Riser was created with the combination of successful privately held companies (Rini Supermarkets, Rego Supermarkets and American Seaway Foods) and the publically held, financially troubled Fisher Foods in June of 1988. Riser noted that much of the pressures and problems associated with last year's merger contributed significantly to the prior year's losses.

Riser reported same-store sales gains of .4 percent during the second quarter of fiscal 1990 and 1.9 percent year-to-date. Riser said that total sales were negatively impacted by the loss of sales attributed to the closing or sale of twelve (12) retail stores between years.

Riser operates 50 supermarkets in Northeastern Ohio under the Rini-Rego Stop-N-Shop and Carl's format, one deep discount store, a wholesale distribution business (American Seaway Foods), an institutional distribution business (Seaway Food Service) and an ice cream manufacturing operation (Eagle Ice Cream).

EVANSVILLE, IN (FEB. 26) BUSINESS WIRE - A Shareholder Rights Plan has been approved by the Old National Bancorp (NASDAQ:OLDB) board of directors.

In approving the plan, the board of directors declared a dividend payable on March 15, 1990, of one Right for each outstanding share of common stock of Old National Bancorp held of record on March 1, 1990.

Each Right entitles the registered holder to purchase from the company 1/100 of a share of preferred stock at an initial price of $60, subject to adjustment.

The mechanism for the plan is a dividend distribution of Rights to Purchase Preferred Stock, which were declared at a recent board meeting. The declaration establishes a plan to discourage unwanted suitors. The Shareholder Rights Plan compels any potential acquiring party to deal directly with Old National Bancorp's board of directors, thereby detering any attempt to acquire the company on terms not approved by the board.

''Old National Bancorp is not presently the target of an unfriendly takeover,'' according to company Chairman Dan W. Mitchell. ''Well over 1,000 American companies have enacted such plans, and our board and

managment feel it is in the best interest of shareholders to have such a plan in place.''

Old National Bancorp is a consistently strong performer and continues to command a comparatively high price for its stock. The company has approximately 11.2 million shares outstanding and more than 5,400 shareholders. Assets as of Dec. 31, 1989, were $2.2 billion.

CONTACT: Old National Bancorp, Evansville

NEW YORK (FEB. 26) BUSINESS WIRE - Following its regularly scheduled board of directors meeting today, American Express Co. announced that it plans to add $750 million of additional equity capital to Shearson Lehman Hutton Holdings Inc. (SLH).

This is in addition to the $250 million of capital which American Express added through the purchase of Shearson Lehman Hutton Holdings Money Market Cumulative Preferred Stock in December 1989. The $750 million would be made available by the purchase of a combination of preferred and common stock. The common stock would be purchased at $11 per share.

In light of unsettled conditions affecting the securities industry, SLH will withdraw its previously announced $250 million rights offering, and American Express will withdraw its previously announced plans to distribute shares of SLH to American Express shareholders.

American Express said that it remains committed to maintaining SLH's position as a premier firm in the securities industry. "The steps taken today," said James D. Robinson III, chairman and chief executive officer, "are designed to underscore our commitment to Shearson Lehman Hutton and our belief in its underlying value.

"The additional $750 million will substantially enhance Shearson Lehman Hutton's balance sheet while Shearson Lehman Hutton and American Express study steps to strengthen Shearson Lehman Hutton's operations."

WASHINGTON (FEB. 26) COMTEX - Cal-Star Financial Services Inc. filed a Form 8-K with the SEC announcing on Feb. 13, 1990 that it determined it is not in compliance with the adjusted net worth requirements of the Federal National Mortgage Association and Federal Home Loan Mortgage Corp. These standards are required in order for Cal-Star to be an approved seller/servicer of FREDDIE MAC and FANNIE MAE.

Cal-Star also reports it has defaulted under four its warehouse credit lines by failing to repay an aggregate of $13.60 million even though the warehouse lenders had released collateral in such amount and that the company and its chief executive officer have each received a federal grand jury subpoena to produce records and documents relating to the operations of the company.

Cal-Star originates conventional mortgage loans and sells the majority of such loans to FANNIE MAE AND FREDDIE MAC.

Cal-Star further states it reported a net loss of approximately $2.2 million for the fiscal year ended Oct. 31, 1989 and believes at Oct. 31, 1989 it had an adjusted negative net worth of approximately $3.4 million.

COEUR D'ALENE, ID (FEB. 26) - Dec. 31, 1989, marked the end of the first quarter of fiscal year 1990 for Mountain West Savings Bank, F.S.B., (NASDAQ: MWSB). The company reported net income for the quarter of $568,291, or 33 cents per share.

The bank reported a loss of $1,306,037, or 79 cents per share for the same period last year, primarily because of a one-time loan loss provision.

Deposits increased from $232.0 million on Dec. 31, 1988, to just over $252.2 million on Dec. 31, 1989. The company reported assets of $324.4 million on Dec. 31, 1989, compared with $317.5 million one year earlier.

CONTACT: Jon Hippler or Ronn Rich of Mountain West Savings Bank, 208-667-2566.

Please note: On February 5, 1990, it was incorrectly reported that Mountain West Savings Bank earned $560,291 in the first quarter. Comtex regrets the error.

WASHINGTON (FEB. 26) COMTEX - The 8-K report filed at the SEC shows on Feb. 17, 1990, Sappho Inc.'s acquisition of United Environmental Corp. was approved by the shareholders of Sappho Inc. Under this acquisition of all of United Environmental's issued and outstanding shares, the shares of Saphho were effected with a 1 for 3 revese stock split.

60 million pre-split shares were issue in connection with the acquisition. Following the acquisition, shareholders elected new board members and changed Sappho's name to United Environmental Corp.

The company now intends to engage in the business of manufacturing and marketing asbestos abatement and removal products.

The executive office of United Environmental Corp., formerly Sappho, is located at 600 Industrial Drive, Cary, IL 600013, and its telephone number is (708) 516-3500.

WASHINGTON (FEB. 26) COMTEX - The 8-K report filed at the SEC shows on Feb. 20, 1989, Equity Growth Co. dismissed the services of its prior independent public accountants and engaged the services of the firm of Scutillo & Bauza in their stead.

For the previous two years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

Scutillo & Bauza had previously assisted Equity's former public accountants with Equity's financial statements, and performed the accounting work for

Equity's acquisition of Majestic ScrewBolt Inc. in 1989.

#90057c0123 02/26/1990 ~Comtex

WASHINGTON (FEB. 26) COMTEX - The 8-K report filed at the SEC shows on Jan. 23, 1989, La Teko Resources Ltd. announced the discovery of "Porphyry Type" gold deposits in its Ryan Lode Mine that are analogous to those found in the Fort Knox lode.

Through exploration on the part of St. Joe Minerals under Richard Walters, gold ore samples in concentrations varying from 0.104 to 0.501 ounces per ton were found in a mineralized shear zone at least 160 feet wide that was sampled in the mine site.

These discoveries, the company stated, should lead to significant increases in heap leachable gold reserves.

The executive office of La Teko Resources is located at 3184 Four Bentall Centre, 1055 Dunsmuir Street, P.O. Box 49301, Vancouver, B.C., Canada V7X1L3.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 1

GROUP LED BY AMC ENTERTAINMENT INC OF KANSAS CITY, MO OWNS 6,844,432

SHARES (30.50%) OF TPI ENTERPRISES INC (TICKER: TPIE) OF NJ.

ANNOUNCEMENT:

On Jan. 9, 1990, TPI and AMC agreed to postpone the second closing in connection with TPI's purchase of 90 AMC theaters until May 23, 1990.

This closing will cover TPI's acquisition of the remaining leasehold interests and other assets related to the remaining theaters subject to the original purchase agreement.

AMC and American Multi-Cinema Inc. are considering alternatives which may lead to an increase in AMC's leasehold interests in the 55 theaters already sold at the initial closing.

In addition, AMC and American Multi-Cinema are considering plans that may result in a change in American Multi-Cinema's beneficial ownership of company shares.

PURPOSE:

Purchase agreement.

WASHINGTON (FEB. 26) COMTEX - The registration statement filed at the NASD shows Atwood Oceanics Inc. proposed to offer 2.4 million shares within the U.S. and 600,000 shares outside the U.S., or a total public offering of 3.0 million shares.

On Feb. 20, 1990, the closing price of the common stock of Atwood Oceanics on the NASDAQ exchange was $20.25 per share.

Atwood Oceanics is engaged in contract drilling of exploratory and development oil and gas wells. Principal international operations are in Australia, India and Southeast Asia, accounting for 85% of 1989 fiscal revenues.

Proceeds from the proposed public offering will go to finance general corporate operations, including expanding and modernizing rigs in Atwood's drilling fleet and capitalizing Atwood's recent acquisition of interests in three semisubmersible rigs.

The shares are being offered through the underwriters of Merrill Lynch Capital Markets, and are subject to prior sale.

The executive office of Atwood Oceanics is located at 15835 Park Ten Place Drive, Houston, TX 77084, and its telephone number is (713) 492-2929.

WASHINGTON (FEB. 26) COMTEX - The registration statement filed at the NASD shows Syntellect Inc. is proposing to offer 1.25 million common shares with an additional 80,000 shares being offered by a selling shareholder.

The initial public offering price is estimated to range between $11.50 and $13.00 per share.

Underwriters for the proposed initial public offerings are Alex. Brown & Sons Inc. and Hambrecht & Quist Inc.

Syntellect develops, supports and markets a family of interactive voice responce systems worldwide.

The proposed initial public offering is intended to increase Syntellect's

working capital and equity base and to provide a public market for Syntellect's common stock.

The executive office of Syntellect Inc. is located at 15810 North 28th Ave., Phoenix, AZ 85023, and its telephone number is (602) 789-2800.

#90057c0170 02/26/1990 ~Comtex

WASHINGTON (FEB. 26) COMTEX - The registration statement filed at the NASD shows American LBO Fund I Inc. proposed an initial public offering of 250,000 units at a price of $10.00 per unit.

Each unit is to consist of ten shares of common stock.

Included in the offering is the sale of 500 convertible subordinate debentures and 1 million shares of common stock, issuable upon conversion of the debentures, in accordance with the terms of a debenture purchase agreement with American Merchant Financial Inc., American LBO Fund's parent company.

This initial sale is to be underwritten by A.T. Brod & Co. Inc.

American LBO Fund intends to acquire existing businesses which are engaged in the manufacturing or distribution industries.

The company's executive office is located at 1777 South Harrison Street, Suite 1110, Denver, CO 80210 and its telephone number is (303) 758-4344.

#90057c0176 02/26/1990 ~Comtex

WASHINGTON (FEB. 26) COMTEX - The Securities and Exchange Commission today took a step which will give mutual funds more latitude in purchasing securities of foreign banks and insurance companies and their subsidiaries.

In a unanimous 3-0 decision, SEC commissioners voted to adopt a rule allowing U.S. investment companies, of which mutual funds are the most common type, to purchase the securities of foreign banks and foreign insurance companies without any restrictions.

Mutual funds, which are organizations that invest the money of its shareholders in a diversified group of securities of other corporations, are presently allowed to invest in the securities of U.S. banks and insurance companies because the Investment Act of 1940 excludes those entities from the definition of an investment company.

However, the exclusion from the definition of investment company does not extend to foreign banks and insurance companies. Thus, foreign banks and insurance companies could fall within the definition of an investment company to the extent that they invest and trade in securities otherwise excluded by the Investment Act of 1940.

Since current regulations prohibit mutual funds from acquiring more than 3 percent of the voting stock of another mutual fund, the present laws impose a limit on the number of foreign bank and insurance securities which a mutual fund may acquire.

"This rule today gets rid of the limits on what mutual funds can buy by way of foreign securities," an SEC official said. "We don't believe Congress ever intended foreign banks or insurance firms be seen as a fund to fund investment."

The SEC commissioners also voted to adopt a proposed rule affecting utility companies. The measure directs the SEC to exempt from its review the issue or sale of securities by any public utility that is a subsidiary company of a registered holding company, if the issue and sale are solely for the purpose of financing the business of the public utility company.

LOS ANGELES (FEB. 26) - Former President Ronald Reagan Monday congratulated Nicaraguan voters for electing opposition candidate Violeta Chamorro and advancing democracy in their country.

"The people of Nicaragua and the cause of democracy have won an impressive and important victory today," Mr. Reagan said in a statement released from his office.

"Through a free and fair election, Mrs. Chamorro has succeeded in her campaign to win the confidence and support of her people and she can now begin the task of peaceful reconciliation," he added.

Nicaraguans can now build peace after more than eight years of civil war as the leftist Nicaraguan Sandinista Government battled the U.S.-backed contra rebels who were trying to overthrow the government.

Overthrowing the Sandinistas was one of Mr. Reagan's chief policy aims during his eight-year term and he gave strong support to the contras, who never achieved their goal, but who kept steady pressure on the Sandinistas.

"Now is the time for all parties to put down their weapons and join in a common pursuit of what is in the best interests of the Nicaraguan people," Mr. Reagan said.

"They have suffered through a long and brutal war, but now, at long last, they can look forward to living in peace and freedom," he said.

CAPE TOWN (FEB. 26) - The population register, classifying South Africans by race, is doomed in its present form, Constitutional Development Minister Gerrit Viljoen told parliament Monday.

Mr. Viljoen, who spearheads the government's efforts to get credible black leaders round the negotiating table, said the Population Registration Act would not survive the negotiating process.

Groups would have to gain a new status cut loose from the negative connotations of the past, he said, although he pledged the National Party's support for the protection of group rights, so that minorities had a real say in decision-making which affected them.

Meanwhile in Johannesburg two people were brought to court Monday for falling foul of another of what U.S. Assistant Secretary for African Affairs Herman Cohen has called the four pillars of apartheid, the Group Areas Act.

White property magnate Clive Keppler was accused of letting a non-white, Ismail Mayet, live in a house in the officially whites-only district of Mayfair West. Both men pleaded not guilty and the case was adjourned until March 2.

Housing rights group Actstop told the South African Press Association 17 similar cases were in the pipeline.

#90057d0200 02/26/1990 ~French/German News Agency

BERLIN (FEB. 26) - The East German prosecutor's office has shelved plans to prosecute former communist leader Erich Honecker on charges of embezzling tens of millions of dollars, the official ADN news agency said Monday.

The prosecutor's office had originally suspected Mr. Honecker of diverting 75 million Deutsche marks (44 million dollars) into a bank account to which only he had access. The money was reportedly paid by West Germany for the release of East German political prisoners.

However a communique from the prosecutor Monday said the charges, among counts drawn up for a case of high treason opened against Mr. Honecker on January 29, "no longer correspond to the current state of investigations."

Since then, it had been discovered that the only people with access to the bank account in question were former secretary of state Alexander Schalk-Golodkowski and his deputy, said the communique published by ADN.

However it was Mr. Honecker who decided what to do with the funds, used among other purposes to even out East Germany's balance of payments.

This power, according to the statement cited by the news agency, was

incompatible with Mr. Honecker's functions as head of state.

West Germany's weekly magazine Der Spiegel reported the embezzlement charges on Saturday. It said the disgraced leader had denied the allegations.

Mr. Honecker, forced out of office by popular pressure last October, has told investigators he allowed some 35,000 East Germans to leave the country each year and dismantled automatic machine guns along the border for "humanitarian" reasons.

Mr. Honecker, who underwent surgery to remove a malignant tumor from his right kidney on January 10, is living in the home of a pastor at Lobetal, north of Berlin, having been released from prison for health reasons.

CAIRO (FEB. 26) - Yugoslav President Janez Drnovsek arrived here for an official visit and held talks Monday night with his Egyptian counterpart Hosni Mubarak, the daily Al Akhbar reported in its Tuesday edition.

Official talks between the Egyptian and Yugoslav leaders and their aides on international relations and economic cooperation are to begin Tuesday morning, sources here said.

The Yugoslav president, quoted in an interview with the Egyptian newspaper Al-Gomhouriya, said he was opposed to halting or limiting the emigration of Soviet Jews to Israel.

"The Soviet Union cannot impose limitations on people's freedom of movement since this freedom is a fundamental human right," he said. "We must therefore seek another solution."

But Yugoslav Foreign Minister Budimir Loncar said late Monday that Belgrade opposed the settling of Soviet Jews in the Israeli-occupied territories.

"Soviet Jews have the right to emigrate to the country of their choice, but their settlement in the occupied Arab territories is unacceptable," he told reporters after a meeting with Egypt's Foreign Minister Esmat Abdel Meguid.

Arab countries have voiced fears that Soviet Jews would be settled in the occupied West Bank and Gaza Strip, where the Palestinian residents have staged an uprising since December 1987.

Mr. Drnovsek is here at the invitation of Mr. Mubarak, who has visited Yugoslavia six times since 1981.

SAN SALVADOR (FEB. 26) - El Salvador's military and ruling party leaders hailed the victory Violeta Chamorro over Sandinista President Daniel Ortega in Sunday's elections in neighboring Nicaragua.

The commander of the Third Infantry Brigade of San Miguel, Colonel Mauricio Vargas, said Monday that Mrs. Chamorro's win foreshadowed the end of the Farabundo Marti National Liberation Front's (FMLN) 10-year insurgency in El Salvador.

"I see peace closer to our country ... the triumph of Dona Violeta brings stability to Central America," Col. Vargas said.

The United National Opposition (UNO) victory in Nicaragua will produce "a protective harmony in the Central American region, where we will have no more confrontation," he said.

El Salvador has accused the Sandinistas of supplying the FMLN with arms and equipment in their war against the government, which has cost 70,000 lives.

"We can say with assurance that peace will be found to be drawing closer as Nicaragua's ideology and political system changes, which will affect the protection the FMLN has had from Nicaragua," Col. Vargas said.

"Today the FMLN will have to give concrete proof it wants to incorporate its cause to democracy, because the situation implies that there will be a diminution of support from the point of view of arms, materiel and equipment," he said.

The governing rightist Nationalist Republican Alliance (ARENA) said Mrs. Chamorro's victory signaled the beginning of a new era in Central American politics.

ARENA president and mayor of San Salvador Armando Calderon Sol called the triumph of Mrs. Chamorro "a transcendental and historic step."

The defeat of the Sandinistas provided "a historical moment for consideration by Salvadorans," because "today is when the democratic process ought to open political doors for the integration of the rebels and social harmony."

#90057d0470 02/26/1990 ~French/German News Agency
EAST BERLIN (FEB. 26) - A civic committee in East Germany which oversees the dissolution of the former state secret service says it is faced with

mountains of documents which, if laid out in a line, would stretch out 100 kilometers.

The 90-member committee formed January 15 told a public conference in East Berlin Monday it has so far only studied ''4 kilometers'' of dossiers, according to the official East German Adn news agency.

The former secret police noted, for example, how suspected individuals voted in elections and even their sexual preferences, the committee said.

The dossiers are kept under lock and key until a democratic government has decided after the March 18 elections how to destroy them.

The only authorities which are now granted access to the papers are the public prosecutor and the courts in the course of current investigations, committee members said.

#90057d6660 02/26/1990 ~French/German News Agency

Manama (FEB. 26) - Iraq has urged Saudi Arabia and Kuwait to target higher crude oil prices than the 18 dollar per barrel minimum reference price, currently embodied in the Organisation of Petroleum Exporting Countries (Opec) agreement of November last year.

This was the main thrust of a message sent by Iraqi President Saddam Hussein to King Fahd of Saudi Arabia on February 17 and to Kuwaiti ruler Sheikh Jaber al-Ahmad as-Sabah on February 20, the Cyprus-based Middle East Economic Survey (Mees) reported Monday.

The weekly said the Iraqi messages ''conveyed the suggestion that nominal prices should be allowed to rise gradually, at least to reflect inflation and preserve the Opec 18 dollar per barrel in real terms, if not to show some improvement in real dollars.''

President Hussein implied that Gulf producers should observe ''the necessary production restraint'' to permit this to happen, Mees added. Iraq was worried about a possible price deterioration in the second quarter of this year due to Opec overproduction.

Big oil producers like Saudi Arabia and Kuwait with spare output capacity should not ignore the interests of other Opec members such as Algeria, which lacks the capacity to expand output but badly needs higher oil prices to sustain economic development, Hussein argued.

The average spot price of the Opec basket of seven crudes rose from 18.84 dollars per barrel last December to 19.99 Dollars per barrel in January. The average price in 1989 was 17.31 dollars per barrel.

#90057d6690 02/26/1990 ~French/German News Agency
TOKYO (FEB. 26) - Japanese tyremaker Bridgestone Corp. said Monday its net profit rose 13 percent from a year earlier to 40.7 billion yen (283 million dollars) in the year to December.

Sales climbed 12 percent to 699 billion yen (4.85 billion dollars) in the same period because of growing demand both at home and abroad along with the dollar's apppreciation against the yen, the company said.

Exports jumped 30 percent to 223 billion yen (1.55 billion dollars), reflecting an expanded retail network in North America and strong replacement demand in Europe and the Middle East. Domestic sales rose six percent to 476 billion yen (3.3 billion dollars), it said.

Bridgestone said its tyre sales grew 12 percent to 546 billion yen (3.79 billion dollars) while sales of other products climbed 16 percent to 153 billion yen (1.06 billion dollars).

The company forecast a 16 percent increase in net profit to 47 billion yen (326 million dollars)) in the current year. Sales are expected to rise two per cent to 715 billion yen (4.96 billion dollars) in the same period.

ARNHEM, Netherlands (FEB. 26) - The Dutch Akzo chemicals group achieved an increase of 13 percent in net profits to 954 million guilder (954 million dollars) in 1989 compared with 843 million guilder in 1988, the company reported on Monday.

Sales throughout the world rose by 13 percent to 18.7 billion guilder compared with 16.6 billion guilder in 1988.

Operating profits rose by 20 percent during the year to 1.7 billion guilder or 9.1 percent of sales, compared with 1.4 billion guilder in 1988 representing 8.6 percent of sales.

Akzo is the 12 biggest chemicals group in the world.

ABU DHABI (FEB. 26) - The United Arab Emirates (UAE) expects oil revenue for 1989 to increase by 60 percent compared to the previous year, Al-Khaleej newspaper reported Monday.

Economy and Trade Minister Saif Ali al-Jarwan also told the daily that the revenue would rise to between 10.6 and 12 billion dollars because of last year's increase in world prices to around 17 dollars per barrel.

The minister gave no figures for 1988 when prices were around 14 dollars per barrel, but oil sources have estimated the Gulf state's oil export revenue at 7.35 billion dollars that year.

The UAE is seeking a new OPEC accord on quotas that will reflect its true production capacity, the crown prince of Abu Dhabi, Sheikh Khalifa bin Zayed,
said in an interview published Monday in the Kuwaiti daily As-Seyassa.

The Emirates "had been victimized by all the earlier accords of the Organisation of Petroleum Exporting Countries," he said.

The UAE rejected a quota of 1.5 million barrels a day offered it by OPEC last November and vowed to produce as much as it wanted. Oil analysts have said the Emirates produced 2.35 million barrels a day in December.

MOSCOW (FEB. 26) - The Soviet Union is reducing exports of crude oil to Czechoslovakia by 20 percent over the first three months of the year because of internal problems, Soviet television reported here Monday.

The Soviet Union is required by treaty to supply 16.6 million tonnes of crude per year to Czechoslovakia and will presumably have to make up the 896,000 tons shortfall later in the year.

The announcement was made shortly after Czechoslovak President Gustav Havel arrived here on a two-day official visit during which he will have talks on economic cooperation with the Soviet Union.

Moscow had earlier announced similar reductions in oil supplies to most other east-bloc countries for the first three months of this year.

MANILA (FEB. 26) - Taiwan investors will pour in an additional 45 million dollars to build a plastics plant in addition to a 370 million dollar petrochemical complex in the Philippines, an official said here Monday.

Trade and Industry Secretary Jose Concepcion told a news conference that the Luzon Petrochemical Corp., 70 percent owned by USI Far East of Taiwan

and the rest by Filipinos, would start operating between June 1992 and January 1993.

"There are no more remaining obstacles," he said.

The project had been delayed by a dispute between officials from the provinces of Bataan, the original planned site west of Manila, and Batangas, south of the capital.

The petrochemical plant will have an annual production capacity of 230,000 tons of ethylene and propylene, which are used for plastics manufacturing. The plant's output will be for export and domestic use.

Taiwan investors have also decided to establish a plastics film plant that will use part of the petrochemical firm's output, and will invest 45 million dollars into it, Mr. Concepcion said.

He said the Filipino equity in the petrochemical project will be expanded five years after the start of operation.

The Philippine constitution limits foreign ownership to 40 percent of local companies, except for high-cost pioneer industries like petrochemicals.

JAKARTA (FEB. 26) - Indonesia announced Monday that it would reopen a multi-million dollar tender to expand its telephone network after all five major foreign bidders remaining were disqualified.

State Secretary Murdiono said President Suharto had decided that the five bidders all failed to meet the financial terms set by the government for the installation of the country's second telephone digital system.

"President Suharto has decided to reopen the tenders for limited applicants and this will be conducted as soon as possible," Mr. Murdiono said after a meeting between the two men.

He declined to give the names or number of firms who would be allowed to bid, but said an announcement would be made soon.

The 300 million dollar contract, which includes supplying 350,000 new phone lines across the country, had been the subject of stiff competition among the bidders, with several getting the support of their governments.

Industry sources said the deal's worth could eventually climb to two billion dollars, including repeat orders and supplying spare parts.

U.S. President George Bush wrote to President Suharto in February alleging pressure from the Japanese government, Indonesia's main aid donor, and demanding that a unit of American Telephone and Telegraph (ATT) be given the opportunity to win the tender.

The government has previously said that ATT and NEC Corp. of Japan had been shortlisted from the five bidders, out of an original 40, for a final decision by President Suharto.

The three disqualified earlier were Fujitsu of Japan, a Dutch subsidiary of French Alcatel and an Australian unit of Sweden's Ericcson.

Mr. Murdiono said not a single bidder met the terms for the loan package set by the government: a minimum repayment period of 25 years, a grace period of seven years and a maximum interest rate of 3.5 percent a year.

BELGRADE (FEB. 26) - Yugoslavian car maker Zastava has resumed exports to the United States afer a one-year gap, the Tanjug news agency said Monday.

A consignment of 400 Yugo-GV Plus and 100 Cabriolet models are to leave for the United States on March 15.

They will be sold on the U.S. market by Yugo-America, a venture involving Zastava of Kragujevac in eastern Yugoslavia and Belgrade firm Genex set up after Zastava's former distributor went bankrupt early last year.

Some 12,000 Yugo-GV's have been sold in the United States since 1985 when Yugoslavia signed what it saw as the deal of the century under the auspices of former U.S. Secretary of State Henry Kissinger and former U.S. ambassador to Yugoslavia Lawrence Eagleburger, who is currently on a visit to Belgrade.

MOSCOW (FEB. 26) - Well over half a million people took part in more than 300 meetings and demonstrations on Sunday in the Russian federation and the republics of Ukraine and Belorussia, according to official sources.

In the Russian federation not including Moscow, a total of 300,000 people took part in 177 demonstrations organized by pro-reform groups, the Radio Moscow bulletin Interfax reported Monday, citing interior ministry sources.

The largest rallies were at Saratov (30,000 people), Gorky (20,000) and Sverdlovsk (13,000). At Leningrad, despite the cancellation of the rally by the organizers, 7,000 people persisted in demonstrating, Interfax said.

In Moscow, according to Soviet television late Sunday, 80,000 people turned out to demand a more rapid pace of reform.

In the Ukraine, 299,000 people attended 126 meetings, while in Belorussia, 51,000 demonstrators took part in 16 meetings, interior ministry figures said.

Meanwhile the Popular Front in Belorussia has called for legal action against Communist politburo member Nikolai Slyunkov whom it accuses of concealing the true dimensions of the nuclear catastrophe at Chernobyl in 1986, Interfax said Monday.

At a rally in Minsk attended by 100,000 people, the pro-reform movement read out a motion criticizing Mr. Slyunkov, a former first secretary in the republic. The motion, which also demanded more financial aid to overcome the consequences of the disaster, was approved by the rally on a show of hands.

Speeches by Popular Front spokespeople were broadcast on television at the demand of the townspeople, Interfax reported.

Belorussia lay under the path of a cloud of radio-active fallout released when a nuclear reactor exploded at Chernobyl, in the Ukraine, in April 1986.

AMSTERDAM (FEB. 26) - Dutch bank NMB-Postbank said Monday it had set up a 50-50 joint venture with Warsaw-based bank Handlowy Warszawie SA, Poland's leading bank involved in foreign trade.

The new venture, which is to begin operations Tuesday, will offer financial advice and services, essentially to Polish companies looking for international cooperation and foreign firms seeking to set up in Poland.

It will also offer services to Polish government institutions and international organisations operating in Poland, NMB-Postbank said in a statement.

The Handlowy bank employs some 1,700 people.

NMB-Postbank was created in October with the merger of private bank NMB and former Dutch postal bank Postbank.

The state holds a 23.6 percent stake in NMB-Postbank which has 43 subsidiaries in 26 countries and is among Europe's top 25 banks.

BRUSSELS (FEB. 26) - The European Economic Community on Monday expressed regret that the EEC remained on a possible hit-list for U.S. trade sanctions because of alleged barriers to its telecommunications market.

The United States gave the EEC and South Korea "priority" status in February 1989 for urgent talks aimed at removing the obstacles.

U.S. Trade Representative Carla Hills said on Friday that the negotiations would be extended for a year because there had been progress towards solving the dispute. The talks can be extended for an additional year before Mrs. Hills is obliged to authorise retaliation.

In a reaction Monday, the EEC's executive Commission reminded Washington that the Community had embarked on "a major liberalisation exercise" in telecommunications under its 1993 project.

With the chief exception of Britain, telecommunications are a closed, state-dominated market throughout the EEC.

The Community has made "substantial progress in this regard in 1989, which will bring benefits to the world trading system, including U.S. companies " the statement said.

"The Commission fails therefore to understand what purpose is served by continuing to put the Community on the priority list," it added.

The Commission added that the liberalisation of telecommunications was already being addressed in multilateral negotiations in the General Agreement on Tariffs and Trade (GATT). The negotiations, in the so-called Uruguay Round of talks, are scheduled to end in Brussels in December.

The EEC executive contended that European telecommunications firms experienced their own obstacles to trade when they sought to export to the United States.

This contributed to a deficit with the United States in this sector of 418 million dollars in 1988, compared with 326 million the previous year, Commission officials said.

#90057d8470 02/26/1990 ~French/German News Agency

HELSINKI (FEB. 26) - The Finnish businessmen's federation said Monday it is to hold an emergency meeting Friday on the effects of a bank strike which has already led to the laying off of hundreds of workers.

The decision came after the bank employees' union on Sunday rejected a conciliation offer from a mediator aimed at ending a three-week-old dispute which has closed most of the country's banks.

The businessmen's federation said that small companies had been forced to lay off hundreds of of workers and many companies were facing bankrupcty as a result of the conflict.

The forwarders' federation has already stopped part of its customs handling operations due to the strike and lockout which began on February 1, as small importers are unable to pay their customs duties.

The 38,000-member bank employees' union is asking for a 10 per cent pay rise and more days off.

On Sunday it rejected a mediation offer that would have lifted salaries in three stages this year by a total of 7.2 percent.

Heikki Ropponen, the chief of the bank employers' association, said on Monday that he expected the strike to continue for at least another two weeks.

The dispute has not totally closed down the financial system, as the state-run postal savings bank Postipankki, whose workers have a different pay deal that other bank employees, has remained open and employers have

been paying workers in cash instead of bank transfers.

But the dispute is causing increasing problems for foreign trade and business.

Departments stores say their sales have gone down, and police announced that house-breaking and burglary had increased markedly.

As many safes have been broken into in the past three weeks as in the whole of last year.

PARIS (FEB. 26) - French engineering group Technip said Monday it had signed a contract to complete and put into operation the Bandar Khomeini petrochemical complex in Iran.

Bandar Imam Petrochemicals had awarded Technip a management contract for the complex on the Gulf, the French firm said in a statement. It did not give the value of the deal.

Technip would manage the project and be responsible for the coordination, control and supervision of all its activities.

Iranian Oil Minister Gholamreza Aghazadeh had said earlier this month that the contract for completing the complex would go to French and South Korean firms.

The contract for the Bandar Khomeini petrochemicals complex was originally awarded to a consortium led by Mitsui of Japan more than a decade ago, but the project was suspended in 1984 because of the Iran-Iraq war.

Teheran said that at that time it was more than 80 per cent complete.

After Iran and Iraq reached a ceasefire agreement in August 1988, Mitsui decided to pull out of the deal, saying that the project had already cost more than four billion dollars and a further three billion would be needed to complete it.

As a result of lengthy negotiations, Mitsui paid Iran some 890 million dollars in damages, Teheran has said.

#90057d8670 02/26/1990 ~French/German News Agency

BUCHAREST, Feb 26 (AFP) - The Romanian government hopes that foreign companies will be allowed to hold a majority stake in joint ventures, Deputy Foreign Trade Minister Ion Aurel said here Monday.

The current government has not ruled out making exceptions to a 1971 law limiting foreigners to holding 49 percent of capital in Romanian

enterprises, if what the foreign companies have to offer respond to the basic needs of the Romanian economy, Mr. Aurel told a press conference.

Mr. Aurel also released what he said were true figures showing the level of food consumption in Romania last year. The new government has accused the administration of executed dicatator Nicolae Ceausescu of systematically falsifying economic statistics.

Average per capita meat consumption in Romania last year was 25 kilograms (55 pounds), compared to a world average of 90 to 120 kilos (200 to 245 pounds), Mr. Aurel said.

Vegetable consumption was 80 kilograms (175 pounds) against average world consumption of 160 to 200 kilograms (350 to 440 pounds).

The Ceausescu administration's determination to repay all of Romania's foreign debt meant that the bulk of the country's food production was exported, leading to shortages at home.

Romania's western imports grew 10 percent in January over the same month last year and the government is planning to spend 200 million dollars in the first three months of this year on supplying the population with basic necessities, Mr. Aurel said.

Exports to other Eastern European countries fell 57.5 percent over the January 1988 level last month, while exports to western countries were down 59 percent.

Mr. Aurel said that fundamental changes to the economy would have to wait for a vote on a new constitution and new laws following general elections in May, and until then "we are in a transition period."

The current government could not immediately change Article Eight of the constitution, which guarantees a state monopoly on foreign trade, he added but had introduced other liberalisation measures and Romania's decision to move towards a market economy is irreversible, he stressed.

Debt-free Romania is now considering several loan offers and will decide according to who is offering the most advantageous terms, Mr. Aurel said.

#90057d8960 02/26/1990 ~French/German News Agency

PARIS (FEB. 26) - French economic daily Temps de la Finance is to suspend publication Tuesday only five months after its launch after two minority shareholders abruptly pulled out, the publishers said Monday.

NCM Communication said that the decision by GAN and Banque de Gestion Privee to pull out had destabilised "an already tense financial situation."

Temps de la Finance was short of 9.7 million francs (1.6 million dollars) to meet financing needs, NCM said, and operating losses had totalled 141,600 francs (24,840 dollars) per issue in the past two weeks.

The daily will be replaced by a supplement to the Business Bourse weekly, also published by NCM, beginning with the issue dated Saturday.

The Temps de la Finance had a paid circulation of 14,000 but was also issuing tens of thousands of free copies.

A group of Lyons lawyers in January went to court to protest that they were being deluged with NCM newspapers which they had not asked for.

The British newspaper the Financial Times had also won a court case preventing NCM using the title Temps de la Finance, (Financial Times in French), although the French paper had said it would appeal.

LA JOLLA, California (FEB. 26) - IDEC Pharmaceuticals Corp., of California, and the Tokyo-based Institute of Immunology Co. Ltd. have formed what they say "is believed to be the first major collaboration between privately-held biotechnology companies in the U.S. and Japan."

At the same time, IDEC said it was establishing a new wholly-owned subsidiary, IDEC Seiyaku, to be based in Tokyo.

Michio Nishida, 39, previously manager of the research and development division of NKK Corporation, has been appointed representative director of IDEC Seiyaku.

Under its agreement with the Institute of Immunology, IDEC said it would receive up to 23 million dollars over a two-year period.

"In return," said IDEC, "the Institute of Immunology will receive rights in Japan and certain Asian countries to develop selected IDEC products - specifically, therapeutic and diagnostic products for B-cell lymphoma, and diagnostic products for autoimmune diseases."

The Institute of Immunology will also receive shares of IDEC's preferred stock, representing about 20 percent of the U.S. company's outstanding voting shares.

#90057d9220 02/26/1990 ~French/German News Agency
WASHINGTON (FEB. 26) - The United States Monday welcomed the holding of multi-party elections in Lithuania, but avoided direct comment on the sharp defeat suffered by Mikhail Gorbachev's Communist Party in the polls.

"We welcome the advent of multi-party elections in the Baltic states," said State Department spokeswoman Margaret Tutwiler of the weekend vote, the first free multi-party elections in the Soviet Union in seven decades.

She said the results of the voting for the Lithuanian legislature indicated a "clear victory for the pro-democratic" candidates supported by the Lithuanian independence movement, Sajudis, and "reform-minded members" of the Lithuanian Communist Party, which earlier declared its independence from Moscow.

In the polling Saturday, the Moscow-based Communist Party of President Gorbachev won only seven of the 90 seats decided in the Lithuanian Parliament, with Sajudis candidates taking 72 races and 22 going to independent Communists.

The vote was seen as a clear mandate for pressing ahead to independence from the Soviet Union.

The United States has handled the issue of independence for the Baltic states gingerly, supporting the goal in principle but avoiding direct statements of support which could be seen as undermining Mr. Gorbachev.

In her carefully worded statement Monday, Miss Tutwiler said simply: "We are of course very pleased to see that the campaign and the voting were carried out in an atmosphere of openness and tranquility.

"The results of the Lithuanian people's views speak eloquently for themselves."

#90057d9690 02/26/1990 ~French/German News Agency

ATLANTA, Georgia (FEB 26) - Former presidents Jimmy Carter of the United States and Julius Nyerere of Tanzania called Monday on Ethiopia and rebels in Eritrea to halt their latest outbreak of fighting before it leads to mass starvation.

The two former leaders, who have been accepted as mediators by both sides in efforts to end the 28-year-old Eritrean conflict, demanded an immediate cease-fire so that relief efforts to famine areas in northern Ethiopia could resume.

The renewed fighting "not only calls into question the genuiness of the intention to seek a solution to the dispute by peaceful means, it also adds further suffering and insecurity to the lives of millions of people," they said in a letter to the two warring parties released by the Carter Center here.

Under Mr. Carter's mediation, the Ethiopian Government and the Eritrean People's Liberation Front (EPLF) agreed last year to a cease-fire and negotiations on resolving Eritrean demands for independence. Mr. Nyerere was later chosen to co-chair the peace talks.

But the efforts were interrupted when the EPLF launched a major offensive on February 8 focused on the main port city of Massawa.

The fighting has hampered deliveries of emergency relief to an estimated five million people threatened with starvation due to crop failures in Eritrea and neighboring Tigre province. Both sides have accused the other of using famine as a weapon in their war efforts.

"We appeal to the leaders of the EPLF and the (Ethiopian Government) to

recognize that famine and mass starvation can be of political assistance to neither side in the dispute," Mr. Carter and Mr. Nyerere wrote in their appeal.

"Deliberately aggravating these disasters by an escalation of the military conflict around the relief pipeline, and thus preventing essential and rgent relief supplies from reaching the endangered people is a crime against the hunger victims," they said.

They called on both sides to resume negotiations.

KUWAIT, FEBRUARY 26 (XINHUA) -- JORDANIAN KING HUSSEIN ARRIVED HERE TODAY ON A BRIEF WORKING VISIT THE FIRST LEG OF HIS GULF TOUR AIMED AT MUSTERING SUPPORT AGAINST THE EXPECTED INFLUX OF SOVIET JEWS INTO ISRAEL.

KING HUSSEIN, WHO WILL ALSO VISIT BAHRAIN, QATAR AND THE UNITED ARAB

EMIRATES, WILL ALSO BRIEF THE GULF LEADERS ON THE OUTCOME OF THE JUST-CONCLUDED FOURTH SUMMIT OF THE ARAB COOPERATION COUNCIL (ACC) WHICH GROUPS JORDAN, EGYPT, IRAQ AND ARAB YEMEN.

THE MONARCH WAS EXPECTED TO PRESS FOR CONVENING AN EMERGENCY ARAB SUMMIT TO TAKE CONCRETE STEPS TO CONFRONT THE FLOOD OF SOVIET JEWS INTO ISRAEL.

ISRAELI OFFICIALS PREDICTED THAT 300,000 SOVIET JEWS WILL ARRIVE IN ISRAEL OVER THE NEXT THREE YEARS, AND MANY OF THEM WILL BE SETTLED IN THE OCCUPIED WEST BANK AND GAZA STRIP.

THE JEWISH IMMIGRATION HAS ALARMED MANY ARAB COUNTRIES, AND SOME OF THEM HAVE CALLED FOR AN EMERGENCY ARAB SUMMIT TO DEAL WITH THE INFLUX.

KING HUSSEIN WAS WELCOME AT THE AIRPORT BY THE KUWAITI AMIR SHEIK JABER AL AHMED AL-SABAH, AND THEY IMMEDIATELY HELD TALKS.

AS THE KING ARRIVED, THE AMIR RECEIVED A MESSAGE FROM LIBYAN LEADER COL. MOAMMER GADDAFI, WHO "WARNED AGAINST THE DANGERS OF THE INFLUX OF THE SOVIET JEWS ON THE FUTURE OF THE PALESTINIAN PEOPLE AND THEIR NATIONAL RIGHTS," REPORTS QUOTED KUWAITI FOREIGN MINISTER SHEIK SABAH AL-AHMED AL-JABAH AS SAYING.

KING HUSSEIN, ACCOMPANIED BY PRIME MINISTER MODAR BADRAN AND FOREIGN MINISTER MARWAN AL-QASEM, WILL PROBABLY SEEK MORE ECONOMIC AID FROM THE GULF COUNTRIES DURING THE TOUR.

JORDAN HAS DEPENDED ON GRANTS FROM GULF STATES TO HELP IT OVERCOME A CHRONIC BUDGET DEFICIT.

HUNDREDS OF THOUSANDS OF JORDANIANS ALSO WORK IN THE GULF COUNTRIES, ESPECIALLY KUWAIT. THEIR REMITTANCES CONSTITUTE A MAJOR ECONOMIC PILLAR IN JORDAN.

#90057h0151 02/26/1990 ~Chinese News Agency

UNITED NATIONS (FEB. 26) XINHUA - CHINA WILL LAUNCH FIVE SATELLITES IN 1990, INCLUDING A MULTINATIONAL-OWNED COMMUNICATION SATELLITE "ASIA-1" AND WILL ALSO CARRY OUT THE FIRST EXPERIMENTAL LAUNCH OF "LONG MARCH-2E" ROCKET, A NEW VEHICLE WITH FOUR LIQUID FUEL BOOSTERS ABLE TO BOOST 8,000 KG TO LOW EARTH ORBIT.

ANNOUNCING THE LAUNCH FOR THE FIRST TIME AT THE U.N. COMMITTEE ON THE PEACEFUL USE OF OUTER SPACE (UNCOPUOS) TODAY, CHINESE DELEGATE LIU ZHAODONG SAID 1990 WILL BE A BUSIER YEAR FOR CHINA'S SATELLITE LAUNCHING ACTIVITIES.

ON FEBRUARY 4, CHINA ALREADY SUCCESSFULLY LAUNCHED ITS 5TH OPERATIONAL COMMUNICATION SATELLITE BY A "LONG MARCH 3" ROCKET, A 3-STAGE VEHICLE CAPABLE OF DELIVERING ABOUT 1300 KG TO A GEOSYNCHRONOUS TRANSFER ORBIT. HE SAID THAT IN THE FIRST HALF OF THIS YEAR, CHINA WILL LAUNCH ANOTHER COMMUNICATION SATELLITE "ASIA-1" BY THE USE OF THE SAME TYPE OF VEHICLE. THIS WILL BE THE FIRST TIME FOR CHINA TO LAUNCH A FOREIGN SATELLITE.

THREE OTHER SATELLITES, INCLUDING ONE RECOVERABLE REMOTE SENSING SATELLITE AND ONE SOLAR SYNCHRONOUS ORBIT WEATHER SATELLITE, WILL BE LAUNCHED IN THE SECOND HALF OF THE YEAR, HE ADDED.

THE 27TH SESSION OF THE SCIENTIFIC AND TECHNICAL SUB-COMMITTEE OF UNCOPUOS WHICH OPENED HERE THIS MORNING WILL FOCUS DISCUSSIONS ON THE USE OF SPACE TECHNOLOGY IN TERRESTRIAL SEARCH AND RESCUE AND IN DISASTER-RELIEF ACTIVITIES IN THE NEXT TWO WEEKS.

LIU SAID THAT IN ORDER TO FACILITATE DISASTER RELIEF, CHINA CONDUCTED

EXPERIMENTS OF REMOTE SENSISNG APPLICATION TO FLOOD MONITORING IN THE LOWER AND MIDDLE REACHES OF THE YELLOW RIVER AND THE YANGTZE RIVER IN THE LAST THREE YEARS.

CHINA HAS USED REMOTE SENSING IN AN INTEGRATED INVESTIGATION OF FOREST RESOURCE AND ITS ECOLOGIC IMPACT IN THE NORTHWEST, NORTHEAST AND NORTH CHINA REGIONS AND ACHIEVED OBVIOUS SOCIAL AND ECONOMIC BENEFITS.

HE TOLD THE 53-NATION COMMITTEE THAT CHINA HAS ALSO MADE BIG PROGRESS IN THE DEVELOPMENT OF REMOTE SENSORS, SUCH AS INFRARED MULTISPECTRAL SCANNER, SYNTHETIC APERTURE SIDE-LOOKING RADAR, MICROWAVE RADIOMETER AND IMAGING SPECTROMETER.

REFERRING TO THE STRENGTHENING OF INTERNATIONAL COOPERATIN IN THE PEACEFUL USE OF OUTER SPACE TECHNOLOGY, THE CHINESE DELEGATE ANNOUNCED TWO OFFERS OF THE CHINESE GOVERNMENT AS AN EXPRESSION OF CHINA'S ACTIVE SUPPORT FOR THE ACTIVITIES OF THE U.N. OUTER SPACE PROGRAM.

HE SAID CHINA, IN CONJUNCTION WITH THE U.N. OUTER SPACE DIVISION AND OTHER RELATED BODIES, WILL HOST AN INTERNATIONAL WORKSHOP IN BEIJING IN 1991 ON APPLICATION OF SPACE TECHNOLOGY TO COMBATING NATURAL DISASTERS. IT WILL ALSO PROVIDE TWO ONE-YEAR SCHOLARSHIPS ON SATELLITE GEODESY, PHOTOGRAMMETRY, REMOTE SENSING AND CARTOGRAPHY.

TO STRENGTHEN INTERNATIONAL COOPERATION FOR PEACEFUL USES OF OUTER SPACE IS A BASIC POLICY OF CHINA IN DEVELOPING SPACE TECHNOLOGY, HE SAID.

#90057h0154 02/26/1990 ~Chinese News Agency

MAPUTO (FEB. 26) XINHUA - FINANCE MINISTER ABDUL MAGID OSMAN SAID TODAY THAT MOZAMBIQUE'S ECONOMY REMAINS SO VULNERABLE THAT THERE IS NO ALTERNATIVE BUT TO CONTINUE WITH THE ECONOMIC RECOVERY PROGRAM BACKED BY THE WORLD BANK AND THE INTERNATIONAL MONETARY FUND (IMF).

OPENING A SEMINAR ON THE IMPLEMENTATION OF FISCAL POLICIES IN MOZAMBIQUE, MR. OSMAN ADMITTED THAT THE PROGRAM IS "FAR FROM BENEFITING THE POOREST STRATA OF THE SOCIETY" BUT WARNED THAT ABANDONING THE PROGRAM WOULD LEAD THE COUNTRY INTO CHAOS.

HE HINTED THAT THE PEOPLE ARE UNHAPPY ABOUT A SUBSTANTIAL INCREASE IN THE COST OF LIVING UNDER THE PROGRAM, SAYING THE GOVERNMENT IS AWARE OF THE SACRIFICES THE MOZAMBICANS HAVE TO MAKE.

"BUT WE SHOULD ALSO BE CLEARLY AWARE THAT AN IMPROVEMENT IN THE LIVING CONDITIONS IS POSSIBLE ONLY WHEN THERE IS AN INCREASE IN THE LEVEL OF ECONOMIC GROWTH," HE NOTED.

ACCORDING TO THE MINISTER, THE SOUTHERN AFRICAN COUNTRY'S ACTUAL FOREIGN DEBT CURRENTLY AMOUNTS TO 4.2 BILLION U.S. DOLLARS, WHICH REQUIRES AN ANNUAL DEBT SERVICE PAYMENTS OF 350 MILLION U.S. DOLLARS -- ABOUT THREE TIMES THE TOTAL FOREIGN EXCHANGE EARNED BY THE COUNTRY'S COMMODITY EXPORTS.

IN 1989, HE SAID, THE COUNTRY'S EXPORTS STOOD AT AROUND 100 MILLION U.S. DOLLARS WHILE ITS IMPORT NEEDS WERE CALCULATED AT AROUND 875 MILLION U.S. DOLLARS.

THE CURRENT AND INVESTMENT BUDGETS THEMSELVES DEPEND ON FOREIGN AID FOR THEIR IMPLEMENTATION, SAID MR. OSMAN, ADDING THAT THIS YEAR THEY REQUIRE 775,000 MILLION METICAIS (843 METICAIS EQUAL ONE U.S. DOLLAR AT THE CURRENT EXCHANGE RATE) WHILE ONLY 280,000 MILLION METICAIS WILL BE AVAILABLE FROM INTERNAL STATE INCOME.

HE CLAIMED THAT THE RECOVERY PROGRAM HAS RESULTED IN AN AVERAGE ECONOMIC GROWTH OF 4.5 PERCENT IN THE PAST THREE YEARS, REVERSING THE DECLINE OF THE MID-1980S.

THE MINISTER ANNOUNCED THAT THE GOVERNMENT HAS DECIDED TO CREATE A SUPPLEMENTARY WAGE FOR FAMILIES THAT HAVE MORE THAN FIVE MEMBERS EACH AND PROMISED TO TAKE OTHER MEASURES TO ALLEVIATE THE NEGATIVE EFFECTS CAUSED BY THE INCREASE IN THE COST OF LIVING.

TOKYO (FEB. 26) KYODO - SAPPORO BREWERIES LTD. SAID MONDAY IT WILL RAISE THE PRICE OF A BIG BOTTLE OF BEER BY 20 YEN TO 320 YEN, A MOVE EXPECTED TO BE FOLLOWED BY OTHER MAJOR BEER BREWERS.

THE PRICE HIKE, THE FIRST IN ABOUT SIX AND A HALF YEARS, IS EXPECTED TO BE EFFECTIVE FROM SHIPMENT ON WEDNESDAY, THE COMPANY SAID.

KIRIN BREWERY CO., ASAHI BREWERIES AND SUNTORY LTD. WILL ALSO IMPLEMENT A SIMILAR PRICE HIKE WITHIN MARCH, INDUSTRY SOURCES SAID.

THE HIGHER PRICE OF THE POPULAR BEVERAGE, WHICH HAS MAINLY RESULTED FROM MOUNTING COSTS IN THE TRANSPORTATION SECTOR AMID A LABOR SHORTAGE, IS FEARED BECAUSE IT MAY HAVE A RIPPLE EFFECT ON OTHER DOMESTIC PRICES, THE SOURCES SAID.

THEY ALSO SAID THE PRICE HIKE WILL DRAW STRONG CRITICISM FROM CONSUMERS, AS IT IS PARTLY INTENDED TO OFFSET THE RISING COSTS OF ADVERTISEMENTS AND DEPRECIATION IN THE BREWERY INDUSTRY.

A REPRESENTATIVE AT A NATIONWIDE CONSUMER GROUP SAID, ''SUCH A PRICE HIKE CANNOT BE ACCEPTED AS LONG AS THE RUNAWAY COSTS FOR ADVERTISEMENTS ARE

LEFT AS THEY ARE.''

PHOENIX, AZ (FEB. 24) PR NEWSWIRE - The presidents of 19 local unions, representing 9,000 employees of Greyhound Lines, Inc., today called on Greyhound management to make a good faith effort to negotiate the terms of a new employment contract. The current contract expires on March 2, 1990.

Edward M. Strait, president of the Amalgamated Council of Greyhound Local Unions, stated, "The leadership of this union is ready, willing and able to continue good faith negotiations in order to reach a contract settlement before the March 2 deadline."

Strait added, "We challenge the management of Greyhound to join us at the bargaining table so we can continue to provide the American public with safe and affordable over-the-road transportation services."

Contract talks between Greyhound and the council began in November 1989. However, on Jan. 10, 1990, Greyhound management issued a take-it-or-leave-it ultimatum to union negotiators. The company refused to make any meaningful changes to its first -- and only -- contract proposal. Union members previously rejected that proposal by a 91.9 percent margin.

"Despite the company's reckless ultimatum, the Council of Greyhound Local Unions has not broken off negotiations," said Strait. "Instead, on February 16 the council urged Greyhound to begin good faith negotiations with the assistance of a federal mediator. Regrettably, the company rejected the council's offer to bring in a mediator on February 21."

Unfair labor practice charges have been filed by the Amalgamated Council against Greyhound Lines, Inc., and are now pending before the National Labor Relations Board.

Strait stated, "If the company continues its unfair labor practices -- refusing to bargain in good faith -- the Council of Greyhound Local Unions may be compelled to strike. However, as far as the council is concerned, negotiations are not at an impasse. We are prepared to return to the bargaining table at any time. If the Greyhound Lines, Inc., management is truly concerned about the welfare of its employees and the traveling public, they will take their seats at the table."

The Amalgamated Council of Greyhound Local Unions comprises of 19 local unions of the Amalgamated Transit Union, AFL-CIO, CLC.

CHICAGO (FEB. 26) PR NEWSWIRE - More than 4,500 U.S. Roman Catholics and some 92 Catholic organizations are signers of a paid ad statement to be published in The New York Times on Ash Wednesday, Feb. 28, calling on the entire church to take responsibility for implementing fundamental changes in church life and structure. The ad marks the beginning of a national campaign to promote a more open spirit and broader participation in decision-making at every church level from the local parish to the Vatican.

Among the changes called for in The New York Times statement, titled "A Pastoral Letter from Catholics Concerned about Fundamental Renewal of Our Church," are:

-- The opening of the priesthood to women and married men. -- Extensive consultation with Catholic people in developing church teaching on sexuality and in reaching decisions on other issues deeply affecting their lives (including the closing of parishes).

-- The grass-roots involvement of the people in the selection of bishops.

-- Respect for academic freedom, open dialogue and due process. -- Making church financial reports, including the Vatican's, models of openness and accountability.

The response to the idea was so overwhelming, said Savard, that the signatures already received (signers paid $25 each to cover the cost of the ad) have flowed over onto a second page. Many more nuns, priests and lay church employees wrote to say they agreed with the statement but could not risk signing for fear of repercussions from their superiors. With the ad's publication, Call to Action is announcing a new goal of 100,000 signers by the end of 1990.

Call to Action is an independent organization of 5,000 Catholic laity, religious and clergy working for social justice and church reform in the spirit of Vatican II. Among other national groups sponsoring the statement are the Women's Ordinance Conference (WOC); the Association for the Rights of Catholics in the Church (ARCC); Catholics Speak Out (CSO), a Washington-based group working for justice and participatory processes in the church; CORPUS, the national association for a married priesthood; and Friends of Creation Spirituality (FCS), an organization associated with the work of Dominican Father Matthew Fox.

"Ash Wednesday begins the season of Lent during which we're called to change our hearts," said Dan Daley, co-director of Call to Action. "This

pastoral letter is not simply asking the pope and bishops to make changes. We are asking ourselves and others at all levels to make a commitment to act, to build the kind of church that Vatican II promised, one that is more consistent with the teachings of Jesus."

"The peoples of South Africa and Eastern Europe have challenged us with their courage in pressing for revolutionary democratic changes even in the face of entrenched institutional resistance," said Sister of Loretto Maureen Fiedler, a board member of Catholics Speak Out. "U.S. Catholics want a similar right of participation in their church. That means an end to silencings and loyalty oaths and the institution of a system of impartial due process."

OREM, UTAH (FEB. 26) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT) today announced that its wholly owned subsidiary, Wicat Systems Ltd., located in the United Kingdom has signed a contract with Swissair to supply a computer-based training (CBT) system at the airline's training center in Zurich, Switzerland.

The contract, valued in excess of $1 million, provides for two Wicat 2260 file servers and 44 workstations. Flight crew training will receive 26 workstations for ab initio, Piper Cheyenne, and MD-11 training and maintenance technician training will receive 18 workstations for MD-11 training. Swissair has selected Wicat's WITS 4000 workstation with a high resolution 19-inch monitor, touch screen and mouse.

Swissair is a launch customer for the MD-11 aircraft and will be responsible for customer training for European MD-11 operators. Piper Cheyenne III flight crew transition training is already under development for Swissair.

"This recent agreement with Swissair has further strengthened our relationship with them. We're pleased that the airline recognizes an increasing role for the use of technology-based training solutions in order to remain in step with the new technology of its modern fleet," commented Robert Mendenhall, Wicat's president and CEO. He added that Wicat was selected by Swissair to not only develop aviation courseware, but also to supply a totally integrated solution for delivering its flight crew and maintenance technician training.

Wicat Systems Inc. is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

LAKELAND, FL (FEB. 26) PR NEWSWIRE - QMI Inc. of Lakeland recently demonstrated their automotive engine treatment's lubricating ability by running a treated engine for nearly 1-1/2 hours without oil.

At the annual Specialty Equipment Market Association (SEMA) show held in Las Vegas, the new two-horsepower Briggs & Stratton engine was treated with QMI's PTFE Engine Treatment, then the oil was drained from the engine. The engine was then started and run for one hour, 24 minutes and 57 seconds before it seized. It was then allowed to cool and restarted, showing no apparent signs of damage.

A study by the Society of Automotive Engineers indicates that up to 90 percent of engine wear takes place when an engine is first started, before the oil can circulate and lubricate properly.

QMI's protective coating virtually eliminates engine start-up wear. One treatment of QMI every 50,000 miles protects your engine against wear and tear.

QMI Engine Treatment is now available in automotive parts stores across the country. For more information about QMI products write to QMI c/o International Marketing Systems Inc., P.O. Box 1748, Lakeland, 33802 or call 813-688-4887.

LA JOLLA, CA (FEB. 26) PR NEWSWIRE - IDEC Pharmaceuticals Corp. of Mountain View and La Jolla, Calif., and Tokyo-based Institute of Immunology Co., Ltd. have formed what is believed to be the first major collaboration between privately-held biotechnology companies in the U.S. and Japan.

Under terms of the collaboration, IDEC will receive up to $23 million over a two-year period. In return, the Institute of Immunology will receive rights in Japan and certain Asian countries to develop selected IDEC products -- specifically, therapeutic and diagnostic products for B-cell lymphoma, and diagnostic products for autoimmune diseases. The Institute of Immunology also will receive shares of IDEC's preferred stock, representing approximately 20 percent of the outstanding voting shares. Further financial details were not disclosed.

IDEC Pharmaceuticals is a leader in the development of immunotherapies based upon antibody and peptide-derived products. As reported in the September 28, 1989 issue of The New England Journal of Medicine, the company has developed a proprietary panel of anti-idiotype antibodies ("anti-ids") which cross-react with certain tumor-associated "markers," or cellular surface structures known as idiotypes. The discovery of this cross-reactivity has opened the door to broad-based therapy for B-cell lymphoma and other immune diseases.

IDEC's first anti-id product, used in the treatment of B-cell lymphoma, is currently in Phase III human clinical studies at leading oncology centers in the United States and Canada, preparatory to application for marketing approval from the Food and Drug Administration in the U.S. and the Health Protection Branch of Health and Welfare Canada.

A number of other products and technologies also are under development at the company. Separate from those entering collaboration with the Institute of Immunology, IDEC has initiated Phase I human clinical studies at two major oncology centers in the U.S., utilizing an immunogen designed to stimulate the patient's immune response against malignant melanoma. Preclinical development is under way on agents for other solid tumors. In addition, active research programs are evaluating potential products for other conditions, including therapeutic products for autoimmune diseases and AIDS/ARC. Between equity investments and R&D partnerships, IDEC has raised a total of nearly $60 million to fund its programs. The company has 100 employees, 80 percent of whom are engaged in research and development activities.

The Institute of Immunology Co., Ltd. is a leader in Japan in the production and marketing of various monoclonal antibodies and antisera as well as in vitro diagnostic reagents. The privately- held company is based in Tokyo and has production facilities in Tochigi Prefecture. The Institute of Immunology has formed a number of collaborative agreements with major pharmaceutical and biotechnology companies around the globe, including Institute Pasteur in France, Hoffmann LaRoche in Switzerland, Abbott Laboratories in the U.S., and health care companies in Japan and other Asian countries.

#90057p0034 02/26/1990 ~PR Newswire

LA JOLLA, CA, AND TOKYO (FEB. 26) PR NEWSWIRE - IDEC Pharmaceuticals Corp., which today separately announced a collaboration with Japan's Institute of Immunology Co., Ltd., will establish IDEC Seiyaku, a

wholly-owned subsidiary of IDEC Pharmaceuticals Corp.

The Tokyo-based affiliate will be responsible for the development of IDEC's long term business strategy in Japan. It will also work closely with IDEC's Japanese partners and will maintain close ties with academic institutions throughout the country, both for the purpose of conducting research with leading Japanese scientists and for seeking potential product development candidates in areas central to IDEC's R&D strategy.

IDEC reported the appointment of Michio Nishida, 39, as Representative Director of IDEC Seiyaku. Nishida, who has been Manager of the Research & Development Division of NKK Corporation, previously held various management positions at Meiji Milk Products Co., Ltd. He is a graduate of Kyoto University.

"I am extremely excited to have the opportunity to lead IDEC's Japanese operations," Nishida said. "IDEC is at the forefront of scientific research in immunology and has developed a number of promising products for the treatment of cancer and other severe and life threatening diseases. There is tremendous opportunity for expansion of the company's business, particularly in the historically large market for oncology products in Japan. We intend to work very closely in long-term relationships with IDEC's current academic and corporate partners. At the same time, we will seek partners for collaboration in other therapeutic and diagnostic areas," Nishida added.

Two IDEC executives also have been appointed directors of IDEC Seiyaku. They are: Dr. William H. Rastetter, 41, IDEC's President and Chief Executive Officer, and Clifford Orent, 39, IDEC's Vice President of Corporate Development and General Counsel. Orent will serve as Chairman of IDEC's Japanese subsidiary.

IDEC Pharmaceuticals is a leader in the development of immunotherapies based upon antibody and peptide-derived products. Its first product, an anti-idiotype for the treatment of B-cell lymphoma, is currently in Phase III human clinical studies at leading oncology centers in the United States and Canada. A second product, for the treatment of malignant melanoma, is in Phase I human clinical studies at two major oncology centers in the U.S. IDEC has several products in preclinical studies for the treatment of other solid tumors, as well as certain autoimmune diseases, AIDS and ARC.

#90057p0036 02/26/1990 ~PR Newswire

FOUNTAIN VALLEY, CA (FEB. 26) PR NEWSWIRE - Newport Corp. (NASDAQ: NEWP) today reported sales for the second quarter ended Jan. 31, 1990 totaled $14,379,000, a 3 percent increase over the $14,025,000 reported for the previous year.

Net income for the second quarter was $1,143,000, or 14 cents per share. This compares with $1,759,000 (21 cents per share) for the corresponding quarter of the 1989 fiscal year and $1,147,000 (14 cents per share) for the first quarter of this fiscal year.

For the six-month period revenues totaled $28,181,000 compared with $28,093,000 for the prior year period. Net income for the first half of fiscal 1990 totaled $2,290,000 (28 cents per share) compared with $3,481,000 (42 cents per share) for the corresponding 1989 period.

"International sales," noted Tom Galantowicz, president of Newport, "totaled $4,727,000 for the quarter, up 32 percent over 1989 levels; while domestic sales declined 8 percent from 1989 levels reflecting continuing softness in both government and industrial research funding."

Galantowicz continued, "Income from operations improved over the first quarter primarily because of higher sales volume. However, this improvement was offset by unrealized losses in our marketable securities portfolio and foreign exchange transactions."

Galantowicz concluded, "We anticipate improved performance during the second half of this fiscal year because of a record backlog, continued strong international sales and increased contribution from new products. The higher volume is anticipated to result in improved operating income as our capacity is more efficiently utilized."

Newport Corp. is the leaading worldwide manufacturer and marketer of precision laboratory equipment for scientists and engineers who develop and apply technology involving lasers and optics. Customers include Fortune 500 corporations, national research laboratories, government and educational institutions.

JERSEY CITY, NJ (FEB. 26) PR NEWSWIRE - Mascott Corporation (NASDAQ: DINE) today announced the expected opening this spring of its second Cinnabon(TM) franchise, to be located in the Willowbrook Mall in Wayne, N.J. The company opened its first Cinnabon, located in Paramus, N.J., in September 1989.

Scott Gillman, vice chairman, stated that, "We are very excited about the potential for Cinnabon in the Willowbrook Mall. Currently, our Paramus sales rank in the top 25 percent of franchise stores nationally. With Willowbrook Mall, we gain a location which is able to open on Sunday, which is, unfortunately, not the case in Paramus. We expect to do 20 percent or more of our sales on Sundays."

Commenting on future development plans, Gillman stated that, "We are talking to most of the major malls in New Jersey. The malls are very positive toward our concept, as it provides a unique food product for their food programs. We expect new locations to become available in the near future."

The company was established to own and operate restaurants and Cinnabon franchises. (Cinnabon is a registered trademark of Restaurants Unlimited, Inc.) In addition to its Paramus Park Mall Cinnabon, the company currently operates Markers Restaurant & Bar and an adjacent take-out and delivery outlet in Jersey City, and recently announced the expected opening of a second Markers Restaurant in Somers Point, N.J.

NEW YORK (FEB. 26) PR NEWSWIRE - Apple Computer, Inc. (NASDAQ: AAPL) and KPMG Peat Marwick today announced the formation of a strategic alliance that will provide consulting and systems integration services to companies implementing executive information systems and decision support systems (EIS/DSS) on Macintosh(R) personal computers.

The strategic alliance, known as Exis (Executive Integration Services), will provide a full range of systems integration services, including project management, systems planning and analysis, application and database development, system configuration, training and support. Solutions provided by Exis will integrate Macintosh systems with a variety of host systems, networks, off-the-shelf database management systems (DBMS) and EIS/DSS software. Several Fortune 500 companies such as Steelcase, Inc., and Aetna are already using Macintosh computers and KPMG Peat Marwick services, methodologies and tools that Exis will now provide.

Consulting and systems integration services are areas of great importance to Apple. One year ago, Apple formed its Apple Integrated Systems (AIS) division to work with third-party systems integrators such as EDS, SHL Systemhouse and Peat Marwick.

Peat Marwick brings to Exis one of the nation's largest groups of consultants with substantial experience in EIS/DSS solutions, Macintosh programming, networking, and systems integration, as well as in strategic systems planning through its wholly owned Nolan, Norton & Co.

Exis will operate as a business unit of KPMG Peat Marwick's management consulting practice. Rod McGeary, formerly partner-in-charge of Peat Marwick's Cupertinto, Calif., office, will function as partner- in-charge of Exis. Exis will be staffed initially by 60 consultants, with contribution of proprietary technology from both Apple and Peat Marwick. Exis will not serve as a reseller of Apple equipment.

Apple Computer, Inc. develops, manufactures, and markets personal computer systems for use in business, education, science and engineering, government and the home. A recognized pioneer and innovator in the personal computer industry, Apple does business in more than 85 countries. Apple's fiscal 1989 revenues total $5.3 billion.

KPMG Peat Marwick provides accounting and auditing, tax and management consulting services to a wide variety of business organizations, institutions, and individuals through 132 offices in the United States. It is a member of KPMG, an international association of member firms, operating in 115 countries with revenues of $4.3 billion. KPMG has approximately 6,000 consulting professionals, including more than 2,500 professionals in information technology.

#90057p0058 02/26/1990 ~PR Newswire

KIRKLAND, WA (FEB. 26) PR NEWSWIRE - McCaw Cellular Communications, Inc. (NASDAQ: MCAWA) announced it has completed negotiations with its full banking group as to the definitive credit agreement for the financing of its tender offer for 21.9 million shares of stock of LIN Broadcasting Corporation. On Friday evening, February 23, execution copies of the agreement were distributed to the lenders for their signatures and all lenders are expected to have signed by the middle of this week.

In addition, McCaw Cellular said it will file today an amended registration statement with the Securities and Exchange Commission regarding the $425 million of McCaw Cellular Class A common stock to be distributed as a dividend to holders of LIN shares not purchased in the tender offer (other than McCaw Cellular and its affiliates). The filing will respond to the SEC's prior comments on the registration statement.

Accordingly, McCaw Cellular has extended its tender offer to the end of this week so as to expire at midnight (New York City time) on Friday, March 2, 1990, subject to its right to extend further if all conditions to the offer are not satisfied at that time. Assuming the offer expired as contemplated on March 2, under its current timetable, McCaw Cellular would accept for payment 21,900,000 validly tendered shares on Monday, March 5, 1990, subject to the conditions to the offer being satisfied at that time. Preliminary results of proration would be announced on -- March 5 and final proration results would be announced by March 13, whereupon payment for the purchased shares would begin.

McCaw Cellular also said that, if the LIN shares were accepted for payment on March 5 as contemplated, it would expect to submit to LIN on that date a written stockholder consent to remove the current LIN board, increase the size of the board to nine members and appoint its own slate of nine directors, including three "independent directors" to be designated by the current LIN board as provided in the acquisition agreement and related Private Market Value Guarantee previously executed with LIN.

In addition, under this timetable, the reconstituted LIN board on March 5 would set a record date of March 20 for the stock dividend referred to above. On March 27, after the LIN stockholders of record have been identified, McCaw Cellular would sell $425 million of its Class A common stock to LIN, with the value of such stock being based on the average per share closing prices for the stock as reported by NASDAQ in its National Market System during the 20 trading days ending on March 26, 1990. LIN would then distribute the stock as a dividend to its stockholders of record (other than McCaw Cellular and its affiliates) on or about March 30.

McCaw Cellular also said that it expects to close its previously announced sale of certain cellular properties to Contel Corporation this week. The proceeds of that sale, totalling approximately $1.3 billion, would be used to reduce the borrowings required under the credit agreement to complete

the tender offer.

As of the close of business on Feb. 23, 1990, approximately 23.7 million shares had been tendered in the offer, McCaw Cellular said.

McCaw Cellular Communications, Inc., the nation's largest cellular telephone company, will have 58.7 million "pops" following the completion of the sale of its south-central cellular system to Contel, the completion of the tender offer and LIN's completion of its pending acquisition of 6.9 million pops in New York from Metromedia. ("Pops" are a key cellular yardstick derived by multiplying market area populations by the percentage ownership of the cellular system serving those markets.) The company currently offers cellular service, primarily under the "Cellular One" name in 127 markets in 26 states across the country. McCaw Cellular operates major regional systems in California, Florida, Texas, the Pacific Northwest, the Midwest, the Rocky Mountain states and the Northeast.

BOCA RATON, FL (FEB. 26) PR NEWSWIRE - Computer Products, Inc. (NASDAQ-NMS: CPRD), an electronics manufacturer based in Boca Raton, Fla., today announced the appointment of Richard H. (Dick) Miller to head the company's Government Electronics business. Miller will replace President Al Jeffries, who has decided to resign his position for personal reasons.

Based in Boulder, Colo., Government Electronics (Tecnetics) develops and manufactures power supplies for U.S. government agencies and department of defense prime contractors.

Miller comes to Computer Products from CEAG, a West German power supply company. He was responsible for managing CEAG's power supply subsidiary located in Long Island, N.Y.

"Our Government Electronics business has made considerable progress during the past 18 months under the direction of Al Jeffries. I am confident that the progress will continue under Dick Miller's leadership. Our goal is to make our Government Electronics business as profitable as our other divisions," said John N. Lemasters, chairman, president and chief

executive officer of Computer Products.

Computer Products, Inc. specializes in three businesses: Power Conversion, Measurement and Control, and Government Electronics. The company is headquartered in Boca Raton, Fla., and employs 1,700 people in the United States, Hong Kong and the Republic of Ireland. The company is listed on the NASDAQ national market system under the symbol CPRD.

CHICAGO (FEB. 26) PR NEWSWIRE - Britannica Software, Inc., publisher of the revoluntionary Compton's MultiMedia Encyclopedia(TM) (CMME), announced today that it has selected Radio Shack, a division of Tandy Corporation, as its strategic partner in a unique hardware- software marketing plan.

Stanley D. Frank, president of Britannica Software, Inc., said the new Tandy(R) 2500 XL personal computer, configured with internal CD-ROM drive, has been chosen as the exclusive hardware platform which Encyclopaedia Britannica Educational Corp. will use to market the stand-alone version of CMME to the education and library markets. It will be a complete integrated system-to-user package.

Compton's MultiMedia Encyclopedia was unveiled in late 1989. Since then, it has won broad acclaim from educators and librarians who have field-tested it at schools across the nation. The CMME contains not only the complete text of the 26-volume print version of the educationally renowned Compton's Encyclopedia, but also 15,000 pictures (many in full color), animated sequences, 60 minutes of sound segments, and an innovative search and retrieval system -- all on a single 5-inch CD-ROM disk. The disk also includes the complete Webster's Intermediate Dictionary from Merriam-Webster, Inc.

The newly developed Tandy 2500 XL computer, with an internal CD-ROM drive, is especially well suited to institutional and personal use. Standard features include a special circuit for recording and playback of high-fidelity voice and sound, high-speed 16-bit VGA color graphics and a mouse port.

The Tandy 2500 XL computer features the MS(R)-DOS 3.3 operating system and Tandy's DeskMate(R) interface in permanent Read Only Memory (ROM), making it one of the easiest-to-use computers available.

Britannica Software and Tandy officials stressed that the 2500 XL displays an organized "desktop," displaying all of the user's available software

programs -- including CMME -- for simple "point-and-click" selection.

The two companies will conduct coordinated marketing campaigns in the kindergarten through 12th grade school market, as well as in more than 700 Radio Shack Computer Center locations nationwide.

HOUSTON (FEB. 26) PR NEWSWIRE - ENSR Corporation (AMSE: ENX) today reported a net loss for the year ended Dec. 31, 1989, of $23.5 million, or $2.44 per share, resulting primarily from a streamlining to improve profitability. Revenues for the year continued to show strong growth, up 28.8 percent to $158.1 million. For the same period in 1988, ENSR reported earnings of $2.1 million on revenues of $122.8 million. A summary of the results follows:

ENSR CORPORATION
(In thousands, except per share data)

Periods ended	Quarter		Year	
Dec. 31	1989	1988	1989	1988
Revenues	$ 42,579	$ 37,699	$ 158,120	$ 122,769
Net income (loss)	$(19,507)	$ (1,248)	$ (23,493)	$ 2,143
Net income (loss) per common share	$ (2.02)	$ (0.14)	$ (2.44)	$ 0.21
Average common shares outstanding	9,668,016	9,105,638	9,620,150	10,002,295

The majority of the loss occurred in the quarter ended Dec. 31, 1989, during which ENSR decided to discontinue two profitable businesses. The company reported a net loss for the quarter of $19.5 million or $2.02 per share, on revenues of $42.6 million. For the same period in 1988, ENSR reported a loss of $1.2 million on revenues of $37.7 million.

"ENSR enters the 1990s with one mission in mind -- to enhance shareholder value," said John Deckro, ENSR chief financial officer. "In 1990 we will focus on the proven strength of our core businesses."

According to Deckro, the loss for the year was due primarily to the write-offs and reserves resulting from the decision to discontinue the ENVIRONET regulatory information publishing service, the health information software system and the transformer replacement business. Deckro said the company is adopting a more conservative approach to spending and investments, and will focus future technology development on client-funded ventures.

ENSR (pronounced "N-Sir") Corporation has more than 20 years of experience solving complex environmental problems for America's leading industrial companies.

#90057p0073 02/26/1990 ~PR Newswire

SAN DIEGO (FEB. 26) PR NEWSWIRE - Humphrey Inc. (NASDAQ: HUPH) today reported net earnings for the year 1989 of $313,346 on total revenues of $18,411,610. This compares to 1988 earnings of $226,113.

Per share earnings of 31 cents in 1989 compares to 23 cents in 1988 based on 1 million shares outstanding for both years. The 1989 net earnings included an extraordinary item amounting to $30,300 and for 1988 an extraordinary item of $75,500, which were reductions of income taxes arising from loss carryforward from 1987.

Commenting, P.E. Humphrey, president and chairman of the board, states, "This is a 65 percent increase in shipments and 35 percent in earnings. The earnings were diminished by one program's problems in passing lot tests and another large contract which was for a new IMU (inertial measurement unit). The IMU is a new item for which we have received a $3 million production contract. Pre- production engineering and qualification were partially written off in the fourth quarter."

Continuing, he says, "We have some growing pains with this large increase in business. We have added and will continue to add personnel and facilities to accommodate new business. Additional contracts are expected soon for Hellfire gyros and IMU units. A contract has just been received for GBU-15 gyros amounting to close to $1 million, which will start delivery later this year. Even with the changing defense scene we are in a good position competitively with our specialized product line."

Backlog is now approximately $16.2 million, compared to $14.6 million last year at this time.

Humphrey Inc. is a leading supplier of gyroscopes and electromechanical devices to the aerospace, defense, petroleum, mining and oceanographic industries with sales and representation worldwide.

WARREN, MI (FEB. 26) PR NEWSWIRE - Detroit Testing Laboratory (DTL) has announced that it has signed a letter of intent to form a joint venture with the Chinese Automotive Technology and Research Center (CATARC) to establish and develop a modern automotive testing capability in the People's Republic of China. The new company will be known as Tianjin-Detroit Testing Laboratory (TDTL).

The announcement was made today in conjunction with the Society of Automotive Engineers Exposition in Detroit. The official announcement stated:

Each partner will own 50 percent of the new company, contribute one- half of the assets and capital, and share in the profits accordingly. Total capitalization will grow to $9 million and employment to more than 250.

CATARC will contribute buildings, personnel, cash, some testing equipment and other facilities. DTL will transfer to the joint venture advanced automotive testing technology, know-how, cash, test specifications and procedures, test machinery and computers, training of CATARC personnel and other technical assistance.

Pier Talenti, DTL's chairman and chief executive officer, said, "This joint venture is good news for DTL, the Chinese auto industry and our mutual customers.

Talenti indicated that it could take as long as a year to finalize the joint venture agreement and nine years to reach the anticipated equity and employment levels.

Detroit Testing Laboratory is an independent testing laboratory founded in 1903. DTL uses the latest technology to provide testing and engineering services to a diverse group of automotive, industrial and government clients.

TULSA, OK (FEB. 26) PR NEWSWIRE - C.I.S. Technologies, Inc. (NASDAQ: CISI) has announced the first month of positive net earnings in its five year history as a publicly traded corporation. While not its normal practice to release monthly results, the company reported results for January, 1990, following a story that appeared in the Friday edition of USA Today. The story erroneously listed CIS Technologies as one of a number of "big-name bankruptcies" filed in New York's Southern District

Court.

"The irony of the situation was too great to ignore," stated President and Chief Executive Officer Philip D. Kurtz. "We had just reached a significant milestone in the company's brief history." Kurtz cautioned that January results are unaudited and that a single month of positive net income is no guarantee of first quarter profitability.

WHEELING, W.VA (FEB. 26) PR NEWSWIRE - The appointment of Tom Patrick, vice president, to the added position of general manager-finishing operations, was announced today by Richard E. Stoll, executive vice president-manufacturing, Wheeling-Pittsburgh Steel Corp. (NYSE: QWHX).

Since September 1989, Patrick has been serving as assistant to James L. Wareham, president and chief operating officer, for special projects.

Following 20 years with United States Steel Corp. (now USX) in various operations and staff positions, Patrick joined Wheeling-Pittsburgh Steel in 1983 as manager-rail mill at Monessen, Pa. In 1984 he was promoted to plant manager at Monessen, then to vice president and general manager-Monessen Profit Center in January 1986. Following the sale of the coke and steelmaking facilities at Monessen in June of 1988, Patrick was named general manager-Allenport Plant in addition to his duties as vice president.

Patrick, a native of McKeesport, Pa., is a graduate of Kansas State University where he earned a B.S. degree in business administration.

Patrick and his wife are the parents of two sons and live in Glassport, Pa.

CINCINNATI (FEB. 26) PR NEWSWIRE - The Penn Central Corporation (NYSE: PC) announced today that its Marathon LeTourneau Company subsidiary has entered into a contract for the sale of a 116-C Cantilever type self-elevating mobile jack-up drilling platform to Brobekk A.S., a Norwegian company. This unit represents the first offshore rig construction in the United States since the delivery of the Rowan Gorilla IV from Marathon LeTourneau's Vicksburg yard in 1986.

The Marathon class 116-C unit, designed for exploration, production drilling, and workover in the Gulf of Mexico, will be equipped with 410 feet of leg and will be capable of drilling in 300 feet of water to a drilling depth of 25,000 feet. The unit will be built at Marathon's Vicksburg, Mississippi yard. Marathon's Class 116-C design is the most utilized jack-up in the world today.

According to J. Earl Beckman, president, Marathon LeTourneau Company, "Industry conditions during the past several years have been extremely difficult due to the oversupply of drilling rigs. We are very pleased to have the opportunity to begin construction of a rig at this time for delivery in December of 1991. While we don't see the construction of one or two rigs a year as a full recovery, we do see it as a positive turning point."

Penn Central operates businesses primarily in the areas of industrial manufacturing, defense services, insurance and energy.

PERTH AMBOY, NJ (FEB. 26) PR NEWSWIRE - Bankers Corp., the proposed

holding company for Bankers Savings, announced that it had filed an amendment to its registration statement with the Securities and Exchange Commission related to a revaluation and resolicitation of subscribers and community members in connection with its conversion from mutual to stock form.

It is anticipated that 4,700,000 shares of common stock will be offered at a price of $8.50 to $11.50 per share. The midpoint of the new valuation range is $47.0 million, reduced from the previous midpoint of $62.5 million.

"The reduction in the number of shares and the price range of the common stock being offered is due to the overall decline in the stock prices of financial institutions since the commencement of the offering on Jan. 5, 1990," stated Bankers Corp. Chairman Joseph Gemmell.

The subscription and community offering ended on Feb. 5, 1990. Subscribers are receiving interest on their funds pending closing of the transaction and will be given the right to confirm, modify or cancel their orders. Shares not sold in the subscription and community resolicitation offering will be made available to the public in an underwritten public offering to be managed by PaineWebber Incorporated, Dean Witter Reynolds Inc. and Ryan Beck & Co. expected to occur in mid-March.

The bank is a New Jersey state chartered, FDIC-insured savings bank whose business is primarily conducted through six retail offices in Middlesex County, N.J.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

PITTSBURGH (FEB. 26) PR NEWSWIRE - Dravo Corp. (NYSE: DRV) president and chief executive officer Carl A. Torbert Jr. today announced that Dravo would take the appropriate legal steps to respond to a lawsuit filed on Friday, Feb. 23, in Luzerne County, Pa., by Continental Energy Associates (CEA), a Hingham, Mass.-based firm with whom Dravo had contracted to

construct a coal gasification plant in Hazleton, Pa.

CEA's suit alleges breach of contract, negligent misrepresentation and fraud and deceit on Dravo's part in connection with the construction of the Hazleton coal gasification facility.

"The extraordinary amount of attention focused on this matter in recent days makes it necessary for us to acknowledge this development," commented Torbert. "In so doing, we would like to make three additional observations:

- "It is our contention that the Hazleton project contract can and should serve as the basis for resolving the issues on which we and the project developers disagree;

- "We affirm our belief that denying us an opportunity to complete our work at the Hazleton site constitutes an act of wrongful termination on CEA's part; we also affirm our determination to vigorously pursue the legal remedies available to us as the victim of such an action;

- "Our disagreement with the Hazleton project developers involves a number of complex technical matters which are likely to be the subject of extensive investigation and review. While any comment we might make on those matters would be premature, I feel no hesitation in dismissing as groundless, untrue, and an affront to our good name and reputation any attempt to allege or imply malicious motives or intent on our part in connection with this or any other project in which Dravo Corp. is involved."

NEW YORK (FEB. 26) PR NEWSWIRE - CompLink, a New York-based software development company, reports strong market acceptance of WorldLink, its new comprehensive messaging application that enables users to transmit information from their own PCs directly to their target recipients' host environments, including FAX machines, telex and off-network electronic mail.

WorldLink allows users of IBM-compatible PCs and DOS 3.1 Local Area Networks to communicate with anyone in the world. WorldLink can automatically send information to any of the following destinations: electronic mail to other users on the network; FAX machines; telex; off-network electronic mail to selected IBM, DEC, Wang and Data General environments, and paper-based mail services including priority mail, cablegram and telegram.

"WorldLink is an invaluable communications management tool." says Howard Davis, president of CompLink. "It reduces reliance on telex departments and reduces the usage of FAX machines. Users can create their own customized internal distribution list, distinguishing how each point wants to receive its information."

WorldLink features Message Tracking, which monitors the status and history of each transmitted message created by the user. WorldLink also offers users the capability to easily receive electronic messages at their own workstations and easy access to thousands of popular public bulletin boards and data bases.

Because WorldLink integrates with any DOS-based data application or word processing package, there is no change in the user environment. And background processing allows users to perform their regular work functions on their PCs without any communication interferences.

CompLink specializes in easy-to-use application software products for a wide variety of computer environments. The company has enjoyed great success in the Wang VS automation environment and lists among its clients
success in the Wang VS automation environment and lists among its clients
several of Wang's largest multinational accounts, including Deutsche Bank, Union Bank of Switzerland, Abbott Labs, Syntex Corp., Bank of Boston and PPG Industries. #90057p0111 02/26/1990 ~PR Newswire

PRINCETON, N.J. (FEB. 26) PR NEWSWIRE - DNX today announced that it has granted a non-exclusive license to Genzyme Corporation (NASDAQ: GENZ) to use DNX's DNA microinjection technology to develop transgenic livestock capable of producing large quantities of valuable human pharmaceuticals in their milk. In exchange for the license, Genzyme in will pay DNX annual fees as well as royalties on sales of pharmaceuticals produced using transgenic livestock.

"Genzyme, a recognized leader in the development of transgenic animals for use in pharmaceutical production, is among the first commercial enterprises to be granted a non-exclusive license to use DNX's microinjection technology," said Paul Schmitt, president and CEO of DNX.

Late last year, a patent on the DNA microinjection process -- the most widely used method for developing transgenic animals -- was awarded to Ohio University (Athens, Ohio), U.S. Patent No. 4,873,191. DNX, as exclusive licensee of the patent, is granting non-exclusive licenses for experimental use of the process in laboratory animal species in exchange for a standardized annual fee. Licenses for additional applications, such as the transgenic mammary production license granted Genzyme, are being negotiated on a case-by-case basis, Schmitt explained.

Transgenic animals which produce pharmaceutical proteins in their milk are developed by microinjecting genetically engineered DNA fragments into an embryo. These fragments contain the gene for the pharmaceutical protein coupled with the regulatory sequences which direct production of the protein to the milk of the animal. Since livestock produce large volumes of milk at low cost, transgenic mammary protein production may have substantial cost advantages over other pharmaceutical protein production methods. To date, the feasibility of this method of production has been demonstrated with such major pharmaceutical proteins as tissue plasminogen activator (tPA) that promotes the dissolving of blood clots and Factor IX, a blood-clotting protein used to treat a form of hemophilia.

DNX develops and produces integrated recombinant and transgenic systems for anti-viral drug discovery and genetic toxicology compound safety testing. It also develops and produces superior transgenic breeding animals for the livestock production industry, and transgenic animals for the development and production of human pharmaceuticals.

GREENWICH, CT (FEB. 26) PR NEWSWIRE - As part of its continuing international expansion, United Parcel Service (UPS) has acquired Cuallado S.A., one of Spain's leading parcel delivery companies. Terms of the deal were not announced.

The acquisition provides UPS, the world's largest package delivery company with 750 vehicles and a network of 98 offices from which 1,500 people provide transportation services throughout Spain. Additionally, it gives UPS an established customer base and a significant presence in the country. Cuallado, S.A. delivered nine million packages and documents in Spain during 1989.

In announcing the deal, Larry Long, UPS vice president and European region manager, said, "Spain is becoming an increasingly important area for us. Acquiring Cuallado, S.A. gives us the ability to participate from the start as a key player in that country and further strengthens our strategic position in Europe as trade barriers continue to fall."

UPS has employed a strategy of acquisitions and service partner agreements to expand its service network worldwide to more than 180 countries and territories. Cuallado, S.A. represents the tenth UPS acquisition in Europe. The other European countries in which UPS has acquired companies are the United Kingdom, Italy, France, Denmark, Finland, Switzerland and the Benelux countries.

UPS, based in Greenwich, Conn., is a worldwide company serving all 50 states and more than 180 countries and territories. With a volume of 2.8 billion packages and documents in 1989, and revenue of more than $12 billion, UPS is the largest package delivery company in the world.

OSAKA, JAPAN (FEB. 26) PR NEWSWIRE - The board of directors of Matsushita Electric Industrial Co., Ltd. (NYSE: MC) today announced an issue of US$1 billion in unsecured bonds due 1994 with warrants, by a public offering in the Euromarket. Simultaneously, Panasonic Finance (Netherlands) B.V. also announced a public Euromarket offering of US$300 million in straight bonds, also with a four-year maturity.

The new Matsushita Electric equity-linked issue will be launched in the Euromarket with the targeted closing in mid-March 1990. The bonds will be issued in $10,000 denominations with two warrants each.

This is Matsushita Electric's second major international issue. In 1975, the company issued unsecured convertible debentures, mainly in the United States.

Panasonic Finance (Netherlands) B.V. (PFN) is one of the financial subsidiaries of Matsushita Electric Industrial Co., Ltd. Closing of its straight bond issue is targeted for mid-March 1990. They will be issued in $5,000 denominations. PFN's issue will be backed by a keepwell agreement between the issuer and its parent company.

Nomura International plc is the lead manager of both issues, the net proceeds of which will be applied primarily toward the Matsushita Group's continuing capital expenditure programs, both in Japan and overseas.

These bonds will not be offered or made available in the United States, to any areas subject to its jurisdiction, or to any U.S. person.

Applications are being made to have the bonds listed on the Luxembourg Stock Exchange.

Matsushita Electric Industrial Co., Ltd. is Japan's largest manufacturer of consumer electric and electronic products. The company's stock is also listed outside Japan on the Amsterdam, Dusseldorf, Frankfurt and Paris stock exchanges. Its products are marketed around the world under the "Panasonic," "National," "Quasar" and "Technics" brand names.

NEW YORK (FEB. 26) PR NEWSWIRE - Ply Gem Industries, Inc. (AMEX: PGI), today announced the appointments of David Cohen as vice president, sales and marketing, and Edmund Linehan as director of merchandising.

Cohen is the former president of Somerville Lumber, a leading retailer and distributor of building materials. With 20 years of experience encompassing all areas of the company, Cohen's keen organizational and leadership skills guided Somerville Lumber through its largest period of growth and profitability, gaining a nationally recognized leadership position in the industry. "Ply Gem is a company I have long admired for its innovative thinking and bold strategy in our industry. The Ply Gem management team is outstanding. I am excited about my new position and the opportunity to join the Teamwork 90s task force. Teamwork and a sense of purpose is a concept that works," said Cohen.

Linehan also joins Ply Gem from Somerville Lumber, where his position as director of merchandising built profitability and sales through strong vendor relationships and the implementation of successful and innovative marketing and merchandising programs. "I applaud the Ply Gem philosophy of building an organization based on fostering teamwork and respecting individual efforts and look forward to making a significant contribution to this dynamic organization," said Linehan.

Ply Gem developed its Teamwork 90s concept at an executive management committee conference held in November 1989. According to the announcement made by Jeffrey S. Silverman, chairman of Ply Gem Industries, "...the Teamwork 90s growth strategy will lay the foundation for Ply Gem to further enhance profitability, generate increased revenues and accelerate the shared benefits of its strategic alliance of 11 operating companies."

"We have made significant progress towards implementing the Teamwork 90s programs and have made the cross-selling of Ply Gem products a top priority for the 1990s. It has become clear that greater-than-anticipated opportunities exist to increase Ply Gem's share of the home center/lumberyard market by expanding our customer relationships to include the full array of quality Ply Gem products. We must dedicate more corporate resources to exploit these opportunities. Given their backgrounds, David Cohen and Edmund Linehan are uniquely qualified to provide an insightful marketing perspective for Ply Gem," said Dilip Advani, Ply Gem vice president and task force leader for the Teamwork 90s program.

Ply Gem is a national manufacturer and distributor of specialty products for the home improvement industry.

DALLAS (FEB. 26) PR NEWSWIRE - EDS has signed a 10-year merchant processing contract with First USA Merchant Services, Inc. of Dallas.

Under this agreement, EDS (Electronic Data Systems Corp.) will provide full-service processing support for First USA Merchant Services, Inc.'s extensive merchant portfolio using The Merchant Accounting System, EDS' comprehensive merchant transaction system. First USA Merchant Services, Inc., a subsidiary of First USA, Inc. of Dallas, is a national provider of merchant processing services and currently supports a base of over 50,000 merchants and 100,000 merchant locations, making it one of the largest merchant processors in the United States.

"Teaming with EDS gives us a decided advantage in our market place," said John Tolleson, chairman and chief executive officer of First USA, Inc. "We believe that the EDS system offers us the control and flexibility we need to be competitive in the merchant account business. And having a long-term relationship with a company like EDS will ensure our continued success in this unique industry. The new system will also allow us to significantly enhance the service we provide to our large customer base."

Bob Lund, president of EDS Payment Services Division, said, "The agreement with First USA is a clear indication of the strategic value a leading financial institution finds in a partnership with EDS. Our full- service approach enables our merchant-account customers to be more profitable in a dynamic market by reducing operating costs through improved service efficiencies. We are tremendously excited about this opportunity to employ EDS' resources in support of a leader in the merchant services business."

The Merchant Accounting System is a component of The Card Processing Solution, EDS' complete line of card processing services. The Merchant Accounting System enables maximum flexibility in price setting, profitability analysis and fraud monitoring. Special functions include warning bulletin distribution, rebate offers, productivity tools and merchant memos. The system is built on a modular design to easily adapt to changing operating environments.

First USA, Inc. is an independent financial services company that provides credit cards to over 1.7 million customers, correspondent bank services to over 1,000 financial institutions and merchant services to over 50,000 merchants nationwide.

EDS, which is based in Dallas and has operations in 28 countries, is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

BEDMINSTER, N.J. (FEB. 26) PR NEWSWIRE - Bell Atlantic today announced a series of moves to support wireless communications technology and extend the company's capabilities beyond current cellular technology and services.

The technological initiatives include the creation of a Wireless Technology Laboratory at Bell Atlantic Mobile Systems and a growing relationship with Rutgers University's Wireless Information Network

Laboratory (WINLAB) that includes a unique post-doctoral fellowship funded by the Bell Atlantic Charitable Foundation.

Bell Atlantic Mobile's laboratory is headed by Richard Lynch, vice president of network operations and engineering. Several key personnel already are in place and the lab will grow to a staff of more than a dozen engineers.

"We have taken the technical assessment and research capabilities -- present at Bell Atlantic Mobile for quite some time -- and given them a clear charter and the resources necessary to break new ground," Lynch said.

He said the lab's activities will include field trials of vehicle management systems and personal communications networking. The company's conceptual work and technical assessment will not include equipment design or development.

Complementing Bell Atlantic Mobile's research efforts is the expanding partnership between the company and the Rutgers WINLAB.

"In establishing the WINLAB, Rutgers has initiated the country's first comprehensive program focused on current and future wireless information technologies," Lynch said. "It is sure to serve as a national focus of attention on the long-term future of wireless networking."

As a WINLAB corporate sponsor, Bell Atlantic Mobile Systems has committed an initial sum of $30,000. In return for that commitment, Bell Atlantic Mobile will have a voice in determining the direction of research through participation in the WINLAB advisory board.

David Goodman, WINLAB director and chairperson of the Rutgers department of electrical and computer engineering, said, "Bell Atlantic Mobile is our neighbor and many of the ideas for our structure came out of discussions with key Bell Atlantic managers. They continue to be valuable neighbors and advisors."

Lynch said Bell Atlantic Mobile also anticipates entering into research contracts with Rutgers to undertake specialized wireless communications studies.

In addition, the Bell Atlantic Charitable Foundation has approved a $150,000 donation to support a novel three-year post-doctoral fellowship at the WINLAB.

In addition to sharing information and common problems, Bell Atlantic Mobile's Wireless Technology Laboratory and Rutgers will cooperate in what is believed to be the cellular industry's first student internship program. The summer program will give Rutgers undergraduate students

hands-on industry experience and provide Bell Atlantic with an experienced field of future radio engineers.

Bell Atlantic Mobile Systems provides cellular service and equipment in New Jersey, Pennsylvania, Delaware, Maryland, Virginia and Washington, D.C.

NEW YORK (FEB. 26) PR NEWSWIRE - Grace Specialty Chemicals Co., the more than $3 billion operating unit of W.R. Grace & Co. (NYSE: GRA), today announced the appointment of two Massachusetts-based division presidents - Robert J. Bettacchi, as president of its Construction Products Division based in Cambridge, and Edwin L. Chesnutt, as president of its Amicon Division in Beverly.

Bettacchi, 47, succeeds Robert C. Walsh, who was recently appointed an executive vice president of Grace Specialty Chemicals Co. in New York. Chesnutt, 49, replaces Peter N. Rigopulos, a founder of Amicon, who was appointed vice president, biotechnology and separations science, of Grace Specialty Chemicals Co.

Grace's Construction Products Division manufactures waterproofing and structural steel fireproofing materials for buildings, and concrete additives used to enhance the versatility and performance of concrete, as well as insulation and corrosion-resistant building materials.

Bettacchi joined Grace in 1968 as a development analyst at the company's research headquarters based in Columbia, Md. In 1970 he began working with Grace's Letterflex printing plate business, part of Grace's Polyfibron Division, then in its early stages of commercialization. He served with Letterflex in various managerial capacities, becoming manager of sales and marketing in 1976. He joined Grace's Construction Products Division in 1979 as general manager of its Coplanar foam insulation unit and the following year was appointed business and marketing manager for the building products unit. In 1982 he was named vice president of marketing for building products, and he became vice president and general manager of the Construction Products Division's specialty materials unit in 1986.

Bettacchi was graduated from Villanova University in 1964 and resides in Lexington, Mass.

Grace's Amicon unit provides separations science, products and services to the biotechnology, pharmaceutical and medical fields worldwide.

Chesnutt, 49, joined Grace in 1964 as a process development engineer at the company's Cryovac packaging division in Duncan, S.C. He later served in various managerial positions, becoming manager of the Simpsonville, S.C. manufacturing complex in 1969. In 1976, he was appointed vice president of Cryovac and director of marketing and product planning. Chesnutt was named executive vice president and general manager of Amicon in 1989.

Grace Specialty Chemicals is the ninth largest manufacturing concern in Massachusetts and has strong historical and economic ties to the area. Five of the 13 divisions of Grace Specialty Chemicals have headquarters in Massachusetts and employ over 2,500 people in New England. The company has nine manufacturing plants and four research facilities in the Bay State and New Hampshire.

#90057p0131 02/26/1990 ~PR Newswire

BETHESDA, MD (FEB. 26) PR NEWSWIRE - Federal Realty Investment Trust (NYSE: FRT) today announced record operating results for 1989.

Funds from operations increased for the 27th consecutive year, rising 20 percent to a record $21 million ($1.43 per share) compared to $17.5 million ($1.28 per share) in 1988.

Funds from operations is defined as income before property depreciation and amortization less gains on sale of real estate. Management believes that funds from operations is an appropriate measure of the trust's operating performance because it believes that reductions for property depreciation and amortization charges are not meaningful in evaluating the operating results of the trust's income-producing real estate, which have historically been appreciating assets.

Revenues for 1989 rose to a record $82.9 million, up 22 percent from $68.1 million in 1988. Net income, including a $7.2 million gain on the sale of a property, rose to $12.0 million compared to $9.3 million in 1988, which included a gain of $3.9 million.

Steven J. Guttman, president and chief executive officer, attributed the 1989 record results to the trust's strategic development of a balanced portfolio of well located shopping centers. "Our recent acquisitions, coupled with the improved performance of our newly renovated centers and our portfolio, have provided us with steady growth and future opportunities."

Federal Realty is an equity real estate investment trust which concentrates on acquiring older shopping centers in prime locations. Trust properties are located in 10 states in the Northeast between the New York metropolitan area and Richmond, Va.

LAUSANNE, SWITZERLAND (FEB. 26) PR NEWSWIRE - The International Institute for Management Development (IMD) today announced an agreement with the General Electric Company (NYSE: GE) to conduct a three-week management training program in Eastern Europe for 47 of the company's senior managers according to Dr. Juan F. Rada, IMD director general.

Swiss-based IMD is one of the world's leading management education institutes. It emphasizes general management training for senior executives as well as for general and functional managers.

"The General Electric program," said Rada, "adds momentum to our Eastern European strategy at the same time expanding the work of the IMD business associate consortium which includes other corporations such as Digital Equipment, SKF, ASEA Brown Boveri, Montedison, Fiat and Neste. Because the demands of world competitiveness are already forcing accelerated management education in every corner of the globe, IMD plans to expand its role as a global provider of these sophisticated management development resources."

Designed to accelerate the internationalization of General Electric management, the new program will take place in July of this year beginning with a week's study at GE's Corporate Management Development Institute in Crotonville, N.Y., followed by five days at the IMD campus in Lausanne. The managers will then separate into three groups, one to spend the final

11 days in Czechoslovakia, one in Hungary, and one in Poland. During the final two days of the three-week program, the managers will debrief GE senior management back on the IMD Lausanne campus.

According to professor Yury Boshyk, a Canadian of Ukrainian descent and the man-in-charge of IMD's Eastern European relations, "The GE managers will examine global trends and impacts in Eastern Europe, methods of analyzing and assessing social, economic and political changes, and seek understanding of how business is currently conducted in those countries.

"While visiting Poland, Czechoslovakia and Hungary," Boshyk concluded, "the GE managers will benefit from personal meetings with government ministers as well as conducting actual projects at local businesses including related research and impact assessments."

Expanding on its traditional worldwide management development mission, IMD has already made a series of strategic moves toward training the new generation of senior business managers so desperately needed in the U.S.S.R. and other Eastern European countries. One example: IMD is cooperating with a recently opened management training program in Kiev where 37 managers from all over the Soviet Union are currently studying global business management.

ROY, UT (FEB. 26) PR NEWSWIRE - Iomega Corp. (NASDAS: IOMG) announced today that its Bernoulli Optical Systems Co. (BOSCO) subsidiary in Boulder Colo., has completed initial development of mass storage drive technology using indelible flexible optical media producted by ICI Imagedata.

ICI, which is based in the United Kingdom, intends to license the drive technology, often referred to as a Write Once, Read Many Times (WORM) technique, for further development and manufacturing.

According to Leon Staciokas, president of BOSCO and senior vice president of operations for Iomega, Iomega has achieved most of the technical objectives established when ICI funded the joint development venture in 1988, and that the relationship will be winding down through the rest of the year. Instead of continuing with WORM technology, Iomega will concentrate resources on other products and technologies that better fit its overall business strategy and have higher potential return on Iomega's investment.

The BOSCO operation was founded by Iomega in 1986 to investigate and

develop removable optical and other advanced storage technology. The BOSCO staff will continue in its original charter.

Iomega develops, manufactures and markets high-performance removable mass storage products. Its patented Bernoulli Technology provides unlimited data storage capability by combining the removability, transportability and security of floppy disks with the high capacity and performance of hard disks. Iomega stock is listed on the NASDAQ National Market System under the symbol IOMG.

#90057p0141 02/26/1990 ~PR Newswire

MILWAUKEE (FEB. 26) PR NEWSWIRE - Harley-Davidson, Inc. (NYSE: HDI) today reported record sales and earnings for its fourth quarter and year ended Dec. 31, 1989.

For the quarter, net sales from continuing operations totaled $201.6 million, an increase of $14.5 million (7.8 percent) over the comparable year-ago quarter. Income from continuing operations totaled $6.8 million and earnings per share was $.79, an increase of $.5 million and $.06 (8.6 and 8.2 percent) respectively, over the year-ago quarter. All prior year comparisons have been restated to reflect the discontinuance of the Parkway Distributors operation. The gain on the sale of Parkway was $3.4 million net of taxes and resulted in an additional $.39 earnings per share. An extraordinary expense of $.6 million on the write off of deferred financing and premium costs was the result of the repurchase of $11.6 million of subordinated debt and the early retirement of term debt in the fourth quarter. Net income after extraordinary items was $9.6 million or $1.11 earnings per share versus $4.8 million or $.56 earnings per share a year ago.

The fourth quarter sales increases are attributed to significant gains within the company's motorcycle and related products segment, which reported a 28.0 percent increase in sales over the year-ago quarter, Richard F. Teerlink, president and chief executive officer, Harley-Davidson Inc., said. Worldwide unit shipments of motorcycles exceeded the comparable year-ago quarter by 1,640 units.

A $17.2 million (21.5 percent) decrease in sales at the company's Transportation Vehicle segment was the result of continued softness in the recreational vehicle market, Teerlink said. Sales for the Recreational Vehicles division decreased $15.5 million, to $43.9 million, primarily due to an industrywide downturn and the shutdown of two operations in 1988 which had contributed $2.1 million in revenue during the comparable

period. Sales in the Commercial Vehicle division were down $2.0 million when compared to last year.

For the year, net sales from operations totaled $791.0 million, an increase of $81.6 million (11.5 percent) over the year-ago period. Income from continuing operations totaled $32.6 million, an increase of $5.4 million (20.0 percent) and earnings per share were $3.78, an increase of $.37 (10.9 percent) over the year-ago period. Net income after extraordinary items and earnings per share were $32.9 million and $3.81 on 8.6 million shares outstanding, versus $23.9 million and $3.00 on 8.0 million shares outstanding for the year-ago period.

Extraordinary expense items for 1989 reflect the additional cost of a $1.8 million provision for the final payment under a settlement with AMF Inc. and the write off of $1.4 million of costs associated with the early retirement of debt. The company repurchased $37.1 million of subordinated debt during 1989 and retired $18 million of term debt from the proceeds of the Parkway sale.

The 1989 sales increases are mostly attributable to a $98.2 million, or 24.7 percent, sales increase in the motorcycle and related products segment. Worldwide unit shipments of motorcycles exceeded 1988 figures by 8,409 units, or 16.6 percent.

Harley-Davidson Inc., the only American motorcycle manufacturer, produces heavyweight motorcycles and a complete line of motorcycle parts and accessories. Its Holiday Rambler subsidiary is a leading manufacturer of premium recreational vehicles, specialized commercial vehicles and a diverse range of related products. Harley-Davidson, Inc. is also a manufacturing contractor for a variety of industries, including the U.S. Department of Defense.

NEW YORK (FEB. 26) PR NEWSWIRE - A sophisticated system designed to revolutionize the time-consuming process of document assembly in law offices was introduced by legal publisher Callaghan & Co. at the Legal Tech Show here today.

Called FlexPractice, the powerful, yet easy-to-use program allows lawyers to make legal decisions and create documents at the same time. Tested and approved by the American Bar Association, FlexPractice is the only document assembly program to receive ABA approval.

FlexPractice was originally conceived and written by attorney Dennis P.

Schuler, David W. Hill and Earl Chapman, co-founders of Integrated Concepts, Inc., a Rochester, N.Y., software company. The company introduced an earlier version (FlexPractice 1.4) in 1987.

The new version (FlexPractice 2.0), greatly enhanced and updated by Callaghan and compatible with all major word processors, will be released early this year. It will be marketed under an exclusive agreement with Integrated Concepts.

The system is completely menu-driven and so simple to use that lawyers with no previous computer experience can master the process in a few minutes. FlexPractice is so fast that it can reduce the time required to create and produce a complex 70-page finished document from several days to a matter of a few hours.

As its name implies, FlexPractice allows lawyers the flexibility to use a supplied text or customize it to suit their own style and needs. The self-prompting and menu checklist features remind the users to consider all options and guarantee quality control.

Initially, FlexPractice will be made available in five areas of practice: wills and trusts, residential real estate, business organizations, personal injury, and matrimonial practice.

FlexPractice is currently written specifically for the state of New York, but can be adapted for other states.

Callaghan & Co., headquartered in Deerfield, Ill., publishes over 180 reference publications for lawyers, accountants, tax consultants and other professionals. The company is a subsidiary of The Thomson Corp.

CONTACT: John Cain, 708-383-9393, or Vernette Schultz, 708-848-6565, both of Callaghan & Co.

CAMBRIDGE, MA (FEB. 26) PR NEWSWIRE - Individual, Inc. has launched First!, an intelligent news agent for corporations in information-intensive markets. First! monitors worldwide news sources and uses artificial intelligence technology to extract only those stories that match a particular client's interests. Relevant articles are packaged into an up-to-the-minute customized report of industry news, delivered to each client daily by 8:00 a.m. via electronic mail for organization-wide redistribution on local area networks. Daily delivery via FAX is also available.

First! provides organizations, at the corporate or divisional level, with a complete solution to the current-awareness information needs of their busy managers. Via First! the company or division receives only the pertinent stores that impact their decision making process. A unique feature of the service permits the copyrighted stories to be disseminated throughout the organization on a local electronic mail network, providing for information sharing and insuring broad access to knowledge.

Individual ensures the relevance of information through the dynamic adjustment of subscriber profiles. Users fill out an initial profile form of their interests and then regularly refine this profile by simply marking stories received as relevant or not. Individual's computers take this "relevance feedback" and -- on a monthly basis -- automatically modify the profile using such advanced information refining techniques as Similarity Measurement, Relevance Tuning, and Concept Recognition.

First! is currently in use by such companies as Digital Equipment Corporation, Lotus Development Corporation, Computer Corporation of America, NEC, On Technology, and GTE. Departments utilizing the service include marketing, sales, competitive intelligence, mergers & acquistions, product line management, and the office of the CEO.

First!, Individual's introductory product, is targeted at the fast-paced high technology industry. Customized reports draw information from such news sources as Business Wire, Kyodo (Japan Economic and High Tech Wire), PR Newswire, Reuters, and UPI, to assure worldwide coverage. When more than one source carries the same news, First! delivers only the version most appropriate to the specific profile.

Individual , Inc., based in Cambridge, Mass., was established in 1988 to build and operate an information refiner, filtering and customizing information from a broad spectrum of electronic sources. The company applies advanced technologies to spread the power of knowledge to business professionals worldwide.

PORTLAND, OR (FEB. 26) PR NEWSWIRE - Bioject Medical Systems Ltd. (NASDAQ: BJCTF) today received a commitment from a Great Britain-based institutional investment fund to purchase 397,614 units for an aggregate purchase price of $500,000, Bioject announced. Each unit will consist of one common share and a two-year warrant to purchase one common share for $1.57. The proceeds will be used for activities associated with the launch of its first product, the Biojector(R) needleless syringe.

Bioject is also continuing discussions with domestic and European funding institutions for additional equity financing. Five-year-old Bioject has never incurred any long-term debt.

Manufacture of the Biojector(R) should begin at Bioject's Portland facility within the next month. Sales efforts are under way, and the company expects to report receipt of its first orders this quarter.

The Biojector(R) Jet Injection System is designed to deliver medication subcutaneously or intramuscularly without needle puncture of the skin. A carbon dioxide gas cartridge powers the unit, forcing medication from a disposable sterile plastic ampule at high speed. Because the Biojector(R) has no needle, health care workers face only minimal risk of needlestick injury and subsequent infection.

PITTSBURGH (FEB. 26) PR NEWSWIRE - Genix Enterprises Inc. has been awarded a five-year, multimillion-dollar computer operations outsourcing contract by Bailey Controls, a Cleveland-based manufacturer of process control equipment.

Under the contract, Genix will provide Bailey Controls with all required mainframe computer capacity, systems software, disk and tape storage, data

telecommunications network management and technical resources necessary to support its business. Bailey will continue to conduct all applications development and maintenance functions with its own staff.

Mainframe services for Bailey Controls were previously handled by Power Computing Company of Dallas.

Bailey officials say the agreement with Genix will enable the company to upgrade its technology platform or take advantage of the low cost incremental processing capacity available through outsourcing.

According to Cecil Sexton, Genix Enterprises' senior vice president of marketing and sales, outsourcing allows corporations to eliminate the distractions of the generic task of running the computers and concentrate instead on the strategic aspects of integrating their business and information technology strategies.

Bailey Controls is a world leader in the supply of controls, instrumentation and computer systems for chemical refining, electric power generation, pulp and paper, industrial automation and shipboard and offshore applications.

Genix Enterprises is a wholly owned information services subsidiary of National Intergroup Inc. (NYSE: NII), a multibillion-dollar diversified distribution and services firm. Genix Enterprises' principal operating unit is Genix Corp., which operates a large computer processing facility in suburban Pittsburgh, through which it provides computer operations outsourcing services to customers in a wide variety of industries.

LOS ANGELES (FEB. 26) PR NEWSWIRE - Security Pacific Corp. (NYSE: SPC) announced today that Donald K. Johnson, vice chairman of Burns Fry Limited has been appointed president and chief executive officer of Security Pacific Alliance Limited, the holding company which will be responsible for managing Security Pacific's international network of investment banking and brokerage affiliates. The chairman of Security Pacific Alliance Limited will be David R. Lovejoy, vice chairman of Security Pacific Corp.

According to Lovejoy, "The appointment of Don Johnson as president and chief executive officer of Security Pacific Alliance Limited is a major step in advancing the goals of the Alliance Project. Don brings to this post extensive experience and knowledge of the domestic and international securities industry as the former president of Burns Fry and the past

chairman of the Investment Dealers Association of Canada. Don's appointment will enable us to strengthen our business development activities and tighten our focus on leveraging the resources of our international securities affiliates for executing cross-border M&A and financing transactions, cross-marketing of equity and debt securities and related products, satisfying the clients' needs of the entire Security Pacific organization, and increasing profit opportunities."

Johnson joined Burns Fry in 1963 as a securities analyst and subsequently served in a variety of increasingly important posts. In 1982, he was appointed executive vice president and in 1984 was named president of Burns Fry. He was appointed to his present post as vice chairman in November 1989.

The Alliance Project was established in early 1989 to strengthen the profitability of Security Pacific's international securities subsidiaries through the creation of an international network of strong local investment banking firms affiliated with Security Pacific Corp.

The strategic plan for the Alliance provides for Security Pacific Alliance Ltd. to hold a 49 percent interest in each of the investment banking affiliates which, initially, will be Burns Fry in Canada, Hoare Govett in the United Kingdom, and Hoare Govett Asia in the Pacific Rim. The employees of each investment banking firm in turn will own a minority interest in Security Pacific Alliance Ltd.

Responsibilities will be divided as follows: Burns Fry for the development of the North American investment banking business, Hoare Govett for the United Kingdom and Europe, and Hoare Govett Asia for Southeast Asia. The plan also includes having a strong Japanese partner as part of the ownership of Security Pacific Alliance Ltd. The balance of the strategic plan is expected to be completed over the next two years.

Security Pacific Corporation, the fifth-largest bank holding company in the United States with assets of $84 billion, has 1,500 offices in 46 states and 27 countries.

DETROIT (FEB. 26) PR NEWSWIRE - Du Pont Automotive Products is committing new technology and resources to the auto industry's highest priority areas to better serve customer needs and increase sales, according to company executives.

At a media briefing during the 1990 Society of Automotive Engineers Congress and Exposition in Detroit, Ross W. Fasick, group vice president, reported that Du Pont's automotive-industry sales were $3.0 billion in 1989, up 7 percent from 1988. Because of its wide range of lightweight materials that improve industry productivity, Du Pont's automotive market penetration increased, even as the market softened, in 1989, he said.

Fasick cited several business highlights over the past year, including: -- A $1 billion investment over the next decade to build plants for nylon and its ingredients to serve growing industry needs in the Asia- Pacific region.

-- The extension of its global position through a joint venture with ICI for finishes in Europe and a small Soviet finishes joint venture in Moscow for refinishing diplomatic vehicles.

-- The licensing of Showa Denko in Japan -- in addition to existing agreements with Kuhlman Plastic Group of the United States, Dyno Industries of Finland and Mitsui Petrochemical Industries Ltd. of Japan -- for the production of high-quality plastic fuel tanks manufactured with Du Pont's "Selar" RB barrier resin.

-- The aligning of Du Pont developmental priorities with key auto industry issues -- safety, reliability, energy and the environment.

To address these industry issues, Du Pont has stepped up its developmental efforts for exterior body, safety, fuel, air induction, air conditioning and electromechanical systems, according to Joseph A. Miller, general director - automotive products.

As part of this initiative, Du Pont introduced a new composite material, "Bexloy" K-550 thermoplastic polyester, for vertical auto body panels that can withstand temperatures of 400 degrees Fahrenheit in E-coat primer ovens and be used in assembly line production at no economic penalty compared to steel panels.

According to Miller, Du Pont has invested $10 million in the fully recyclable composite panels that were developed and proven for commercial production in partnership with Chrysler Motors Corp. They are corrosion and impact resistant, increase vehicle fuel economy and weight savings and provide greater design flexibility.

Du Pont Automotive Products offers more than 100 product lines to automakers, worldwide, in plastics and advanced composites, elastomers, finishes, fibers, fabricated products, electronics, specialty chemicals and lubricants.

CHICAGO (FEB. 26) PR NEWSWIRE - Daniel P. Casey has been elected executive vice president and Lawrence G. Rogna has been elected senior vice president by the board of directors of Gaylord Container Corporation, according to Marvin A. Pomerantz, chairman and chief executive officer.

Previously, Casey was senior vice president-financial and legal affairs for Gaylord. Prior to joining Gaylord in 1987, he served as executive vice president-law for Lone Star Technologies, Inc., for one year, and for 17 years he was employed by Northwest Industries, Inc. in various financial positions, the last of which was vice president and treasurer.

Rogna joined Gaylord in 1988 as vice president-human resources. Previously he was employed for seven years by Rohr Industries, Inc. where he served as vice president-human resources during his last five years with that company.

Gaylord Container Corporation is a major national manufacturer and distributor of corrugated containers, containerboard, unbleached kraft paper, multiwall bags and through a joint venture, grocery bags and sacks.

CLEVELAND (FEB. 26) PR NEWSWIRE - Case Western Reserve University and the IBM Corporation (NYSE: IBM) have announced a joint effort to develop a prototype computer-based library information delivery service that will give faculty and students immediate access to written, visual and audio information at their individual workstations.

Under the terms of the agreement, IBM will donate approximately $5 million in equipment and programming to CWRU. The university will provide the staff, facilities and support services necessary to develop the service. IBM will also donate $75,000 to equip an imaging center that will record the pictures, graphs and drawings that will be available on the system.

The university will provide the staff, facilities and support services necessary to develop the service at a cost of $1.6 million. About $700,000

of the university money comes from a 1963 bequest to the university from Mrs. Martha Holden Jennings in honor of her husband, Andrew R. Jennings. Jennings was a partner at IBM with company founder Thomas Watson.

The IBM equipment will be hooked into the university's existing CWRUnet system by August of 1990, according to Vice President for Informtion Services Raymond Neff, and along with CWRUnet represents a step towards a level of library automation found nowhere else in the country.

According to IBM vice president Carl Conti, the project represents a chance to gain knowledge in the usage of computer technology in library services.

Initially, the new service will include the university's collection of musical scores and recordings, the histological instruction library including the collection of biological tissue slides, and the medical reference library that includes anatomical drawings, photographs and graphs.

A student, for example, could follow the score of a recording while listening to it, or even change the score electronically and have the music conform with stereo-like clarity. State-of-the-art graphic displays would allow side-by-side comparison on healthy and diseased tissues, or any combination of tissues and medical information.

The study will take approximately two years to complete. Project director Dennis Risen said since the study will cover new areas and introduce new capabilities, there will be a constant monitoring of results and evaluation of progress as each phase of the study is completed.

The new equipment and programming represent a first step in the building of the "Library of the Future," and will advance the CWRU plan of providing students with an unparallelled electronic learning environment, according to CWRU President Agnar Pytte.

VALLEY FORGE, PA (FEB. 26) PR NEWSWIRE - The Vanguard Group of Investment Companies today announced stocks splits for two of its member funds -- PRIMECAP Fund and Vanguard Small Capitalization Stock Fund.

PRIMECAP Fund declared a four-for-one stock split in the form of a 300 percent stock dividend. Vanguard Small Capitalization Stock Fund declared a three-for-one stock split in the form of a 200 percent stock dividend.

The dividends will be paid Feb. 28, 1990, to shareholders of record on Feb. 23.

In taking this action, the funds' directors cited the current high price of funds' shares relative to the share prices of other mutual funds, which makes it difficult for shareholders to compare changes in the funds' net asset values with those of comparable funds.

While the stock split will result in a decline in the share prices of both Funds, shareholders will receive additional shares so that the value of their investments will not be affected. The stock dividend is not considered taxable for Federal, state, or local income tax purposes.

The Vanguard Group of Investment Companies, headquartered in Valley Forge, has net assets of more than $48 billion and manages 56 investment portfolios owned by two million individual and institutional shareholders.

This communication is neither an offer to sell nor a solicitation of an offer to buy fund shares. Such as offer is made by prospectus only, copies of which may be obtained from The Vanguard Group. The prospectus should be read carefully by individuals before they invest or send money. The prospectus contains more complete information on advisory fees, distribution charges, and other expenses.

#90057p0179 02/26/1990 ~PR Newswire

LOS ANGELES (FEB. 26) PR NEWSWIRE - A U.S. stockholder in one of Japan's largest banks filed a lawsuit today against Tokyo-based Saitama Bank Ltd. and its directors claiming the defendants breached their fiduciary duty to stockholders, wasted and mismanaged the bank's assets and conspired to permit and commit illegal transactions.

The lawsuit was filed in the U.S. District Court, Central District of California by Los Angeles businessman Robert Wang. It is believed to be one of the few cases in which a U.S. investor has sought relief against

directors of a Japanese bank in U.S. courts. Saitama Bank has offices in Los Angeles, New York, Chicago and Dallas. Its shares are traded on the over-the-counter market.

The case is expected to raise some unusual issues about the responsibilities of the directors of Japanese corporations to their international stockholders. "In light of the recent scandals involving the Japanese stock market, international investors should take a closer look at the rules governing the conduct of corporate directors in Japan and how the laws regulating that conduct are -- and in many cases, are not -- enforced," said Wang.

The lawsuit cites an example of the alleged illegal activities of the directors of Saitama Bank. It describes an April 18, 1989 incident in which Wang says the directors authorized Saitama Bank to purchase 10 million shares in Janome Sewing Machine Industrial Co. at a price that greatly exceeded its actual value. The stock was purchased from Koshin, a Japanese corporation which is Janome Sewing Machine Industrial Co.'s single largest stockholder, through TOA Finance. The lawsuit states that TOA Finance is associated with, controlled and financed by Saitama Bank.

The suit states that the payment of an inflated purchase price for the shares of Janome Sewing Machine Industrial Co. reduced the assets of Saitama Bank to the detriment of the bank and its shareholders and violated both Japanese and California laws. In the suit, Wang seeks to discover the motivation for the transaction and to determine if any personal benefits were received by the directors of Saitama Bank as a result of the transaction.

"Saitama Bank has significant operations and stockholders in the United States," said Wang. "As Saitama expands the scope of its international business, it is important that all investors be treated fairly and the company operates within the law, not above it." Wang purchased 1,000 shares of Saitama Bank stock April 25, 1989 and later learned of the inflated nature of the price paid for the Janome stock.

"I hope not only to recover damages for Saitama Bank for the misuse of Saitama Bank funds, but also to set an example for directors of international corporations. They must learn to abide by the law and be held accountable for any illegal or inappropriate activities," Wang said.

In addition to the Janome incident, the lawsuit cites other instances in which Saitama Bank and its directors allegedly violated Japanese law. These allegations include violations of anti-trust law and failure to report relationships among Saitama Bank, Janome and TOA and another Saitama subsidiary as required under the Japanese Securities and Exchange Law.

The lawsuit, which was filed on Wang's behalf by the Los Angeles law firm of Haight, Brown & Bonesteel, seeks unspecified compensatory and punitive damages from Saitama Bank and its 22 directors.

#90057p0181 02/26/1990 ~PR Newswire

DALLAS (FEB. 26) PR NEWSWIRE - Dallas-based United Medicorp, Inc. (NASDAQ: UMCI) announced the signing of an agreement with GE Capital which allows UMC to initially purchase up to $160 million of medical insurance claims annually in conjuction with UMC's medical insurance claims processing and collection program for hospitals, clinics and physicians.

United Medicorp brings together service expertise of Andersen Consulting, GTE Health Systems and Sears Business Centers to offer the latest in medical electronic claims processing and collection services together with advance funding of 45 percent to 80 percent of the expected insurance payment to the health care provider. This payment is made within seven business days of processing the claim, dramatically improving cash flow for the hospital and physician.

United Medicorp's program is available for both newly produced claims, as well as claims that have been previously submitted to insurance carriers but remain unpaid.

The benefits of the United Medicorp system include lower administrative overhead, reduced accounts receivable and improved cash flow.

United Medicorp earns revenues by charging clients a fee based on a percentage of claim amounts actually collected. Computer hardware and software are provided at no additonal cost to the customer, along with computer installation, training and maintenance.

G. Ray Miller, United Medicorp chairman and chief executive officer, said, "The medical claims processing and collection field has been slow to respond technologically to improve its timeliness and cash management techniques. Our research indicates that 2,000 claims per minute are filed in the United States, approximately 96 percent on paper. The capabilities exist to dramatically improve the process, and United Medicorp is unique in filling the niche because of its total capabilities concept: electronic claim processing, advance funding, claims management and collection, and the provision of hardware and software.

United Medicorp looks forward with enthusiasm to becoming a major ally of both the health care and insurance industries by becoming the financial and technological interface between them."

BILLERICA, MA (FEB. 26) PR NEWSWIRE - Optrotech Ltd. (NASDAQ: OPTKF) today announced that following agreement in principle which was previously announced, it has signed a final agreement with Claridge Israel Inc. (Canadian Corporation) and Elron Electronic Industries Ltd., Optrotech's major shareholder, regarding a $16 million (U.S.) investment by Claridge in Optrotech.

Pursuant to this agreement, Claridge will purchase $6 million worth of new shares at $9 per share and $10 million convertible notes yeilding 4 percent annual interest with an $11 conversion price with an average term of five years. In addition, Claridge may not sell shares or notes of Optrotech for a period of two years.

On a fully diluted basis, after full conversion, Claridge will own approximately 22 percent and Elron approximately 31 percent of Optrotech's capital.

The agreement's implementation is subject to final approval of shareholders expected mid-March 1990.

Jonathan Kolber, CEO of Claridge Israel, Inc., said that Claridge looks

forward to its involvement with Optrotech and considers Optrotech the world leader in automated inspection and design systems for the Printed Circuit Board industry.

Optrotech Ltd., founded in 1981 by Dr. Shlomo Barak and a team of scientists, and Elron Electronic Industries Ltd., is a world leading manufacturer of integrated solutions for automation of the Printed Circuit Board (PCB) industry. It was the first company to supply Automated Optical Inspection (AOI) equipment based on advanced vision and artificial intelligence technologies.

PORTLAND, OR (FEB. 26) PR NEWSWIRE - Bioject Medical Systems Ltd. (NASDAQ: BJCTF) today received a commitment from a Great Britain-based institutional investment fund to purchase 397,614 units for an aggregate purchase price of $500,000, Bioject announced. Each unit will consist of one common share and a two-year warrant to purchase one common share for $1.57. The proceeds will be used for activities associated with the launch of its first product, the Biojector(R) needleless syringe.

Bioject is also continuing discussions with domestic and European funding institutions for additional equity financing. Five-year-old Bioject has never incurred any long-term debt.

Manufacture of the Biojector(R) should begin at Bioject's Portland facility within the next month. Sales efforts are under way, and the company expects to report receipt of its first orders this quarter.

The Biojector(R) Jet Injection System is designed to deliver medication subcutaneously or intramuscularly without needle puncture of the skin. A carbon dioxide gas cartridge powers the unit, forcing medication from a disposable sterile plastic ampule at high speed. Because the Biojector(R) has no needle, health care workers face only minimal risk of needlestick injury and subsequent infection.

KILLINGTON, VT. (FEB. 26) PR NEWSWIRE - S-K-I Ltd. (NASDAQ: SKII) today reported second quarter earnings of $3,918,000, or 69 cents per share. In last year's second quarter the company earned $4,768,000, or 84 cents per share, of which 16 cents per share represented a non-recurring gain from the recovery of certain tax credit reserves.

Revenues for the quarter were $38,583,000, down 2 percent from 1989. For the first six months of fiscal 1990, S-K-I's net income was $31,000 or 1 cent per share on revenues of $43,335,000 compared to earnings of $1,315,000 or 23 cents per share with revenues of $44,435,000 the previous year.

Preston Leete Smith, president and chief executive officer of S-K-I Ltd. noted, "We believe business levels at our Vermont areas continue to reflect the region's weak economy. Business has been slower than anticipated in California because Bear Mountain has not had the chance to establish the reputation that our Vermont areas enjoy."

Smith added, "Although business volume remains soft, our strong financial

and operation control systems have been used to selectively reduce expenses. If the tax credit received last year is eliminated, our second quarter earnings are up slightly."

ELGIN, IL (FEB. 26) PR NEWSWIRE - Donald W. Brinckman, president and chief executive officer of Safety-Kleen Corp. (NYSE: SK), said that the company has now acquired the remaining 20 percent of Breslube Holding Corp., having acquired an initial 80 percent interest in that business in May 1987.

Headquartered near Toronto, in Breslau, Ontario, Breslube is the leading re-refiner of used lubricating oils in North America. Breslube collects used lubricating oils from auto garages, car dealers and other businesses in Canada and the United States. The oil is either re-refined or processed into fuel for use in industrial furnaces.

In 1989, Breslube collected approximately 80 million gallons of used oil. Breslube's annual revenues are approximately US$58 million. Brinckman said "Purchasing the remaining 20 percent interest of Breslube reaffirms Safety-Kleen's commitment to the development of a successful re-refined lubricant business in North America."

Located in Elgin, Safety-Kleen Corp. is the world's largest provider of parts cleaner services and related solvent recycling. The company also collects a variety of hazardous and quasi-hazardous liquid wastes from automotive repair outlets, industrial plants, dry cleaners and other waste generators. The fluids are recycled or re-refined for re-use or blended into fuels for use in industrial furnaces or cement kilns.

AUSTIN, TX (FEB. 26) PR NEWSWIRE - Chrysler Motor Company has presented Motorola's Microcontroller Division with its 1989 Pentastar Award. Each year the award, Chrysler's highest honor, is presented to select suppliers who have demonstrated a best-in-class performance in Chrysler's Supplier Rating System. The Pentastar recognizes excellence in the areas of quality, price, delivery and technology.

In presenting the award to Motorola in Austin on Feb. 2, Tony Watt, manufacturing manager of Chrysler's Acustar Huntsville, Ala., plant, elaborated on the reasons for Chrysler's choice of Motorola's Microcontroller Division to receive this prestigious award: "For the decade or more that Chrysler and Motorla's Microcontroller Division have worked together, we have found the consistency and quality of their products and their price/performance ratio to be excellent." Watt continued: "They are willing to work side by side with us to deliver what our stringent requirements demand."

In receiving the award, Gary Daniels, Microcontroller Division general manager and corporate vice president, dedicated the award to the Motorola employees around the world for their commitment to "quality, on-time delivery, technology leadership and manufacturing excellence." "Winning the Pentastar Award reconfirms our dedication to be the best," said Daniels. According to Daniels, Motorola's new $500 million wafer fabrication facility currently under construction in Austin "will manufacture the next generation of electronics that will redefine automotive performance."

Chrysler uses Motorola microcontrollers in a variety of applications, including its electronic engine control and transmission control modules. In addition, Motorola's microcontrollers are at the heart of the airbag diagnostic system found in every U.S.-made Chrysler.

Automotive semiconductors are a $2 billion-a-year industry, and according to industry analysts M.H. Kitchen & Associates, Motorola is the leading supplier with a 24.5 percent share. By 1993, the world market for automotive chips is projected at $10 billion. Motorola is also the world leader in the sale of 8-bit microcontrollers and the first manufacturer of a 32-bit microcontroller -- the 68332 -- announced in 1989.

Many of today's innovative, industry-leading products are powered by Motorola. As America's largest supplier of semiconductors, Motorola has a balance portfolio of over 50,000 devices. Motorola's Microprocessor Products Group (Austin, Texas) has established industry standard architectures and design methodologies including the 68HC05 and 68HC11 microcontrollers; the CSIC (customer specified integrated circuit) design methodology; the 68000 and 88000 families of microprocessors; and the

56000 family of digital signal processors.

MIAMI (FEB. 26) PR NEWSWIRE - Edward C. King, Jr., president and chief executive officer of Enviropact, Inc. (AMEX: ENV) announced that Enviropact has opened an office in Greenville, S.C., and has employed Alan J. Lehocky to manage the new region.

According to King, "Mr. Lehocky's 22 years professional experience, with specialization in hydrogeology and well design, brings Enviropact proven expertise in the solution of geologic, environmental, geotechnical and engineering problems." Lehocky is a member of the American Institute of Professional Geologists and a registered Hydrogeoligist in South Carolina.

King said, "Lehocky's managerial and professional experience will enable Enviropact to compete quickly and effectively in the favorable but highly competitive five-state market that makes up the company's new region." He said the region includes: Virginia, Tennessee, Georgia as well as North and South Carolina.

Enviropact offers a variety of environmental services, including environmental consulting and assessments, groundwater and soil remediation and analytical laboratory services. The company has offices in Miami, West Palm Beach, Orlando, Tampa and Jacksonville, Fla.; Yonkers, N.Y.; and Corpus Christi, Texas.

LAS VEGAS, NEV (FEB. 26) PR NEWSWIRE - On Feb. 22, 1990, in response to an ongoing investigation of its earnings level, Nevada Power Company (NYSE: NVP) executed a stipulation with the Public Service Commission staff and the Office of Consumer Advocate to reduce its general rates by $8.5 million effective April 1, 1990. It was also agreed that none of the parties to this stipulation will seek any adjustment to general rates prior to Aug. 1, 1990.

The stipulation also allows the company, beginning April 1, 1990, to

increase rates to collect an additional $25 million annually of deferred fuel and purchased power expenses.

The rates under the foregoing stipulation will be effective April 1, 1990, subject to the approval of the Public Service Commission.

#90057p0203 02/26/1990 ~PR Newswire

BAY SHORE, NY (FEB. 26) PR NEWSWIRE - Lumex, Inc. (AMEX: LUM) today reported increased sales and earnings for 1989. Net income tripled to $2,735,000, or $.65 per share, compared to $911,000, or $.22, last year. Sales were $87,391,000, a 10.2 percent increase from the prior year.

For the fourth quarter of 1989, Lumex earned $1,083,000, or $.26 per share on sales of $23,837,000 compared to earnings of $541,000, or $.13 per share, on sales of $22,529,000 for the same period the prior year.

The company's Cybex fitness products were the largest contributor to 1989 sales growth. Strong demand continues from the domestic medical and commercial fitness markets and there has been an increasing acceptance in the growing international markets as well.

New product offerings having applications to both the rehabilitation and fitness markets were introduced in June 1989.

The new Cybex Metabolic (MET) Systems designed for use in physical therapy cardiac and pulmonary testing and rehabilitation and general fitness programs have been enthusiastically received. The new MET systems feature three types of resistance; a color monitor for vivid graphics and VCR and TV signals; and computer programming for exercise profiles, exercise testing and competitive scenarios.

Cybex also introduced a new series of isokinetic extremity testing and rehabilitation equipment. The 350 series featured a more compact machine and several more competitively priced units.

Isokinetic back testing and rehabilitation machines are now in use in over 300 facilities. Reports on clinical results continue to be extremely favorable. Domestic sales of these and the extremity rehabilitation units have been impacted by capital cost containment considerations and by competition. Exports sales, however, increased sharply.

The Lumex Division's Ortho-Biotic seating line, and its Akros line of pressure management products also recorded consistent strong growth during

the year.

Awareness is growing of how effective Akros products are in the prevention and treatment of pressure sores, creating an increasing demand for these products. Exclusive distribution agreements covering Akros specialty mattress products for the operating room and intensive care units has been a positive addition to the product line in the fourth quarter, and important to further future growth.

The Lumex Division introduced a record number of new products during the final quarter of 1989. A complete line of competitively priced, durable stainless steel wheelchairs was added, strengthening the division's position in the long-term care market. The distribution rights to this line was acquired in November 1989 from Contemporary Health Services, California.

Additional new products for the long-term care market included a line of shower chairs, stretchers and related equipment constructed of PVC tubing, or high quality, furniture grade plastic tubing, nursing home beds, and bedroom furniture.

CHICAGO (FEB. 26) PR NEWSWIRE - Centel Corp. (NYSE: CNT) announced today that is has reached tentative agreements to acquire the non-wireline licenses to provide cellular communications service to four rural service areas in New Mexico. The four areas have a total population of 535,000. Terms of the agreements were not disclosed.

A lottery for the six rural service areas in New Mexico was conducted by the Federal Communications Commission in 1988. Centel has reached tentative agreements to acquire RSAs 1, 2, 4, and 5. The acquisitions are subject to FCC and other regulatory approvals.

RSA 1 will be acquired from an individual construction permit holder and is located in northwest New Mexico. This area includes the communities of Farmington and Gallup, along with a section of Interstate 40, and has a population of approximately 229,000.

The second RSA, located in the northeast corner of the state, also will be acquired from an individual construction permit holder and has a population of 25,000. Interstate 25, which connects Albuquerque, N.M., with Denver, is located in this RSA.

RSA 4, to be acquired from an individual construction permit holder, covers the east central section of the state and includes Interstates 40 and 25 and the New Mexico communities of Santa Fe, Los Alamos and Las Vegas. The area has a population of approximately 230,000.

RSA 5, in the southwest corner of the state, will be acquired from a corporate construction permit holder and has a population of 51,000. The area includes Interstate 10 which connects El Paso, Texas, with Tucson, Ariz., and borders Mexico for about 125 miles.

Centel currently provides cellular communications service in 44 markets, with interests in 14 others, with a combined population of more than 14.2 million, adjusted for percentage of ownership. Including New Mexico, Centel also has interests in 29 RSAs with a population of 1.2 million.

In addition to its cellular operations, Chicago-based Centel Corp., which had 1989 revenues of $1.19 billion, provides local exchange telephone service in nine states through nearly 1.6 million access lines and supplies electric power to nearly 136,000 customers in two states. The company currently is seeking bids for its communications systems and information systems units, which market, design and install advanced telecommunications and data systems, and has reached a tentative agreement for the sale of Centel Federal Systems.

HARTFORD, CT (FEB. 26) PR NEWSWIRE - Magellan Petroleum Corporation (NASDAQ: MPET) said today that proved, recoverable reserves at the Palm Valley gas field, in central Australia's Amadeus Basin, are now estimated at 680 billion cubic feet by Canadian consultants, more than doubling the 1985 estimate of 325 bcf.

The new figure is the result of a lengthy evaluation of the field's production history and other data by Servipetrol Ltd., a Calgary-based reservoir engineering firm headed by Roberto Aguilera, an internationally recognized authority on fractured reservoirs.

THe Aguilera report further concludes that proved gas-in-place now amounts to 845 bcf -- as compared to 379 bcf in the 1985 study -- with an additional 150 bcf of gas-in-place categorized as probable. It also confirms that the matrix sandstone reservoir, which contains the bulk of the stored gas, is replenishing the gas that is being produced from the fracture system, Magellan said.

As adjusted for production to date (30 bcf) and contractual obligations,

Palm Valley's proved, recoverable, uncommitted reserves now amount to 458 bcf, which, -- when added to the uncommitted gas from the nearby Mereenie field -- give the Amadeus Basin more than 700 bcf of proved reserves available for other markets, a Magellan spokesperson said.

Potential new markets for Amadeus gas, at present, are the Mt. Isa Mines complex in western Queensland and the Nabalco alumina refining plant at Gove. Negotiations with both parties are continuing, the spokesperson said, noting that the indicated demand in each case is between 14 and 21 bcf annually.

Magellan has a 26 percent net interest in the Palm Valley field, or about a 167 billion cubic feet of the field's proved, recoverable reserves as adjusted for production, which is equivalent to 28 million barrels of oil.

#90057p0215 02/26/1990 ~PR Newswire

CHICAGO (FEB. 26) PR NEWSWIRE - Norwest Mortgage, Inc. and the Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) today announced a $2 billion agreement to sell and exchange fixed-rate and adjustable-rate home mortgages originated nationwide over the next 12 months.

The companies said the agreement will provide financing for approximately 24,000 home mortgages, based on the $83,000 average size of the mortgage loans Fannie Mae financed in 1989.

Norwest Mortgage, the wholly owned mortgage banking subsidiary of Norwest Corporation (NYSE: NOB), Minneapolis, originates home mortgages nationwide. The mortgages, which Norwest Mortgage will sell for cash or exchange for Fannie Mae Mortgage-Backed Securities (MBS), will be primarily new originations.

The commitment was announced here by John R. Hayes, senior vice president of Fannie Mae's Midwestern Regional Office.

"This agreement demonstrates the strong commitment of Norwest Mortgage, one of Fannie Mae's largest Midwestern-based customers, to meet the needs of home buyers all over the country for affordable mortgage money," Hayes said. "We are pleased that Norwest Mortgage has chosen to work with us."

Norwest Mortgage President Mark Oman said: "This commitment will allow Norwest to continue our growth plans in 1990 -- more locations, more mortgage professionals, more assistance to Realtors, and more importantly, more service to American home buyers. We are delighted that Fannie Mae shares this vision with us."

Norwest Mortgage is a wholly owned subsidiary of Norwest Corporation, a $24 billion diversified financial services organization providing investments, insurance and banking through more than 1,090 offices in 45 states and internationally. Norwest Mortgage currently has more than 170 locations in 38 states.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company and the nation's largest investor in home mortgages.

DALLAS (FEB. 26) PR NEWSWIRE - Royal International Optical Corp. (NYSE: RIO) announced today that U.S. Vision Inc. has received a financing commitment which, subject to certain conditions, is sufficient to consummate the previously announced merger between Royal and U.S. Vision. The delivery of this commitment to Royal satisfies U.S. Vision's obligation under the merger agreement to provide satisfactory evidence of financing to Royal before today.

The consummation of the merger remains subject to certain conditions, including the approval of Royal's shareholders. In the transaction, holders of not more than 80 percent of Royal's common stock who so elect will receive $12.50 for each Royal share, and holders who do not elect to

receive cash will receive one share of common stock of the resulting corporation for each share of Royal stock. If holders of more than 80 percent of the Royal shares elect to receive cash, then all shares electing cash will be exchanged for a pro rata combination of cash and shares of stock of the resulting corporation. Former Royal stockholders will own 25 percent of the common shares of the resulting corporation. Management of Royal and U.S. Vision expect the merger to be completed during the second quarter of 1990.

U.S. Vision Inc. is a privately held optical retailer based in Glendora, N.J., and operates 225 retail optical stores in 20 states. Royal operates 657 retail optical stores in 36 states and also manufactures, imports, and distributes optical frames. The company resulting from the merger would continue as a public company under the name Royal International Optical Corp. and would operate more than 850 retail optical stores in over 40 states.

#90057p0218 02/26/1990 ~PR Newswire

NEW YORK (FEB. 21) PR NEWSWIRE - Monsanto Chemical Company and Vista Chemical Company (NYSE: VC) have formed a strategic alliance to develop styrenic- and polyvinyl chloride (PVC)-based alloys and polyblends, the companies announced today.

This alliance supports Monsanto's objective of developing new products and opening new markets via strategic cooperative efforts. Through this strategic alliance, Vista will broaden its customer base even further as a full-service supplier of PVC and other related compounds, with a wider variety of products moving into highly specialized, value-added markets.

"The alliance between Vista and Monsanto capitalizes on strengths of each company," said John J. Uihlein, manager of new business development at Monsanto. "Vista is able to benefit from Monsanto's sophisticated styrenics and alloy technology, while Monsanto, on the other hand, is able to profit from Vista's expertise and manufacturing capabilities in PVC."

"Vista will be the exclusive manufacturer of alloys and polyblends that evolve from this alliance," noted Rick Flammer, Vista's vice president of polymers. Vista, headquartered in Houston, is one of the nation's leading producers of PVC.

All products resulting from the alliance will be marketed independently by each company. Uihlein believes that market-driven alliances and other similar ventures may dominate alloy development strategies entering the 1990s.

The alliance has already produced a new flame retardant alloy to be marketed by Monsanto as Triax CBE1/41, an extension of its broad line of Triax alloys. This alloy targets business machine enclosures and combines Vista's PVC with ingredients from Monsanto's high-heat acrylonitrile butadiene styrene (ABS) family.

Monsanto Chemical Company is a unit of Monsanto Company (NYSE: MTC). The company's plastics division is a leading provider of performance plastics to the automotive, lawn and garden, medical, houseware and business machine enclosure markets.

Vista Chemical Company is a major integrated producer of commodity and specialty chemicals, including surfactant intermediates, PVC resins and compounds and industrial specialty chemicals.

CLEVELAND (FEB. 26) PR NEWSWIRE - The Sherwin-Williams Co. (NYSE: SHW) and Meredith Corp. (NYSE: MDP) jointly announced one of the most extensive media and merchandising agreements ever reached between an advertiser and a single media company.

The goal of the agreement: to align Sherwin-Williams home decorating and improvement products with the strength of Meredith products in reaching the home and family market. The result is a one-of-a-kind marketing partnership designed to dramatically increase Sherwin-Williams' market share. The partnership utilizes a unique combination of Meredith subscription magazines, including Better Homes and Gardens magazine, Special Interest Publications, books, video, research, and real estate operations.

The heart of the partnership program is the media schedule, which includes extensive advertising in Better Homes and Gardens, Country Home, Metropolitan Home, Traditional Home, and Midwest Living magazines, as well as eight Meredith Special Interest Publications.

Supplementing the advertising program will be a series of in-store displays and year-round promotions. One promotion will offer Meredith do-it-yourself videotapes as premiums through Sherwin-Williams' retail stores. Other promotions will involve Meredith books as self-liquidating premiums.

Additionally, the Better Homes and Gardens Real Estate Service will develop a Sherwin-Williams home improvement magazine that will focus on enhancing homes to increase their resale value or to simply improve the home living environment. The magazine will be distributed through the Better Homes and Gardens Real Estate Service, a 650-member network of residential real estate firms, and through Sherwin-Williams stores.

Meredith Custom Marketing manages Meredith's Magazine Group-buying opportunities and will customize any combination of magazines and merchandising promotions for clients.

Meredith Corporation, headquartered in Des Moines, Iowa, is a Fortune 500 diversified media company involved in magazine and book publishing, television broadcasting, real estate marketing and franchising and commercial printing.

Sherwin-Williams, headquartered in Cleveland, Ohio, is a Fortune 200 company which operates 1,900 stores serving consumers and professional painters in the continental U.S.

Wyse Advertising is an independent, $125 million agency with offices in Cleveland and New York.

DETROIT (FEB. 26) PR NEWSWIRE - Citing improved financial conditions, better performance in key areas, and the successful resolution of major operational and financial uncertainties, the board of directors of Detroit Edison Company (NYSE: DTE) today raised the dividend for the company's common stock to an annual rate of $1.78 from $1.68.

The board declared a quarterly dividend of 44.5 cents per share, payable April 15, 1990, to shareholders of record as of March 15, 1990. Previously the quarterly dividend was 42 cents.

Walter J. McCarthy Jr., chairman and chief executive officer, said Detroit Edison was among the nation's top-performing utilities in 1989, realizing a 56-percent increase in total return on common stock, including dividends.

"Key ratemaking issues have now been resolved, the Fermi 2 power plant's operation and performance have improved markedly, sales are strong, costs continue to be under tight control, and improved systems resulting from a series of strategic initiatives have taken root," he said.

The last time the company raised its common stock dividend was October 1981, when the dividend was increased to an annual rate of $1.68 from $1.60.

The board also declared regular dividends on the company's preferred and preference stocks. All dividends are payable April 15, 1990 to shareholders of record at the close of business March 15, 1990, as follows:

Common stock	$0.445 per share
5.50 pct. convertible cumulative preferred stock	$1.375 per share
9.32 pct. cumulative preferred stock	$2.33 per share
7.68 pct. cumulative preferred stock	$1.92 per share
7.45 pct. cumulative preferred stock	$1.8625 per share
7.36 pct. cumulative preferred stock	$1.84 per share
9.72 pct. cumulative preferred stock	$2.43 per share
9.60 pct. cumulative preferred stock	$2.40 per share

CLEVELAND (FEB. 26) PR NEWSWIRE - The Cleveland-based Eliza Jennings Group (E.J. Group) has announced the offering of a new bond issue for $37,835,000 to be termed the Series 1990 Bonds for The Renaissance Project a 64-acre retirement community in Olmsted Township, Ohio. The Series 1990 Bonds were issued by Cuyahoga County, Ohio, with proceeds being directed to the advance refund of the E.J. Group's Series 1988 Bonds issued in July 1988 in the principal amount of $40,900,000.

The Series 1988 bonds have carried a fixed effective rate of 9-1/2 percent through 1993, with a variable rate thereafter, and were secured by a letter of credit from The Merchants Bank of Kansas City, Missouri. The Series 1990 Bonds carry more favorable fixed rates through the year 2020, with an average annual interest rate of 9.11 percent, and require no letters of credit.

In commenting on this new issue, Betty Kemper, President and CEO of the E.J. Group, said, "The bond refunding is a positive indication of the corporation's financial strength and is the latest step in our strategic plan for continued growth and expansion in Ohio. The E.J. Group is recognized as an industry leader and has more than 100 years of experience in the innovative delivery of quality senior living care."

McDonald & Company Securities, Inc. of Cleveland, Ohio, has been named underwriter for the Series 1990 Bonds.

The E.J. Group is an Ohio non-profit corporation which owns and operates skilled nursing home facilities in Cleveland and The Renaissance, a retirement community in Olmsted Township, OH.

LOS ANGELES (FEB. 26) PR NEWSWIRE - Southern California Gas Co. has named four new vice presidents as part of an overall plan to consolidate departments and realign functions, the utility announced today.

Effective March 1, Nancy I. Day, 44, currently division manager for the utility's Torrance-based South Coastal Division, becomes vice president of regulatory affairs; Mark C. Pocino, 45, manager of engineering services, will assume responsibilities as vice president of gas supply; and W. E. "Bill" Miller, 52, director of planning, will become vice president of distribution divisions.

Lee M. Stewart, 44, currently manager of supply operations and analysis, has been named assistant vice president of transmission divisions. Stewart will become vice president of that function when Vice President Tom Harlan retires on Nov. 1.

SoCalGas' announcement follows its earlier announcement a few weeks ago on the naming of a new president, Warren Mitchell, effective May 1. He replaces Jonel Hill, who is retiring.

The company reorganization will consolidate 15 existing departments into 12 to better align department relations, improve spans of control and streamline levels of management, according to SoCalGas Chairman and Chief Executive Officer Dick Farman.

"The changes are intended to provide needed stability in executive assignments during the next several years and to make the company as a whole more responsive to customers' needs," Farman said.

SoCalGas is the nation's largest natural gas utility, serving more than 4.5 million meters throughout Southern California. It is a subsidiary of Los Angeles-based Pacific Enterprises.

ROCHESTER, N.Y. (FEB. 26) PR NEWSWIRE - Used x-ray film, much of it historically destined for the nation's landfills, is now being purchased by Eastman Kodak Company (NYSE: EK) and recycled into new polyester film base.

"This is another happy instance in which sound environmental practices and sound business objectives are absolutely in synch," said William F. Fowble Kodak group vice president and general manager, Photographic Products Division.

"We needed additional feedstocks for our methanolysis plant, which converts polyester, fiber, and bottle polymer manufacturing scrap into raw materials," Fowble explained. "These raw materials can then be used to make more film base. Once the silver has been removed from x-ray film by washing, it is an ideal feedstock -- and it is not sent to a landfill."

Kodak's methanolysis plant, located at Kodak Park in Rochester, began operatins in 1977. In the last 12 years, over 350 million pounds of polyester scrap that would have gone to landfills has been transformed back to the chemical raw materials for making polyester. Film scrap comes from Kodak's Rochester and Colorado manufacturing sites. Fiber and bottle polymer scrap is recovered from Kodak's Eastman Chemical Company plants in Kingsport, Tenn., and Columbia, S. C.

According to Andrew Liszkay, operations manager of the polymer manufacturing and recovery operation, Kodak began buying used, desilvered x-ray film about a year ago on a trial basis.

"We can accommodate additional feedstock," Liszkay said, "because our methanalysis plant has increased efficiency, and the waste-reduction

efforts in the Kodak manufacturing units have been extremely effective."

Liszkay added that Kodak's goal now is to at least double the amount of washed x-ray film purchased within the next year.

DETROIT (FEB. 26) PR NEWSWIRE - Walter J. McCarthy Jr., who will retire as Detroit Edison Company (NYSE: DTE) chairman and chief executive officer upon reaching the company's mandatory retirement age May 1, announced the election today by the company's board of directors of John E. Lobbia as chairman, president and chief executive officer, effective May 1.

Lobbia currently is president and chief operating officer. McCarthy, 64, chairman and chief executive officer since 1981, has guided the company through a decades-long, multi-billion-dollar power plant construction, expansion and modernization program that will provide the company's 1.9 million customers in southeastern Michigan with adequate power in the coming years. Recent resolution of major ratemaking and financial issues has led to a sharp turnaround in earnings, a 56-percent increase in the price of the company's common stock in 1989 and a shareholder value increase of $1.2 billion.

"Today's board action," McCarthy said, "successfully culminates our efforts to mold a new management team, led by John Lobbia, that has the vision, qualifications and experience needed to guide Detroit Edison in the 1990s and beyond."

Lobbia, 48, joined Detroit Edison in 1964 after graduating from the University of Detroit with a bachelor of science degree in electrical engineering. He has been president and chief operating officer since April 1988. Lobbia has served in a variety of management positions in the company, including assistant to the vice chairman of the board in 1980; assistant vice president and manager, Fuel Supply, in 1981; vice president, Financial Services, in 1982; and executive vice president in 1987.

Lobbia co-chaired the Education Task Force of the Detroit Strategic Planning Project and is a trustee of the Business/Education Alliance, University of Detroit and WTVS-TV (Ch. 56). He also is a director of the National Bank of Detroit, the Detroit Convention Bureau, Detroit Economic Growth Corporation, Greater Detroit Chamber of Commerce and various other professional and community organizations.

McCarthy, a New York City native, began his utility career in 1949 with

the Public Service Electric and Gas Company of Newark, N.J. In 1952, he was assigned to work in Detroit with the Enrico Fermi Breeder Reactor Project and in 1963 was named general manager of the Power Reactor Development Company (PRDC) with overall responsibility for the plant. That same year he joined Detroit Edison but remained on leave to PRDC until 1968 when he was named assistant manager of engineering for Detroit Edison and manager of the Fermi 2 project.

During the next 13 years, he held positions of increasing responsibility in the financial, engineering and operations areas of the company. In 1981, he was elected chairman and chief executive officer.

McCarthy also is chairman of the board of directors of the Institute of Nuclear Power Operations and is a director of the Edison Electric Institute.

CORAL GABLES, FL (FEB. 26) PR NEWSWIRE - BankUnited (NASDAQ-NMS: BKUN), a $205 million savings bank serving both coasts of Florida, has opened its seventh banking office in Delray Beach. The new branch is BankUnited's first entry into Palm Beach County.

In announcing the Delray Beach opening, Alfred R. Camner, chairman and president of BankUnited, stated, "Our level of capital far exceeds the new government requirements and will permit us to pursue continued growth in the future. This new office is our first such expansion of 1990."

BankUnited recently reported record annual earnings for its fiscal year ended Sept. 30, 1989, and then record first quarter earnings for the three months ended Dec. 31, 1989.

BankUnited's other six offices are located in Bonita Springs, Venice, Bradenton, Coral Gables, Tamarac and Coral Springs.

BankUnited is a publicly owned financial institution traded on the NASDAQ national market system under the symbol BKUN.

#90057p0243 02/26/1990 ~PR Newswire

DETROIT (FEB. 15) PR NEWSWIRE - General Motors Corporation (NYSE: GM) earned net income of $4.2 billion in 1989 on record worldwide sales and revenues of $126.9 billion, Chairman Roger B. Smith and President Robert C. Stempel said today. In 1988, net income was $4.9 billion on total sales and revenues of $123.6 billion.

General Motors 1989 net income benefited significantly from the fifth consecutive annual record earnings at Electronic Data Systems (EDS) and from the third consecutive annual record earnings achieved by GM's overseas operations. Additionally, both GM Hughes Electronics (GMHE) and General Motors Acceptance Corporation (GMAC) achieved strong 1989 earnings. GM's North American automotive operations were profitable in 1989, although earnings were lower than in 1988 because of lower total industry volume and higher sales incentives reflecting an intensely competitive marketplace.

Worldwide, GM sold more than 7.9 million cars and trucks, more than any other automotive company. In the intensely competitive U.S. market, GM sold more cars than Ford and Chrysler combined and more cars and trucks than all the imports combined.

GM's 1989 consolidated net income of $4.2 billion was the third largest annual profit in its history -- and more than any other manufacturing company in the world. In 1989, GM paid nearly $2 billion in dividends to its shareholders, and the 7 percent yield on its basic common stock was the highest among the top 10 American companies.

Earnings per share attributable to $1-2/3 par value common stock were $6.33 in 1989, compared to the $7.17 earned in 1988 which benefited by $0.35 per share attributable to an accounting change affecting inventory costing.

At its Feb. 5, 1990, meeting, the General Motors Board of Directors declared a dividend increase of 17 percent on Class E common stock and split the Class E stock two-for-one by providing a 100 percent stock dividend payable March 10, 1990, to holders of record on Feb. 16, 1990. This action follows those in March 1989: a two-for-one stock split of GM's $1-2/3 par value common stock (also by providing a 100 percent stock dividend); a 20 percent increase in the quarterly dividend paid on $1-2/3 par value common stock; a 41 percent increase in the quarterly dividend on Class E common stock; and a 64 percent increase in the quarterly dividend on Class H common stock.

During the fourth quarter of 1989, sales and revenues totaled $31.4 billion, 3.3 percent below 1988. For the quarter, worldwide factory sales to GM dealers totaled 1,950,000 units -- 7.5 percent below the same period in 1988. Net income for the period was $700 million, or $1.01 per share

of $1-2/3 par value common stock, compared with $1,398 million, or $2.12 per share, in the period a year ago.

MINNEAPOLIS (FEB. 26) PR NEWSWIRE - Comdisco Disaster Recovery Services Inc. (CDRS), a subsidiary of Comdisco Inc. (NYSE: CDO), has selected extended channel networking systems from Computer Network Technology Corp. (CNT) (NASDAQ: CMNT) for use in deployment of a high speed private data network that links backup disaster recovery sites nationwide.

Comdisco announced the first leg of this network, called CDRS Net, in January. CNT's CHANNELink systems are being used to provide data networking facilities so that data traffic can be moved at high speed between CDRS backup sites and to provide access to CDRS computing resources from any of the 22 sites on the network.

John Schladweiler, vice president of business planning for CDRS, said, "The private network will enable CDRS clients to operate and monitor backup computing and network operations at a single local site, regardless of where the computing resources are located. Previously, if a particular processor was unavailable at our client's preferred backup site the user had to travel to a remote CDRS center and set up backup operations there. The flexibility, performance and networking features of CNT's extended channel networking systems made CNT the logical vendor

for implementation of CDRS Net."

Mac Lewis, president and chief executive officer of CNT, commented, "Comdisco continues to be an innovator and leader in providing flexible and convenient disaster recovery services for their clients. Production networks at CNT clients gave CDRS the confidence that CNT technology and support services would help contribute to a successful deployment of CDRS Net. Demanding and critical network environments, like CDRS Net, are the marketplace that CNT is servicing daily."

Lewis also observed, "Based on discussions with CDRS, we are anticipating 1990 product revenue of approximately $2 million. Furthermore, by working as a partner with CDRS, we have the opportunity to demonstrate CNT extended channel networking capabilities to the thousands or organizations that are CDRS clients. As these clients run their regular disaster recovery verification tests at one of CDRS' business recovery facilities across the country, they and CDRS can point to a CNT network node and say "That's our backup computer!" We are confident that they will be pleased with the results."

Comdisco Disaster Recovery Services is a wholly owned subsidiary of Comdisco Inc., with headquarters in Rosemount, Ill. The company's 1990 plans call for 22 business recovery facilities with CNT extended channel networking systems throughout the nation.

Computer Network Technology Corp. develops, manufactures and markets high speed extended channel networking systems for the interconnection of mainframe computers, computer peripheral devices, and data base computers over unlimited distances. The company's common stock is traded on the national over-the-counter market under the NASDAQ symbol CMNT.

CDRS Net is a service of Comdisco Disaster Recovery Services Inc. CHANNELink is a trademark of Computer Network Technology Corporation. CNT Extended Channel Networks support high speed networks for computer to computer, computer to peripheral and computer to workstation data transfer.

TWINSBURG, OH (FEB. 26) PR NEWSWIRE - Revco Drug Stores is putting the

finishing touches on Charlotte's soon-to-open Revco Health and Beauty Expo. The first such event for Charlotte, this premier Expo will take place in the downtown Charlotte Convention Center, March 30 and 31. The show is free and open to the public, 10 a.m. to 8 p.m.

The show will feature exhibitors of health, beauty and fitness products, and entertainment, exercise and beauty demonstrations, free health screenings and apearances by celebrities. Exhibitors will demonstrate products and offer scores of free samples and valuable coupons.

"The Health and Beauty Expo exemplifies Revco's commitment to health and wellness," said Jim Adamson, Revco executive vice president of marketing, "by making health screenings, product samples, beauty makeovers and a wide variety of other offerings available to the community at no cost in one location."

"This is our first Expo to be held outside Cleveland, our home base," added Bob Newmark, vice president of marketing services. "We chose Charlotte because it's a growing city and an important market for Revco. It's the heart of our business in the South. It's a city on the rise."

He noted that the Cleveland Expo -- to be held again in May -- last year saw 100,000 visitors.

Co-sponsors American Greetings, American Vitamin/Fields of Nature, Clairol and Pepsi Cola will have major exhibits, demonstrations and give-aways -- in addition to presentations by some 100 other exhibitors of health and beauty products and services.

Fitness, health and beauty celebrities making special appearances at the Expo include Olympic gold-medal diver Greg Louganis; Gale Sayers, NFL Hall of Famer and former Chicago Bears star running back; Baseball Hall of Famer and former Baltimore Orioles pitcher Jim Palmer; Denise Austin of ESPN's "Getting Fit;" actor Jeff Conaway ("The Bold and The Beautiful," "Grease," and "Taxi,"); "hair stylist to the stars" Richard Stein; and "Hugo," mascot of the Charlotte Hornets.

Celebrities will appear on stage and be available for autographs. There will also be hair styling demonstrations by Tony Ruessling of Vidal Sassoon, aerobics shows by Charlotte's own Absolutely Aerobic and fashion shows of fitness wear by The Model Shop of Charlotte. A drawing will be held for a 1990 Honda Accord DX, courtesy of Honda Cars of Monroe.

Revco operates some 1,800 drugstores -- including over 60 in the greater Charlotte area -- filling more than 66 million prescriptions annually. Based in Twinsburg, Ohio, the company has annual sales in excess of $2.7 billion.

TULSA, OK (FEB. 26) PR NEWSWIRE - Unit Corp. (NYSE: UNT) today reported revenues of $11,926,000 for the fourth quarter of 1989; a significant 31 percent improvement over the fourth quarter of 1988. This improvement is mainly attributable to a 39 percent increase in natural gas production and a 25 percent increase in natural gas prices over the fourth quarter of 1988.

Increased revenues resulted in a reduced net loss of $89,000 (1 cent per share) for the fourth quarter of 1989, as compared to a net loss of $318,000 (2 cents per share) for the fourth quarter of 1988.

Total revenues for the twelve months ended Dec. 31, 1989 were $39,541,000, a 25 percent increase from 1988 revenues of $31,555,000. The net loss for 1989 of $1,598,000 (8 per share) was a slight improvement over the net loss of $1,617,000 (8 cents per share) for 1988.

Unit also announced that the company replaced 204 percent of its 1989 oil and natural gas production. The replacement and addition of oil and natural gas reserves resulted from approximately equal amounts of new wells drilled and reserve acquisitions.

DENVER (FEB. 26) PR NEWSWIRE - Coral Pacific, Inc., of Marina Del Rey, Calif., a wholly owned subsidiary of Coral Companies, Inc. (NASDAQ: COCI), today announced it has signed an agreement with Tradux, Inc. (NASDAQ: TRDX), for exclusive worldwide rights to a new UNIX(TM) based foreign language translation product, "The Linguist."

"The Linguist is widely considered the most advanced computer translation product available for general use," Gerald P. Troy, president and chief executive officer of Coral Pacific, said. "In its initial offering, 'The Linguist' will translate English, Japanese, German and Spanish, each to the other. Chinese will be added shortly. French, Russian, Italian and Portuguese modules are under consideration. Others will be introduced as market needs dictate."

The technology, based on a relatively new interlingual translation technique, is said to be the most advanced methodology available,

combining a mathematical algorithm with an artificial intelligence technique. "The Linguist" is presently demonstrable on the "SUN workstation" and will be ported to other hardware platforms as needed. A fully operational version of the system is planned to be available in the third calendar quarter of 1990.

Troy pointed out that Coral Pacific was formed to market high quality, horizontal UNIX software solutions. "We are delighted to have formed the alliance with Tradux and to have such an exciting product as one of its flagship offerings," Troy said. He further noted that "The Linguist" is far beyond present state-of-the-market technology and should set standards for future machine language translation.

Coral Pacific, a publisher and marketer of UNIX-based software solutions, is currently negotiating for the rights to several additional software products, Troy added.

Coral Companies specializes in the global marketing of software solutions to companies involved in direct marketing and telephone sales, including catalog fulfillment, telemarketing, and financial and insurance institutions. Currently, it offers two principal products, Profile 90 and Profile 2000, as turnkey packages consisting of software and compatible computer hardware and including related consulting and support services. Coral is a value added reseller for IBM, DEC, Sequent, UNISYS, and General Automation computers and peripherals through its regional offices in Denver, Dallas, Philadelphia, Seattle, San Francisco and London.

#90057p0277 02/26/1990 ~PR Newswire

LOS ANGELES (FEB. 26) PR NEWSWIRE - Unocal Corp. (NYSE: UCL) said today it plans to spend nearly $1.5 billion on capital and exploration projects in 1990, a 22 percent increase from the $1.2 billion spent in 1989.

Richard J. Stegemeier, Unocal chairman, president and chief executive officer, said, "The increased investment level reflects the company's improved cash flow and strategy of investing in projects which offer improved returns."

The capital budget for 1990 is $1.27 billion, up from $1.05 billion in 1989. Planned domestic capital expenditures are $858 million, up from $695 million last year. Foreign capital expenditures are budgeted at $413 million for 1990, compared with $355 million in the previous year.

For the first time in the company's history, budgeted foreign exploration

expense, including petroleum and geothermal energy, will exceed domestic expense. The foreign exploration expense budget for 1990 is $111 million, compared with $76 million in 1989. Domestic exploration expense spending is expected to total $106 million in 1990, up from $92 million a year ago.

The company said that the projected capital spending for domestic petroleum exploration and production will total $424 million in 1990, down slightly from $427 million last year. Exploration expense in the United States is expected to increase to $99 million from $85 million.

Capital spending for foreign petroleum exploration and production, including Canada, is budgeted at $370 million, up from $343 million in 1989. Planned spending on foreign petroleum exploration is $101 million, up from $72 million.

Increases in foreign exploration and production spending will focus in Thailand, Indonesia, the Netherlands and Ecuador.

Capital spending for geothermal projects is expected to total $84 million in 1990, with another $14 million for exploration expense. This compares with $63 million capital and $10 million exploration expense in 1989. A major part of the increase is because of higher expenditures for development of geothermal resources in Indonesia.

The refining, marketing and transportation operations plan capital expenditures of $220 million in 1990, up from $143 million a year ago. The company is constructing nitrogen oxide control emission equipment at its Los Angeles refinery and increasing marketing investments on the west coast and in its national auto/truckstop system.

Capital expenditures for chemicals operations are expected to total $105 million in 1990, up from $37 million last year. The increase is due principally to construction of a new polymers plant and expanded nitrogen fertilizer facilities.

#90057p0282 02/26/1990 ~PR Newswire

HARTFORD, CT (FEB. 26) PR NEWSWIRE - Against the backdrop of a sluggish national economy, Phoenix Mutual Life Insurance Company "beat the general fiscal odds of 1989 and performed very well," Chairman and CEO John Gummere reported today at the company's annual meeting.

"By all commonly accepted indicators, 1989 was a very good year. Total

revenues were $1.4 billion. New annual premiums alone were $148.2 million an increase of 15 percent. Profits before dividends and taxes increased 11 percent, and net income totaled $27.6 million," Gummere said.

"This solid financial performance, combined with excellent sales in our major lines of business and an increase in surplus to 5.65 percent of assets, made 1989 a very good year," Gummere said. "Most important, the company paid $166 million in dividends to its policyholders, returning 87 percent of our profit after taxes," the chairman said. As a mutual company, The Phoenix has no stockholders. It returns its profits to policyholders in the form of dividends. Gummere explained, "The Phoenix's dividend scale remains one of the most aggressive in the industry."

During a year in which the life insurance industry as a whole saw a decline in sales of policies to individuals, The Phoenix's individual life sales increased strongly. In 1989, new annual premium from this line of business totaled $78.4 million, an increase of more than 14 percent.

At the same time, while many group life and health insurers were just beginning to recover from several unprofitable years, The Phoenix's Group line of business reported excellent sales and profits for the second consecutive year.

Phoenix Equity Planning Corporation, the company's broker/dealer subsidiary, produced a $3.6 million before-tax profit in 1989 and assets under management reached $1.9 billion.

WILLIAMSPORT, PA (FEB. 26) PR NEWSWIRE - William E. Snell Jr. has been appointed president and chief operating officer of Commonwealth Bancshares Corp. (NASDAQ: CBKS), and president and chief executive officer of Commonwealth Bank.

The announcement was made today by William D. Davis, who will continue as chairman and chief executive officer of Bancshares. Snell assumes his positions on April 2, 1990.

Snell has left his position as president of the Susquehanna Valley Division of Meridian Bank to join Bancshares. He had been with Meridian Bank since 1971, and as president was responsible for building Meridian's revenues and profits in the Lancaster, Lebanon, York and Dauphin/Cumberland, Pa., markets. He was directly managing five banking functions, including retail banking, private banking, business banking,

corporate banking and community relations.

The executive served as one of five members of Meridian Bancorp's Credit Policy Committee: responsible for approving all loan packages in excess of $20 million as well as establishing both corporate and retail lending objectives, portfolio quality, policies and procedures. He was vice chairman of the Reading Senior Credit Committee, a member of the Meridian Political Action Committee Board of Directors and a member of the Meridian Bank Asset Liability Management Committee.

Snell holds a master of business administration degree form Tulane University Graduate School of Business Administration. He is an active participant in many community organizations, including the Economic Development Company of Lancaster County, the United Way and Millersville University.

He and his wife Pam, are in the process of moving to Williamsport.

PHILADELPHIA (FEB. 26) PR NEWSWIRE - Leading energy project developer O'Brien Energy Systems (AMEX: OBS), today announced that the $25 million convertible debenture offering, initially co-managed by Advest, Inc. and Drexel Burnham Lambert, will proceed with Advest as the sole managing underwriter. "We are optimistic that the offering now can be completed after the disruptive delay caused by the Drexel bankruptcy filing," Bruce Levy, vice president-marketing, said.

The company also announced that it has accepted its first large cogeneration project, a 32MW plant, built at California Milk Producers in Artesia, Calif. "We had delayed acceptance of the project, which has been partially operational since September 1989, pending completion of site work," Levy concluded.

CHARLESTON, WV (FEB. 26) PR NEWSWIRE - Key Centurion Bancshares Inc. (NASDAQ: KEYC), West Virginia's largest bank holding company, announced today that it, along with its wholly owned subsidiary, Charleston National Bank, has entered into an agreement in principle to acquire Farmers and

Citizens State Bank, Clendenin, W.Va.

Both Charleston National and Farmers and Citizens banks are located in Kanawha County, W.Va.

The agreement in principle contemplates that each outstanding share of Farmers and Citizens will be exchanged for $135.87 cash. The proposed transaction is valued at $2 million. The transaction is wholly contingent upon execution of a mutually acceptable agreement of merger, the approval by Farmers and Citizens' shareholders, and various regulatory authorities.

Farmers and Citizens Bank, with assets of $45 million and shareholders' equity of $2.2 million at Dec. 31, 1989, is located in Clendenin, W.Va., with a branch in Elkview. Charleston National Bank, with assets of $420 million at Dec. 31, 1989, has a total of four offices in Charleston and South Charleston, Kanawha County.

"The transaction should strengthen Charleston National's retail market opportunities in an area of the county where it has not previously had an office," said A. Michael Perry, president and chief executive officer of Key Centurion.

"This transaction is the second of its type that we have announced in which we have augmented market share in an area already served by a Key Centurion subsidiary," said Marshall T. Reynolds, chairman of the board of Key Centurion. "Farmers and Citizens can build upon its past record of serving its local community by drawing upon the resources of Charleston National and Key Centurion," he said.

The proposed transaction will be the 14th announced by Key Centurion since the 1982 change in West Virginia banking laws permitting multi-bank holding companies.

Key Centurion, with $2.4 billion in assets at Dec. 31, 1989, has banking subsidiaries with 43 offices in West Virginia and Kentucky, operating as: Cardinal State Bank, NA, Beckley; The Central National Bank of Buckhannon, Buckhannon; Charleston National Bank, Charleston; Union National Bank of West Virginia, Clarksburg; The First Huntington National Bank, Huntington; Guyan National Bank, Barboursville; The Lincoln National Bank of Hamlin, Hamlin; The National Bank of Logan, Logan; Boone National Bank, Madison; First National Bank in Philippi, Philippi; Citizens National of Point Pleasant, Point Pleasant; Citizens National Bank of St. Albans, St. Albans; Nicholas County Bank, Summersville; Wayne County Bank, Wayne; The National Bank of Commerce of Williamson, Williamson, all in West Virginia and First National Bank of Pikeville, Pikeville, Ky.

PHILADELPHIA (FEB. 26) PR NEWSWIRE - Ballard, Spahr, Andrews & Ingersoll today issued the following:

On Feb. 23, the Federal Court of Appeals in Philadelphia ruled in Green v. USX Corp. (NYSE: X) that, despite new constraints imposed by the Supreme Court's 1989 ruling in Wards Cove Packing Co. v. Antonio, USX Corp. continues to be liable under the Civil Rights Act to a class of black job applicants.

Damages are estimated to exceed $30 million.

In 1988, the Court of Appeals affirmed a district court ruling that USX had discriminated against thousands of blacks who applied for unskilled jobs at USX's Fairless Hills plant. In June 1989, the Supreme Court vacated that decision and remanded the case to the Court of Appeals for further consideration in light of Wards Cove. Friday's ruling reflects that reconsideration.

HOUSTON (FEB. 26) PR NEWSWIRE - Kirby Exploration Co. Inc. (AMEX: KEX), a diversified corporation engaged in marine transportation, marine diesel repair and property and casualty insurance, reported consolidated net earnings for the year ended Dec. 31, 1989 of $11,512,955, or 50 cents per share, compared with net earnings for 1988 of $35,793,777, or $1.51 per share.

The 1988 results include a net gain of $19,942,370, or 84 cents per share, from the sale of substantially all of the company's oil and gas assets and a net loss from the discontinued oil and gas operation of $2,968,796, or 13 cents per share. In addition, the 1989 and 1988 results include an extraordinary item of $2,600,000, or 11 cents per share, and $11,100,000, or 47 cents per share, respectively, representing the utilization of tax benefits of prior years net operating loss carryforwards.

Consolidated earnings from continuing operations for 1989 were $8,912,955, or 39 cents per share, compared with $7,720,203, or 33 cents per share, for the 1988 year. Consolidated revenues for 1989 were $141,335,544, compared with $97,894,742 for the 1988 year.

For the fourth quarter of 1989, consolidated earnings from continuing operations totaled $3,231,270, or 14 cents per share, compared with earnings from continuing operations for the fourth quarter of 1988 of $629,439, or 3 cents per share. Consolidated revenues for the 1989 fourth quarter totaled $39,960,604, compared with consolidated revenues of $24,285,024 for the fourth quarter of 1988.

The results for 1989 include a loss of $1,450,000, or 6 cents per share, from actual and estimated losses incurred by its wholly owned subsidiary, Universal Insurance Co., as a result of Hurricane Hugo which hit Puerto Rico on Sept. 18, 1989.

The following table sets forth by industry segment the combined gross revenues, operating profits (before general corporate expenses, interest and income taxes) and identifiable assets (including goodwill) attributable to the continuing principal activities of the company for the period indicated.

WALTHAM, MA (FEB. 26) PR NEWSWIRE - Using CAT-scanner technology, combined with the power of supercomputers, GTE scientists are dramatically shortening the time needed to bring the next generation of automotive headlamps to the marketplace. In what is the first known application of this technology in lighting research, they are discovering what occurs in the interior of high-intensity discharge (HID) lamps, where temperatures are similar to those on the surface of the sun.

Now under development at GTE Laboratories in Waltham, Mass., these new light sources are not only five times more efficient than present headlamps, they also last up to 25 times longer.

HID technology will be used in the next generation of smaller, brighter and more efficient automobile headlamps as well as for a wide range of other applications such as merchandise display lighting.

"This will definitely speed the introduction of better products," said Dr. John C. Gustafson, manager of the light-source technology department at GTE Labs. "As information from the CAT scanner is combined with computer models, we are obtaining the most complete picture yet available of the processes occurring in HID lamps," he said.

At the heart of each lamp is a tiny arc tube filled with gasses which, when excited with an electrical current, produce an intense light. The tube must be precision-designed and fabricated to minute tolerances to maximize efficiency and endurance. "The more evenly heat and light are distributed, the more efficient the product," said Dr. Timothy Fohl, principal member of the technical staff at GTE Labs.

Process Cuts Design-change Time from Months to Days The CAT-scanned images reveal exactly where light is being emitted in the tube. This information is then fed into a supercomputer where it is combined with a mathematical model of the arc-tube environment. The resulting calculation appears as a graphic image showing the pattern of heat energy within the lamp.

"Once we know where there are imbalances, we can correct them by changing the chemistry of the gaseous discharges or the shape of the tube. With the CAT scanner, we can make observations and changes in a matter of days, rather than months," Fohl said.

"Computer-aided tomography (CAT scanning) has been widely used for medical imaging, certain astronomical measurements, and for the study of fusion plasmas. But this is the first time anyone has used the technology to design a better light bulb," Fohl noted.

GTE's lighting business manufactures and markets a wide range of Sylvania lighting products, including fluorescent, incandescent, mercury, metal halide, high-pressure sodium and many specialty lamps as well as lighting fixtures.

GTE Laboratories is the central research and development facility for GTE Corporation (NYSE: GTE). Based in Stamford, Conn., GTE is a leader in its three core businesses -- telecommunications, lighting, and precision materials -- providing products and services worldwide.

MINNEAPOLIS (FEB. 26) PR NEWSWIRE - United HealthCare Corporation (NASDAQ: UNIH) said that Warburg, Pincus Capital Company, L.P., the company's largest shareholder, converted its 100,000 shares of United HealthCare preferred stock into 2,511,111 shares of the company's common stock. The conversion was made in accordance with the terms of the securities purchase agreement entered into by Warburg and UHC in February 1988.

UHC said that fully diluted, weighted average common shares outstanding as previously reported by the company have fully considered the potential conversion of these shares.

UHC Chief Executive Officer Kennett L. Simmons said that the conversion was expected by the company in light of the company's redemption rights with respect to the preferred stock effective Feb. 19, 1990. Simmons said that this conversion by Warburg of all of its preferred stock is advantageous to United HealthCare in that it eliminates Warburg's 6-1/2 percent preferred stock dividend on its previously outstanding preferred stock.

MIAMI (FEB. 26) PR NEWSWIRE - Eastern Airlines has named Luis A. Torres general manager for its Latin American operations.

He will be responsible for the day-to-day sales and services function of the South and Central American routes.

Eastern recently sold its Latin American system to American Airlines for $349 million. The transaction is awaiting various governmental approvals, with a target date of mid-1990 for American to begin its flights.

Joseph B. Leonard, executive vice president and chief operating officer, said Torres will have "the dual role of maintaining Eastern's presence in Latin America while helping facilitate transition of the routes to American."

A 21-year airline veteran, Torres joined Eastern in 1973 after the airline bought Caribbean Atlantic Airlines (Caribair). He then assisted in merging Caribair's operations into Eastern's.

After the merger, Torres was named personnel supervisor in the Antilles. He was later promoted to regional personnel manager in the Caribbean.

In 1982, he was a task force member for Eastern's feasibility study to buy Braniff's South American routes. The sale was completed that year and Torres was then named director of employee relations -- international, based in Miami.

Born in Puerto Rico, he received a bachelor of arts degree from the University of Puerto Rico. He and his wife, Carmen, have three children and live in the Kendall section of Miami.

CHICAGO (FEB. 26) PR NEWSWIRE - Rail-Bridge Corporation (RBC), a subsidiary of Kawasaki Kisen Kaisha (K Line), Ferrocarriles Nacionales De Mexico (NDM) and Santa Fe Railway (ATSF) announced today they will begin double stack service between Southern California and two major Mexican hub centers: Mexico City and Monterey. ATSF and NDM will run a final test in early March with official start-up of service scheduled later in March, according to Ray Ascencio, RBC executive vice president at Cranford, N.J.

The new "Azteca Service" will initially handle import/export cargo between the Far East and Mexico on ATSF/NDM trains through K Line's ITS terminal at Long Beach, with direct container-to-train loading, and NDM's Pantaco Terminal at Mexico City and piggyback ramp at Monterey.

Expedited train connections between major U.S. and Canadian points will offer North American shippers the same benefits of this improved, double stack, run-through rail service via El Paso for their Mexican intermodal containerload cargo utilizing the ATSF system and connecting railroads.

Rail-Bridge will supply the double-stack cars with steamship line containers utilizing ATSF's network for border crossing at El Paso, Texas to NDM. NDM considers the implementation of double stack service in Mexico a contribution, because of its high technology and low costs, to strengthening the trade policies promoted by the president of Mexico, Lic. Carlos Salinas de Gortari.

NDM supports the policy of railroad modernization initiated by Lic. Andres Caso, secretary of communications and transports. In addition to its railroad system, NDM will support the service by providing crew and locomotive power for non-stop transit across the border at El Paso,

Texas/Ciudad Juarez, Chihuahua offering a substantial reduction in transit time to Monterey and Mexico City. ATSF/NDM and RBC will offer weekly service southbound leaving Long Beach at 3 a.m. every Monday with availability on Friday at both Monterey and Mexico City.

RBC is currently the second largest operator of steamship line double stack trains in North America. Combined with its existing network serving Portland, Tacoma, Chicago, Boston, Detroit, New York, Atlanta, Houston, Memphis, New Orleans, Dallas, Kansas City, Long Beach, Columbus, Montreal, and Toronto; the addition of Monterey and Mexico City will make RBC the only double stack train operator to service the United States, Canada and Mexico.

GREENWICH, CT (FEB. 26) PR NEWSWIRE - The XTRA Corporation Independent Stockholders Committee stated today that it was greatly disappointed to learn of XTRA's cancellation of Wednesday's stockholders meeting and that it had grave reservations concerning the incumbent board's will and ability to consummate a successful sale in the best interests of stockholders.

John Lee, a member of the committee's executive committee, stated that "Stockholders have to wonder why XTRA would announce this step just two days before stockholders were to vote on the composition of the entire board and on the XTRA board's performance over the past decade. This

appears to us to be a last minute public relations ploy aimed at diverting attention from the incumbent board's unsatisfactory record.

Lee said, "As owners of over 21 percent of XTRA's outstanding stock, we are obviously in favor of any action that would maximize stockholder values. However, we believe that we have demonstrated in this proxy contest that the XTRA board has erected obstacles to acquisition proposals such as a poison pill and golden parachutes and sold assets to XTRA's competitors on what we believe to be unfavorable terms. In short, the incumbent board has overseen a decade of unsatisfactory performance," he said.

"Accordingly, we question whether this board has earned the confidence of XTRA's stockholders to supervise the sale of the company, Lee stated. Moreover, we are greatly concerned that the circumstances under which this process is being undertaken may result in a fire sale mentality on the part of potential buyers."

The committee also announced that it has commenced litigation in Delaware Chancery Court to compel the Kaye board to convene a stockholders meeting immediately.

#90057p0359 02/26/1990 ~PR Newswire

YORKVILLE, NY (FEB. 26) PR NEWSWIRE - Combined net sales for the three member companies of the Digimetrics group were up 8.6 percent for the second quarter of the organization's 1990 fiscal year, which ended Dec. 31 1989. That was the report made by Patrick G. Shields, the firm's president.

He said Digimetrics, Inc. (NASDAQ: DIGM), Control Chief Corporation, and Bradford Classics Woodworking, Inc. had combined net sales of $1,479,277 during October, November and December, compared to $1,362,672 for the same period last year. That increase brought the three companies' combined net sales for the first six months of fiscal 1990 to $2,843,053, a 14.1 percent increase over the comparable results of the previous year.

At Digimetrics, Inc., the parent company, second quarter net sales climbed to $209,568 from $168,620, an increase of 24.3 percent. For the six-month period, Digimetrics' sales increase stood at 14.2 percent, reflecting growth of from $348,053 to $397,555.

Bradford Classics' net sales nearly doubled during the second quarter, rising from $77,655 to $154,630, growth Shields attributed largely to the firm's acquisition of Blood's Grinding and Turnings, Inc. last March. For the six-month period ending Dec. 31, 1989, Bradford Classics had net sales of $303,302, also up substantially from the previous year's figure of $128,042.

Control Chief Corporation had second quarter net sales of $1,115,079, virtually the same as the previous year's results of $1,116,397. Shields said the slight decrease was due to higher discounting of the firm's products during the second quarter of fiscal 1990. He noted, however, that for the six-month period, Control Chief's sales continued to outpace

the previous year's results by 6.2 percent, standing at $2,142,196 as compared to $2,017,418.

Shields said he was pleased that the total backlog of orders for all three companies stood at $786,504 this past Dec. 31, compared with $525,385 a year earlier. He said the growth was brought about primarily by a 5.9 percent increase in orders at Control Chief as well as first- time back orders at Digimetrics and Bradford Classics.

Although net income for Digimetrics and Control Chief continued to rise, a loss by Bradford Classics resulted in a decrease in total operating profits for the most recent three- and six-month periods. The group's combined net income for the second quarter and first half periods ended Dec. 31, 1989, was $21,952 and $62,978, respectively. Those results compared to figures of $46,631 and $84,379 for the previous fiscal year. Earnings per share were down from $.014 to $.007 for the second quarter, and from $.026 to $.019 for the half. Shields said the decline was the direct result of lower gross margins on the products sold by Bradford Classics.

He explained that during the second quarter, Bradford Classics' shipments included mostly items that had been manufactured under Blood's price structure. Those prices, he said, reflected less-than-adequate profit margins. He said management has analyzed and adjusted prices, and also improved product quality to make the company's wood parts a better value for customers. The changes, he said, have been well received.

Digimetrics, Inc., of Yorkville, is one of the world's largest makers of weld-monitoring devices for the automated welding industry. Control Chief Corporation, which is based in Bradford, Pa., manufactures remote control systems for a wide range of industrial applications. Bradford Classics Woodworking, located in Randolph, N.Y., produces wood parts such as furniture components and stair balusters and newels for the furniture and home building industries.

#90057p0363 02/26/1990 ~PR Newswire

SAN ANTONIO, TX (FEB. 26) PR NEWSWIRE - Datapoint Corp. (NYSE: DPT) today announced an operating loss of $5.1 million on revenue of $67.4 million for the company's second quarter ended Jan. 27, 1990. This compares with operating income of $800,000 on revenue of $84.6 million for the second quarter of the prior year.

Operating results for the second quarter of fiscal 1990 include $5.3

million of restructuring charges associated with the streamlining of the company's U.S. operations. Excluding these charges, the company had operating income of $200,000 during the second quarter.

The net loss for the second quarter of fiscal 1990 was $9.4 million, compared with a net loss of $1.9 million for the second quarter of fiscal 1989.

In addition to the net operating loss, the company incurred charges of $3.6 million, consisting primarily of net interest expense and a loss of $1.4 million on the company's investment portfolio.

The first half of fiscal 1990 resulted in an operating loss of $10.7 million, including $7.5 million of restructuring charges, on revenue of $127.6 million. This compares with operating income of $1.3 million on revenue of $158.1 million for the first half of the prior year.

"Operating results for the second quarter have been negatively impacted by customer uncertainty about the future of the company arising from the shareholder consent solicitation and the continuing slowdown in the computer industry," said Michael M. Michigami, Datapoint president and chief executive officer.

"However," Michigami stated that, "a series of actions introduced in the first half of fiscal 1990 refocused the business, which enabled us to achieve a modest operating profit in the second quarter, before restructuring costs, and positive operating cash flow in the face of revenue softness. Our operating improvement over the first quarter is the direct result of the organization's efforts to reduce our cost structure while maintaining, and in some cases increasing, support to our valued customers worldwide."

Datapoint Corp. develops, manufactures, and markets computer and communication products for integrated network systems worldwide.

HOUSTON (FEB. 26) PR NEWSWIRE - NL Industries Inc. (NYSE: NL) announced today that its wholly owned subsidiary, GG Acquisition Corp., has waived a condition to its tender offer for all outstanding shares of Georgia Gulf Corp. at $45 per share in cash. The condition relates to the applicability of Section 203 of the Delaware General Corp. Law to the offer and NL's proposed second step merger in which GG would merge into Georgia Gulf and all Georgia Gulf stockholders would receive the same consideration for their shares as offered in the tender offer.

NL said that all other terms and conditions of the offer remained unchanged and unaffected by the waiver.

NL said that it learned from a filing by Georgia Gulf with the Securities and Exchange Commission that Georgia Gulf's board of directors had opted not to be governed by Section 203 in 1988. Georgia Gulf had not previously disclosed the board action. NL stated that it is continuing to seek financing to complete the offer and the subsequent merger.

NL Industries is a worldwide supplier of titanium dioxide pigments and specialty chemicals.

#90057p0366 02/26/1990 ~PR Newswire

WASHINGTON (FEB. 26) PR NEWSWIRE - The National Science Foundation announced today the signing of a contract for the construction and 10-year leasing of a 300-foot research ship with icebreaking capability for use in the U.S. Antarctic Program, which is managed by the foundation.

Edison Chouest Offshore Inc. of Galliano, La., will build the ship at its shipyard in Larose, La., southwest of New Orleans along the Gulf of Mexico. The ship will be the first U.S. flag vessel with icebreaking capability fully dedicated to research and capable of operating year-round in Antarctica.

The new ship will be a first-rate platform for studies of global change, including its biological, oceanographic and geological components. It will be able to operate safely year-round in the Weddell and Ross seas, and in other Antarctic waters that are often stormy or covered each winter with sea ice.

Polar regions are sensitive to changes in the global environment, and may also significantly influence the direction and magnitude of global climate changes through the interrelationships of the ocean, atmosphere, ice and the continent itself.

One of the ship's first projects will focus on ocean processes in the western Weddell Sea, a major source of bottom water for the world's oceans. Scientists from the U.S. and Soviet Antarctic programs will work together to establish a base camp on sea ice from which they will launch studies of ocean circulation and climate.

The ship will also aid in studies of the winter stages in the life cycles of krill -- a shrimp-like crustacean -- and other marine organisms, the

effects of the annual melting of sea ice on marine productivity at the ice edge, and the dynamics of the marine food chain, among others.

The research vessel is scheduled to be ready for delivery in January 1992. When construction is completed, NSF will acquire a 10-year charter. The contract, valued at $83.8 million, includes the 10-year charter, per diem charges such as food and accommodations for the duration of the charter, installation of winches and compressors, and delivery to Punta Arenas, Chile, anticipated to be one of the ship's home ports.

The total cost of operating the research ship, including the contract, fuel, port charges and other expenses, is estimated to be about $11 million per year, or $110 million for the 10-year duration of the charter. The ship is being leased in compliance with administration and congressional policy, but the contract gives NSF the option to buy the ship for $55 million at the end of the charter period.

The ship, designed to break up to 3 feet of ice at a speed of three knots, will support the research of 37 scientists on board, and will have a crew of 22.

Six diesel engines, three directly driving each of two propeller shafts through a gear box, will be capable of generating 11,070 horsepower. Under normal low-speed cruising conditions, one or two engines will be running on each propeller shaft. The ship will be able to perform 75-day missions, and will have a helicopter landing deck and capabilities for housing and maintaining two four-passenger helicopters.

The contract with Edison Chouest is actually a subcontract entered into by ITT Antarctic Services, Inc. (ANS), of Paramus, N.J. ANS has been under contract to NSF for the past 10 years to manage station facilities, construction, and ship operations in Antarctica. ANS, with input from NSF and the scientific community, consulted a marine engineering firm to define technical requirements for inclusion in a solicitation for bids.

In February 1989, ANS, taking into account a congressional stipulation that U.S. shipyards receive special consideration, issued a request for proposals. ANS received six formal bids. The contract has been made to Edison Chouest on the basis of technical merit and price.

ORLANDO, FL (FEB. 26) PR NEWSWIRE - Martin Marietta Electronic Systems has received a $29.3 million long-lead production contract to provide the Republic of Korea with the LANTIRN night navigation and targeting system for its F-16 fighters.

LANTIRN, the Low Altitude Navigation and Targeting Infrared system for Night, consists of twin pods mounted under the aircraft. A targeting pod, an advanced technology fire control system, is used in conjunction with a navigation pod that allows pilots to fly safely at low altitudes in total darkness and under the weather at speeds exceeding 500 mph.

Under terms of an agreement between the U.S. and Korean governments, Martin Marietta will supply 10 sets of LANTIRN pods, field support equipment, spare parts and program management. The Foreign Military Sale is authorized under the U.S./Republic of Korea "Peace Nightlight" program.

LANTIRN, designed, developed and manufactured by Martin Marietta for U.S. Air Force F-15E and F-16C/D fighters, has been field proven on more than 6,600 sorties exceeding 2.5 million miles. To date, the U.S. Air Force has ordered 561 production navigation pods, 441 production targeting pods and 26 field support systems under contracts totaling $2.9 billion.

In addition to the Republic of Korea, LANTIRN and derivative technology systems have been approved for sale to Israel, the Arab Republic of Egypt and Turkey.

NEWPORT BEACH, CA (FEB. 26) PR NEWSWIRE - "Judging by the January residential sales activities in Coldwell Banker offices which are located throughout the country and in Canada and Puerto Rico, the residential resale business appears to be alive and well," according to Chandler B. Barton, chairman of Coldwell Banker Residential Group.

"Our January sales figures indicate that business in not only good throughout the U.S., in many places we're running well ahead of last year " he said. "Even in the Northeast, where the residential real estate sales have been particularly soft the past few years," Barton pointed out, "there are some very bright spots. Our sales in Fairfield County, Conn., for example, are nearly double this year over last year, and in Westchester County, N.Y., our sales are 8 percent ahead."

Other cities where Coldwell Banker is showing sales increases this January over last include: Detroit plus 7 percent; Tampa/Orlando plus 8 percent; Pittsburgh and Minneapolis/St. Paul both plus 11 percent; Charleston and St. Louis plus 29 percent; Seattle plus 69 percent; and Las Vegas plus 122 percent.

"We're fortunate as a company to have the representation throughout the country to give us a national perspective, and overall we're ahead of last year in sales," Barton added. "In addition to these major markets, our franchised offices in the smaller markets are looking particularly strong."

Coldwell Banker has nearly 1,900 residential real estate offices and over

40,000 sales associates in North America, and is a member of the Sears Financial Network.

NEW YORK (FEB. 26) PR NEWSWIRE - ISS International Service System, Inc. (AMEX: ISI) reported today the following for the quarter and the year ended Dec. 31, 1989:

ISS INTERNATIONAL SERVICE SYSTEM, INC. AND SUBSIDIARIES
(Consolidated)

Periods ended	Year		Three months	
Dec. 31	1989	1988	1989	1988
Revenues	$493,621,000	$242,176,000	$129,753,000	$65,716,000
Cost of services	419,496,000	211,114,000	109,783,000	56,814,000
Gross profit	74,125,000	31,062,000	19,970,000	8,902,000
Selling & admin. expenses	57,363,000	26,215,000	15,293,000	7,224,000
Operating income	16,762,000	4,847,000	4,677,000	1,678,000
Interest expense, net	9,176,000	1,696,000	2,461,000	588,000
Inc. bef. inc. taxes	7,586,000	3,151,000	2,216,000	1,090,000
Prov. for inc. taxes	3,450,000	1,440,000	1,000,000	490,000
Net income	4,136,000	1,711,000	1,216,000	600,000
Earnings per share	$.58	$.45	$.17	$.16

ISS reported record results for the year and the three-month periods ended Dec. 31, 1989. The company's operating income increased to $16,762,000 for the year ended Dec. 31, 1989, compared to $4,847,000 for the year ended Dec. 31, 1988, an increase of 246 percent. The operating results for the three months ended Dec. 31, 1989, increased to $4,677,000, compared to $1,678,000 for the comparable period last year, an increase of 179 percent. The results reflect the successful integration of the ADT Maintenance Division (ADT) purchased on Dec. 29, 1988.

The earnings per share of 58 cents and 17 cents for the year and three-month periods of 1989 reflect an increase of 29 percent and 6 percent for the comparable periods of 1988. The 1989 earnings per share have been fully diluted for the 25,000 shares of convertible preferred stock issued to ISS A/S in connection with the financing of the acquisition of ADT. If converted, the preferred stock would equal 3,333,333 shares of common stock. The total number of outstanding common shares used in the 1989 earnings per-share calculation is 7,169,574, compared to 3,836,241 shares in 1988.

The board of directors has declared a common stock dividend of 6 cents per share to be paid on April 6, 1990, to stockholders of record at the close of business on March 19.

ISS International Service System, Inc. is a national service company providing cleaning, indoor environmental management services, landscape management, security, mechanical and other related maintenance services.

#90057p0387 02/26/1990 ~PR Newswire

DETROIT (FEB. 26) PR NEWSWIRE - A Rockwell International executive, saying he is "bullish" on the automotive industry outlook for the 1990s, said that strategic investments totalling $130 million have helped position the company's Automotive Body and Chassis Systems business for the 1990s.

William F. Rebone Jr., president of Automotive Body and Chassis Systems (AB&CS), said that the investments have helped his business to increase sales volumes, have added new technology, expanded product lines and increased capability to provide "concept-to-delivery" service to customers in strategically targeted markets.

He said that despite recent softening in the North American passenger-car market, he remains bullish on the automotive industry outlook in the new decade. He said the four business units reporting to him began Fiscal 1990 with strong sales volumes.

Rebone discussed details of the investment program and its impact upon his business at a news conference today, held in conjunction with the 1990 SAE International Congress and Exposition in Detroit, today through March 2.

He said the investments also helped Automotive Body and Chassis Systems to improve its design, engineering and production capabilities and to expand capacity during the 1988-90 period.

"We now have 25 production locations worldwide, compared to 19 at the end of 1988," Rebone said. "We anticipate that more new plants will probably be established in the near future."

In addition to several new product programs for Chrysler, Ford and General Motors in North America, Rockwell also is supplying automotive products to every major North American automotive manufacturer of Japanese or Korean ownership, Rebone noted.

He said the $130 million investment has helped AB&CS complete its transition from a "contract manufacturer" to a full-service, world- class, systems-oriented supplier, capable of handling design, engineering and prototyping requirements in all of its body systems, automotive plastics, suspension systems and steel wheel businesses.

"We have full program management capability," Rebone explained. "In many of our new product programs we're providing our customers with complete design, engineering, prototyping and testing services."

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

PHILADELPHIA (FEB. 26) PR NEWSWIRE - Consolidated Rail Corp. (Conrail) (NYSE: CRR) announced today that it purchased approximately 22.32 million shares of its common stock (approximately 33 percent of its outstanding shares of common stock) at $49 per share in accordance with the terms of its "Dutch Auction" cash tender offer which expired at midnight, New York City time, Feb. 14, 1990.

Conrail had previously announced on Feb. 15 that a preliminary count by the depositary showed that approximately 22.5 million shares were tendered at or below the $49 per share purchase price and that the preliminary proration factor would be approximately 99.3 percent. The actual number of shares properly delivered in accordance with the terms of the offer, based on the final computation provided by the depositary, was 22,322,860 shares. As a result, Conrail purchased all shares properly delivered at or below the $49 per share purchase price without proration.

Payment for the shares commenced today, Feb. 26, 1990.

ST. PETERSBURG, FL (FEB. 26) PR NEWSWIRE - Progress Credit Corporation has acquired a minority interest in Pegasus Capital Corporation, a San Francisco based asset finance and management company with aircraft equipment as its primary focus, it was announced today by Thomas S.

Krzesinski, group vice president, Florida Progress Corporation (NYSE: FPC).

Pegasus, with total assets in excess of $300 million, is engaged in the business of purchasing, selling, leasing and remarketing new and used commercial aircraft. It also has international operations through a London office and in the Pacific-rim area with international commercial carriers.

"This investment complements our existing focus on commercial aircraft financing and allows us to access Pegasus' expertise in achieving both an increased presence and selected diversity of asset holdings in this industry," Krzesinski said.

"We feel that the involvement of Progress Credit, with a portfolio of $1.4 billion of financings, will enhance Pegasus Capital Corporation's position within the industry," Stephen C. Bieneman, president and chairman of the board of Pegasus Capital Corporation said. "We will be able to access markets which will allow for continued significant appreciation in the underlying value of Pegasus."

ANN ARBOR, MI (FEB. 26) PR NEWSWIRE - Gelman Sciences, Inc. (AMEX: GSC), an Ann Arbor-based manufacturer of microporous membranes, will appeal a $2.57 million jury award against the company in a personal injury action.

On Feb. 23, 1990, the U.S. District Court for the Northern District of Ohio entered judgment against the company in that amount. The plaintiff allegedly had been injured transferring jet fuel using one of the company's funnels. A spokesman for the company noted that the handling of jet fuel is inherently dangerous and that there have been no similar reports of injury from use of the company's products. Gelman Sciences believes that any amount for which the company may be liable will be covered by insurance.

#90057p0399 02/26/1990 ~PR Newswire

CAMDEN, S.C. (FEB. 26) PR NEWSWIRE - Builders Transport Incorporated (NASDAQ: TRUK) and Comcar Industries, Inc. announced today that they have entered into a letter of intent providing for the combination of their

companies through the acquisition by Comcar of all the outstanding common stock of Builders for a cash price of $15 per share. The letter of intent is subject to a number of conditions, including completion of due diligence, negotiation of a definitive acquisition agreement and the method for handling Builders' subordinated debentures, the obtaining of financing and the receipt of a fairness opinion by Builders. The letter of intent is not binding on the parties and there is no assurance that a transaction will be concluded.

Comcar Industries is a privately held company headquartered in Auburndale, Fla., which is the parent company of seven diversified nationwide and regional motor carriers. Comcar, one of the nation's leading truckload carriers, has over 40 years experience in the trucking industry.

Builders Transport also announced that its results of operations for the fourth quarter ended Dec. 31, 1989, were adversely affected by severe weather conditions and sharply increased fuel costs during the month of December as well as required increases in workers compensation and other reserves. Accordingly, the company expects to report a loss for the fourth quarter.

Charles Gay, chairman of the board of Builders, stated, "We believe that the proposed transaction with Comcar is in the best interest of our stockholders, customers and employees. Comcar is committed to maintaining a high level of service to our customers and has proven ability in operating trucking operations similar to those of Builders. We hope to work quickly with Comcar to allow it to complete its due diligence with a view toward entering into a definitive agreement and concluding the transaction as soon as practicable. We have authorized an independent committee of our board of directors to work with our counsel and our financial advisor, Alex. Brown and Sons Incorporated, to review the proposed transaction and consider any other alternative that may be presented to the company."

Builders Transport, Incorporated is a truckload carrier transporting a wide variety of general commodities in both interstate and intrastate commerce. The company is headquartered in Camden and conducts operations throughout the continental United States, pursuant to authority granted by federal and state regulatory agencies.

HOUSTON (FEB. 26) PR NEWSWIRE - Baroid Corp. (NYSE: BRC) announced today the appointment of J. Landis Martin as chairman of its board of directors.

Martin will continue his responsibilities as chief executive officer. Additionally, Edward C. Hutcheson Jr., has been named president and chief operating officer of Baroid Corporation. Hutcheson will continue in his position as president of Baroid Drilling Fluids Inc., the largest subsidiary of Bariod Corp.

Martin was elected president and chief executive officer and a director of Baroid Corp. in October 1987. Martin is also president and chief executive officer of NL Industries Inc. Prior to joining Baroid and NL, Martin was a senior partner in the national law firm of Kirkland & Ellis from 1984 to 1987.

Hutcheson joined the company in 1987 as vice president, marketing, and corporate vice president. He was appointed president of Baroid Drilling Fluids in October 1988. Prior to joining Baroid, Hutcheson served as senior vice president for Bernard Johnson Inc., a Houston-based engineering firm. He is a 1968 graduate of Northwestern University.

Baroid Corporation is a worldwide supplier of products and services to the oil and gas well drilling industry. Bariod Drilling Fluids is a major supplier of drilling fluids and services, and fluids testing equipment.

TROY, MI (FEB. 26) PR NEWSWIRE - K mart Corporation (NYSE: KM) today announced a five-year, $2.3 billion new store opening, enlargement, relocation and refurbishment program and the establishment of a $640 million provision to cover all expenses associated with the store modernization program and other non-recurring charges.

K mart chairman of the board and chief executive officer Joseph E. Antonini said, "In the past 18 months, we have addressed two key strategies for K mart Corporation. Last year, several thousand prices were reduced to maintain our price leadership across America. In addition, a number of our stores were expanded, relocated or refurbished to maintain our dominance in the marketplace. Both strategies proved to be very successful. In the enlarged, relocated and prototype stores, customer acceptance of the layouts, fixturing and new merchandise assortments has been very good, and sales results have exceeded expectations. As a result, we are announcing an acceleration of our store modernization program, including the refurbishment of our existing store base.

"These programs, combined with the planned completion of the installation of POS systems in our stores later this year, will strengthen the company

for the future, providing our customers with good value-quality products at low prices in an attractive, modern shopping environment."

Antonini continued, "The store modernization program, which represents an acceleration of a previous program, will involve virtually all U.S. K mart discount stores. There will be approximately 250 new full-size K mart stores, 620 enlargements, 280 relocations and 30 closings. In addition, approximately 1,260 stores will be refurbished to bring their layout and fixturing up to new store standards. Plans now call for completion of the store enlargements and relocations by 1993 and remaining refurbishments by 1994. In essence, we are making the right changes, right now."

Commenting further on the store program, Antonini added, "This program is the best investment we can make in our core discount store business and clearly demonstrates the company's commitment to discount store retailing. The acceleration of this strategic store restructuring program will improve the shopping environment for our customers and will clearly show the excellent quality of our merchandise through an improved presentation. The fine quality of the branded merchandise we carry will become more evident in a more modern store environment."

With respect to the provision, Antonini stated, "The $640 million provision, to be charged against 1989 earnings, will include the expenses to be incurred in the K mart stores that will be closed, relocated, enlarged or refurbished. These expenses, which represent approximately 80 percent of the total provision, include the estimated lease obligations for store closings and relocations, as well as asset write-offs, primarily furniture and fixtures, for all of the affected stores. Approximately 20 percent of the provision is for the subsidiary companies' store closing and refurbishment program; costs of converting Makro warehouses into PACE Membership Warehouse locations; and the settlement of certain non-routine legal matters, all of which are non- recurring charges."

Antonini concluded, "In conjunction with the adoption of our plan to accelerate this program, we are recognizing the associated expenses up front as a one-time, restructuring charge. Going forward, we anticipate sales and earnings in future years will benefit significantly from the expansion and acceleration of this program."

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada.

ZEELAND, MI (FEB. 26) PR NEWSWIRE - Gentex Corporation (NASDAQ-NMS: GNTX) announced today that it has received a U.S. patent on its electrochromic technology, an important protection for what has become a major product line. Electrochromic automatic mirror sales represented 42 percent of total sales for the company in 1989.

"We are pleased that this patent was issued to Gentex and believe that this and other patent applications pending will protect the product from infringement," said Gentex Executive Vice President Ken LaGrand. The patent was issued by the U.S. Patent Office on Feb. 20.

Gentex was the first company to introduce a successful electrochromic mirror product to the automotive industry. The Gentex electrochromic mirror is an automotive safety feature which automatically darkens when subjected to headlight glare from following vehicles. Gentex utilizes a proprietary electrochemical gel which darkens when electrical current is applied. The mirror is offered in options packages by General Motors Corporation, Ford Motor Company and Chrysler Corporation. The company has a five-year contract with Ford Motor Company to supply all of its interior automatic mirror products.

Patent No. 4,902,108 was issued to Gentex Corporation for "Single-compartment, self-erasing, solution-phase electrochromic devices, solutions for use therein, and uses thereof." Gentex applied for the patent on March 31, 1986.

Gentex Corporation develops, manufactures and markets proprietary electro-optical products: motorized and electrochromic automatic mirrors for the automotive industry and an extensive line of fire- protection products for commercial applications. Shares of Gentex common stock are traded in the NASDAQ National Market System under the symbol GNTX.

#90057p0414 02/26/1990 ~PR Newswire

LONDON (FEB. 26) PR NEWSWIRE - Vickers P.L.C. today reported the following financial highlights:

(in millions of pounds sterling)

	1989	1988	Pct.
Revenue	695.7	776.3	-10.4
Earnings before taxes	83.6	69.8	+19.8
Earnings per Share	23.3pence	19.3pence	+20.7
Dividends per Share	8.9pence	7.5pence	+18.7

Following are extracts from the chairman's statement:

Earnings growth continued in 1989 for the sixth consecutive year. Pre-tax profits were 83.6 million pounds sterling, an increase on 1988 of 19.8 percent. Earnings per share grew by 20.7 percent and the proposed full year dividend of 8.9 pence represents an increase of 18.7 percent.

The compound annual rate of growth in earnings per share over the last six years has been 27 percent, an excellent performance which reflects the strength and balance of our portfolio of international businesses.

1989 was a particularly active year for the company, with the sale of Howson-Algraphy and the acquisition of Ross Catherall being major steps forward in the continuing progress of our strategy.

The continued success of Rolls-Royce Motor Cars in 1989, with a 16 percent increase in worldwide retail sales, was achieved against a background of adverse currency factors and a weak market for luxury vehicles in the United States. The autumn launch of the new Rolls-Royce and Bentley models was very well received by the press, public and dealers.

It has been a year of sound achievement by our defense and aerospace activities. The development contract for Challenger 2 announced in December 1988 gave Vickers some tough milestones to meet. I am happy to say that the division has kept ahead of program for the completion of the prototypes in September 1990. When questioned about tanks for the British Army in the House of Commons on Feb. 6, 1990, the Secretary of State for Defense stated, "I think that there is a prospect of significant purchases of tanks and it is worth putting that on record."

In 1989, Vickers Marine Engineering Division produced a noteworthy recovery, returning to acceptable levels of profitability in a market that is still at a low ebb in most parts of the world.

Vickers Medical Division continues to make progress. Air-Shields Vickers performed well in the neonatal incubator sector despite a soft market for medical equipment in the United States. Demand in Europe for neurodiagnostic equipment has been strong. A number of new products were successfully launched by the division in 1989.

The board is recommending a final net dividend of 5.6 pence per share, making a total of 8.9 pence for the year compared with 7.5 pence for 1988.

BELLEVUE, WA (FEB. 26) PR NEWSWIRE - VWR Corp. (NASDAQ: VWRX) confirmed today that it will proceed on March 1 with the tax-free spin-off of its non-laboratory businesses into a new public company, Momentum Distribution Inc.

The Internal Revenue Service has ruled that the Momentum shares can be distributed as a tax-free dividend to VWR shareholders of record on March 1. For each five shares of VWR stock held, shareholders will receive one share of Momentum Distribution Inc. Fractional shares will be settled in cash. The distribution of shares is expected to be complete by March 31.

VWR Corp., which was created by a 1986 spin-off from Univar Corp., will retain the laboratory supply distribution businesses now conducted by its VWR Scientific subsidiary. Boosted by the recent acquisition of a similar business formerly owned by Sargent-Welch, VWR is now the nation's second-largest distributor of laboratory supplies and equipment, with sales of approximately $350 million for the 10 months ended Dec. 31, 1989. Sales for the current year are expected to exceed $400 million.

Momentum Distribution Inc. will consist of two groups, one distributing graphic arts supplies (Momentum Graphics) and the other distributing covering and construction fabrics and supplies for manufacturing upholstered furniture and bedding (VWR Textiles & Supplies and Momentum Textiles). Taken together, these operations generated approximately $165 million in sales for the 10 months ended Dec. 31, 1989.

Both companies will be traded on NASDAQ.

Effective March 1, VWR headquarters will be relocated to Media, Penn. Jerrold B. Harris, a recognized leader in the scientific supply industry, will become president and chief executive officer of the reorganized company. Gerard W. Cooney, former president of VWR Scientific, has been named executive vice president and chief operating officer.

Richard E. Engebrecht, currently president and chief executive officer of VWR Corp., has been named president, chief executive officer and chairman of Momentum Distribution Inc., which will remain in Bellevue.

DALLAS (FEB. 26) PR NEWSWIRE - Halliburton Co. (NYSE: HAL) announced today that its Brown & Root Inc. subsidiary is exploring with a potential purchaser the possible sale of a major portion of its marine construction assets, consisting primarily of offshore construction vessels in the

United States, Middle East and Far East.

Assets not included in the possible sale are Brown & Root's interests in European Marine Contractors Limited, Rockwater Offshore Contractors, Highlands Fabricators, and its fabrication operations in the United States and Indonesia.

The company stated that there is no assurance that these efforts will result in a sale, and that pending such sale the company will continue to pursue business as usual, with the full support of the Brown & Root organization.

Halliburton indicated that its efforts to explore a sale of these assets resulted from Brown & Root's continuing examination of its business activities and its strategy to emphasize engineering, construction, construction management, project management and maintenance in markets that offer the most attractive growth opportunities in the future.

Halliburton Co. is one of the world's largest diversified oil field services, engineering and construction companies. Founded in 1919, Halliburton provides oil field services and products, industrial and marine engineering and construction services, and property and casualty insurance services.

DALLAS (FEB. 26) PR NEWSWIRE - MCorp today announced it has executed a definitive agreement to sell its interest in MBank El Paso to a private investor group led by the bank's management. MBank El Paso is a wholly owned banking subsidiary of MCorp with assets of $1.1 billion and deposits of $946 million at Dec. 31, 1989.

Terms of the agreement call for MCorp to receive an undisclosed amount of cash in redemption of all the issued and outstanding stock of MBank El Paso. Specific terms of the agreement will be set forth in documents filed with the bankruptcy court when the proposal is submitted for approval.

The transaction, which is subject to applicable regulatory and bankruptcy court approvals, is expected to be completed prior to Sept. 30, 1990. MCorp has been in Chapter 11 proceedings since March 31, 1989.

The proposed sale of MBank El Paso reflects MCorp's ongoing efforts to maximize the company's value for the benefit of its creditors and shareholders.

EDMONTON, Alberta (FEB. 26) PR NEWSWIRE - Terra Mines Ltd. (NASDAQ: TMEXF; Toronto: TER) today reported that it has been unable to make satisfactory financial arrangements to enable the company to recommence production at the Amelia mine. Payments required to be made pursuant to the mineral rights purchase agreement are in default and the previous owner of the mineral rights is taking legal action to recover those rights. The Amelia mine is held by Minera Canterra, S.A. de C.V., a company which is effectively control led by Terra Mines Ltd. and constitutes the company's major asset.

The company continues its attempts to resolve the issue, but unless it is able to make satisfactory arrangments with the previous owner within the

next 10 business days it is likely that it will lose its interest in the mine.

Terra Mines Ltd. is headquartered in Edmonton, Alberta. The shares of the company trade on the Toronto Stock Exchange, trading symbol of TER and trade over-the-counter on the NASDAQ system in the United States; trading symbol TMEXF.

SEATTLE (FEB. 26) PR NEWSWIRE - Avianca, the flag carrier of Colombia, took delivery today of its first Boeing 767-200 extended range jetliner. A second Boeing 767-200ER will be delivered to the airline later this year. The new twinjets will replace Boeing 707s on Avianca's international routes.

With the advanced-technology 767, Avianca not only will maintain nonstop service to distant points but will improve operational efficiency and passenger comfort while meeting the most stringent noise regulations.

Avianca, the oldest airline in the Americas and the second oldest in the world, will use the new 767-200ER initially to service destinations in North and South America. In the near future, however, the carrier intends to operate the extended range twinjets on its European routes.

Avianca's 767-200ER can fly nonstop up to 5,400 statute miles (8,700 km) from the airline's home base of Bogota with a full passenger payload. Thus Avianca will be able to use the 767-200ER for nonstop flights from Bogota to European destinations such as Madrid. This is a greater range than that of any other twinjet with comparable payload for flights originating from high-altitude cities like Bogota. As configured for Avianca, the twin-aisle 767 carries 193 passengers in a two-class arrangement of 10 seats in first class and 183 in tourist.

The aircraft is powered by Pratt & Whitney PW4056 engines and is certified for a maximum takeoff weight of 351,000 lbs. (159,213 kg).

The Boeing 767 excels at extended range operations. An Air Seychelles 767-200ER on its delivery flight set a new world distance record for commercial twinjets on July 27, 1989, when it flew 8,893 miles (14,311 km) nonstop between Grand Rapids, Michigan, USA, and the Republic of Seychelles in 16 hours 49 minutes.

As of Feb. 15, 43 airlines worldwide have ordered 483 Boeing 767s. In the Americas, operators of the 767 include Varig, Transbrasil, TACA, Lan Chile

Aero Peru and several major U.S. and Canadian carriers.

#90057p0454 02/26/1990 ~PR Newswire

CLEVELAND (FEB. 26) PR NEWSWIRE - The Ohio Department of Insurance today approved new premium rates for Blue Cross & Blue Shield of Ohio (BCBSO) Medicare supplemental health insurance policies.

The new rates will affect about 66,000 Medifil subscribers in the Eastern Region (Greater Cleveland) and about 24,000 in the Western Region (Greater Toledo) who have individual policies. Increases in premiums will begin appearing with the March billings.

The increases, averaging $15 to $25 a month, were made necessary by growing utilization of medical services, rising costs and the federal government's cutbacks in coverage for medical needs of the elderly.

The Department of Insurance rejected BCBSO's Medifil premium rate requests on Jan. 30 while approving rates for a new under-65 statewide product, which is now being implemented. For the Medifil policies, BCBSO simply refiled the requests without the objectionable portions.

The difference will mean an increase of $14.52 per month for Eastern Region high-option subscribers to the current product instead of $15.62 under the previous filing, and $18.54 per month for regular-option subscribers instead of $20.33. Subscribers in the Western Region will pay $18.90 more a month instead of $20.69.

All newly eligible Medicare consumers are being offered the statewide Medifil plan. Only current customers already enrolled in the current

high-option Medifil policies will continue to receive the higher-benefit reimbursement. This includes coverage of the Part B deductible and reimbursement up to Usual, Customary and Reasonable (UCR) medical costs.

The statewide plan's high option also covers the Medicare deductible, but the 20 percent of charges not covered by Medicare are based on Medicare's reasonable charges rather than UCR. The statewide product also requires an additional $1,000 co-payment, plus the original $2,500 deductible before Medifil begins to cover 100 percent reimbursement under catastrophic coverage. The Medifil Ohio regular option offers no catastrophic reimbursement or payment for private duty nursing, home health care or hospice care.

Seniors who enroll in the statewide Medifil plan immediately upon Medicare eligibility will remain on the deepest discount rung of a three-tier pricing plan by age. This discount is $17.54 each month in the Eastern Region and $16.23 in the Western Region.

#90057u0207 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - A panel of economists predicted Monday that the U.S. economy will grow slowly during 1990 and avert a recession over the next three years even though it is hovering in a ''danger zone.''

The 65 economists, surveyed by the National Association of Business Economists, also predicted inflation will hold near 4 percent for the year echoing the opinion of Federal Reserve Board Chairman Alan Greenspan, and maintain that level through 1991.

''The general shape of the economy in 1990 remains one of slow growth with a somewhat lower rate of inflation,'' the Cleveland-based association reported in releasing its quarterly economic survey.

''The basic outlines of the forecast have changed very little between our last two surveys, although the panel sees some of the cyclical components - investment, housing, automobile sales, industrial production, corporate profits - weaker than before,'' the group said.

The survey found 60.6 percent of the economists believe the United States will avoid a recession in 1990, as well as 1991 and 1992. But it warned, ''The risk of a recession is not trivial.''

''The median probability of a downturn in the next 12 months is 28 percent and almost half of the panel say the risk has increased in the last quarter,'' the quarterly survey said.

''Thus even though the best guess in either the next 12 months or even as far ahead as three years, the economy is in a danger zone,'' it said. ''The probability of recession is not trivial, and almost 80 percent of respondents think it has risen or remained the same over the last quarter.''

The survey also predicted that the real gross national product - the nation's total output of goods and services - will edge up 1.7 percent this year. In 1991, the GNP will accelerate to 2.5 percent, it said.

#90057u0214 02/26/1990 ~United Press International

(FEB. 26) UPI - The New York Knicks wanted to send a message Sunday to the Detroit Pistons. They instead were handed a stinging rebuke.

The defending NBA champions functioned like a tight unit Sunday, while the Knicks were disorganized from the start. The result was a 98-87 Detroit victory in a game between Eastern Conference leaders.

Detroit, sparked by Joe Dumars' 31 points, placed five scorers in double figures.

''They got beat by the world champions,'' Knicks Coach Stu Jackson said. ''They're there, we're not yet. This game was an indication we're not there with them. This was played in playoff style. We have to establish we can beat this team.''

The Knicks are winless in three games against Detroit, a team they beat four times last season. While New York looked upon this game as a way to measure up against Detroit, the Pistons approached it as just another regular-season game in which they needed to play well.

That confidence and experience paid off for Detroit at the outset. They ran off a 6-0 lead as New York missed its first five shots and the Pistons never trailed. The closest the Knicks came was within three points on two occasions.

The Knicks, as they often have this season, relied on Patrick Ewing. He finished with 37 points, but received little help. Maurice Cheeks, playing his first home game for the Knicks since they acquired him from San Antonio for Rod Strickland, scored 12 points and Gerald Wilkins 10.

Detroit, meanwhile, had balanced scoring. Bill Laimbeer had 16 points, Vinnie Johnson 12, James Edwards 11 and Dennis Rodman 10.

The Pistons, who had an NBA season-high 13-game winning streak snapped Friday night in Atlanta, handed New York its third home loss of the season. New York, 22-3 at home, attracted its 18th Madison Sqaure Garden sellout.

--- AROUND THE NBA ---

In other NBA games Sunday, Cleveland blasted Charlotte 102-86, Chicago nipped New Jersey 107-106 in overtime, Indiana defeated Portland, 117-112, Dallas clipped Minnesota 87-82, Boston pounded Denver 115-107, Milwaukee topped Miami 113-108, San Antonio edged the LA Clippers 107-106, Seattle beat Golden State 110-102 and Utah upended the LA Lakers 104-103.

Cavaliers 102, Hornets 86

At Richfield, Ohio, Larry Nance scored 24 points and Hot Rod Williams added 18 points and 11 rebounds to lead Cleveland to its third straight triumph. The Hornets are 1-23 on the road.

Bulls 107, Nets 106 (OT)

At East Rutherford, N.J., Michael Jordan capped a 32-point effort with an 18-foot jump shot with 25 seconds remaining in overtime. Jordan hit two jumpers in the final 1:38 to decide the game. Sam Bowie paced the Nets with 22 points and 13 rebounds.

Pacers 117, Blazers 112

At Indianapolis, Reggie Miller scored 35 points for the Pacers while Rik Smits and LaSalle Thompson combined for 28 rebounds against the league's top rebounding team. Portland, paced by Terry Porter's 20 points, has lost four of five games since Clyde Drexler suffered an ankle injury last week.

Mavericks 87, Wolves 82

At Minneapolis, Derek Harper hit a 15-foot jumper with 16 seconds to go and Rolando Blackman converted two free throws with 11 seconds left for Dallas. Roy Tarpley had 26 points and 16 rebounds as the Mavericks won for the 14th time in their last 17 games. Minnesota dropped its third straight outing.

Celtics 115, Nuggets 107

At Denver, Larry Bird scored 25 points and grabbed 17 rebounds as Boston closed an eight-game road trip with two victories. Boston made 8 of 10 free throws in the final three minutes. Alex English led the Nuggets with 26 points.

Bucks 113, Heat 108

At Miami, Ricky Pierce sank three free throws in the final 15 seconds to help the Bucks seal the victory. Pierce led the Bucks with 30 points, while rookie Sherman Douglas led the Heat with 17 points. The Heat outscored Milwaukee 37-21 in the fourth quarter.

Spurs 107, Clippers 106

At Los Angeles, David Robinson sank two free throws with 7 seconds left to help San Antonio extend the Clippers' losing streak to seven games. Ken Norman had given the Clippers a 105-104 lead on a pair of free throws with 15 seconds remaining. Robinson led the Spurs with 26 points and 14 rebounds. Charles Smith paced the Clippers with 23 points.

SuperSonics 110, Warriors 102

At Seattle, Derrick McKey scored 33 points and rookie Dana Barros added a career-high 26 points as the SuperSonics streaked to their fifth straight victory. McKey scored 11 points in the final four minutes as Seattle went on a 14-2 spurt and put the game away. Chris Mullin scored 27 points for the Warriors, who have lost six games in a row.

Jazz 104, Lakers 103

At Inglewood, Calif., Karl Malone scored 34 points, including a three-pointer with six-tenths of a second to play, to lift the Jazz. Thurl Bailey added 21 points as Utah won its fifth straight game. Magic Johnson led the Lakers with 32 points and 16 assists.

#90057u0232 02/26/1990 ~United Press International

JOHANNESBURG, South Africa (FEB. 26) UPI - Black leader Nelson Mandela prepared Monday to depart on a 17-day foreign trip after urging an end to black-on-black violence at a rally in troubled Natal province.

The rally in Durban, in Natal, and a second in the central city of Bloemfontein were Mandela's last public engagements in South Africa before embarking Tuesday to Zambia, where he will meet the once-exiled leaders of the African National Congress and leaders of the southern African frontline states.

It will be the first meeting between the ANC hierarchy in Zambia and Mandela since his release Feb. 11 from a Cape Town prison after serving 27 years of a life sentence. The ANC headquarters were established in Zambia during its years of exile, which ended when South African Frederik de Klerk lifted a ban on the nationalist organization prior to releasing Mandela.

Mandela urged tens of thousands of supporters at the rally in Durban to ''close down the death factories'' and end their war with a rival Zulu movement.

In a speech devoted almost exclusively to the conflict that has left as

many as 3,000 dead since 1987, Mandela warned that the fighting jeopardized ''the peace process in the whole of the country'' and appealed for black unity in the struggle against apartheid.

The Natal conflict has pitted radical supporters of ANC-linked anti-apartheid groups and labor fronts against the conservative Zulu movement of Chief Mangosuthu Buthelezi known as Inkatha.

While Mandela drew cheers for his appeal for peace, murmurs and booing rippled through the crowd when he spoke of reconciliation with Inkatha, prompting him to stretch out his arm to quiet the crowd. Midway through his 50-minute address dozens of youths began to leave the stadium, evidently dissatisifed with his conciliatory tone.

In Johannesburg, southern Africa's Anglican bishops Sunday urged the ANC for the first time to suspend its armed struggle against white rule, citing de Klerk's reform initiatives.

Archbishop Desmond Tutu said the clerics hope the government would reciprocate by granting amnesty to all political prisoners and exiles and withdrawing the 800 army troops deployed in the nation's black townships.

Following the rally in Natal, Mandela flew aboard a private jet to the central city of Bloemfontein, the country's judicial capital and the heartland of white conservatism, where the ANC was formally launched in 1912.

Appearing before a crowd of 25,000 people, Mandela called on white Afrikaners to join the ANC, urged police to ''abandon apartheid and to serve the interests of the people'' and spoke of the ''moral decay'' in the security forces.

But he then departed from the prepared text of his speech to omit a demand that de Klerk suspend his law and order minister, Adriaan Vlok, and fire his defense minister, Gen. Magnus Malan.

In the original speech released by his aides, Mandela called for the actions amid allegations of military involvement in two assassinations of white human rights lawyers last year in South Africa and Namibia.

#90057u0282 02/26/1990 ~United Press International

GRANADA, Nicaragua (FEB. 26) UPI - The army of foreign election observers who monitored Nicaragua's elections used jeeps, airplanes, helicopters and even horse-drawn carriages to crisscross the country in search of fraud.

They didn't find much.

Several observers said the ruling Sandinistas could hardly improve on the voting process and former President Jimmy Carter said he found Sunday's election proceeding in a ''normal fashion.''

Maria Harrere Albrieu, an official of the Organization of American States, said she only saw ''minor problems'' in Granada, 29 miles southeast of Managua.

Harrere traveled by horse-drawn carriage from one polling place to another questioning officials at each site about how voting was progressing.

Official observers from the OAS and the United Nations were a minority compared to the legion of self-appointed observers from around the world who descended on the Central American nation to ensure elections pitting President Daniel Ortega against U.S.-backed opposition candidate Violeta Chamorro were fair.

One official called the observers by and large ''electoral tourists'' and some opposition leaders accused them of sympathizing with the ruling Sandinistas.

Observers stopped in at virtually every polling place to watch as voters waited patiently in lines that sometimes numbered in the hundreds. Schools offices, even private homes served as makeshift voting sites.

Each location held only one or two cardboard booths. Only one voter per booth was allowed into the building, and representatives of opposing parties signed the back of each completed ballot.

Nikki Zollar, former chairwoman of the Chicago Board of Election Commissioners, told a chief election judge at one polling place, ''You're doing a good job,'' and said election officials in Chicago could learn a lot from the way the Nicaraguan elections were run.

Zollar's group, Lawyers for a Democratic Election, praised the numbering of ballots to prevent fraud and the inking of voters' thumbs to prevent people from voting more than once.

''In Chicago, people would probably be outraged if you asked them to dip their fingers in ink,'' Zollar said. ''These people are pretty serious about this.''

Zollar was even more impressed by the enthusiasm of the volunteer election judges.

''One woman was up at 4 a.m.,'' she commented. ''The volunteers are very much willing to work. They met last night, and spent the night with the

(voting) materials. These people are really into it.''

#90057u0291 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - David Goldfarb, the Soviet Jewish geneticist who battled authorities for seven years before he was allowed to emigrate to the United States in 1986, died of heart failure. He was 71.

Goldfarb, who had suffered from diabetes and heart disease since before leaving the Soviet Union, died of heart failure Saturday at George Washington University Hospital in Washington, a hospital spokesman said.

The scientist made his home in Manhattan, but since December had been staying in Bethesda, Md. where he was a visiting scholar at the National Institutes of Health.

Goldfarb gained world attention as a ''refusenik'' in the early 1980s after his numerous requests to leave the Soviet Union were nixed by authorities. His case was publicly championed by Nicholas Daniloff, a Moscow-based writer for U.S. News & World Report.

Daniloff once reported that the Soviet intelligence agency KGB asked Goldfarb to invite Daniloff to his home in a scheme calculated to embarass the American. Goldfarb declined, complicating his efforts to leave the county.

The scientist and his wife, Cecilia, finally received permission to leave the country in 1986.

Permission came only after Armand Hammer, the American chairman of Occidental Petroleum who for decades has exerted strong financial an political influence in the Soviet Union, intervened on their behalf.

Goldfarb, a native of the Ukraine and a graduate of the state medical school in Moscow, served in the Soviet Army during World War II. He later did key genetic research that undermined the influence of Tofrim Lysenko, an agronomist influential during Josef Stalin's reign, who rejected standard theories of heredity.

Goldfarb eventually became the head of the laboratory of molecular genetics of bacteria for the Soviet Academy of Sciences, a post from which he resigned in 1978 when he sought permission to emigrate.

In the United States, Goldfarb and his wife joined their son Alex, a microbiologist and assistant professor at Columbia University, who had emigrated to the United States in 1975.

The couple left behind two daughters, although recently their daughter Olga received permission to emigrate. She is expected to arrive in the United States in May.

Information about funeral and burial plans were not immediately available.

#90057u0370 02/26/1990 ~United Press International

NEW YORK (FEB. 26) UPI - All you need to know about current Broadway attractions, theaters, leading players and ticket situations (opening dates in brackets):

Credit card holders can order tickets by telephone as indicated. Orchestra seats for musicals run $45, $47.50 and $50 and for plays $37.50 to $40. Tele-Charge and Ticketron add a booking fee, and Ticketmaster adds a service charge. There are no additional fees for theater charge phones. Tele-Charge: 212-239-6200; Ticketron: regional offices or 212-399-4444; Ticketmaster: 212-307-7171.

''Black and Blue'' - Minskoff; an all star cast pays tribute to jazz and blues in a dazzling new musical by the creators of ''Tango Argentino''; available (1-26-89) (Teletron).

''Cats'' - Winter Garden; one of the most fantastically staged shows in Broadway history, a knockout musical based on a T.S. Eliot fable with Andrew Lloyd-Webber music; near capacity (10-7-82) (Tele-Charge).

''A Chorus Line'' - Shubert; longest-running show in Broadway history, an absorbing musical about Broadway chorus ''gypsies''; available (7-25-75) (Tele-Charge).

''The Circle'' - Ambassador; Rex Harrison, Glynis Johns and Stewart Granger make this fluffy 1921 Somerset Maugham drawing room comedy sparkle again; available (11-14-89) (Tele-Charge).

''City of Angels'' - Virginia; a new smash hit musical thriller by Larry Gelbart with music by Cy Coleman about the detective novel writer in Hollywood; near capacity (12-7-89) (Ticketron).

''A Few Good Men'' - Music Box; Tom Hulce and Roxanne Hart score in a stunning new play about a military court martial that pits duty against conscience; available (11-15-89) (Ticketron).

''Grand Hotel'' - Martin Beck; Tommy Tune's eye-filling new musical is a generally effective adaptation of Vicky Baum's novel about 1920s Berlin; available (11-12-89) (Ticketron).

''Gypsy'' - St. James; Tyne Daly is a searingly obsessive Mamma Rose in this effective 30th anniversary revival of the Styne-Sondheim musical; near capacity(11-16-89) (Ticketron).

''The Heidi Chronicles'' - Plymouth; Brooke Adams gives a fine performance as a woman comes of age in the feminist era in this new, Pulitzer and Tony award-winning Wendy Wasserstein comedy; near capacity (3-8-89) (Tele-Charge).

''Jerome Robbins' Broadway'' - Imperial; an electric Tony Award-winning musical smash with emphasis on dancing wrought from the hit shows choreographed by Robbins; near capacity (2-26-89) (Tele-Charge).

''Lend Me a Tenor'' - Royale; a hilarious new comedy set in the 1930s with a powerhouse cast headed by Philip Bosco, Victor Garber and Tovah Feldshuh; available (2-2-89) (Tele-Charge).

''Les Miserables'' - Broadway; the spectacularly staged Tony Award-winning pop opera from London based on Victor Hugo's novel, directed by Trevor Nunn; near capacity (3-12-87) (Tele-Charge).

''Meet Me in St. Louis'' - Gershwin; a lavishly staged musical version of the 1944 MGM film with 10 new songs and a powerhouse cast; available (11-2-88) (Ticketron).

''The Merchant of Venice'' - 46th Street; Peter Hall's production of Shakespeare's drama notable for Dustin Hoffman's sympathetic Shylock; capacity (12-19-89)(Ticketron).

''Phantom of the Opera'' - Majestic; Andrew Lloyd-Weber's enchanting, excitingly staged operatic treatment of the beauty and the beast story set at the Paris Opera; capacity (1-26-88) (Tele-Charge).

''Tru'' - Booth; Robert Morse recreates Truman Capote in a shallow but mesmerizing one-man play set in 1975; available (12-14-89) (Tele-Charge).

Opening: Nil.

Closed: ''Rumors'' (2-24) (531 performances); ''Miss Margardia's Way'' (2-25) (11 performances).

#90057u0374 02/26/1990 ~United Press International

CAPE CANAVERAL, FL (FEB. 26) UPI - The shuttle Atlantis and its five-man, all-military crew have been grounded five times so far because of crew illness, bad weather and a computer glitch.

But Columbia holds the shuttle record with six delays in a row before finally blasting off Jan. 12, 1986, on its seventh launch attempt. Here is a chronology of NASA's ongoing bid to get Atlantis into orbit on a secret military mission:

-Feb. 18: Atlantis's countdown began at 8 p.m. EST for a Feb. 22 launch attempt.

-Feb. 21: NASA managers ordered a 24-hour launch delay when Atlantis skipper John ''J.O.'' Creighton fell ill with flu-like symptoms, pushing liftoff to no earlier than Friday, Feb. 23.

-Feb. 22: Launch of the 34th shuttle mission was delayed an additional 24 hours, to no earlier than Saturday, Feb. 24, to give Creighton more time to get better. Predicted bad weather also was cited as a concern.

-Feb. 23: Creighton was pronounced fit for flight, but NASA delayed launch to Sunday, Feb. 25, because of more bad weather.

-Feb. 25: Trouble with a ground tracking computer delayed liftoff another 24 hours when Atlantis's countdown reached the T-minus 31-second mark. The weather was ideal and Atlantis was in perfect shape for liftoff, only to be grounded.

-Feb. 26: Atlantis's countdown remained in an extended ''hold'' at the T-minus nine-minute mark, starting at 12:45 a.m., because of high winds at launch pad 39A. The wind concern was later eased, but low clouds ultimately prompted NASA managers to delay the flight for the day. Launch was rescheduled for no earlier than Wednesday, Feb. 28, between midnight and 4 a.m.

CORTLAND, NY (FEB. 26) UPI - The daily New York state ski report compiled by Ski Areas of New York Inc.:

Legend: New, new snow; GM, grooming; SM, snowmaking; NS, night skiing.

Surface condition codes: P, powder; PP, packed powder; WP, wet powder; WBP wind blown powder; MGS, machine groomed surface; FG, frozen granular; LG, loose granular; ICY, icy; WG, wet granular; CRN, corn snow; VAR, variable; SPR, spring conditions. The final two numbers refer respectively to number of day slopes open and number of night slopes open.

Key to Cross-Country: TS, track setting in last 24 hours; SM, snowmaking; KM TRAX SET, distance of groomed trail available in system; KM TRAILS, total trail distance open in system; NS, area offers night cross-country facility.

Note: The absence of a ski center listing in the daily report indicates that no report was received from that ski center or that it may be a weekend facility.

#90057u0407 02/26/1990 ~United Press International

(FEB. 26) UPI - Arctic cold gripped the East Coast early Monday, dropping temperatures below zero from Maine to Maryland, while clouds and high wind over Florida delayed a space shuttle launch and snow whitened the storm-weary Midwest.

The National Weather Service said temperatures dipped into the 20s and 30s overnight across much of the South, and a hard-freeze warning was posted for northern and eastern portions of Georgia.

High winds and clouds over Cape Canaveral, Fla., Monday postponed the predawn launch of the space shuttle Atlantis, delaying the secret military mission for at least 48 hours. The launch delay was the fifth for the hard-luck shuttle crew and the second attributed to adverse weather conditions.

Air Force meteorologists called for an 80 percent chance of yet another delay Wednesday at the next possible launch opportunity, and a 60 percent chance of bad weather if the flight ends up slipping 72 hours.

Temperatures around the South ranged from 25 in Knoxville, Tenn., 35 in Atlanta, 36 in Charleston, S.C., 38 in Jacksonville, Fla., and 59 in Miami.

Bitter cold chilled the mid-Atlantic states overnight, dropping temperatures below zero from Pennsylvania to Maryland, the NWS said.

Lows ranging from 15 below to 10 above were reported in Pennsylvania and Maryland, and from 20 below to 10 above in West Virginia. Southern New Jersey saw relatively warmer temperatures, recording lows between 10 and 15 above.

New Englanders got a blast of bonechilling cold early Monday as strong northwest winds combined with arctic cold, sending wind chill values plunging to more than 30 below in parts of the region.

The mercury dropped to 7 below under clear skies in northern Maine, where wind gusts of up to 30 mph made temperatures feel like minus 30. Vermont also reported subzero temperatures, bitterly cold winds and partly cloudy skies.

Skies were clear in New Hampshire, where the mercury was in the single digits and wind chills slipped near 30 below.

Single-digit temperatures also were reported throughout Massachusetts, and the wind chill in Boston dropped to minus 25. Subzero wind chills also blew through Rhode Island, where up to 10 inches of snow fell on Sunday.

A brutal storm that clobbered the Great Lakes states over the weekend, leaving at least 23 people dead in traffic accidents, was replaced by a milder weather system that blanketed the Midwest with cloudy skies and light snow.

Temperatures in the 20s and 30s were reported across the Midwest from Indiana to Minnesota, the weather service said.

Sault Ste. Marie in Michigan's Upper Peninsula dipped to 9 below early Monday morning and was one of the few locations in the Midwest and Great Lakes to report clear skies, the NWS said.

In northern Wisconsin, Eau Claire and Wausau reported snow flurries.

Temperatures were in the single digits in Wisconsin and the lower 20s in southern Illinois. Missouri reported generally cloudy skies with temperatures in the mid 20s and lower 30s.

Mardi Gras revelers in New Orleans and Louisiana expected clear skies and temperatures reaching into the 60s, the weather service said. Clear skies and springlike weather also was forecast across much of Texas.

Clouds were increasing over western New Mexico, and some mountain snow was possible near the Colorado border, forecasters said.

In the West, sunny skies and scattered clouds prevailed in most areas.

Low clouds and fog hugging the coast of northern California were expected to continue through mid-week, while skies remained clear and temperatures hovered above normal inland.

Dry weather was forecast for Washington until mid-week, with early morning fog, afternoon sunshine and highs in the 50s, the NWS said.

#90057u0444 02/26/1990 ~United Press International

(FEB. 26) UPI - Around the world... around the clock... the latest news from U-P-I.

The fifth attempt in five days to launch the space shuttle Atlantis has failed. High winds and clouds over Cape Canaveral this morning forced NASA to postpone the lift-off. NASA managers even waived a rule forbidding launches if winds are higher than 27-point-six miles an hour. But cloud

cover over the ship's emergency runway caused the launch to be called off for the day. The next attempt to send the shuttle off on a military mission will be Wednesday.

President Bush and West German Chancellor Helmut Kohl have sketched the vague outlines of the unified Germany they want to emerge from 45 years of separation. Bush and Kohl held a news conference at Camp David after the second of their two meetings in 24 hours. They want Germany to stay in NATO... but Kohl could NOT predict what forces might be stationed in what is now East Germany.

Several battalions of Soviet troops will leave Czechoslovakia today. The withdrawal will occur as Czechoslovak President Havel is in Moscow to sign an agreement with Soviet President Gorbachev calling for the pull-out. The deal calls for 73-thousand 500 Soviet troops to leave Czechoslovakia by May 31st, with the rest to be out by December of 1991.

Lithuanian nationalists and the republic's Communist Party leader went to Moscow last night. They want to start talks with Soviet leaders, now that the secessionists have dominated the parliamentary elections. Lithuanian nationalists claim they won 72 of the 142 parliamentary seats, with runoffs necessary in 45 races.

#90057u0531 02/26/1990 ~United Press International

ANALYSIS BY STEVE GERSTEL

WASHINGTON (FEB. 26) UPI - A cursory reading of the resolution showed the two-page document to be routine: The designation of Apr. 24 as a day of remembrance for Armenian victims of genocide under the Ottoman Empire, 1915-1923.

Yet this simple commemoration ignited a passionate debate in the Senate over events of 75 years ago, sent lobbyists rushing to Capitol Hill, rendered old political alliances and involved even the president of Turkey.

Most significant, it matched two men, Senate President Pro Tem Robert Byrd D-W.Va., and Senate Republican leader Robert Dole of Kansas, who have been commanding figures in the chamber for the past decade and more.

No one who heard Dole can question his genuine, almost emotional support for the Armenians.

Some of it can be traced to his deep-felt debt to an Armenian-American doctor who helped restore him to health after he was badly, almost mortally, wounded in World War II.

But there seemed to be more: a fight for the little guy against the giant - the Armenians against the Turks, or as Dole put it, ''This is the David vs. Goliath vote.''

''Turkey, Goliath, has all the troops, all the guns, money, an embassy, American business, lobbyists, the whole nine yards,'' Dole said. ''They can all speak for Turkey, make Turkey's case.

''Armenia has none of the above,'' Dole added. ''If the Senate doesn't speak for Armenia - who will?''

Byrd's role as defender of the Turks seems more pragmatic yet there are those who say his own roots in the poverty of West Virginia allow him to identify with and admire the people of Turkey.

Byrd says that historians, at this late date, disagree whether there was a genocide of Armenians - a claim which Dole dismisses as nonsense - and warns of the negative impact the resolution would have on the Turkish

government.

There are scholars who say the Armenians were victims of an almost continious civil war, disease and famine and that both Christians and Muslims suffered an ''immense'' number of deaths. Presumably, it is this side that Turkish President Turgut Ozal outlined to leading senators when he visted Washington last month.

In seeking passage of the resolution, Dole was also bucking the White House, which did not want to offend the Turkish government. The United States has long maintained bases and listening posts in Turkey and is considered one of the most loyal allies in a troubled part of the world.

It is this fear of offending Turkey, which Byrd and some others expressed in public and which Dole said more gave as their reason in private, which worked against the resolution.

Byrd stated his concern that the resolution would be an affront to present day Turks because the Senate would be calling their ''forefathers criminals.''

But Dole replied, ''I am not moved by the plea that we should not punish the sons and daughters of those who may have participated in the Ottoman Empire in the slaughter of Armenians.

''I am moved by who might have been the sons and daughters of the 1.5 million Armenians who were slaughtered,'' Dole said. ''What about their sons, what about their daughters, if any?''

#90057u0534 02/26/1990 ~United Press International

(FEB. 26) UPI - The count-down clock at Cape Canaveral stopped again this morning, the fifth time during attempts to launch the shuttle Atlantis.

High winds and clouds over Florida caused the fifth delay in five days to send Atlantis into space. NASA scientists plan to try again Wednesday.

Radio traffic monitored by reporters indicated that the shuttle's blacked-out countdown was held up at the T-minus nine-minute mark because of high winds at the launch pad.

NASA flight rules forbid launches if winds surpass 27-point-six miles an hour. But space agency managers waived the rule, and agreed to let Atlantis take off as long as winds were less than 29-point-nine miles an hour.

Even so, the shuttle's countdown remained in an extended ''hold'' because

of cloud cover over the ship's emergency runway.

Air Force meteorologists predict an 80 percent chance of yet another delay Wednesday at the next possible launch time... and a 60 percent chance of bad weather if the flight ends up slipping 72 hours.

The goal of the 34th shuttle mission is classified top secret. But the astronauts are reported planning to deploy a 500-million-dollar 37-thousand-pound photo-reconnaissance satellite into an orbit carrying it over more than 80 percent of the Soviet Union.

Launch delays have plagued the shuttle program since it began, with only eight of the 34 flights to date getting into space on time.

The record-holder for late launches was the January 12th, 1986, flight of Columbia. It got off the ground on its seventh try, 16 days before the Challenger disaster. The fatal flight of Challenger occurred on the sixth attempt.

#90057u0542 02/26/1990 ~United Press International

(FEB. 26) UPI - Partial election returns from Nicaragua show that President Daniel Ortega has lost his bid for another term.

According to partial returns, U-S-backed opposition candidate Violeta Chamorro is leading... 51-point-five to 44 percent. The Sandinista-controlled Supreme Electoral Council announced the newspaper publisher's victory early this morning... eight hours after polls closed... based on returns from five-point-six percent of Nicaragua's 43-hundred 91 polling stations.

Council President Mariano Fiallos said he is certain within a reasonable degree that these figures will fit with the final results. He held a nationally televised news conference to announce the results.

Government workers watching the news conference gasped in shock at the announcement.

Chamorro's supporters gathered at a downtown Managua restaurant and declared her the winner a short time before the official returns were announced.

Ortega has NOT announced any reaction to the results. He had pledged to respect the election results before yesterday's voting... but he also refused to acknowledge the possibility of an opposition victory that would end 10 years of Sandinista rule.

The voting itself went quietly. It was witnessed by thousands of international observers who said the election process was fair.

Diplomats say Chamorro's upset victory was fueled by surprisingly strong discontent with the decade-old regime. The Sandinistas have presided over a bloody civil war with the U-S-financed Contra rebels and an economic crisis that saw 33-thousand percent inflation in 1988.

#90057u0560 02/26/1990 ~United Press International

(FEB. 26) UPI - President Bush and West German Chancellor Kohl are vague about the workings of the two-plus-four talks on German re-unification. But the leaders are adamant about their wish for a united Germany to be a member of NATO.

Bush and Kohl held an hour-long news conference yesterday following their weekend talks at Camp David.

Both men agreed that Germany must remain a full military partner in NATO... with U-S troops on its soil... to guarantee stability in a rapidly changing Europe.

They also said such an arrangement would guarantee Germany's own peaceful intent. Kohl tried to further ease fears of a dominant Germany by saying the country would have NO desire to posess nuclear wepaons.

Kohl said issues such as future presence of Soviet troops in what is now East Germany and the preservation of the German-Polish border would have to be dealt with in the formal talks.

Those talks between the Germanies and the four World War Two Allied powers are expected to begin after the March 18th East German elections.

Czechoslovak President Vaclev Havel arrived this morning in Moscow, where he's expected to sign an agreement that will lead to the Soviet Union withdrawing its troops from his country.

The withdrawal will be done in three stages. Soviet officials say the agreement calls for 73-thousand 500 soldiers to leave during the first phase, which is to be completed by May 31st.

The second phase is scheduled to close by the end of this year... with the remaining Soviet forces leaving Czechoslovakia by December 1991.

Several battalions of the Soviet first tank division will be pulling out even as Havel and Soviet President Gorbachev sign the agreement.

Those battalions are leaving as part of Gorbachev's decision to withdraw 50-thousand troops from Europe.

A Soviet officer at one base in Czechoslovakia says he expects the withdrawal to go smoothly. But he notes that there will be problems relocating 17-thousand families... that include 20-thousand children.

-30- 2201

#90057u0575 02/26/1990 ~United Press International

(FEB. 26) UPI - The stage is set for the international custody battle of a seven-year-old girl whose mother spent 25 months in a jail instead of turning the girl over to her father for UNsupervised visits.

The father... Dr. Eric Foretich... arrived in New Zealand today where his daughter, Hilary, has been living with her maternal grandparents.

Foretich was granted visitation rights after his divorce from his wife, Elizabeth Morgan, and he says he'll rescue their daughter from Morgan's parents.

Morgan does NOT want Foretich to see Hilary... alleging that he sexually abused their daughter. Foretich denies the charge.

Hundreds of U-S reporters who followed Foretich to New Zealand are receiving a stern warning from the nation's prime minister.

Prime Minister Geoffrey Palmer says the journalists should be sure to study and heed New Zealand's tough contempt-of-court laws, which mandate privacy.

The law calls for a three-month jail term for any journalist who publicizes information about Family Court hearings that has NOT been released by the judge.

The nation's greatest street party, The Mardi Gras, is building toward its final blowout.

Clear skies and spring-like temperatures are expected for a fourth straight day in the Crescent City. By tomorrow night, the end of Fat Tuesday, the crowds are expected to be larger than the one and one-half Million that filled New Orleans at Mardi Gras last year.

A total of 11 parades rolled through New Orleans and its suburbs yesterday. The chief one... staged by the Krewe Bacchus... had movie star Dennis Quaid as its king... reigning as the mythical Roman god of wine.

Only two parades are on tap for today... but tomorrow will have 15

processions before the beginning of the Christian penitential season of Lent, a period of self-denial and reflection that continues to Easter.

So far, police have NOT given out any arrest figures. But drunkenness and bawdy behavior are traditional during Mardi Gras.

Although New Orleans is the Carnival capital, the Louisiana capital of Baton Rouge had a parade of its own Saturday. The Spanish Town Mardi Gras Parade... a tongue-in-cheek procession... had a mix of bawdy floats and political krewes. The Krewe Rhetoric was composed of five former top-level members of Governor Buddy Roemer's administration. They chanted cliches Roemer made famous.

Another group that attracted a lot of attention was the Krewe of Yazoo. It's a precision lawnmower drill team... whose members dressed like Elvis Presley and had a theme this year of GraceLAWN.

#90057u0580 02/26/1990 ~United Press International

(FEB. 26) UPI - Carried forward by the memory of her martyred husband, U.S.-backed opposition presidential candidate Violeta Chamorro is pitting a motherly image against the youthful style of President Daniel Ortega.

Chamorro, 60, campaigned from a wheelchair after a fall shattered her kneecap late last year. The white canopy that shaded her from the sun, combined with an all-white wardrobe, gave Chamorro a saintly appearance in a wheelchair throne.

At the beginning of the campaign, U.S. officials looking for an alternative to Sandinista rule enthusiastically embraced Chamorro as Central America's Corazon Aquino.

Like the Philippine president who rallied that country's public to oust Ferdinand Marcos, Chamorro's late husband is a popular martyr.

Chamorro has little political experience but ample reknown as a rival to the ruling Sandinista Front. She wields clout as the publisher of La Prensa, the afternoon daily that is the main voice of the Nicaraguan opposition. She has used the paper to criticize and harass the Sandinista government at every turn, as well as to promote her own candidacy.

Because she professes not to belong to any political party, she was able to bridge the deep personal and political differences that mark the 14 parties of the National Opposition Union, or UNO.

''I want the same thing for the Nicaraguan family as I want for my own family,'' says a Chamorro campaign poster. ''Peace and reconciliation.''

''It's true she has little political experience, but she is very popular and will help the ticket,'' said Andres Zuniga, an UNO politician.

Chamorro served on a five-member governing junta after the Sandinista-led uprising overthrew dictator Anastasio Somoza in 1979, but resigned in April 1980 and gradually became one of the government's most outspoken critics.

Chamorro's late husband and predecessor as publisher, Pedro Joaquin Chamorro, was a leading critic of the Somoza regime and became a political martyr when he was assassinated in 1978, a murder that has never been solved. His slaying is regarded as the spark that set into motion a popular insurrection that brought down the Nicaraguan dictator a year later.

Of the couple's four children, two sided with the Sandinista revolution and two chose to work against it. As a result, the Chamorros currently dominate Nicaraguan journalism - both pro- and anti-Sandinista.

The eldest son, Pedro Joaquin Jr., was editor of La Prensa before becoming a director of the U.S.-backed Contra rebel movement. The paper's current editor is daughter Cristiana.

On the government side, son Carlos Fernando edits Barricada, the official Sandinista newspaper, and daughter Claudia served as ambassador to Costa Rica. Xavier Chamorro, Violeta's brother-in-law, is editor of the country's third newspaper, the pro-Sandinita Nuevo Diario.

Looking beyond the symbolism, there is little that makes Chamorro a likely presidential candidate. Even her own supporters recognize that political savvy is not her strong point. Chamorro is a bumbling public speaker who left campaign strategy to her aides.

Many wonder about her ability to hold together the fractious opposition coalition, which is supporting her campaign.

Political observers said Chamorro's main strength as a presidential candidate would be her image as a polite, if somewhat genteel, matriarch.

But critics question her ability to understand and discuss complicated issues, and said she might crack under pressure.

''They couldn't have picked a better candidate from our point of view,'' said one Sandinista organizer.

Chamorro was born on Oct. 18, 1929, into a wealthy farming family. Through her marriage to a Chamorro, she joined another wealthy and influential

family which had provided Nicaragua with several of its past presidents.

-30- 4048

#90057u0768 02/26/1990 ~United Press International

(FEB. 26) UPI - It appears the underdog candidate will score a surprising victory in Nicaragua's national elections. Projections by the government-controlled Supreme Electoral Council show opposition candidate Violeta Chamorro defeating President Daniel Ortega and his Sandinista party. Votes from 30 percent of the nation's polling places show Chamorro leading Ortega 54 percent to 42 percent.

A Soviet vice president greeted Czechoslovak leader Vaclav Havel ... who arrived in Moscow this morning to sign a major agreement with Soviet President Gorbachev. Havel and Gorbachev will ink an pact calling for the removal of all Soviet troops from Czechoslovakia by December 1991. During his visit, Havel will lay a wreath at the grave of Soviet human rights activist Andrei Sakharov.

The latest delay in the launch of the shuttle Atlantis will last at least 48 hours. This morning's scheduled launch was scrubbed because of bad weather over Cape Canaveral. The forecast for Wednesday calls for more of the same. Today's blacked-out countdown was held up at the T-minus nine-minute mark due to strong winds. It was later called off because of the winds and low clouds.

The Washington-based Population Crisis Committee wants more couples to use birth control. The committee says about half of the world's couples currently use birth control. But the committee says if the Earth's spiraling population growth is be slowed and stopped, the percentage of couples using contraceptives will have to increase to 75 percent. The committee gave 18 nations ''poor'' ratings for birth control practices.

#90057u0784 02/26/1990 ~United Press International

(FEB. 26) UPI - Prices on the Tokyo Stock Exchange nosedived in thin trading Monday reflecting investors' disappointment with the weak bond market and the dollar's rally to an eight-month high against the yen.

The blue-chip Nikkei Average of 225 selected issues, which lost 2,569.35 points or 10.34 percent last week, plummeted 1,569.10 points - 4.5 percent - to close at 33,321.87, below the 34,000-point level for the first time

since July.

It was the second-largest single-day loss next only to the ''Black Monday'' stock crash in October 1987 in term of points.

The broader-based Tokyo Stock Exchange Index of all listed major shares tumbled 106.0 points to 2,448.31, the second sharpest fall on record.

Trading was slow, with a turnover of 400 million shares, compared with 445 million traded Friday.

Declines pounded advances 1,030 to only 25, with 29 issues unchanged.

Elsewhere in Asia, prices on the Hong Kong Stock Exchange closed lower but showed some resilience to the plunge in Japan.

The Hang Seng Index, which fell 33.61 points Friday, lost 21.68 points to 2,872.63. Utilities closed down 30.92 points, industrials lost 21.39 and properties closed down 37.86.

The Hang Seng Index rebounded late in the session after an initial 55.83-point fall reflecting the sharp plunge in Japan.

Turnover amounted to 990.98 million shares, compared with 1.1 billion Friday.

In Australia, stock prices closed broadly lower in thin trading on the Sydney Sharemarket.

The All Ordinaries Index, which fell 27.8 points Friday, lost 35.4 points to 1545.6.

Turnover amounted to around 101.1 million shares, compared with 95 million Friday.

#90057u0804 02/26/1990 ~United Press International

NASHVILLE, TN (FEB. 26) UPI - Students vowed Monday to maintain their sit-in at historically black Tennessee State University until they are granted amnesty for the protest to improve campus living conditions.

On the fourth day of their occupation of administrative offices, the 150 students claimed they had won agreements on some demands but negotiations with university president Otis Floyd broke down Sunday because he refused to grant amnesty.

''We deliberated over six hours to try to reach the end of our sit-in,''

student body president Jeffrey Carr said. ''We asked for amnesty. They did not grant it to us and we don't understand it.''

Civil rights leaders have thrown their support behind the students, who complain of rundown dormitories with cockroaches, rats and leaky roofs. Community ministers and supporters have brought donations and food for the protesters.

''The conditions under which you have to live and which you are paying for don't exist in any white college in the state,'' C.T. Vivian, one of Nashville's first civil rights protesters, told the students at a rally. ''You have a right to sue these people. They have taken your money and not given you proper services.''

The protest is the second within a week at Tennessee State. About 100 students ended a 22-hour occupation of Floyd's office Wednesday night after four squads of riot police entered the building. No arrests were made.

The protesters left the building with arms linked, chanting, ''No sellout, no compromise,'' and vowed to return unless their demands were met.

Students asked for amnesty for protesters, a meeting with Floyd and improvements in dormitories, study areas and campus cafeterias, and 1,000 supporters then joined them in a midnight march on the president's home.

After a noon Friday deadline passed without response to their demands, the students took over administrative offices on the university's downtown campus.

Students from other Tennessee colleges are rallying behind the occupation.

''The same God that was with the students 30 years ago at the sit-in movements is the same God that is with the students at TSU,'' said Jerome Morris, a student at Austin Peay State University at Clarksville, Tenn.

State higher education officials have acknowledged many of the student complaints are legitimate because Tennessee State traditionally lagged behind the state's mostly white universities in funding. But they contend they are working to improve building upkeep with capital outlays of $30 million in 1987, $22 million in 1988 and $23 million last year.

''We are unified,'' student protester Darryl McClain said. ''I'm telling you here right now, I don't want to be arrested. But if I must be arrested I will be arrested.''

-30- 2996

#90057u0834 02/26/1990 ~United Press International
HOUSTON (FEB. 26) UPI - Domestic drilling fell last week to 897 working rotary rigs, compared with 918 last week and 757 for the same week last year, according to Baker Hughes.

Offshore drilling activity in the Gulf of Mexico, though, increased slightly as two more mobile offshore drilling units went to work, according to Offshore Data Services.

There were 328 rotary rigs working in Texas last week, compared with 336 the week before and 218 for the same week a year ago.

Counts for other states and Canada were:

Louisiana, 148, compared with 147 the previous week and 126 for the same week a year ago; New Mexico, 35, compared with 35 the previous week and 24 for the same week a year ago; Oklahoma, 111, compared with 124 the previous week and 113 for the same week a year ago; Canada, 230, compared with 233 the previous week and 227 for the same week a year ago.

In the Gulf, 147 of the area's 215 mobile offshore rigs are under contract. Utilization in the area is now at 68.4 percent.

In European waters and the North Sea, a net decrease of one unit under contract was offset by the movement of one rig out of the area, resulting in little net change in the area's utilization, currently at 87.1 percent.

Officials said 115 of the 132 European market mobile offshore drilling units were working.

-30- 1508

#90057u0863 02/26/1990 ~United Press International
AUSTIN, Texas (FEB. 26) UPI - The Microelectronics and Computer Technology Corp. Monday announced the signing of Northern Telecom Inc. as the 21st shareholders in the advanced computer research consortium.

''We are proud to welcome one of the world's leading telecommunications firms to MCC,'' said Grant Dove, chairman and chief executive officer of MCC. ''Northern Telecom has been a technology leader in its industry, pioneering the implementation of digital technology.''

Dove said Northern Telecom will participate in the Packaging-Interconnect Program, which is developing technologies that will allow computer chips to be packaged with greater density.

Northern Telecom, a major manufacturer of telecommunications equipment, is the U.S. subsidiary of Canadian telecommunications giant Northern Telecom

Ltd., based in Mississauga, Ontario.

''MCC is an exciting research organization on the cutting edge of semiconductor packaging and interconnection technology,'' said David Vice, vice-chairman of products and technology for Northern Telecom Ltd.

''We are pleased to be a part of this consortium and are confident that our investment in MCC's long-term research will keep us well-positioned in the areas of manufacturing and packaging technology,'' he said.

Northern Telecom, the sixth largest captive supplier of microchips in North America, manufactures proprietary semiconductors for exclusive use in its telecommunications products for business and residential users.

The company also makes a complete line of fully digital central office switches for telephone companies in North America, Europe and Asia.

The leading global suppliers of fully digital telecommunications switching systems, Northern Telecom had 1989 revenues of $6.1 billion.

Northern Telecom, based in Nashville, Tenn., is the first new MCC member since Cadence Design Systems, Inc. signed up last October.

MCC, composed of some of the nation's largest electronics companies, was formed in 1982 to boost long-term technology and overcome Japanese advances in computer-related research.

In addition to component packaging, MCC is also conducting research into computer-aided design, advanced computer architecture, software technology human interface, parallel processing and high temperature superconductivity.

TAIPEI, TAIWAN (FEB. 26) UPI - The Taiwan Stock Exchange suffered the biggest single-day loss in its 28-year history Monday after share prices in Tokyo continued to nosedive.

The weighted prices index of the Taiwan Stock Exchange plummeted 572.03 points to close at 11,086.63 as investors reacted to the fall in Tokyo, sparked by fear of higher interest rates.

This was the biggest loss registered by Taiwan's exchange in 28 years, stock analysts said. Nov. 28, 1989, the Taiwan index tumbled 547.98 points due to investor uncertainty over a new stock transaction tax rate.

Analysts said the outlook for Taiwan stocks was gloomy and market performance would continue to depend on the Tokyo and New York share markets. "Investors are pretty nervous about the global markets," one dealer said. "They remember the great crash of 1987."

Turnover totaled 116.1 billion New Taiwan dollars ($4.46 billion), with losers outnumbering gainers 185 to eight and two issues unchanged.

#90057u0930 02/26/1990 ~United Press International
WASHINGTON (FEB. 26) UPI - The Supreme Court refused Tuesday to decide whether the military can remove soldiers and sailors from duty because they are gay.

The justices, without comment, declined to review appeals from a lesbian Army reservist stationed in Wisconsin and a male homosexual Navy reservist now living near San Diego.

Their appeals challenged Pentagon policy, which states, ''homosexuality is incompatible with military service. The presence of such members adversely affects the ability of the armed fores to maintain discipline, good order and morale ....''

Navy reservist James Woodward, 39, was placed on inactive duty in 1974 and eventually discharged at the end of his six-year military obligation after saying he was a homosexual.

Technical Sgt. Miriam Ben-Shalom, who said she was a lesbian, was discharged from the Army reserves in Milwaukee, but a federal court in 1980 ordered the Army to reenlist her. The Army repeatedly refused but eventually reenlisted her under another court order. A federal appeals court reversed the lower court decision in August.

Lawyers for both Woodward and Ben-Shalom contend their clients' First Amendment rights to freedom of speech and association and their rights to equal protection were violated by the military's action.

Woodward admitted he was homosexual at the time of his enlistment in 1972 but answered ''no'' when asked if he had engaged in homosexual activity. He was accepted into the Navy but asked to resign during his assignment in the Philippines after he was seen sitting in the Subic Bay Officer's Club with an enlisted man who was being discharged for homosexuality.

Woodward, then an ensign, was eventually placed on inactive reserve duty. He sued the Navy, seeking reinstatement to active duty status and back pay.

The U.S. District Court of Appeals for the District of Columbia found the Navy acted properly in placing Woodward on inactive reserve duty.

Woodward's lawyers urged the justices to send the case back to the lower courts, arguing the Navy must first prove what interests are served by prohibiting homosexuals from military service.

The government argued against high court review in both cases, adding that only one appellate decision invalidating the gay-related regulations has been made in the United States and it was vacated when a full-court appeals panel heard the case.

WASHINGTON (FEB. 26) UPI - The Supreme Court refused to disturb a lower court ruling Monday that barred a neighborhood preservation group from stopping the construction of a 200-foot television tower near New Orleans' French Quarter.

The justices, without comment, rejected the appeal by the Bywater Neighborhood Association in a case that focuses on the Federal Communications Commission's licensing authority.

Bywater contends the FCC violated its own regulations as well as the National Historic Preservation Act of 1966 by failing to consult with the NHPA advisory council before allowing the tower construction.

Bywater unsuccessfully tried to stop the tower from going up by suing the FCC and Delaware-based Crescent City Communications Co. The federal court in New Orleans dismissed the case, saying only the federal court in Washington may review challenges to FCC licensing. The 5th Circuit Court of Appeals upheld that decision.

The tower now stands in the Bywater Historic District, which is listed in the National Register of Historic Places, but the FCC has yet to rule on Crescent City's broadcast license application.

Lawyers for the government argued that even if the New Orleans federal court could decide the case, the FCC has no authority to determine whether such towers could be built since it licenses their operation, not construction.

''The dispute over the construction of the tower is for the local authorities, not the FCC,'' the government said, arguing against high court review.

OSAKA, Japan (FEB. 26) UPI - Matsushita Electric Industrial Co. said Monday it has signed an agreement with two subsidiaries of Du Pont de Nemours and Co. for joint development of materials for use by the electronics industry.

Matsushita said the Master Task Agreement was signed with Du Pont Japan Ltd. and Du Pont de Nemours International SA in Geneva.

Under the agreement, the three companies will bring together their expertise and experience to develop materials for electronic manufacturers and exchange technical information between the Matsushita Group and the Du Pont Group worldwide.

The agreement stipulated basic terms and conditions for the exchange and protection of this proprietary technical information, the company said.

Matsushita said it would raise its overseas production to 50 percent of its overall output by 1993 and double its imports into Japan over the 1988 level.

In a separate announcement, Matsushita said the company and its finance subsidiary in the Netherlands will issue $1.3 billion worth of bonds by

public offering in the European market to raise funds for its capital expenditure programs.

The company said the parent firm will issue $1 billion in unsecured bonds due 1994 with warrants and Panasonic Finance (Netherlands) BV will issue $300 million in straight bonds with a four-year maturity.

The Matsushita Electric equity-linked bonds will be issued in $10,000 denominations with two warrants each. Panasonic Finance bonds will come in $5,000 denominations, the company said.

It will be Matsushita's second major international issue following unsecured convertible debentures issued mainly in the United States in 1975.

WASHINGTON (FEB. 26) UPI - The Supreme Court Monday let stand a ruling that barred the release of CIA documents relating to the sinking of the Greenpeace vessel Rainbow Warrior in New Zealand in 1985.

The court refused to hear the case brought by a Houston man seeking review of a ruling by the 5th U.S. Circuit Court of Appeals.

The case involves the sinking of the vessel in Auckland on July 10, 1985, as it was preparing to monitor and protest a scheduled nuclear weapons test conducted by France.

In September of that year, the French prime minister admitted that two French intelligence agents, acting under orders from senior levels of the French government, had been responsible for the sinking.

While the CIA eventually supplied John Knight with some information about the documents, it refused to disclose the documents citing national defense and foreign policy reasons.

Knight brought suit in federal court but the courts sided with the government and he appealed to the high court. He argued that the lower court rulings did not follow procedures set out by the Freedom of Information Act and that the appeals court decision conflicts with other appellate court rulings.

The government argued against review.

#90057u1027 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - Secretary of State James Baker, the main architect of the strategy of pressure for free elections in Nicaragua, said Monday that Mrs. Violetta Chamorro appears to have won and this will lead to peace in Central America.

Baker said, ''In this year of remarkable political change, freedom won another victory yesterday in Nicaragua.''

Baker said the vote count by 8 a.m. EST showed Chamorro leading by a margin of 55 percent to 41.5 percent for Daniel Ortega, with 61 percent of the polling places counted.

One year ago, in a compromise with the Congress, Baker laid out a strategy that would effectively end military aid to the U.S.-backed Contras, providing that Ortega's Sandinista government in Nicaragua allowed free and fair elections.

Although an official U.S. election observer delegation was not given the necessary visas to go to Nicaragua, observers from the United Nations, the Organization of American States and other organizations supplied an extensive system of poll-watchers.

Baker, speaking to a meeting of the National Governors Association, appeared to accept that the elections were free and fair. ''We pay special tribute to all of those whose presence as international observers contributed so greatly to protecting the integrity of the electoral process.''

He continued, ''We hope that yesterday's election will mark the beginning of permanent peace and democracy for the people of Nicaragua.''

Baker commended Chamorro on the apparent victory, adding, ''We also commend Daniel Ortega and the Sandanista government for carrying out this commitment to conduct elections under international supervision.''

Baker made no specific reference to lifting the U.S. economic sanctions against Nicaragua, but he said, ''We are confident that the international community will rally in support of Mrs. Chamorro's new government. The United States looks forward to working with President-elect Chamorro.''

He said that the international communtiy will insist that the vote be respected and that ''full civil and military power be transferred to the new elected government.''

#90057u1082 02/26/1990 ~United Press International
GENEVA, SWITZERLAND (FEB. 26) UPI - Developing countries charged Monday that industrialized nations are seriously jeopardizing the Uruguay Round trade liberalization talks by demanding too much and offering too little in the way of trading concessions.

"After three years of negotiations the time for political decisions has arrived and must be made without further delay," the developing countries said in a statement after a two-day meeting.

Running seriously behind schedule, the Uruguay Round was launched in late 1986 and is facing a deadline of December this year. Negotiations are being held in the framework of the General Agreement on Tariffs and Trade.

The statement by the developing countries, presented by Ambassador Leopoldo Tettamanti of Argentina, said industrialized nations have made demands in new areas such as service industries without "meaningful" offers in return.

Nothing of substance has been offered especially in the tropical products, textiles, and agriculture sectors, the statement said. "The present attitude has the potential to undermine the essential interests of developing countries participating in the (Uruguay) Round and is thus unacceptable to them," it said.

"Consequently it should be pointed out now, while there is still time to adopt the necessary corrective measures, that if this situation persists it will seriously jeopardize the Uruguay Round," the statement said. "The Group of developing countries ... urges all participants to recognize the gravity of the present situation."

Other major problems at the trade liberalization negotiations include a U.S.-European Community fight over EC farm export subsidies and U.S. and other western nations' attacks on Japanese import barriers.

#90057u1101 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - Here is the text of President Bush's statement Monday on the upset election of Violeta Chamorro over Daniel Ortega as Nicaragua's new president:

In this remarkable year of political change, democracy won another victory yesterday. I am most pleased that there has been a free and fair election in Nicaragua and the results are being accepted by both sides.

I am sending messages to Mrs. Chamorro congratulating her on her victory and to President Ortega congratulating him on the conduct of the election and his stated willingness to abide by the results. The United States looks forward to working with Mrs. Chamorro's new government in support of her stated goals of national reconciliation and economic reconstruction, and with President Ortega in helping ensure a peaceful transition of power.

I have talked this morning with Venezuelan President Carlos Andres Perez and we agree completely on the need to help all parties in Nicaragua to achieve a peaceful reconciliation and transfer of power.

We also congratulate the international observer delegations whose activities, which took place at the request of the Sandinista government, helped ensure an open and safe electoral process. There were many, but I want to mention delegations led by former President Jimmy Carter and former Governor Dan Evans, the United Nations delegations led by former Secretary Elliot Richardson and the OAS delegation led by Secretary-General Baena Soares.

We hope that all sides in this hotly fought contest will extend the hand of reconciliation and cooperate together in rebuilding their country for

the good of all Nicaraguans. There is space in a democratic Nicaragua for the expression of all political points of view. We also hope that the cease-fire will be re-established immediately and respected by all sides. Given the elections clear mandate for peace and democracy, there is no reason at all for further military activity from any quarter.

We are confident the international community will strongly support the results of yesterday's elections and will join in the effort to help all Nicaraguans to rebuild their country.

#90057u1124 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - A panel of economists predicted Monday that the nation's economy will grow slowly during 1990 and avert a recession

over the next three years even though it is hovering in a ''danger zone.''

''There is no boom. There is no bust,'' said James Smith, president of the National Association of Business Economists and a professor at the University of North Carolina. ''The inflation outlook is 'steady as she goes.'''

The 65 economists surveyed by the group believe inflation will hold near 4 percent for the year, echoing the opinion of Federal Reserve Board Chairman Alan Greenspan, and maintain that level through 1991.

''The general shape of the economy in 1990 remains one of slow growth with a somewhat lower rate of inflation,'' compared to 4.5 percent in 1989, the Cleveland-based association reported in its quarterly economic survey.

''The basic outlines of the forecast have changed very little between our last two surveys, although the panel sees some of the cyclical components - investment, housing, automobile sales, industrial production, corporate profits - weaker than before,'' the group said.

The survey found 60.6 percent of the economists believe the United States will avoid a recession in 1990, as well as 1991 and 1992. But it warned, ''The risk of a recession is not trivial.''

''The median probability of a downturn in the next 12 months is 28 percent and almost half of the panel say the risk has increased in the last quarter,'' the quarterly survey said.

''Thus even though the best guess in either the next 12 months or even as far ahead as three years, the economy is in a danger zone,'' it said. ''The probability of recession is not trivial, and almost 80 percent of respondents think it has risen or remained the same over the last quarter.''

The survey also predicted that the real gross national product - the nation's total output of goods and services - will edge up 1.7 percent this year. In 1991, the GNP will accelerate to 2.5 percent, it said.

#90057u1141 02/26/1990 ~United Press International

NEW ORLEANS (FEB. 26) UPI - Legions of Mardi Gras revelers nursed their hangovers Monday in anticipation of creating new ones on Fat Tuesday - the bacchanalian climax of the Big Easy's Carnival season.

After 11 parades rolled Sunday, giving crowds ample opportunity to scramble for beads, panties, doubloons and other cheap junk thrown by masked float riders, only three were scheduled for on Lundi Gras -

literally ''Fat Monday.'' The slowdown will give the throngs of tourists and locals a chance to regroup for Tuesday final blowout, which will feature 15 parades.

Three people were injured in a shooting incident along a parade route Sunday night but authorities said the Carnival crowds had generally been well behaved.

Perfect party weather prevailed Monday for the fourth straight day.

The biggest event on Lundi Gras was the scheduled arrival of Rex, the king of Carnival, who was to arrive in the city on the Coast Guard sailing ship Eagle on a dock on the Mississippi River.

Tradition dictates the mayor of the city proclaim Rex ruler on Mardi Gras and instruct citizens to abandon work for one more liquor-soaked blowout before the solemn Catholic Lenten season begins on Ash Wednesday.

The climax to the hedonistic weekend's celebration was the Krewe of Bacchus, which rolled through the city Sunday with actor Dennis Quaid as its king. Quaid, obviously enjoying himself, twirled a cape over his head and whooped and yelled at the appreciative crowd.

The shooting occurred as the Bacchus Parade made its turn onto Canal Street from St. Charles Avenue, said Ruth Asher, a spokeswoman for the New Orleans Police Department.

''The victims and others were involved in an altercation or an argument Saturday night at a bar in Kenner (a New Orleans suburb),'' Asher said. ''It seems they all came together Sunday night on Canal Street, resulting in someone producing a handgun and firing shots.''

All three victims were listed in good condition at Charity Hospital. No arrests had been made in the case Monday, Asher said.

Despite the violence, police said crowds had been well behaved along the parade routes.

''I really think this beautiful weather might have something to do with the way the crowds have been behaving,'' Asher said.

As many as 1.5 million people could fill city streets Fat Tuesday to climax the nation's greatest street party. Mardi Gras is celebrated right up to midnight, when the Christian penitential season of Lent begins, a period of self-denial and reflection that continues to Easter.

#90057u1155 02/26/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (FEB. 26) UPI - More than 300 inmates at Robben Island Prison began a hunger strike Monday because they consider themselves political prisoners eligible for release under President Frederik de Klerk's racial reforms.

The Prisons Service confirmed in a statement that ''a number of prisoners'' declined food at Robben Island but said the inmates ''have ample other foodstuffs in their possession.''

Since de Klerk announced his reform measures Feb. 2, eight political prisoners have been freed under his program to release everyone serving time for violating laws in connection with the 30-year ban on the African National Congress. De Klerk's program excludes those convicted of crimes of violence.

The independent Human Rights Commission estimates there are between 2,500 and 3,000 people detained in South Africa that it would define as political prisoners, including inmates charged with violent crimes related to political activities.

There are 343 prisoners who regard themselves as political prisoners involved in the hunger strike on Robben Island, regarded as South Africa's Alcatraz, a source in the ANC-aligned United Democratic Front said.

Friends and relatives picketed outside the main entrance to Parliament in Cape Town Monday in an effort to win support for the prisoners' release, and police detained more than 20 people.

Robben Island sits in the middle of Table Bay opposite Cape Town. It was named after the Dutch word for seals, which used to live on the island, and has been home to most of the country's political prisoners.

Black leader Nelson Mandela, sentenced to life imprisonment on sabotage charges but freed unconditionally Feb. 11, was jailed on Robben Island from 1964 until 1982 when he was moved to Pollsmoor Prison near Cape Town.

On the issue of the hunger strike, the Prisons Service said prisoners who refuse to eat are warned of the ''adverse effects'' and are treated in strict accordance with ''internationally accepted guidelines'' relating to prisoners refusing food.

''The South African Prisons Service is satisfied that the people entrusted to its care are treated in a professional and humane manner,'' it said in a statement.

Because prisoner requests or complaints receive ''due and prompt attention '' the Prisons Service said, ''it is therefore unnecessary for prisoners

to resort to undisciplined behavior in order to get their requests attended to.''

On Sunday, South Africa's Anglican bishops urged the ANC for the first time to suspend its armed struggle against white rule, citing de Klerk's reforms. In turn, the bishops called on the South African government to reciprocate by granting a general amnesty to all political prisoners and exiles.

The bishops also asked the government to withdraw an estimated 800 army troops deployed in South Africa's black townships.

In a black township near Kroonstad, 120 miles southwest of Johannesburg, municipal policemen killed two people and injured four others Monday when a mob allegedly tried to burn a community hall, a police spokesman said. Those killed were a 12-year-old and an 18-year-old, he said.

Local officials said residents were protesting the sacking of municipal workers and had planned to deliver a petition listing other grievances to the mayor's office.

#90057u1159 02/26/1990 ~United Press International

NEW YORK (FEB. 26) UPI - A private memorial service was held Monday for publisher Malcolm Forbes at an undisclosed place in New Jersey with only his family and a few close friends attending.

Don Garson, a spokesman for Forbes magazine, said the private service would be followed by a public memorial service at St. Bartholomew's Church in New York Thursdy morning. He said some 500 Forbes employes were expected to be in attendance.

The 70-year-old multi-millionaire died Saturday of heart failure at his northern New Jersey estate. He had been in excellent health, according to his physician, and had just returned from taking part in an interntional bridge competition in London.

At a news conference Sunday in the lobby of the Forbes Building in Manhattan, Forbes' four sons and a daughter remembered their father as a man who always defied the odds throughout his adventure-filled life and as a man who could not be replaced.

Malcolm Forbes Jr., the eldest son, said he will take over leadership of Forbes Inc. in keeping with his father's wishes. He will move from president and deputy editor in chief of Forbes magazine to chairman and editor in chief.

''My father, who we called 'Pop,' always looked to the future,'' said Malcolm Jr., 42. ''He wanted this to remain a family business and it shall. As he wished and as the family wishes, I will succeed him as chief executive.

''There is no replacing my father but I hope to bring the same spirit of dedication and joy to the job that he did.''

Forbes' fortune has been variously estimated as from $400 million up to $1 billion. It could be vastly depleted by inheritance taxes, which could run up to 50 percent, but Garson said he believed Forbes had taken out insurance on his estate to insure it was not consumed by taxes.

He said Forbes Jr. will get 51 percent of the voting stock in Forbes Inc. and the rest will be divided between his brothers and sister. Christopher Forbes is vice chairman of Forbes magazine, Timothy Forbes is president of American Heritage and Egg magazines, and Robert Forbes is in charges of the family's vast real estate interests.

Forbes will be cremated and his ashes interred on Laucala, the Fijian island which Forbes purchased for $1 million in 1970. The grave will be marked with a tombstone inscribed ''While alive, he lived,'' Forbes Jr. said.

#90057u1163 02/26/1990 ~United Press International

CHRISTCHURCH, NEW ZEALAND (FEB. 26) UPI - The American father of a 7-year-old girl at the center of a bitter international custody battle arrived Monday in New Zealand vowing to ''rescue'' his daughter, but legal sources said a court may base its ruling on what the girl wants.

''Welfare of the child is the first and paramount consideration,'' said a New Zealand lawyer specializing in custody cases.

He said a child of Hilary Morgan's age would normally be asked who they prefer to live with, and that New Zealand's family courts - which conduct their proceedings in strict secrecy - have their own jurisdiction, allowing them to ignore U.S. court rulings.

Hilary's father, northern Virginia oral surgeon Eric Foretich, 47, arrived in Christchurch Monday vowing to "rescue" his daughter from his ex-wife's parents.

Authorities believe Hilary and her maternal grandparents, William and Antonia Morgan, have been living for two years in New Zealand, where her mother sent her into hiding rather than allow unsupervised visits with her father. The grandparents have renamed their granddaughter Ellen.

The mother, plastic surgeon Elizabeth Morgan, spent 25 months in a Washington, D.C., jail on contempt charges for refusing to divulge her daughter's whereabouts, alleging Foretich abused Hilary sexually during unsupervised visits granted under their divorce.

Foretich, who recently learned of the child's whereabouts after an international search, has repeatedly denied abusing his daughter. He told the local Dominion Sunday Times he wants to see his daughter.

''I just want to see what can be done to get her back. I have faith in the New Zealand justice system. I don't intend that it will be very easy, but I intend to rescue my daughter,'' he said.

Elizabeth Morgan's attorney in New Zealand, Lyn Stevens, said she would ''vigorously'' oppose any effort by Foretich to see his daughter.

Foretich apparently was able to discover that his daughter was in New Zealand because the grandparents applied for permanent residency last June prompting official inquiries.

Their application was initially denied, but they have appealed. Immigration officials have refused to comment on whether the grandparents will be granted permanent residency if they are given custody of Hilary.

A family court judge on Friday refused an application for interim custody by Foretich's lawyers, instead leaving Hilary in the custody of her grandparents, pending the outcome of a full court hearing.

Because of the strict privacy laws relating to New Zealand family courts, the date of the next hearing has not been announced, although it is expected some time this week, possibly after Elizabeth Morgan wins the return of her passport from U.S. authorities and can appear in court.

Courts here have previously overruled American custody orders on the grounds of insufficient attention being paid to the child's best interests.

In a recent similar case that went to appeal, it was ruled an American-born girl should stay in New Zealand with her mother because she had settled into life here and showed no signs of being ill-adjusted or psychologically disturbed.

In other cases, custody has gone to the person the child is more emotionally attached to.

Isabel Mitchell, a court-appointed family law specialist representing Hilary, said she hopes the child can live a normal life during the court battle.

''I just want to insulate Hilary from all this,'' she said. ''It's sad for a child to have her world turned upside down.''

Mitchell said Hilary appeared in good spirits and was anxious to continue with her school and social activities.

The Morgans have enrolled Hilary at an exclusive preparatory school, Selwyn House. They lived in total anonymity at a nearby motel until the chance showing of a television documentary last year about the custody case revealed who she was to her school friends and fellow churchgoers.

U.S. reporters and television crews have flocked to Christchurch to cover the case since word that she had been found in New Zealand became public in the Washington area. Prime Minister Geoffrey Palmer warned the U.S. journalists that, under New Zealand law, the child's interests are private and outweigh the public's right to know about the case.

''Parliament has decided that what goes on in family courts is such a personal matter involving so many different delicate personal considerations that it is better that it not be the subject of public reporting,'' he told reporters.

#90057u1164 02/26/1990 ~United Press International

LOS ANGELES (FEB. 26) UPI - A murder suspect walked into a downtown police station and surrendered early Monday a few hours after he was profiled on the television show ''America's Most Wanted,'' authorities said.

James Noel, 45, was sought in the Oct. 2 fatal shooting of an 18-year-old woman accepting rental applications at an apartment building, Lt. Charles Massey said.

A profile of the case and the suspect were broadcast Sunday night on the Fox Television show ''America's Most Wanted,'' police spokesman Bill Frio said.

Noel walked into the Central Division station as detectives from the Robbery-Homicide Division staked out a location where he was known to seek work as a day laborer, Massey said.

''He came into the desk and said that he was wanted for a murder, that he had seen himself profiled on 'America's Most Wanted' Sunday night and that he wanted to give himself up,'' Sgt. Ted Matthews said.

Noel was wanted for killing Wendy Tarr, the leasing agent at the apartment

building.

''He entered the apartment manager's unit under the pretense of completing a rental agreement, but once inside he shot her to death,'' Frio said. ''No property was taken but robbery was a possible motive for the murder. Since 1971 he's committed other robberies in the Los Angeles, San Diego and Fresno areas.''

''He has a propensity to rape and assault apartment managers,'' Massey said.

WASHINGTON (FEB. 26) UPI - The government should use the Conservation Reserve to protect wetlands and groundwater purity, a panel of governors said Monday in endorsing steps similar to White House proposals for farm policy.

The National Governors Association agriculture committee also approved language calling for giving farmers more power to decide which crops to grow. Farmers have complained they are forced to repeatedly grow the same crop in order to maintain elibility for crop subsidies.

The resolutions were due to be considered Tuesday for adoption as formal policy of the NGA.

Although the resolutions mention some of the same points as White House proposals, they were not an endorsement of them.

The administration has proposed redirection of the Conservation Reserve to restore 2.5 million acres of wetlands and to protect water near munincipal wellheads from contamination by farm chemicals.

The White House also has proposed a formula for letting farmers shift acreage among major crops without jeopardizing crop support payments.

Kansas Gov. Mike Hayden said said the resolutions encourage the government to ''hone in'' on uses of the Conservation Reserve, which was created in 1985 to take highly erodible cropland out of production for 10 years.

The resolution said the reserve should be aimed at land ''inhabited by endangered species and environmentally sensitive areas such as wetlands, riparian areas and lands than influence water quality.''

During a session with Agriculture Secretary Clayton Yeutter and William Reilly, head of the Environmental Protection Agency, North Dakota Gov. George Sinner asked for more research that would suggest ways farmers could profitably reduce use of chemicals.

Hayden decried the ''hodgepodge'' of water quality regulations now in place and warned that groundwater quality legislation would perpetuate the disjointed apporach.

''EPA's goal for the farm bill is that it apply the priciple of prevention'' of pollution,'' Reilly said.

BRUSSELS, BELGIUM (FEB. 26) UPI - The leader of a group protesting the treatment of Albanians living in Yugoslavia was shot and killed in his automobile in what police said Monday was a professional assassination.

No group claimed responsibility and police reported no suspects, though the victim's colleagues accused the Serbian secret police of sponsoring the killing.

Enver Hadri, 49, president of the Committee for Defense of the Rights of Man in Kosovo, was shot in the head as he drove through a residential section of Brussels on Sunday afternoon. He died shortly after arriving at a hospital.

Kosovo is a province of Yugoslavia in which 1.7 million people of Albanian heritage live alongside 200,000 Slavs, mostly Serbs. The area suffers from high unemployment and other ills, and Albanians living there seek greater rights from the Yugoslavian government.

Hadri reportedly carried a list of 32 people killed in recent violent demonstrations in Kosovo.

Police described the slaying near Hadri's home as very ''professional.'' A nearby shopkeeper said she heard two or three shots that sounded muffled, as if fired through a silencer. One report said two men in a car pulled up alongside Hadri's vehicle at a traffic light.

About 15,000 Albanian exiles from Yugoslavia live in Belgium, most in the Brussels area. Hadri, a father of four, obtained political asylum in Belgium in 1973 and has long been active in the Albanian rights movement.

''There had been many threats,'' a spokeswoman for the group said at a news conference. ''Mr. Hadri was very conscious of the fact that he lived a dangerous life.''

Hadri's father was killed in 1944 while a member of the Albanian resistance to Serbian occupation, the group said.

The group called on the Belgian government and the European Community to take steps to protest the killing, including the recall of the Belgian ambassador to Yugoslavia.

(FEB. 26) UPI - Nicaraguan President Daniel Ortega says he will respect the election mandate. With those words this morning, Ortega apparently conceded defeat to opposition presidential candidate Violeta Chamorro. She declared victory earlier in the morning... after the election commission controlled by Ortega's government projected her stunning upset. Ortega said the election results show Chamorro with 54-point-three percent of the vote... and him with 41 and one-half percent. As Ortega put it... ''This number is a tendency which CAN'T be ignored.''

Nicaragua's apparent president-elect... Violeta Chamorro... is a 60-year-old widow who has published a Managua newspaper, LaPrensa, since her husband's death. He became a political martyr when he was assassinated in 1978. His murder has NEVER been solved.

A White House spokesman says President Bush is surprised at the results of the Nicaraguan presidential election. Presidential aide Marlin Fitzwater says all the polls showed victory for the Sandinistas. But Fitzwater says the election results appear- in his words- ''to be a victory for the peace process and the people of Nicaragua.'' Fitzwater says the White House will be consulting with the election observers, which include former President Carter.

The crew for the next flight of the shuttle Atlantis plans to fly back to the Johnson Space Center in Houston today for practice in a shuttle simulator. They will return to the Kennedy Space Center at Cape Canaveral tomorrow to prepare for the sixth attempt to launch the Atlantis. This morning's fifth attempt in five days to launch the shuttle was scrubbed because of the weather.

France reports an accident at a nuclear power plant. Officials say a glass container filled with krypton gas was accidentally broken at a nuclear power plant near Grenoble yesterday. Officials say NO one was hurt at the Superphenix plant. Nine employees were evacuated from the area and were examined at the plant infirmary.

WASHINGTON (FEB. 26) UPI - The U.S. Southern Command has released the identities of the 11 American soldiers killed in two helicopter crashes last week in Panama. Five were members of the 7th Infantry Division from Fort Ord, Calif.

A UH-1 Huey helicopter and a OH-58 Scout observation helicopter separately crashed Wednesday during heavy thunderstorms near Punta Diego on the Atlantic Coast about 50 miles southwest of Colon, killing all 11 soldiers aboard.

The four dead crew members aboard the Huey were identified as Warrant Officer Vincent C. Gibson, Warrant Officer Richard T. Block, Spec. Joel L. Meints, and a fourth man whose name was being withheld pending notification of relatives.

They were all from Company B, 1st Battalion, 228th Aviation Regiment under Army South.

The five passengers killed aboard the Huey were identified as Sgt. Sidney T. Dew, Sgt. Antonio B. Solis, Spec. Rodney L. Blodgett, Spec. Kirk M. Magill, and Pvt. Charles D. Allison. They were all from Company B, 3rd Battalion, 17th Infantry, 7th Infantry Division, Fort Ord. Killed in the OH-58 were the pilot, Warrant Officer James W. Carl of the 228th Aviation Regiment, and the only passenger, Capt. Richard D. Tyndall from the 7th Infantry Division, Fort Ord.

WASHINGTON (FEB. 26) UPI - Total machine tool orders fell 1.7 percent in January from December, the American Machine Tool Distributors' Association reported Monday.

The AMTDA's index stood at 119.2 in January, 1.7 percent below its December level and 2.5 percent below its January 1989 level. The index measures U.S. machine tool consumption, reflecting both domestic and foreign sources of machine tools.

"Machine tool distributors are not anticipating general sales activities to decrease in response to domestic economic conditions," said Robert A. Gale, the AMTDA president. "In fact, January's posting reflects the stable level of sales reported in 1989 year end figures."

The association's index for metal cutting tools moved down 0.2 percent in January from December, and was 0.9 percent above its level in January 1989. The AMTDA's index for metal forming tools fell 14.9 percent in January from December, and was 26.7 percent below its January 1988 level.

Gale claimed machine-tool using industries registering decreases in orders are only following their respective industry cycles and that overall activity remains consistent with levels attained in 1989.

"Consuming industries will continue to maintain their efforts to increase productivity and remain competitive both domestically and abroad," he said.

LONDON (FEB. 26) UPI - Moslems asked a High Court protected by tight security Monday for permission to sue writer Salman Rushdie and his publishers for blasphemy in the controversial novel ''The Satanic Verses.''

The British Moslem Action Front asked three judges to reverse a decision by a magistrate and rule that blasphemy laws apply to the Islamic as well as the Christian faith.

Fundamentalist Moslems argue that Rushdie's book was an insult to their religion, in part for his portrayal of a fictional character patterned after the prophet Mohammed.

The late Ayatollah Ruhollah Khomeini ordered Rushdie's execution for the offense Feb. 14, 1989, sending the Indian-born London writer into hiding.

The Moslem group's attorney, Abdal Choudhury, asked the court to quash the decision of Sir David Hopkins, the chief Metropolitan Magistrate, March 12 not to issue summons for ''blasphemous libel and seditious libel under common law'' against Rushdie and Viking Penguin.

Choudhury won permission last June to challenge a magistrate's ruling that blasphemy in English law can only be committed against Christianity by arguing the law has in the past been applied to the pre-Christian Old Testament.

Everyone entering the High Court was searched by extra police and security forces.

Neither Rushdie nor his publishers were required to attend the court.

#90057u1331 02/26/1990 ~United Press International

VILNIUS, USSR (FEB. 26) UPI - A pro-independence movement swept to victory in Lithuania's first free multi-party elections in 70 years, clearing the way for the first non-Communist dominated republican Parliament in the Soviet Union, official results showed Monday.

''The new Lithuanian Parliament is to usher a new phase in the republic's history, in which Communists will probably no longer play the leading role '' Cheslavas Jurshenas, a spokesman for Lithuania's Council of Ministers, told the official news agency Tass.

A leading member of the Sajudis nationalist movement, an umbrella group supporting candidates who backed its drive for independence, forecast Lithuania's secession from the Soviet Union as ''attainable this year.''

Official results released Monday showed 90 deputies have so far been elected to the 141-member Lithuanian Parliament in the Saturday balloting and 72 of them are endorsed by the Sajudis.

The nationalist movement claimed a landslide victory Sunday and the Tass dispatch from Vilnius on Monday officially confirmed the election results.

The Baltic republic's legislature will now be the first of all 15 republics of the Soviet Union in which the Communist Party will be a minority in Parliament.

The new Parliament, however, cannot convene yet because two-thirds of its members have not been elected. There will be runoff elections in 45 races in which no candidate won more than half the votes, and six races will be held again because of voting irregularities.

The runoffs will take place March 10 and the repeated elections April 7.

Four U.S. congressmen, who were denied a visa to visit Lithuania until after Soviet Foreign Minister Eduard Shevardnadze intervened, saluted the results as a ballot for independence for the republic, which was incorporated into the Soviet Union in 1940.

''It was a referendum on independence and independence won,'' said Christopher Cox, Rep-Calif., at a news conference in Vilnius Monday.

Richard Durbin, Dem-Ill., said: ''I am proud that the United States has stood by Lithuania for 50 years. We salute the courage of Lithuania.''

Republican Rep. John Miller of Washington, a member of the House Foreign Relations Commitee, said: ''We waited for five days to get into Lithuania, and it is nothing compared to your waiting 50 years to get freedom.''

According to the official Communist Party newspaper Pravda and the nationalist movement, the results in the 90 seats elected so far as follows: 48 non-party, 22 independent Communists, 7 Communists loyal to Moscow, nine Social Democrats, two Christian Democrats and two Greens.

The elections brought into official politics for the first time Sajudis movement leader Vitautas Landsbergis and other top Sajudis chiefs Romualdas Ozolas and Bronyus Genzyalis. All were elected.

The bulk of the Communists who were elected belonged to the new Independent Communist Party, which broke away from Moscow in December and also advocates independence for the largely Catholic republic and endorsed by Sajudis.

''Only 30 Communists have so far been elected, mostly members of the Independent Communist Party of Lithuania,'' Tass said.

Pravda said 23 Independent Communists were selected and seven Communists still loyal to Moscow.

None of the secretaries of the Central Committee of the Communist Party were elected to the parliament, Tass said.

In contrast, the secretaries of the Central Commitee of the new Independent Communists were elected. They were Algirdas Brazauskas, who is the new party's leader, Vladimir Beryozov, Kyastutis Glavyatskas and Justas Paletskis, Tass said.

Algimantas Ckuolis, a member of the Sajudis nationalist movement's 35-person Executive Council, forecast independence from Moscow as the next step.

''It is attainable this year,'' Ckuolis said. ''The results of the elections speak for themselves. If that is not a landslide, I don't know what a landslide is.''

Sajudis spokesmen said the movement's leader, Landsbergis, was already in Moscow to discuss the developments with the Kremlin.

MUNCIE, IN (FEB. 26) UPI - A woman who earned a master's degree while in her early 80s has topped her own accomplishment. She's just been granted a Ph.D. at 92.

Agnes Smith Rettig earned her doctorate in history from Union Institute of Cincinnati after 2 1/2 years of study. She was awarded the degree Friday

in a ceremony in her home.

''This is the first time we've ever presented a doctorate to a woman in her 90s,'' said Sherry Penn, who supervised Rettig's doctoral program. ''She's a remarkable woman.''

Rettig's dissertation, which she wrote longhand, was titled ''A Nonagenerian Reviews the History of the Old Northwest, Her Native State and Hometown, 1840-1889.'' A friend typed the work into a computer, she said.

''I wanted the degree for self-enrichment, for occupying my mind and learning something new,'' she said.

Rettig is a 1916 graduate of Muncie High School. She earned her bachelor's degree from the University of Michigan and, in 1979, a master's from California State College.

#90057u1347 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - President Bush, hailing the election of U.S.-backed presidential candidate Violeta Chamorro, said Monday ''the people of Nicaragua have spoken'' and immediately began consultations on an aid and trade package for the depressed Central American nation.

In brief remarks to the nation's governors, Bush said the Chamorro victory over the Marxist-led Sandinista government of Daniel Ortega ''moves us closer to the day when every nation in this hemisphere is a democracy.''

Earlier, White House press secretary Marlin Fitzwater, in response to questions, said the Nicaraguan election raises an ''obvious point that Cuba does stand alone as communist in this hemisphere. It certainly isolates them in that respect.''

Bush said he sent congratulatory messages to Chamorro for her victory and to Ortega ''for the conduct of the election and his pledge to stand by its results.''

Repeating an earlier written statement, Bush said:

''Given the clear mandate for peace and democracy, there is no reason at all for further military activity from any quarter, and we hope the cease-fire will be re-established without delay and respected by all sides.''

''For years the people of Nicaragua have suffered. And today the people of Nicaragua have spoken. Now is the time for Nicaragua to move forward to

freedom,'' he added.

''Any friend of democracy can take heart that Violeta Chamorro won the election,'' he said. ''The election process by all accounts, free and fair is a credit to the people of Nicaragua who chose to decide their nation's future at the ballot box, and that is a victory for democracy.''

Bush said he will be speaking to Central and South American leaders and had conferred Monday morning with Venezuelan President Carlos Andres Perez ''about appropriate trade and economic measures that we can take to support the new government of Nicaragua.''

''We hope now for a peaceful transition for institutionalization of the democractic process in Nicaragua,'' he said. ''And there is space in democratic Nicaragua for all political points of view.''

Fitzwater expressed confidence that Ortega would keep his word to help in a peaceful transition. He noted that the Sandinista leader had said in the past that the transition would be ''smooth and effective.''

Chamorro declared victory early Monday after returns showed she won a stunning upset win amid returns showing her leading by almost 12 percentage points. Fitzwater said the president has made no decision on lifting economic sanctions against Nicaragua, but said that he would immediately begin a study to consider lifting the economic embargo imposed by the Reagan administration against the Marxist-led government.

On May 1, 1985, Reagan ordered a U.S. embargo on all U.S. exports to or imports from Nicaragua; a ban on all flights to and from the United States by Aeronica, the Nicaraguan airline; a ban against Nicaraguan-registered ships from entering U.S. ports and a termination of the Treaty of Friendship, Commerce, and Navigation with Nicaragua.

Nicaragua was already suffering a poor trade relationship before the embargo. The government said Nicaragua exported $57 million in coffee, beef, bananas, and other products to the United States in 1984. Nicaragua bought $112 million in U.S. products and services in 1984.

Asked whether the sanctions and economic reprisals had been instrumental in forcing Ortego out, as well as the creation of the Contras, Fitzwater said: ''We're hopeful all U.S. actions in recent years have been'' helpful but he added, ''the controlling factor was that the Nicaraguan people spoke out very eloquently'' in voting for ''peace and democracy.''

In response to questions about the fate of the Contra rebels, Fitzwater repeatedly replied, ''We see no reason for continued military conflict.''

But he said the United States ''has been providing humanitarian aid to the

Contras for some time'' and he expected aid would be continued.

''We certainly want to be helpful in moving to reintegrate the Contras into Nicaraguan'' society, he said.

Although Bush was a strong supporter of the Contras during his tenure as vice president for the eight years of the Reagan administration, he accepted a Central American peace plan for Nicaragua at the beginning of his presidency and has supported only humanitarian funding for the guerrillas, most of them based in Honduras.

NEW YORK (FEB. 26) UPI - About 41 percent of high school juniors and seniors believe they can try drugs and escape addiction, far more than the 13 percent of fifth and sixth graders who harbor the same belief, a nationwide survey released Monday said.

The survey, based on 5,000 responses to a questionnaire distributed to more than 180,000 students in grades five through 12, also found that 44 percent favor regular drug testing in high schools.

The survey, conducted by The Scholastic magazine and Cable News Network's NEWSROOM broadcast, indicated that 33 percent of all students polled said they easily could buy drugs in school.

Drug availability was far more prevalent in the older grades, the students reported. Among fifth and sixth graders, 14 percent said they could buy drugs in school; 50 percent of 11th and 12th graders said they could do so.

The survey, which asked the youngsters 15 questions, found that 26 percent of all the students polled believe they can sample drugs without slipping into addiction.

But only 13 percent of the fifth and sixth graders said they believed they could try drugs safely, while 41 percent of 11th and 12th graders thought they could experiment with drugs and avoid becoming drug abusers.

The survey also said that while a total of 44 percent of students in grades five through 12 favor drug tests, about 33 percent of the 9th-12th graders said they would be willing to be tested regularly for drug use.

The survey also questioned students on such issues as ''What is most important in preventing young people from abusing alcohol and other drugs?''

Twenty-six percent - the highest percentage of students responding -

answered ''good self-image.''

Asked ''What single factor would convince young dealers to stop selling drugs,'' 34 percent answered ''fear of going to jail.''

The survey also found:

-56 percent of the students were aware of drug education programs offered at their schools, but of those students, only 33 percent believe their drug education programs were working. Twenty-four percent said drug education programs were not working and 42 percent were unsure.

-63 percent of students in grades five through 12 consider former addicts to be the most effective voices against substance abuse.

-56 percent of the students believe advertisements for cigarettes and alcohol encourage young people to use them.

JAKARTA, INDONESIA (FEB. 26) UPI - Cambodian Prime Minister Hun Sen, bolstered by battlefield victories, refused Monday to discuss rebel demands he dismantle his government and insisted that renewed peace talks focus on a transitional U.N. role.

With delegates from 10 countries assembled for the negotiations aimed at ending the 11 years of conflict, the Hanoi-backed Hun Sen said, ''We can avoid the deadlock that happened at the Paris conference last August'' by focusing on Australia's plan calling for a temporary U.N. administration.

Hun Sen's remarks clashed with the resistance position outlined by Prince Norodom Ranariddh, who said the U.N.-recognized coalition will settle for nothing less than the total dismantling of the government that has ruled the country since the Vietnamese invasion in 1978.

Diplomats feared another standoff was brewing.

However, Indonesian Foreign Minister Ali Alatas, co-host of the talks scheduled through Wednesday along with French Foreign Minister Roland Dumas, said the rivals ''should not remain mired in continuing strife ... against the backdrop of a world caught up in fundamental change and transition.''

''We must summon our collective capacity and politic'l,will and put a final end to the agony in Cambodia,'' he said.

Echoing Alatas sentiments, Dumas stressed, ''This Jakarta conference must

confirm an enhanced U.N. role.

''I call here for our Cambodian friends not to reactivate the quarrels which led to the impasse in Paris and to work with us for an acceptable solution.''

With the Cambodian government offensive overrunning resistance bases and heading for new targets, a confident Hun Sen said he was certain the participants ''can reach some basic agreements on major issues so that we can return to another Paris conference.''

Ranariddh, representing his father, Prince Norodom Sihanouk, recognized as the resistance leader, said he welcomed the escalating support for a temporary U.N. administration.

''The U.N. must play a real major role,'' Ranariddh said, and reiterated the demand for ''the dismantling of all government departments of the present regime.''

Hun Sen not only refused to discuss the issue that doomed the Paris talks but stressed he accepted a U.N. role in organizing general elections but not in managing the country.

In the latest accounts of the fighting, non-communist Cambodian guerrilla commanders admitted they were suffering major losses and said thousands of civilians were moving closer to the Thai border. Sources said with the mounting victories behind him, Hun Sen was unlikely to compromise.

Negotiators at the talks include the four warring Cambodian factions, the six members of the Association of South East Asian Nations, Vietnam, Laos, a special U.N. representative, France and Australia. ASEAN groups Singapore, Malaysia, the Philippines, Thailand, Indonesia and Brunei.

Despite Hun Sen's position, Australian Foreign Minister Gareth Evans elaborated on the proposal for an interim U.N. administration which would also hold free elections.

Referring to Sihanouk's unwavering stand on total dismantlement, Evans said, ''In the real world we cannot expect the United Nations to undertake a role that is prohibitively expensive or so cumbersome as to be unworkable.''

Evans outlined a scenario costing $987 million for 12 months of civilian administration, police functions, electoral supervision and military peace-keeping. He said 18 months would run up to $1.3 billion and $7 billion to meet Sihanouk's vision.

''Acceptance of this central principle of a temporary U.N. administration

would be a breakthrough,'' Evans said, ''but it is a breakthrough which gets us only to the starting line.''

Delegates, toning down any prospects of a comprehensive settlement, said they would concentrate on the specifics of the Australian proposal and a ceasefire to verify the withdrawal of all foreign troops, particularly the Soviet-backed Vietnamese.

Two earlier meetings in Jakarta also failed to make significant progress.

#90057u1418 02/26/1990 ~United Press International

SOWETO, SOUTH AFRICA (FEB. 26) UPI - Nelson Mandela met with the chairman of South Africa's largest corporation and later Monday reaffirmed his commitment to nationalization but also said the African National Congress wants an economy based on private enterprise.

Mandela's comments on nationalization since his Feb. 11 release from prison have sparked nervousness on the part of foreign and local investors. Government ministers also condemned Mandela's statements as naive and said the economic policies of the African National Congress were outdated.

Mandela and Anglo American Corp. Chairman Gavin Relly said their 30-minute talks concentrated on industrial relations and did not include the issue of nationalization.

But the two men told reporters that further discussions were necessary on the subject.

Nationalizing key sectors of the economy remained basic ANC policy, said Mandela, who is scheduled to travel to Lusaka Tuesday for his first meeting in more than 27 years with ANC leaders in exile. Nationalization had been adopted in the past to meet social problems in the country, ''and it should come as no surprise whatsoever that the ANC has made it one of its policies,'' he said.

''The sectors which we have selected are those which we feel will give us the resources as a country to tackle some of the problems facing especially blacks,'' Mandela said in reference to the ANC's commitment to nationalizing South Africa's mines and bankr.0

''I must stress that the entire economy, insofar as we are concerned, will remain intact,'' he said. ''It will continue to be based on private enterprise.''

Anglo American dominates the country's gold mining sector and has

interests in diamonds, coal, base metals, steel, paper and car manufature.

''Nationalization will have to be subjected to the tests of debate and the tests of what is reality and what is practicable in trying to make modern economies work,'' Relly told reporters.

''The international community should not get itself in a flurry of excitement over the issues of nationalization. These are for sensible men in due course to address in a quiet and rational way.''

Establishing a ''far more equitable social structure'' in the country should be the prime object of any future government policy, Relly said. Social problems in housing and education called for a reallocation of resources, and private enterprise had an important role in filling gaps left by government.

''The country must come to grips with the brave new era which Mr. (President Frederik) de Klerk has ushered in,'' Relly said.

On Feb. 2, De Klerk announced a bold racial reform program that included the lifting of a 30-year ban on the ANC and other black political organizations. Nine days later Mandela was released after 27 years in jail.

The financial markets since Mandela's release reacted nervously to his comments on economic policy.

The overall share index on the Johannesburg Stock Exchange fell by 7.5 percent in three days and the Financial Rand, an investment currency offering a discount to foreign investors, fell from a high of 3.18 to the dollar after De Klerk's reform speech to a low of 3.72 hours after Mandela reaffirmed ANC nationalization policy on Feb. 12.

The ANC has criticized moves to privatize state-run corporations, including steel giant Iscor, privatized last year, and transport, postal and telecommunications services, which the government has pledged to privatize.

Mandela has charged the government with using nationalized industries to the advantage of whites. ''The whites are now changing. They are saying let's privatize because they want to keep the wealth to themselves,'' said in an interview shortly after his release.

#90057u1429 02/26/1990 ~United Press International

ABIDJAN, IVORY COAST (FEB. 26) UPI - Riot police launched a stun grenade attack to break up a march of some 150 students in the city center Monday as anti-government demonstrations continued into their second week.

The students, who are boycotting classes at the National University of Abidjan as part of the protest, were holding an unauthori1/2eh demonstration as part of their call for a multi-party system and economic improvements.

The students, who claim to have been denied scholarship funds for living expenses and who have faced electricity cutbacks on campus, demanded to meet with Ivory Coast President Felix Houphouet-Boigny.

The marchers were forced to turn around as about a dozen police armed with batons and riot shields confronted them. Stun grenades were used and the students fled through the streets of the city, where office workers cheered them on.

The incident occurred a day after 137 activists were released following their arrest for occupying St. Paul's Cathedral in central Abidjan as part of the protest. Some of those arrested were beaten by police, as was a Catholic priest who tried to negotiate an end to the stalemate.

Sunday's release was televised, the first time the week of riots has been reported by the state-controlled media. The violent events over the weekend, and the reason for the occupation of the Roman Catholic cathedral were not explained.

Conflict between police and journalists reporting the demonstrations have escalated. On Sunday, a United Press International reporter was detained for the second time in 24 hours and interrogated by police. A reporter with the Reuters news agency was also detained. During a police clash with students outside the occupied cathedral last week, an officer smashed camera equipment belonging to a photographer from the French wire service Agence France-Presse.

Students and opposition political factions have faced an intensifying government crackdown in the face of criticism for the country's deepening economic woes. Although the situation is blamed on dramatic falls in world prices for its cocoa and coffee crops, critics maintain that much of the country's wealth has been transferred outside the country and that little has been done to diversify the economy.

The president has also spent millions of dollars - possibly more than $100 million - on construction in his hometown of the largest Catholic cathedral in Africa in the face of criticism that the basic needs of the population remain unmet.

The students began their boycott and demonstrations Feb. 19. Separately, members of a political opposition group have been arrested for distributing a newspaper critical of the government.

#90057u1443 02/26/1990 ~United Press International

HOUSTON (FEB. 26) UPI - The U.S. Postal Service offered a reward of up to $50,000 Monday for information leading to an arrest and conviction in a January mail bombing at a non-denominational church that broadcasts its services worldwide.

A mail bomb packed with large nails and addressed to the Rev. John Osteen, minister of Lakewood Church, exploded Jan. 30, injuring his daughter, Lisa.

The Postal Service often offers rewards of about $10,000 in mail bomb cases, but Chief Postal Inspector Charles Clauson in Washington authorized the higher amount, Postal Inspector V. Geerts said.

''Because of the rash of mail bombings we've had lately, we need to put a stop to it, so there was a special reward offered,'' Geerts said.

The reward was offered for information leading to the arrest and conviction of the person or persons responsible for mailing the bomb. The Postal Service set up a toll-free telephone hot line for information about the case. The number is 800-535-9541.

The bombing is being investigated by federal postal inspectors, the Bureau of Alcohol, Tobacco and Firearms and Houston police.

''This is a top-priority investigation for all three agencies,'' said Postal Inspector in Charge Allison T. Brown.

Federal authorities have said they could establish no links between the Houston bombing and apparently racially motivated mail bombs in December that killed a federal judge in Birmingham, Ala., and a city councilman in Savannah, Ga.

Investigators have determined the bomb sent to Lakewood Church was mailed in North Carolina about Jan. 26, the Postal Service said. The issuance of a reward does not indicate that investigators have reached a dead end, Geerts said.

''In fact, we have quite a few things we are pursuing,'' he said. ''This is just part of it. The chief inspector wanted to go ahead and offer the reward. We do have quite a few leads.''

Services led by Osteen are broadcast worldwide from Lakewood Church, which has about 12,000 members. Osteen has said he has no idea why anyone would send a mail bomb to his church, known as the Oasis of Love.

Lisa Osteen suffered minor injuries when the bomb exploded in her lap. She was hospitalized for 11 days and underwent surgery to close a wound in her abdomen.

#90057u1462 02/26/1990 ~United Press International

(FEB. 26) UPI - Nicaraguan President Daniel Ortega admits he's running behind opposition candidate Violeta Chamorro, but he has NOT formerly conceded, saying instead that Nicaragua is heading down a ''new road.'' Chamorro declared victory today after a stunning 12 percent upset over the Sandinista Front. The latest vote count shows Chamorro's National Opposition Union leading 55 percent to 42 percent.

In Miami, former Contra leader Adolfo Calero says he's ''overwhelmed by joy'' by the opposition win in Nicaragua's freest election ever. Calero says the election was a direct result of the guerrilla war waged by the U-S-backed rebels against the Sandinistas. Calero says he has ''great expectations'' for the future of his homeland.

The crew of the Atlantis called it a day early. Bad weather near Cape Canaveral grounded the shuttle's secret military flight for at least another 48-hours- the fifth delay in as many days. Mission commander John Creighton, whose head cold caused a two-day postponement last week, said he was ''disappointed'' but is looking forward to the next launch opportunity. That might NOT be until after Wednesday, however, because weather forecasters say there's an 80 percent chance of unfavorable weather in two days.

#90057u1465 02/26/1990 ~United Press International

JERUSALEM (FEB. 26) UPI - Defense Minister Yitzhak Rabin said Monday conditions were right for a long-awaited meeting of U.S., Israeli and Egyptian officials that could clear the way for Israeli-Palestinian talks.

In Cairo, Egypt said Monday it saw signs that stalled Mideast peace talks were inching forward.

''There are signs the peace process is moving forward,'' a Foreign Ministry spokesman told United Press International.

''We hope the foreign ministers of Egypt, the United States and Israel can meet soon, despite recent delays,'' the spokesman added.

Diplomats said Egyptian optimism appeard to stem from a letter which Palestine Liberation Organization leader Yasser Arafat sdnt to a Jewish gathering in Jerusalem over the weekend, in which he said the PLO had

approved the participation of Palestinians from the Israeli-occupied West Bank of the River Jordan and the Gaza strip in the proposed talks with Israel.

Prime Minister Yitzhak Shamir and senior Cabinet ministers planned to meet later in the week to discuss the latest developments in the peace process following Foreign Minister Moshe Arens' meeting with U.S. Secretary of State James Baker on Friday.

According to Israeli press reports, Baker told Arens the United States wants prompt Israeli answers on several U.S. proposals, including a compromise on choosing members of a Palestinian delegation.

The United States proposed selecting members of the Palestinian delegation by name rather than category, such as residence, according to the news reports.

Shamir's right-wing Likud Party opposes the participation of deported or East Jerusalem Arabs in the peace process. Under the compromise, Palestinians who live outside Jerusalem but have residences inside the city could be candidates.

Addressing high school students in Rehovot, Rabin said the U.S. proposals offered hope that the peace process would advance.

''After the foreign minister's visit to Washington and what he brought back with him, I believe there is an Egyptian-Palestinian proposal that allows the meeting of the three foreign ministers in order to bring about the meeting of the two delegations, Palestinian and Israeli, in Cairo.''

Later Monday, Shamir played down the importance of deciding on the makeup of the Palestinian delegation, an issue that has divided the Likud.

''This is part of a whole. It's a small detail,'' Shamir told Army Radio. ''When we decide on our next step, we will decide on everything.''

Egypt represents the PLO in talks with the United States and Israel, and has argued that as a host to the proposed dialogue, it should also announce the names of the Palestinian delegates.

But PLO aides said Arafat wanted to announce the delegates himself, as a display of his organization's influence. Israel's ruling Likud coalition partner has refused to deal with the PLO, even after Arafat's renunciation of terrorism in 1988.

Israeli officials said either the Inner Cabinet or the ''Forum of Four'' - Shamir, Arens, Rabin and Labor leader Shimon Peres - would meet later in the week to discuss the U.S. proposals.

The meeting had to be postponed until at least Thursday due to Arens' trip to Poland Monday to renew diplomatic relations.

Under the proposal, Baker, Arens and Egyptian Foreign Minister Esmet Abdel-Meguid would meet in Washington to prepare for the Cairo talks.

Meanwhile, Deputy Prime Minister and Education Minister Yitzhak Navon repeated the Labor's demand that Likud advance the peace process or it would consider leaving the coalition government.

''If next week, on Wednesday, if there is no decision or discussion on these issues, then we are facing a government crisis,'' Navon told Israel Radio.

In the occupied Gaza Strip Monday, at least 40 Palestinians in the Rafah refugee camp were wounded by army gunfire in fierce clashes that erupted after soldiers raided the house of an Arab shot to death by soldiers Sunday, U.N. relief officials said.

At least nine other Arabs were wounded in disturbances elsewhere in the Gaza Strip, Palestinian sources said. The army spokesman said 15 Arabs were lightly wounded and treated at hospitals.

#90057u1472 02/26/1990 ~United Press International

LONDON (FEB. 26) UPI - Stock prices rebounded in light trading Monday on the the London International stock exchange as a firm Wall Street opening helped markets shrug off a shaky start prompted by Tokyo's tumbling 32.5 points Friday.

The Financial Time index closed up 12.6 points at 2,249.4. The narrower top 30 industrial average, which fell 74.3 points last week, climbed 13.8 points to 1,776.1.

Volume amounted to around 337 million shares, compared with 467 million traded Friday.

Analysts said most large institutional investors were taking a back seat while global bond markets continue to signal the likelihood of higher interest rates.

Market watchers said they were surprised there was not a sell-off in the market following the poor performance in Japan where the Nikkei Average suffered its second largest point decline on record.

Stocks opened broadly lower after Tokyo's sharp decline, sending the key

Financial Times Index down more than 35 points.

Stocks began to recover with market hopes, later confirmed, that Wall Street would maintain its composure in the face of Tokyo's turmoil.

Among the most widely traded stocks, Saatchi and Saatchi, the troubled advertising and public relations concern, gained 4 cents to $2.20. The stock had been down as much as 20 cents earlier in the day.

Imperial Chemical Industries gained 14 cents to $16.70 and B.A.T. Industries added 11 cents to $12.51.

In the oil patch, exploration prospects lifted Richmond Oil 17 cents to $2.41.

Banks and insurances improved. Barclays Bank gained 18 cents to $8.97, Abbey National added six cents to $2.88 and Royal Insurance gained 13 cents to $8.06.

Among the day's other highlights, Body Shop tumbled 67 cents to $7.60 on a European Community ruling of product testing on animals.

-30- 2006

#90057u1479 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - House Speaker Tom Foley, D-Wash., announced Monday that a House delegation will visit South Africa this week to access recent changes there and meet with leaders on both sides, including Nelson Mandela.

Foley said the delegation, scheduled to depart Wednesday and return March 6, will be led by assistant House Democratic leader William Gray, D-Pa., prime House author of the 1986 law imposing strict U.S. sanctions on South Africa in an effort to force reforms in apartheid.

In addition to meeting with Mandela, the speaker said the delegation will meet with South Africa President De Klerk and representatives of the once-banned African National Congress that Mandela headed before being jailed in 1962. Mandela was released from prison earlier this month.

The delegation also will meet with officials of the anti-apartheid United Democratic Front and with labor and religious leaders, including Archbishop Desmond Tutu, the Nobel Peace Prize winner, Foley said.

In addition to Gray, the delegation includes Reps. Dean Gallo, R-N.J., Steny Hoyer, D-Md., Ron Dellums, D-Calif., Howard Wolpe, D-Mich., Steven Solarz, D-N.Y., Mike Andrews, D-Texas, Beverly Byron, D-Md., and Jim McCrery, R-La., Foley said.

-30- 1435
#90057u1483 02/26/1990 ~United Press International
WASHINGTON (FEB. 26) UPI - Health and Human Services Secretary Louis Sullivan told a House committee Monday that the Bush administration would ''keep an open mind'' on the possibility of steeply raising excise taxes on cigarettes and alcohol.

Testifying to the House Budget Committee about his huge department's proposed fiscal year 1991 spending priorities, Sullivan did not reject out of hand the excise tax hike proposed to him by panel chairman Leon Panetta D-Calif.

Sullivan's comments seemed at least slightly at odds with Bush's repeated vow of ''no new taxes,'' first made during the 1988 presidential campaign.

Panetta said congressional Democrats are concerned about the Bush administration's proposed $5.5 billion in cuts aimed at Medicare and other health programs for fiscal 1991.

Noting that the health secretary is concerned about the adverse health effects of smoking, Panetta told Sullivan: ''Let me see if I can cut a deal with you.''

''I'm just wondering,'' Panetta said, ''if it wouldn't make some sense, based on your concerns, to have a substantial increase in the excise taxes on tobacco and alcohol products and use the funds from that not only for purposes of deficit reduction but also to assist in maintaining some of the health care programs that are being proposed for reduction.''

Panetta also said some of the money raised by the tax increase could be used to expand anti-smoking and alcohol abuse programs.

Sullivan said he would ''assist in any possible strategy that might get the information across to our citizens'' about the health risks of smoking and drinking. But he added that an excise tax increase ''has broader ramifications'' that must be decided by others in the administration.

While he said he was not prepared to take a position on Panetta's proposal ''certainly we would want to keep an open mind on any initiative because we would want to do everything we can to promote better health ... on the part of our citizens.''

''We would certainly want to look at any proposal you might develop along that line,'' Sullivan told Panetta.

A surprised Panetta told Sullivan he was ''pleased you are keeping an open

mind'' on the tax proposal.

Panetta said that given the costs to society from smoking and alcohol abuse, a steep excise tax hike on cigarettes and alcohol could send a clear message that those who smoke and drink ''are going to help pay for society's problems.''

#90057u1494 02/26/1990 ~United Press International

LONDON (FEB. 26) UPI - Britain in 1939 devised a secret plan to destabilize the Soviet Union by stirring up Moslem and ethnic hostility in the nation's Caucasian and Central Asian republics, areas where ethnic violence has broken out in recent weeks, it was reported Monday.

Elsewhere, the highest-ranking Soviet spy ever to defect to Britain said London wasted time and resources trying to track down a non-existent ''fourth man,'' a mole of Moscow's KGB secret service thought to have penetrated the highest echelons of the intelligence structure.

The Independent reported the Foreign Offibe,had decided to postpone until the year 2015 public access to an Oct. 28, 1939, memorandum on the ''Soviet threat to British Interests in the Middle East.''

The newspaper said it viewed the document late last year at a public record office until the government repossessed the file, which deals with Soviet regions that have recently been the scene of extreme civil unrest.

The Independent said a 75-year closure is usually reserved for highly secret or potentially embarrassing papers, and speculated the document was sensitive because London and Washington ''are now operating agents provocateurs behind Soviet lines.''

It said the paper ''suggested that Moslem and nationalist hostility towards the Russians could be exploited by British military intelligence agents in Armenia, Azerbaijan, Kazhakstan, Uzbekistan and Tajikistan.''

''Use could be made of the natives of the frontier regions of Afghanistan and Iran, who are practically indistinguishable from the corresponding tribes on the Soviet side of the frontier,'' it quoted the report as saying.

The government aparently did not act on the recommendations by the report's author, Fitzroy Maclean, a diplomat who later served in the Cabinets of the Conservative prime ministers Anthony Eden and Harold Macmillan.

Maclean said the destabilization plan would be crucial if Moscow used the

opportunity of war between Britain and Germany to invade Afghanistan and Iran, threatening India.

He said anti-Russian feeling could be fomented with a program advocating independence from Moscow, political and religious freedoms, land ownership and ''an opportunity of venting their hatred on their oppressors ... provided always it had sufficient chance of success to be convincing.''

The British Broadcasting Corp., meanwhile, interviewed fnraer KGB Col. Oleg Gordievsky, who said he would have known if a Soviet mole had penetrated Britain's spy hierarchy because he had run the KGB desk that dealt with Britain and been in charge of all intelligence from the Soviet Embassy in London.

British investigators were obsessed during the 1960s about the presence of a fourth spy in their midst after they discovered the ring consisting of Guy Burgess, Kim Philby and Donald Maclean. The hunt for the mole through the nation's MI5 intelligence service was conducted by group of officers that included Peter Wright, the author of the controversial book, ''Spycatcher.''

Gordievsky said in his first interview since his July 1985 defection that the book had ''a lot of fantasy in it and malicious speculation.''

He rejected Wright's belief the mole was Sir Roger Hollis, the former MI5 director who underwent hours of interrogation, without 'nu evidence found of employment by the Kremlin. Gordievsky also denied suggestions that former Labor Prime Minister Harold Wilson had links with Moscow.

Gordivesky was recruited by Britain while he served in Denmark and secretly worked for London for several years before fleeing for Finland when it became apparent he was about to be detected.

The BBC said he has briefed Prime Minister Margaret Thatcher on the inner workings of the Kremlin, and had advised her during the 1980s to keep an eye on an emerging young politician, Mikhail Gorbachev.

WASHINGTON (FEB. 26) UPI - Ray Shattuck, the chief of President Bush's Secret Service detail, is being promoted to the agency's post of deputy assistant director for protective services, a spokesman said Monday.

Secret Service spokesman Allan Cramer said that John W. Magaw, 54, currently deputy assistant for protective operations, will replace Shattuck on Sunday as special agent in charge of the president's protective division.

Magaw was selected by John Simpson, Secret Service director, apparently with Bush's approval.

The White House uniformed police also fall under the Secret Service's presidential unit.

(FEB. 26) UPI - The official Tass news agency says candidates backed by a pro-independence nationalist movement swept to victory in Lithuania's first free multi-party elections in 70 years. 72 of the 90 deputies elected so far to the 141-member Lithuanian Parliament are members of the Sajudis movement. Runoffs will be held next month in 45 races in which NO candidate won 50 percent of the vote.

Czechoslovak President Vaclav Havel is in Moscow to talk with Mikhail Gorbachev- the key issue is withdrawal of all 73-thousand 500 Soviet forces from Czechoslovakia. As Havel arrived in the Soviet capital, the first Soviet units began leaving Czechoslovakia in a pullback that is part of Gorbachev's policy of ending costly occupations to concentrate on domestic problems. Haval wants all the Soviet troops and equipment out by the end of 1990.

It's Day Four of a sit-in by students at historically black Tennessee State University. About 150 students stay they continue to occupy administration offices until they are granted amnesty for the protest to improve campus living conditions. Talks with university president Otis Floyd broke off yesterday over the issue of amnesty. Students launched the protest complaining about run-down dormitories with leaky roofs.

#90057u1549 02/26/1990 ~United Press International

BUCHAREST, ROMANIA (FEB. 26) UPI - Two students arrested during a Feb. 18 assault by protesters on the provisional government headquarters said Monday they were beaten and denied contact with their family for a week.

The youths, who were released late Sunday after six days in custody, said in an interview they believe a ''great majority'' of the 102 people arrested during the protest were physically abused by soldiers, despite official claims that such practices have stopped.

''I think others were more badly beaten than me,'' said Octavian Farcasanu 19, a Bucharest University mathematics major who claims he was beaten unconscious shortly after his arrest.

''I heard moaning from a room next door and the sound of military boots stamping hard. Later, I saw marks of boots on people's backs,'' Farcasanu said.

The ruling National Unity Provisional Council denies that violence was used against protesters arrested in the Feb. 18 demonstration, the worst unrest since the ouster and execution of communist dictator Nicolae Ceausescu in December.

The 102 detainees are accused of being among 1,000 anti-government demonstrators who used crowbars and sticks to smash their way into the main government building. They shattered windows, ransacked offices, damaged furniture and manhandled Deputy Prime Minister Gelu Voican. At least 50 soldiers were hurt in quelling the disturbance.

On Sunday, the government revealed that 39 people already have been convicted of offenses stemming from the incident and said security personnel have been given orders to use force to prevent future attacks on government officials and property.

Interior Minister Gen. Mihai Chitac told a news conference Monday that 46 of the detainees have admitted they were paid with money or cigarettes to help storm the government headquarters.

Farcasanu and fellow student Cristian Ciubotarescu, however, said they entered the building purely out of curiosity and were arrested and taken to a police station with a group of about 35 others.

Farcasanu alleged he was struck for the first time within minutes after arriving at the police station. He recalled being surrounded by a group of soldiers when suddenly ''someone's fist came from my left, out of sight,'' knocking him unconscious with a single blow.

Later, he was forced to stand facing a wall with his hands raised while several people kicked and punched him from behind, Farcasanu said.

''I w's,just thinking, 'How can I get out of this,''' he said.

Soldiers and unidentified civilians questioned the prisoners for hours at a time, saying they were being charged with murder because two troops had been killed during the demonstration.

The two students said they were not allowed contact with their families or with attorneys during their six days in prison. Their families were not informed, they said, leading Farcasanu's mother to suspect her son had been kidnapped or worse.

''From the time we were arrested, we entered the communist era again,''

Farcasanu said.

#90057u1552 02/26/1990 ~United Press International
WASHINGTON (FEB. 26) UPI - People who murder whites are more likely to get the death penalty than those who kill blacks but it is not as ''clear cut'' whether the race of the killer is as influential in executions, a study showed Monday.

The General Accounting Office, in a report prepared for Congress, said the study ''shows a pattern of evidence indicating racial disparities in the charging, sentencing and imposition of the death penalty.''

The findings by the congressional watchdog group were based on the research of 28 other studies done since states rewrote their laws after the 1972 Supreme Court decision that ruled unconstitutional a death penalty imposed in an arbitrary or capricious manner.

''In 82 percent of the studies, race of victim was found to influence the likelihood of being charged with capital murder or receiving the death penalty - those who murdered whites were found to be more likely to be sentenced to death that those who murdered blacks,'' the report said.

The GAO said the race of the victim was influential at all stages of the judicial process but more pronounced in the early stages of the judicial process, such as charging a capital offense or to go to trial rather than plea bargain.

''However, decisions made at every stage of the process necessarily affect an individual's likelihood or being sentenced to death,'' the report said.

The GAO said that even after taking into consideration legal variables - such as prior criminal record, heniousness of crime and number of victims - and other factors such as region, ''differences remain in the likelihood of receiving the death penalty based on race of victim.''

But the GAO alro,said that the inluence of the race of the killer on the death penalty was ''equivocal'' and said the ''relationship between race of defendant and outcome varies across studies.''

The GAO said three-fourths of the studies showed that blacks were more likely to get the death penalty and the rest said the opposite.

It said one study found that defendants were more likely to get the death penalty if they were black but in urban areas whites were more likely to get the ultimate sentence.

A few studies, the GAO said, showed that blacks who kill whites are the most likely to get the death sentence but added, ''the extent to which the finding was influence by race of victim rather than race of defendant was unclear.''

The GAO said the study ''supports a strong race of victim influence. The race of offender influence ia not as clear cut and varies accross a number of dimension.''

The study was requested in a provision added to the 1988 anti-drug bill in an amendment offered by Sen. Edward Kennedy, D-Mass. who said, it ''confirms that racial discrmination is a pervasive factor in death penalty cases accross the country. No civilized society can tolerate that kind of bias in its law enforcement system.''

In April, 1987 the Supreme Court ruled 5-4 that statistical evidence was insufficient to support the claim that the imposition of the death penalty was racially biased when applied in cases involving a black killing a white.

The decision came in a case from Georgia where a black man, Warren McCleskey, was convicted of killing a white police officer and sentenced to death. On appeal, McCleskey claimed that a statistical study showed that defendants charged with killing whites were 4.3 times as likely to receive a death sentence in Georgia as defendants charged with killing blacks.

However, then Justice Lewis Powell wrote that statistical evidence was not enough to prove discrimination without evidence of racial bias in the individual case.

#90057u1568 02/26/1990 ~United Press International

MIAMI (FEB. 26) UPI - A former Panamanian military officer accused of being a liaison between deposed dictator Manuel Noriega and Colombian drug cartels is discussing a possible plea bargain with prosecutors, his attorney said Monday.

Attorney Sam Burstyn, however, declined to disclose the terms of the agreement being discussed when questioned outside a status hearing for Lt. Col. Luis del Cid, Noriega and three other co-defendants in the federal drug-trafficking case.

''There have been some discussions, some exchanges of information. Certainly there is no agreement and may not be one,'' Burstyn said. ''But it is conceivable that the lieutenant colonel may be confronted with an offer he can't refuse.''

Del Cid, 46, who is being held without bond, appeared in U.S. District Court Monday with three other co-defendants for a status hearing before Judge William Hoeveler. Among the issues that were discussed were access to classified documents and trying Noriega separately from the other defendants.

Noriega, who, like del Cid, surrendered to U.S. agents following the Dec. 20 attack on Panama, did not attend the hearing.

All five defendants are scheduled to go to trial Mar. 5, although attorneys expect it to be delayed for as much as two years.

If del Cid were to plead guilty, he would be the second person to do so. A sixth defendant, pilot Eduardo Pardo, pleaded guilty to transporting drug money from the United States to Panama and is in federal prison awaiting sentencing Apr. 25.

Del Cid is charged with conspiracy to traffic in drugs, racketeering, distributing cocaine and delivering bribes to Noriega. If convicted, he would face a maximum penalty of 70 years in prison and $550,000 in fines.

Burstyn said that a trial would be too expensive for his client.

''One problem we have is an inability to finance two years' pretrial and a multi-month trial, which would need an international investigative effort '' Burstyn said.

Del Cid is accused of being a liaison and courier between Noriega and Colombian drug cartels. He allegedly helped move cocaine from Colombia to Panama with the knowledge that it was headed for the United States.

Prosecutors claim that del Cid's and Noriega's relationship went back to at least 1968 when both were in the National Guard, which later became the Panama Defense Forces.

The other co-defendants awaiting trial are Brian Alden Davidow, a suspected Miami cocaine distributor who allegedly met with Noriega to arrange shipments to south Florida; William Saldarriaga, accused of being a Colombian cocaine trafficker; and pilot Daniel Miranda, accused of flying drug profits from Florida to Panama.

Noriega, his five co-defendants and 10 others, who remain fugitives, were indicted on drug-trafficking charges by a federal grand jury in Miami in February 1988.

In the 12-count indictment, Noriega was charged with turning his country into a haven for Colombian drug traffickers, protecting cocaine as it

passed through his Central American nation on its way north, allowing smugglers to set up a processing laboratory and letting them deposit profits in Panama banks. The alleged criminal acts took place between 1981 and 1986.

In a separate indictment unsealed in Tampa the same day as the Miami indictment, Noriega and Panamanian businessman Enrique Pretelt were charged with arranging to smuggle nearly 1 million pounds of marijuana into the United States between 1982 and 1984.

#90057u1596 02/26/1990 ~United Press International

CAPE CANAVERAL, FL (FEB. 26) UPI - The frustrated crew of the shuttle Atlantis was grounded a fifth straight day Monday by high winds and clouds prompting NASA to delay a sixth pre-dawn launch try to Wednesday and give weary rocket engineers time to rest.

''We're disappointed we didn't launch today, but we're convinced the launch team ... made the correct decision based on the information available,'' said Atlantis skipper John Creighton. ''We are looking forward to our next opportunity.''

In the meantime, the price tag for the repeated delays has reached more than $2.7 million, officials said, based on the cost of fueling the spacecraft and keeping the launch team activated around the clock for a countdown that began a week ago Sunday.

But with Air Force meteorologists calling for an 80 percent chance of weather conditions at launch time Wednesday that would violate tough post-Challenger safety guidelines, Creighton and his four crewmates face the prospect of yet another postponement, which would tie a shuttle record set in 1986.

The weather outlook for a Thursday launch attempt called for a 60 percent chance of a delay and NASA's mission management team, scheduled to meet Tuesday to review launch readiness, could elect to pass up a Wednesday launch try and go for Thursday instead.

Creighton, co-pilot John Casper and Atlantis flight engineer David Hilmers planned to put their latest delay to good use, flying back to the Johnson Space Center in Houston late Monday to practice launch and emergency abort procedures in a shuttle simulator.

The three planned to fly back to Florida Tuesday morning for a pre-dawn launch try Wednesday. The exact time is classified, but sources said liftoff was scheduled for 12:45 a.m. EST.

Navy Capt. Creighton, Air Force Col. Casper - both 46 - Marine Lt. Col. Hilmers, 40, and their crewmates, Air Force Col. Richard ''Mike'' Mullane, 44, and Navy Lt. Cmdr. Pierre Thuot, 34, are scheduled to spend about 4 1/2 days in orbit before gliding to a touchdown at Edwards Air Force Base, Calif.

Originally scheduled for blastoff last Thursday, Atlantis was on track for a fifth launch try Monday at 12:54 a.m., but the countdown was held up at the T-minus nine-minute mark because of winds at pad 39A that exceeded 27.6 mph and violated safety guidelines.

Managers ultimately decided to waive the rule after a hurried analysis that showed Atlantis could safely take off as long as the winds were less than 29.9 mph based on the shuttle's takeoff weight and other factors.

By that time, however, clouds had moved over Atlantis's emergency landing strip where Creighton and Casper would have had to attempt a touchdown in the event of an engine failure during the first four minutes of flight.

Finally, at 2:32 a.m. EST, launch director Robert Sieck called off the countdown for the day.

''A 2,000-foot-thick cloud deck moved into the area at the 5,000-foot level, violating the visibility rules for a return to launch site abort,'' said NASA spokesman Hugh Harris. ''Launch director Bob Sieck asked the team to provide for a 48-hour recycle.

''A minimum of 48 hours is necessary in order to replenish the liquid hydrogen and liquid oxygen ground tanks as well as give the launch team a well-deserved break.''

Atlantis's countdown began a week ago Sunday and the crew is on the verge of establishing several shuttle delay records currently held by Columbia that were set in 1986.

Columbia originally was scheduled for takeoff Dec. 18, 1985, but the mission ultimately was delayed to Jan. 12 by bad weather and technical problems. Its on-again, off-again countdown finally reached zero on the crew's seventh launch attempt.

Atlantis's crew will take over the record for the longest shuttle countdown on Tuesday and a flight delay Wednesday would equal the previous record.

The delay-prone mission was initially delayed two days in a row when Creighton fell ill with flu-like symptoms.

The commander was declared fit for flight Friday, but NASA managers

decided to pass up an early morning Saturday launch try because of expected bad weather, pressing on instead for a predawn Sunday launch attempt.

Atlantis then was fueled for flight and the countdown ticked smoothly toward zero, only to be put on hold at the T-minus 31-second mark because of a faulty ground tracking computer. The flight was called off for the day when it became clear the computer would not be operational in time.

#90057u1613 02/26/1990 ~United Press International

SRINAGAR, INDIA (FEB. 26) UPI - About 25,000 shopkeepers, auto rickshaw drivers, public employees and other slogan-shouting protesters staged a fourth day of demonstrations for the independence of Kashmir Monday amid efforts by the government in New Delhi to review the crisis.

Five bombs exploded in Srinagar, 400 miles north of New Delhi, damaging a post office, a state animal husbandry office, two private companies and the unoccupied home of a former education minister, police said.

There were no injuries in the blasts, which were apparently set by Moslem separatists as part of a sabotage campaign.

Street demonstrations for independence for the Himalayan Kashmir region continued for a fourth consecutive day in Srinagar, with flags of the Jammu and Kashmir Liberation Front - the most powerful underground Moslem separatist group - hoisted atop hospitals and government buildings.

The drive for Kashmir independence is supported by virtually all of the region's 3 million Moslems, who believe their collective interests have been consistently ignored by the Hindu-dominated New Delhi government.

More than 100 people have died since the independence movement erupted in a popular insurrection against Indian rule when security forces opened fire on protesters Jan. 20. Most victims have been demonstrators shot by security personnel.

The government has deployed tens of thousands of troops and police to keep the situation under control.

On Monday, an estimated 25,000 protesters riding buses and walking braved cold and snow to march throughout the day to the headquarters of U.N. military observers monitoring the 1949 cease-fire line of the first Indo-Pakistan war.

The demonstrators included some 2,000 auto rickshaw drivers, their three-wheeled insect-like vehicles packed with three to five people each,

and about 1,000 employees of the bus company of Jammu and Kashmir state, of which Kashmir comprises the northern portion.

Thousands of shopkeepers closed their businesses for part of the day and, with banners and signs waving, joined the marches to the U.N. headquarters which were protected by about 50 armed paramilitary personnel.

Some 10,000 protesters who had traveled by bus from Anantnag, 30 miles south of Srinagar, were stopped by security forces on the outskirts of the state's summer capital. About a dozen protesters slipped past the blockade and later returned with a U.N. official to lodge a protest.

Meanwhile, the Liberation Front announced medical supplies received from a French company would be distributed to those injured in recent weeks by security force gunfire.

Another militant group, Almadad, warned employees at Srinagar's government-run radio station not to participate in un-Islamic programming or ''face the consequences.''

The four days of massive protests apparently prompted Prime Minister V.P. Singh to summon for discussions in New Delhi the state's governor, Jagmohan.

The Press Trust of India said Singh and Jagmohan met with Home Minister Mufti Mohammad Sayeed, a native Kashmiri, and reviewed the crisis. The news agency said the officials discussed militant calls for non-payment of taxes starting March 1 and for government employees to boycott their offices.

The dissidents' main complaint is that India has not fulfilled a promise to hold a plebiscite so Kashmiris can decide if they want to remain a part of the Hindu-dominated country, join neighboring Moslem-dominated Pakistan or become independent.

Both India and Pakistan claim sovereignty over Kashmir, with New Delhi currently controlling two-thirds of the region.

#90057u1620 02/26/1990 ~United Press International

(FEB. 26) UPI - President Daniel Ortega has traded olive green fatigues for blue jeans and loud shirts in his bid for a second term as Nicaragua's leader.

The switch from revolutionary commander to a fun-loving, compassionate image has been reinforced by campaign posters of Ortega, 44, cheek to cheek with Camila, his 3-year-old daughter.

At festive campaign rallies, Ortega danced to salsa music - a dynamic image in a country where the voting age is 16 and where demographics make the youth vote a deciding factor.

Ortega took office as Nicaragua's first Sandinista president Jan. 10, 1985 following elections that gave the Sandinista Front a firm majority in the 90-member Constituent Assembly.

When the assembly of the leftist Sandinista National Liberation Front, or FSLN, picked the then 38-year-old Ortega to run for president in 1984, they passed over the more senior Tomas Borge, interior minister and the only surviving founder of the front.

With his droopy mustache, glasses and introverted nature, Ortega has lacked magnetism, but last year the FSLN again chose him as its candidate.

As president, Ortega had evolved from an awkward dissident leader to a polished politician with undisputed control of his country and the machinery of government.

Even before Sunday's elections, Ortega optimistically proclaimed himself president-elect at a triumphant rally that drew more than 200,000 cheering and flag-waving supporters, dwarfing Chamorro's own final campaign rally of about 45,000 UNO activists.

Wearing tight jeans and a wildly patterned shirt, Ortega capped a campaign that has been long on style and short on substance.

Asked about his change of image, Ortega said the green fatigues he customarily wore ''were the symbol of our resistance to Yankee aggression.''

Ortega said he has liked jeans and loud shirts since he was a 14-year-old, but that commitment to the revolution and seven years in prison for rebel-backed bank robbery has kept his favored garb in the closet for more than 20 years.

''Olive green has been a symbol for the people in their struggle against a war imposed by the the United States,'' Ortega said. ''The time has come to put away the olive green and work to bring about the peace that we need so much.''

Few believe the change in style diminishes Ortega's dedication to the revolution that brought the Sandinistas to power in 1979. Those who know him say he has an almost superhuman ability to work long hours and an unshakable commitment to the Sandinista cause.

Diplomats credit Ortega and his brother Humberto, minister of defense, with masterminding the initiative that led to Sunday's elections and undercutting a U.S. campaign to discredit and derail the Sandinista revolution.

Ortega's inauguration in 1985 culminated a long career as a revolutionary that began in 1960 while he was a student at the Central American University in Managua, where he organized and directed urban guerrilla cells.

Ortega, who never finished college, was imprisoned for his revolutionary activities four times and tortured by dictator Anastasio Somoza's infamous National Guard.

In 1967 he was sentenced to 30 years for an attempted bank robbery and spent seven years in prison before he was freed by a guerrilla commando team in 1974.

By the time Somoza fled the country in 1979 and the Sandinistas marched triumphantly into Leon and Managua, Ortega - then only 33 - was a leading member of the Front and was tapped for the junta.

He and his brother climbed to the highest position in the Sandinista structure that has ruled Nicaragua through the nine-member National Directorate. A third brother was killed in the revolution.

As coordinator of the Junta of the Government of National Reconstruction during 1981-84, he acted as virtual head of state, gaining international exposure.

Despite his obvious dedication to the Sandinista cause, critics charge that Ortega's role as a revolutionary has been overblown.

Acquaintances say Ortega is an introvert, given more to backroom bargaining than the political limelight.

#90057u1621 02/26/1990 ~United Press International

NEW YORK (FEB. 26) UPI - Saying he had little to report in terms of progress, union chief Don Fehr said Monday he would travel to Phoenix to brief player representatives, thus creating an indefinite recess in talks aimed at ending the 12-day spring training lockout.

Fehr, hurrying his remarks because he had a plane to catch, said some telephone calls had been exchanged with management and some language drafted on secondary issues, but no progress had been made on salary arbitration.

Fehr said he will meet with the union's executive board Tuesday in Phoenix and stay on the road long enough to visit two or three other locations. Unless the owners meet him on the road, talks will not resume for at least a few days.

The first exhibition games were scheduled to begin Thursday. One club official said his team's exhibition games were canceled through March 11. As for refund policy, he said, ''A program will be set up the moment a settlement is reached.''

Fehr said the union has proposed what he called ''substantial'' concessions on pensions. But no peace seems possible without an agreement on arbitration. The union wants players to become eligible after two years; management wants to retain the current level of three years.

''It's gonna be solved by buttin' heads,'' Mets pitcher David Cone said. ''We're gonna have to go back and find out just how strong the players' stand is on it. And I think it's gonna be pretty strong. We're a pretty strong union. We're gonna find out how strong the owners are, too.''

Club officials say privately spring training games are lost, and that fans will enjoy refunds or other options, including the chance to exchange tickets for future dates.

An organization calling itself ''STRIKE BACK'' is urging baseball fans to write letters protesting what it incorrectly calls a strike. The Sporting News has set up a phone number to allow fans to express opinions.

As for the cancellations, a spokesman for Commissioner Fay Vincent said, ''My understanding is that it's a club by club issue.''

One club official said regular-season ticket sales had slowed in his area.

Whether economic or emotional pressure will matter remains a question. If anyone needs further hint of how the 1990 talks might turn out, consider that negotiators still disagree on what happened in the last pact.

Fehr, who was there in 1985, says the deal rested on assumptions that proved untrue. Owners' representative Chuck O'Connor says the pact was fairly bargained.

When asked what the players had received for yielding on the arbitration issue, Fehr said, ''Beats me. I have no idea. And I think Chuck knows better.

''Chuck has clients to represent and they've instructed him to take certain positions. ... If anybody else can figure out what the tradeoff

was, perhaps they can tell us.''

O'Connor replied by citing the view of Milwaukee Brewers owner Bud Selig, chairman of the Player Relations Committee during the 1985 talks.

''What was agreed to in 1985,'' O'Connor says, ''was an overall package of benefits and improvements in the contract and as part of the bargain, a year of salary arbitration was given up by the union.''

Players give another reason for wanting the giveback. They claim the financial climate has changed, with the players deserving part of the profits.

Not surprisingly, owners disagree.

''It is a case of each side going back to that bargain and recapturing what it would like to have back,'' O'Connor said. ''We'd like to, I suppose, go back years and recapture a few things out of the contract but we're not able to do it.

''I understand the argument the union is making. All I'm saying to you is from the clubs' perspective, when I say it was a bargain fairly struck it was a bargain struck in that atmosphere at that time for which the union was fairly grateful. As I recall it didn't suffer from any difficulty in ratification.''

Fehr says the owners' claims of financial distress in 1985 had virtually no validity. He said income projections were incorrect, franchise values skyrocketed, and that the owners also colluded to hold down salaries.

#90057u1651 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - Congress, once the battleground of bitter political fights over bankrolling the Contra guerrilla effort to overthrow the Nicaraguan government, united Monday in calling for economic aid to the democratic opposition that toppled the Sandinistas with ballots.

''Let's not kid ourselves,'' Senate Republican leader Robert Dole said. ''We're talking about big bucks in aid.''

Dole, R-Kan., said the victory of challenger Violeta Chamorro and the desperate plight of the Nicaraguan economy, battered by a U.S. trade embargo and a decade of war, again raises the question of how best to allocate American foreign aid.

Rep. Dante Fascell, D-Fla., chairman of the House Foreign Affairs Committee, said the embargo can be lifted quickly but Congress will have problems finding enough money for the democracies emerging from totalitarian rule in Eastern Europe and Nicaragua.

''Bilateral aid of some kind will be important,'' Fascell said. ''But there isn't enough money in the world to provide all that is needed for all the budding democracies. The United States certainly has an obligation to Nicaragua.''

Congress was engulfed in savage political fights during the presidency of Ronald Reagan over providing millions of dollars in military aid to the guerrillas, who fought without notable success to overthrow the Soviet-supported Marxist-lead government in Managua. Despite Reagan assertions that Nicaragua was exporting communist subversion, Congress cut off military aid to the Contras in 1988.

Shortly after assuming office, President Bush said the Contra military policy was a failure and arranged with Congress to supply the guerrillas with humanitarian aid pending the outcome of free and fair elections in Nicaragua.

Supporters and opponents of the Contras still differed Monday over the wisdom of the Contra policy, but most called for a swift lifting of the trade embargo Reagan ordered against Nicaragua in 1985 and for economic aid once Chamorro is in office and democatic reforms are firmly in place.

Dole said such aid should be conditioned on ending Nicaragua's ''unholy alliance'' with the Soviet Union and Cuba, cutting off aid to the leftist guerrillas in El Salvador and support for democratic institutions.

''I hope we will do what ever we need to do,'' Dole said, but added that this all ''raises the same old question - where are we going to get the money?''

Speaker Thomas Foley, D-Wash., suggested the aid money for Nicaragua can be found in the same accounts that paid for the guerrillas - the Pentagon.

''The United States should be as supportive of those (democratic) efforts

as it has in the past, often mistakenly in my judgment, in supporting military activities,'' Foley said.

''It seems strange now for there to be questions about where we get money for economic assistance when those questions were not raised when we were spending hundreds of miliions of dollars for military activity to overthrow the government.''

Senate Democratic leader George Mitchell of Maine said Washington should help the Chamorro government but first see what Nicaragua wants in assistance before throwing an aid package together.

Sen. Richard Lugar, R-Ind., said the Sandinistas must actually give up control of the military and internal police before Nicaragua knows true democracy.

Elliott Abrams, who was in operational charge of U.S. policy in Central America under Reagan, said Chamorro's victory had left Cuba's Fidel Castro isolated in the Americas and is a vindication of Reagan's policies.

''Year after year, a lot of people wanted to give up and say the Sandinistas have won,'' Abrams said. ''We refused to walk away from it.''

Sen. John McCain, R-Ariz., called the victory ''a tribute to the Nicaraguan people who, through 11 years of betrayal, remained determined that their revolution should be completed.''

House Republican leader Robert Michel, R-Ill., attributed some of the success to Reagan's Contra policy. But Rep. Don Edwards, D-Calif., said much of the credit should go to former House Speaker Jim Wright of Texas, who had promoted elections in Nicaragua and opposed the Contras.

Rep. Lynn Martin, R-Ill., said it was the Contra policy ''and our refusal to accept peace at any price that helped set the stage for the events of today.''

But Rep. Joe Moakley, D-Mass., disagreed, saying the triumph should be traced to President Oscar Arias of Costa Rica, who won the Nobel Peace Prize for promoting ''dialogue, reconciliation and democratic elections.''

#90057u1659 02/26/1990 ~United Press International

WARSAW, POLAND (FEB. 26) UPI - Israeli Foreign Minister Moshe Arens began a four-day visit Monday to sign an accord re-establishing diplomatic relations between Poland and Israel, broken in 1967.

The accord restoring diplomatic ties is to be signed Tuesday.

When asked what he felt upon landing in Poland, Arens said: ''Every Jew who comes to Polish soil must bring back the memory of the Holocaust.''

Virtually all of pre-war Poland's 3 million Jewish residents were murdered in gas chambers and by shooting during Nazi Germany's occupation of Poland from 1939-1945.

Monday Arens was to visit the Warsaw Ghetto, scene of the Jewish uprising against the Nazis, as well as Majdanek concentration camp. On Wednesday he is to visit the site of the death camp at Auschwitz.

During his visit Arens will have talks with President Wojciech Jaruzelski as well as Prime Minister Tadeusz Mazowiecki and Polish parliamentarians.

Relations between the two countries were broken off June 12, 1967, as a result of the Six Day Arab-Israeli War. At that time all East bloc nations except Romania severed ties in order to protest what they called Israeli aggression.

Poland was one of the first countries to recognize the state of Israel at independence in 1948 and today some 500,000 Israelis have Polish roots.

Recent changes in Eastern Europe have allowed other nations to resume diplomatic ties with Israel. Hungary did so in September 1989, and Czechoslovakia followed suit in February 1990.

Polish-Israeli relations have been warming since May 1986 when the two countries unofficially renewed consular relations. Since that time economic and cultural contacts have expanded.

#90057u1665 02/26/1990 ~United Press International

CHICAGO (FEB. 26) UPI - Nearby wheat was supported by short-covering but other grain and soybean futures were mostly lower at the close Monday on the Chicago Board of Trade.

March wheat was up 2 1/4 cents at the final bell amid indications that delivery notices on Wednesday will be light. Traders said both China and the Soviet Union have unused export bonus credits.

Late Friday, the Agriculture Department targeted the Soviets for another 1 million tons of wheat.

Deliveries of other grains and soybeans also were expected to be light.

Commercials were featured sellers of new-crop wheat, although losses were limited by the possitility of drier and warmer than normal weather into next week.

Corn futures were mostly lower in lackluster trading. March corn was

fractionally higher on rumors that Mexico and South Korea will be in the market for corn this week, but prices were lower in the rest of the pit.

Liquidation and widespread selling weighed on soybean values along with weekend rain in portions of the South American soybean belt.

Country movement was light to moderate and basis levels were firm.

At the close, corn was up 1/4 to off 2, soybeans down 1 1/2 to 3 1/2, wheat up 2 1/4 to off 1 1/4 and oats off 1/4 to 1.

#90057u1666 02/26/1990 ~United Press International

NEWARK, NJ (FEB. 26) UPI - A judge refused Monday to dismiss a contract dispute between Merv Griffin, the entertainer turned casino operator, and a longtime associate who was fired after New Jersey gaming authorities questioned his alleged mob ties.

Michael Nigris Jr., of Alpine, N.J., former chief executive officer of Griffin's companies, is seeking a buyout of his ten-year contract, which could cost Griffin or his companies several million dollars. Nigris filed suit in November, charging breach of contract.

Griffin terminated Nigris's contract last year and ended a 20-year relationship because the New Jersey Casino Control Commission made it a licensing condition for Resorts International Inc., which operates casinos in Atlantic City and the Bahamas, Griffin's lawyer, Randy Mastro said. Resorts International is currently operating under Chapter 11 bankruptcy protection.

The commission objected to Nigris's 30-year relationship with a reputed member of the Gambino crime family, the lawyer added. But Nigris's lawyer, Bruce Goldstein, argued the commission's objections were irrelevant, and U.S. District Judge Dickinson Debevoise appeared to agree.

"There's nothing there that mandates his acceptability to the Casino Control Commission as a condition of employment," the judge remarked. Griffin himself called the allegations "character assassination" when the commission issued its report, Goldstein said.

Nigris named Mervyn E. Griffin and several of his companies, including Griffin Group Inc., an umbrella organization for the entertainer's non-casino business ventures. Companies operating radio stations in Albany N.Y., Hartford, Conn., and Providence, R.I., and providing closed circuit television service to racetracks were also listed.

In a suit filed in November, Nigris described a relationship with Griffin

that began in 1968. As an accountant for a firm providing professional services to Griffin, Nigris helped Griffin buy several companies and turned some of them from moneylosers into profitable ventures, the complaint said.

After becoming president of the Griffin companies in 1987, Nigris helped Griffin fulfill his "ultimate dream" of buying the Beverly Hilton Hotel in Beverly Hills, the suit said. The next year, he signed a ten-year contract as president, treasurer, and chief executive officer of the Griffin companies with base pay of $330,000 and annual increases of $30,000.

While that contract was terminated after Griffin formed a company to buy Resorts International, "it was understood that Nigris was to devote his full attention to Griffin's non-gaming ventures" under terms of their agreement, the suit said.

Although he refused to grant Griffin summary judgment, Debevoise dismissed a claim for punitive damages. A trial date for the case has not yet been set.

#90057u1668 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - Mayors from four cities met Monday with Attorney General Dick Thornburgh and said they hoped for more anti-drug money from the federal government.

The mayors were Wilson Goode of Philadelphia, Maureen O'Connor of San Diego, Richard Berkley of Kansas City, Mo., and Sue Myrick of Charlotte.

Goode told reporters that the delegation of mayors had a ''productive'' meeting with Thornburgh but their key concern is that the cities are not getting enough money from the federal government to fight the drug problem.

The money they do receive does not arrive quickly enough, the mayors said.

Federal anti-drug money must be allocated ''to areas where the need is the most,'' Goode said.

Berkley said, ''We feel that some money should come directly to the larger urban areas.'' He has been a critic of the current funding formula.

The four mayors represented the U.S. Conference of Mayors in the meeting with Thornburgh.

#90057u1711 02/26/1990 ~United Press International
LONDON (FEB. 26) UPI - A fierce storm lashed the British isles and northern Europe Monday, disrupting essential services, inflicting millions of dollars in damage and leaving at least 27 people dead.

Britain was hardest hit, and meterologists warned the tempest of rain and winds, some recorded at more than 100 mph, would rage into the night across the nation.

''The showers are quite blustery and vicious,'' said a weather official, who compared the storm's intensity to a Jan. 25 storm that left 94 people dead and caused billions of dollars of damage. ''Conditions are atrocious.''

British officials reported at least 12 people had died and an unspecified number of others were injured in accidents mostly caused by falling trees, masonry and telephone and electrical power poles.

Falling trees across worst-hit central England killed four motorists, and one man in Manchester city was crushed to death when a truck blew over onto him, reports said. Tumbling masonry claimed two lives, and winds tore the roof off a house in northwest Blackpool, killing its elderly occupant.

At least six people were killed and many others injured in West Germany as winds of up to 80 mph lashed the country.

One man was killed when the crane he was operating keeled over. A woman died after she was run over by a car that was apparently blown off its course by the storm.

Four others were crushed by trees uprooted by the winds, police said.

Belgian authorities said the storm left four people dead and 24 others injured, four critically.

A tree fell on a police patrol car near Brussels, killing one officer and injuring his partner. Building collapses caused three fatalities, including a woman found in the wreckage of a 15th century house destroyed in the medieval city of Bruges.

French authorities reported four people were killed in car accidents and by falling objects. Gusts of up to 80 mph howled through eastern Strasbourg, knocking down trees, one of which fell on a municipal bus and injured 18 passengers, three seriously, they said.

In Holland, reports said a motorist died in Zundert city in a crash caused by heavy winds.

Authorities in the affected nations advised residents not to venture outdoors, and rescue crews worked to restore electricity and water supplies to tens of thousands of homes.

French maritime officials said several ships were experiencing difficulty in high seas off the Calais and Britanny coasts, and reported they had called in helicopters to rescue crew from two listing vessels.

Virtually all passenger traffic across the English Channel was canceled, and some flights were delayed from London's Heathrow and Gatwick airports.

British insurance offices were flooded with calls, and although reports were still flowing in, preliminary estimates put the storm damage into millions of dollars. Insurance officials said premiums would have to rise.

British officials reported debris had blocked main arterial freeways and railway lines, causing massive traffic jams and leaving many commuters stranded.

Flooding afflicted coastal areas, and the French village of Mers-les-Bains was under 3 feet of water that poured through a shattered dike.

WASHINGTON (FEB. 26) UPI - President Bush and the nation's governors agreed Monday on what they hailed as a historic plan to revitalize education, but while all sides praised the objectives, they left open major questions about paying for the proposals.

The nine-page National Goals for Education, approved Sunday by the state chief executives at the winter meeting of the National Governors Association, were presented to Bush at the White House and the president accepted them as ''a dramatic turning point for our country.''

The proposals, which build upon a framework achieved between Bush and the governors five months ago at a meeting in Charlottesville, Va., outline lofty ambitions to dramatically improve education and stress giving states and localities more flexibility to achieve those ends.

Bush insisted he was devoted to the cause of increasing the graduation rate, improving math and science education, making all adults literate and clearing the nation's schools of drugs and violence.

''Only a year or so ago, the notion of the president and the governors agreeing on education goals was considered a bold step for America to take '' the president said. ''Even now, there are some who say the goals we've established are too ambitious. I think they're mistaken. They fail to appreciate the depth of our commitment to restructuring and change.''

But while Bush, who has said he wants to be known as the ''education president,'' agreed the federal government had a responsibility, the goals did not address how they would be achieved - an omission not lort,on some of the governors.

Bush said he told the governors during a private session that he would be prepared ''to encourage the people of this country to support state and local initiatives that have to do with making the educational system better.''

New York Gov. Mario Cuomo, a Democrat, took that to mean the president would favor increases in ''local real estate taxes and sales taxes so that you don't have to (raise) rich people's income taxes. There's no other way

to look at it.

''What they're saying right now, very clearly, is they approve of taxing the middle class and working poor before we go back to the rich people to whom we gave a tax cut,'' said Cuomo, arguing the public would eventually demand the tax burden be shifted more to the wealthy.

Nonetheless, Cuomo said he was pleased with Bush's willingness to agree to a federal responsibility. ''This is an acknowledgment,'' said Cuomo. ''It's not as bold a commitment as a lot of us would want, but at least an acknowledgment that there is a federal role of some kind when it comes to revenues - that you cannot do it all by management accountablilty and fixing your eye clearly on good goals.''

Other governors, although pleased with the goals, were perplexed about who would pay for their implementation.

''We've done some of the things that have been recommended,'' noted Virginia Gov. Douglas Wilder, another Democrat. ''If we're going to be able to do some of the other things, we're going to need some funds. The funds will not come from the federal government, the Congress. I don't know that we have it in our economy now to allocate those funds.

''To the extent that the money is not coming and the goals are annunciated it says you will reach them some way,'' added Wilder. ''Our job is to say 'How?' I'm certainly against raising any new taxes.''

Other governors stressed that reaching the goals would take more than money.

''As we go forward, we must have help in the process,'' Washington Gov. Booth Gardner, a Democrat, told Bush. ''We must have help from the parents in this country. We must have help from business in this country. We must have help from Congress and from the legislatures. But perhaps most of all we must have help from the teachers and the principals in every one of our schools.''

#90057u1720 02/26/1990 ~United Press International

KNOXVILLE, TN (FEB. 26) UPI - Two animal rights activist groups Monday denied involvement in the ambush-slaying of a veterinary college dean and denounced police for creating ''mass hysteria'' with a nationwide alert against the possibility of assassination plots.

The police alert went out last Wednesday, warning that extremists may have killed Hyram Kitchen, dean of the University of Tennessee College of Veterinary Medicine, and may intend to kill ''one dean a month for the

next 12 months'' to protest laboratory research on animals.

Sheriff's deputies stressed they issued the alert only as a precaution, based on unconfirmed information. But the warning has caused the deans of veterinary colleges around the country to take precautions.

The alert, a copy of which was obtained by United Press International, names as possibly involved in the killing ''a splinter group'' of People for the Ethical Treatment of Animals, or PETA, and the underground Animal Liberation Front.

''This is just wonderful. Talk about creating mass hysteria about something that is unsubstantiated. This is a tactic that we expect from animal experimenters,'' Carol L. Burnett, speaking for the two organizations, said by telephone from Washington.

She blamed veterinary colleges and animal researchers for ''planting the seeds'' of speculation surrounding Kitchen's murder.

''There is no evidence,'' Burnett said. ''It's unfair to us. Animal rights groups have never harmed anyone.''

As he left his horse farm on the morning of Feb. 8, Kitchen, 57, was shot eight times with a .22 caliber handgun: four times in the face and chest, twice in the back as he ran away and twice point-blank in the back of the head as he lay on the ground.

The alert said Kitchen ''had been very moderate in his dealings with the animal rights groups. However, our investigation to this point has turned up no other motives for his death.''

Knox County sheriff's Lt. Larry Johnson said investigators based the alert on threatening mail to the University of Tennessee and on conversations with colleagues of Kitchen about threats they had received.

Burnett said PETA and the Animal Liberation Front employ only non-violent tactics to protest laboratory research on animals, although she acknowledged the liberation front operates underground.

''It operates underground because it breaks the law to rescue animals. It's not a violent group.'' Burnett said. ''There's a big difference between breaking into labs, rescuing animals and destroying equipment and murdering someone.''

Deans of veterinary colleges around the country have said they were taking precautions based on the police alert.

Ronald Wright, the dean of Ohio State University's College of Veterinary

Medicine, said he is taking the threats seriously and is heeding advice from authorities, but would not elaborate.

Police at Texas A&M said security has been tightened. Terry Curtin, the dean of North Carolina State University's veterinary college, said he is taking a different route to work each day on the advice of campus police.

In 1988, animal rights activists protested the use of animals for research at Tennessee's veterinary college, and Kitchen had defended the practice. He acknowledged that, each year, the school conducts research on 250 stray dogs, cats and other pets obtained from animal pounds and dealers.

But he said in an interview, ''The majority are used to teach our students. They are taught surgical procedures on the animals and those procedures are terminal. We kill animals, but always for the benefit of mankind and never in a callous manner.''

(FEB. 26) UPI - Czechoslovakia's president is in Moscow today to sign a troop withdrawal agreement. Vaclav Havel wants all 73-thousand 500 Soviet troops withdrawn from Czechoslovakia by the end of this year. Havel began his visit by laying a wreath at the tomb of the Unknown Soldier near the Kremlin Wall and then met with Soviet President Gorbachev.

The pro-independence nationalist movement in Soviet Lithuania is claiming victory in the republic's first free multi-party elections in seven decades. The Soviet news agency Tass says quotes a spokesman for Lithuania's Council of Ministers as saying the new Lithuanian Parliament will usher a new phase in the republic's history, in which ''Communists will NO longer play the leading role.''

Officials at Union Institute of Cincinnati say Agnes Rettig is a ''remarkable woman.'' The 92-year-old Muncie, Indiana, woman just earned her doctorate degree. Rettig was awarded a doctor of philosophy degree in history from the school after two-and-a-half years of study. She says wanted the degree for self-enrichment.''

#90057u1730 02/26/1990 ~United Press International

WEST LAFAYETTE, IN (FEB. 26) UPI - Success by Purdue University researchers in using a drug to help treat dogs with spinal injuries is the key factor in development of human trials of the drug in Canada, beginning March 6.

Professor Keith Hayes, clinical neurophysiologist and director of the

study, said three people with chronic spinal injuries will be given the drug, 4-aminopyridine (4-AP), at the Canadian Spinal Centre: Parkwood Hospital in London, Ontario. If the results are encouraging, 17 more patients will join the study, he said.

Professor Andrew R. Blight of Purdue's Center for Paralysis Research and Dr. James P. Toombs of Purdue's School of Veterinary Medicine have been using the drug on dogs. Blight said 4-AP may prove to be just one factor in treating patients with spinal injuries. But he and Hayes speculate it will benefit only a small percentage of people and dogs.

''Our feeling going into the (Canadian) study is that it's of great experimental and diagnostic interest and will help us better define what these patients are capable of doing with the spinal cord that is left,'' said Blight, associate professor of veterinary anatomy. ''The drug is a key to unlocking some of the secrets of injured spinal cords. It's more of a means to an end - not the end itself.''

Four groups of subjects are involved in the Canadian study: people with complete paralysis and chronic injuries; complete paralysis and acute injuries; incomplete paralysis and chronic injuries, and incomplete paralysis and acute injuries. Acute injuries are those less than 12 months old.

All of the subjects will be given 4-AP and a placebo at different times as part of the ''double-blind'' investigation and will be tested for changes in neurological function. A double-blind test means neither the patients nor researchers will know until the end of the study when 4-AP was given, allowing the researchers to observe physical results objectively.

The study is expected to last 18 months.

Hayes, director of the Canadian study, said impetus for the human trials stems largely from the success Blight and Toombs have had with 4-AP in treating dogs with spinal injuries. Researchers in the Department of Neurology at Rush University in Chicago also have seen some success in using the drug on multiple-sclerosis patients.

''Some of these MS patients have shown improved motor coordination and vision and good improvement in walking,'' Hayes said.

Purdue's Center for Paralysis Research, part of the School of Veterinary Medicine, uses such methods as electrical stimulation and drugs to study the effects on spinal-cord injuries in dogs, guinea pigs and other animals.

Dogs with naturally occurring spinal injuries that are referred to the center are surgically implanted with either an active miniature electrical stimulator or with a sham unit. Those that received an inactive unit are

given an active one at the end of six months if the owner requests it. The animal is then re-checked six months later for any improvement in sensitivity to pain or in muscular control.

Of the 61 dogs so far in the Purdue study, Blight and Toombs have given 4-AP to 31. Twenty of the 31 dogs improved immediately in such areas as showing greater control in positioning the hind limbs and more skin reflex around the spinal-cord lesion when their backs were touched, Blight said.

The effects were reversed within a few hours as the drug wore off, he said. None of the animals treated so far have walked as a result of being given the drug.

(FEB. 26) UPI - DIGEST:

Baseball

Talks aimed at ending a 12-day spring training lockout were recessed indefinitely when union chief Don Fehr left New York to brief player representatives in Phoenix. Fehr will meet with the union executive board Tuesday, then visit several other spring training locations. Fehr said there has been progress on secondary issues, but none on the main sticking point of salary arbitration. ... Smooth-fielding second baseman Nellie Fox and Leo Durocher, who seldom relied on finesse as a player or manager, are the leading candidates for induction to Cooperstown in Tuesday's annual meeting of the Hall of Fame Veterans Committee. Any new inductees would join Jim Palmer and Joe Morgan in ceremonies Aug. 5 at Cooperstown, N.Y. ... The New York Mets signed infielders Gregg Jefferies and Chris Donnels, pitchers Mike Miller and Wally Whitehurst, catcher Todd Hundley and outfielder Lou Thornton. ... John J. McMullen, who reportedly has expressed interest in selling his majority ownership in the Houston Astros has had discussions about acquiring television rights to a potential expansion baseball franchise in Orlando, Fla. McMullen has held discussions with William du Pont III, who heads a group that wants to acquire a new franchise for Orlando, the Houston Chronicle reported. ... Todd Van Poppel, a pitcher from Arlington, Texas, who is expected to be the first pick in the major-league draft in June, has committed to play baseball for the University of Texas. Van Poppel, a 6-foot-5, 210-pound righty who is ranked by Baseball America as the top prospect in the nation, chose Texas over Louisiana State, Miami and Texas A&M.

Basketball

Charles Shackleford, a former basketball standout at North Carolina State University, admits he accepted cash payments while playing for the

Wolfpack. Shackleford, who plays for the NBA's New Jersey Nets, said he received more than $65,000 from two men, in the 1986-87 and 1987-88 seasons. One of the men was a sports agent.

Boxing

Undefeated British heavyweight champion Gary Mason will try for his 34th victory March 14 against American Everett Martin in London. Martin is the only fighter to have gone the distance with George Foreman in the former world champion's 20-fight comeback. Promoter Mickey Duff said efforts to entice Jose Ribalta and Trevor Berbick to fight Mason in Britain fell through, and Martin was the best available opponent.

Football

The NFL announced four foreign exhibition games: on Aug. 5, the Denver Broncos and Seattle Seahawks will play at Tokyo and the Los Angeles Raiders and New Orleans Saints meet in London; the New England Patriots and Pittsburgh Steelers play Aug. 9 in Montreal; and the Kansas City Chiefs and Los Angeles Rams play Aug. 11 in Berlin or Frankfurt, Germany. It will be the first NFL game played in Germany.

WASHINGTON (FEB. 26) UPI - Medicare carriers in 10 states have begun testing a new automated telephone service designed to help beneficiaries with touch-tone phones get quicker responses to routine questions, officials said Monday.

Medicare carriers are contractors that administer Medicare Part B claims, which cover doctor fees and outpatient services. All carriers have toll-free numbers to handle calls from Medicare patients.

The new automated system is being tested in Arizona, California, Illinois, Maine, Massachusetts, New Hampshire, South Carolina, Texas, Vermont and Wisconsin, Health Care Financing Administration officials said.

By following recorded instructions, beneficiaries with touch-tone phones will be able to receive a recorded update on as many as three Medicare claims.

Beneficiaries with rotary phones or with more complicated questions will be tranferred to service representatives, the officials said.

If the pilot program is successful, HCFA officials said they would implement the service nationwide later this year.

RANGOON, Burma (FEB. 26) UPI - The Burmese segment of the ''Golden Triangle'' - long haunted by opium warlords - is expected shortly to try its hand at playing host to foreign tourists, press reports said Monday.

A hotel named the Golden Triangle Paradise Resort is being built by the government at Monghon in Tachilek township near the border with Thailand, said a report in the Working People's Daily, the government newspaper.

The foundation stones of the hotel were ceremonially laid last Thursday by Burmese Trade Minister Col. David Abel.

Brig. Gen. Khin Nyunt, secretary of the ruling military junta, the State Law and Order Restoration Council, sprinkled scented water onto the foundation stones, the newspaper said.

It said the hotel will be built under the supervision of Vitavas International Company Ltd. of Thailand.

The hotel is expected to help Burma's tourist industry by encouraging trans-border package-tours from Thailand direct to Burmese tourist spots, bypassing Rangoon, the capital.

Construction of the hotel is part of the government's plan to open up the relatively backward frontier regions for economic development, and thereby to wean them away from growing opium and set them to growing cash crops like rice, wheat, pepper, tea and coffee.

Since early last year, a vigorous program of road and bridge construction in these regions has been under way under the personal direction of Khin Nyunt, who is also chief of military intelligence.

The Golden Triangle is a 60,000-square-mile area of mountains near where the borders of Burma, Laos and Thailand meet. The area is the leading producer of illegal opium in the world.

It has also been torn by conflicts between opium traffickers and their private armies and between the government and rebellious ethnic minorities.

#90057u1814 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - Jesse Jackson said Monday he will not be a candidate for mayor of the District of Columbia, but will continue efforts to convince Congress to make the city of Washington the nation's 51st state.

''Many members of the Washington community have encouraged me to become a candidate for mayor,'' said Jackson, the two-time Democratic presidential candidate whose move to the nation's capital last summer spurred intense political speculation.

''I've always said I had no plans to run for mayor,'' Jackson said at a news conference. ''I didn't and I don't.''

Jackson, the nation's most prominent black politician, said his political agenda continues to grow, but did not say whether he will be a candidate for president in 1992. However, his decision to pass up the mayor's contest leaves him free to make a third run for the White House.

Jackson has consistently said he would not run if Mayor Marion Barry, a political ally since their days as young civil rights activists in the 1960s, sought a fourth term. But until Monday he had never ruled out a candidacy.

Barry, arrested on cocaine charges last month, has not announced whether he will seek a fourth four-year term. He was at a substance abuse center near Charleston, S.C., Monday, and was scheduled to be arraigned Wednesday.

Despite his legal problems, a poll published last week showed Barry would defeat Jackson and all other declared candidates if the Democratic mayoral primary were held now. The city is heavily Democratic.

Jackson told reporters, ''I want to work with the citizens without the constraints of the shadow of the impending elections.

''The District is divided and dispirited. I want to be part of the healing process.''

An ordained Baptist minister, Jackson said, ''My desire is to serve and uplift. I want to help set the moral and ethical tone of our city.''

He said he wants to help the city deal with ''the drug crisis, crime, murder, and (push) for affordable housing, statehood, and racial healing.''

Jackson, 48, said it is ''too early'' to endorse any of the four announced Democratic candidates for mayor, but said he would do so later.

Some national Democratic strategists, worried Jackson would disrupt the party's field of 1992 presidential contenders, had privately said they hoped he would run for mayor and remove himself from presidential consideration.

Some Jackson supporters had argued that being mayor would give Jackson a platform for his views, as well as prove he could win public office. However, others expressed concerns that if he won, he might suffer because expectations would be high for a quick reversal of the district's problems. Washington is plagued by a violent drug trade that last year gave it the highest per-capita murder rate in the nation.

Jackson, who moved his home and the base of his Rainbow Coalition to Washington from Chicago ''because our work required more direct access to the federal govenment,'' said one of his top local priorities will be the statehood drive.

He said the efforts devoted to securing votings rights in the 1960s and to winning political freedom in South Africa ''must be applied in the District of Columbia for democracy and statehood. The basic principal of democracy must not be flaunted in our faces.''

Residents of Washington - population 630,000 - have no voting representation in Congress. If it became a state, it would have two senators and a member of the House.

The District curently has a non-voting House delegate, Democrat Walter Fauntroy, who is a leader of the statehood campaign and considered a possible mayoral contender.

#90057u1815 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - The United States and Canada settled a dispute over U.S. border inspections with an agreement Monday to test, initially for one year, a uniform inspection system that would allow meat and poultry

shipments to move freely.

The two governments said in a statement they already have "virtually identical" inspection systems. The agreement was preceded by several weeks of complaints from Canadians of excessive inspections and delays at U.S. border stations.

Officials, however, said the agreement was prompted by a review of the first year of operation of the U.S.-Canada Free Trade Agreement. The test will run a year but if the results are satisfactory, it could form the basis of permanent changes in inspection systems.

"This is the first time in our countries' history that we have been able to 'open our borders' for food safety standards," said U.S. Agriculture Secretary Clayton Yeutter and Canadian Agriculture Minister Donald Mazankowski. "During the experimental period, meat and poultry products inspected by either government's program will move freely between the two countries."

The officials said the U.S.-Canada Free Trade Agreement "set the stage for modifying procedures for reinspecting products from each country at the border." Among the goals of the agreement are removal of all tariff and some non-tariff barriers to agricultural trade.

During 1989, U.S. firms shipped 158,731 tons, or 144,000 metric tons, of meat and poultry to Canada. Canadian firms shipped 300,000 metric tons, or 330,690 short tons, to U.S. buyers.

Canadian inspectors refused entry to 1.4 percent of the U.S. meat and U.S. inspectors turned back 0.72 percent of the Canadian meat. The United States is the largest meat exporter to Canada.

The two nations formed a joint task force to draw up a plan to implement the agreement with a report expected March 6. The new program would be phased into operation over the following several months.

Yeutter and Mazankowski said the decision by the two nations would be "a strong signal" to other nations that it is possible to achieve uniform sanitation and food safety rules. Such a uniform code is a U.S. goal in world trade reform talks.

The disagreement over border inspections was the second time in less than a year that Canada and the United States clashed over meat imports. U.S. trade officials approved the imposition of countervailing duties on Canadian fresh, chilled and frozen pork on grounds the meat was unfairly subsidized. Canada appealed that decision.

#90057u1825 02/26/1990 ~United Press International
WASHINGTON (FEB. 26) UPI - The General Accouting Office urged the Army Monday to drop plans to spend $532 million on another 34 MH-47E helicopters until it can be determined whether the aircraft are needed for special operations troops.

The Pentagon's effort to explain the purchase, a GAO report said, ''does not provide a mission-based justification'' for buying more than 17 of the helicopters built by Boeing Vertol Inc. of Pennsylvania.

The GAO report, released by Sen. William Roth, R-Del., noted a 1987 plan called for just 17 of the aircraft. But the Army is using a 1984 plan to justify buying the extra helicopters because the V-22 Osprey included in the 1987 plan has been scrapped.

A review is in the works now to see what the special operations forces will need in terms of extra aircraft because of the Pentagon's effort to terminate the V-22, and Roth said the update is not expected to be completed until the end of fiscal 1991.

Although the Pentagon did not get a formal response to the GAO in time to have it included in the report, the GAO said Defense Department and Army officials, while not disputing the facts of the report, disagreed with the recommendation that the extra helicopters were not needed and should not be bought.

Pentagon officials told the GAO they believe the 34 extra MH-47Es are needed to provide some of the long-range transport the V-22 would have handled.

The Pentagon, said the GAO, also contended that just $226 million of the $532 million in procurement and support money could be saved by dropping

the spending plans because of possible contract termination penalties and because of higher research and development costs for the MH-47E and the MH-60K, which the Air Force is buying for special operations forces transportation.

#90057u1841 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - Exporters sold 100,000 metric tons of wheat to Sri Lanka at subsidized prices through the Export Enhancement Program, the Agriculture Department reported Monday.

The wheat, 50,000 tons of soft white wheat and 50,000 tons of northern-dark northern spring wheat, was worth about 14.5 million, based on Chicago prices. There are 36.7 bushels of wheat in a metric ton of 2,204.6 pounds, so the sale calls for delivery of 3.67 million bushels between March 12 and April 3.

Under the EEP, exporters receive bonus amounts of government-owned commodities if they lower their prices to make a sale to a targeted country. One exporter was given a subsidy worth $11.06 a ton, or 30 cents a bushel, for the sale to Sri Lanka.

Sri Lanka has the opportunity to buy an additional 250,000 tons of wheat through the export subsidy program.

#90057u1880 02/26/1990 ~United Press International

(FEB. 26) UPI - Latin American democracies embraced Violeta Chamorro's stunning upset victory in Nicaragua Monday as proof of an anti-totalitarian groundswell in the world and advised other Marxist-oriented governments to take heed.

Chamorro's victory ''enormously fortified democracy in the region, and we can foresee a promising future for her country and for definitive peace in the region,'' Argentina's President Carlos Menem said in a statement in Buenos Aires.

Opposition leader Chamorro declared victory early Monday after returns showed her almost 12 percentage points over Sandinista President Daniel Ortega, who presided over a decade of Marxist rule.

The victory brought cheers of surprise and elation from democratic leaders worlwide.

They expressed hope that, provided Chamorro's win is upheld by the Sandinistas and there is a peaceful transition of power, the change will also lead to peace and stability in Central America and give a Western Hemisphere push to a trend that has swept communist regimes in Eastern Europe, the Soviet Union and the world.

In Chile, Gutenberg Martinez, secretary general of president-elect Patricio Aylwin's Christian Democratic Party, said he was ''satisfied...that the recon- struction of the democratic system in Latin America continues to march on.''

''Cuba is now the only American nation outside the democratic system,'' Martinez said, calling it ''an island that tarnishes the hemisphere's image of liberty and democracy.''

Chile will emerge from more than 16 years of military dictatorship when Aylwin is inaugurated March 11.

President Bush praised Chamorro's election, saying, ''the people of Nicaragua have spoken,'' and immediately began consultations in Washington on an aid and trade package for the depressed Central American nation.

Bush said the victory ''moves us closer to the day when every nation in this hemisphere is a democracy.''

Bush said he will be speaking to Central and South American leaders and had conferred Monday morning with Venezuelan President Carlos Andres Perez ''about appropriate trade and economic measures that we can take to support the new government of Nicaragua.''

Earlier, White House press secretary Marlin Fitzwater said the Nicaraguan election raises an ''obvious point that Cuba does stand alone as communist in this hemisphere. It certainly isolates them in that respect.''

Also in Washington, Elliott Abrams, the hard-line former assistant secretary of state who was in operational charge of the Reagan administration's policy in Central America, said the election is bad news for Cuban leader Fidel Castro.

''This is yet another tremendous rejection of communism. I think it brings Fidel's last day closer,'' said Abrams, a zealous supporter of the Contras. ''We do not know what day it is, but he is a lot more isolated than he was yesterday. There is not anybody left for him but the North Koreans, and they are far away.''

Cuba's official news agency, Prensa Latina, said the Castro government would not have a response until official election results are released.

In Peru, ex-president Fernando Belaunde said Chamorro's victory was an ''affirmation of the anti-totalitarian tendency in the world, in Europe as in other continents.''

Costa Rica's foreign minister, Rodrigo Madrigal Nieto, said Chamorro's victory ''filled me with joy'' and that it completes the establishment of democracy in Central America.

''This is a triumph for the Nicaraguan people,'' he said. ''It appears to me that Mrs. Chamorro's victory consolidates the democratic system in

Central America. It fills all Latin Americans with satisfaction.''

''This change is of vital importance to Central American because Nicaragua has always been the arsenal for the Salvadoran guerrillas,'' Madrigal Nieto said. ''I am sure that (the Nicaraguan government) will no longer supply arms or continue to incite civil war in El Salvador.''

Nicaragua, which gets most of its arms from the Soviet Union and Cuba, has over the past 10 years lent support to the rebels of the Farabundo Marti National Liberation Movement in its civil war against the U.S.-backed Salvadoran government.

#90057u1885 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - More than 250 deaths linked to failure of mechanical heart valves point to the need for a mandatory registry - similar to automobile registration - to quickly warn patients of hazards in medical devices, a congressional report said Monday.

The Food and Drug Administration's handling of dangers attributed to Bjork-Shiley heart valves cast further doubts on the agency's ability to regulate the medical device industry, said Rep. John Dingell, D-Mich.

A report prepared by Democratic staff on Dingell's House Energy and Commerce subcommittee claims Shiley's 60-degree convexo-concave mechanical valve won FDA approval in April 1979 after a ''remarkably short'' 5 1/2-month review process.

That valve and a similar larger version were implanted in about 85,000 people worldwide - about 40,000 in the United States - before Shiley Inc., a subsidiary of Pfizer Inc. of Irvine, Calif., pulled it from the market in November 1986. The action followed more than five years of reports of life-threatening valve fractures in patients.

The FDA blamed the delay on confusion over whether Shiley devices posed a lower risk of blood clotting than other mechanical valves. At first it was thought Shiley valves cut the chance of life-threatening clotting - offsetting the risk of death from fracture, but later studies showed that apparently was not the case, FDA officials said.

Although Shiley valves are no longer available, thousands of patients still have the devices implanted in their hearts and reports of fractures continue. As of Feb. 20, Shiley had reported 394 fractures with 252 deaths - one occurring just five months ago - linked to its convexo-concave valves, and congressional investigators say those numbers may be 50 percent too low.

''The mistakes of the past continue because thousands are still implanted '' said Dingell, adding ''We have no assurance that the conditions at the FDA which permitted this valve to enter the market and stay for far too long have been corrected.''

About 2.1 million Americans suffer disease or deformity of the heart valves, and about 40,000 patients undergo heart valve replacement surgery each year. Without surgery, many patients would die in a short period of time.

Noting Shiley failed to promptly report valve fractures and its warning letters to doctors downplayed risks, the report called for establishment of a mandatory reporting system by doctors and hospitals using medical devices, as well as a mandatory registry of patients receiving such devices.

That proposal was supported by Frederick Barbee of Minong, Wis., whose 50-year-old wife Carol died in 1988 after a Shiley valve implanted six years earlier apparently fractured.

Barbee told the congressional panel: ''I believe she would be alive today if some effort had been made to inform the appropriate people of the potential of a malfunction.''

''Even automobile callbacks show more concern than that for human life,'' he said.

Dr. Roger Sachs, Shiley's medical director, called the valve fractures a ''rare phenomenon.'' Sachs said replacing valves that are already in patients would be foolhardy because the death rate from replacement surgery would be about 5 percent, far higher than the .02 percent to .13 percent annual risk that a Shiley valve will fail.

Bruce Finzen, a Minneapolis lawyer representing Barbee and 178 other Shiley valve recipients, said he thinks many patients are still unaware of the dangers they face because Shiley has never sent them direct warnings.

Finzen said the FDA should establish a direct warning system, noting every automobile sold in this country is registered and recall notices of possible defects are sent directly to car owners from the manufacturer.

''A person is more likely to receive notice of a possible defect of some part on his automobile than he is of a possible defect in a life-essential medical device implanted in his body,'' Finzen said.

Acting FDA Commissioner James Benson said, ''In theory, being able to follow a patient and get back quickly to the patient, if appropriate, is a terrific thing to do.''

But Benson said if warnings are not done properly they could prove ''more dangerous than doing nothing.'' For example, patients' lives may be jeopardized if they stop using a medical device without conslulting a doctor.

#90057u1904 02/26/1990 ~United Press International

MOSCOW (FEB. 26) UPI - Czechoslovak President Vaclav Havel met a beaming Mikhail Gorbachev Monday and the two nations signed a pact for the total withdrawal of Soviet troops sent in by Leonid Brezhnev 22 years ago to crush Prague's democratic reforms.

''We have moved beyond what was negative in our relations,'' Gorbachev said after the accord was signed undoing the grimmest chapter of the Brezhnev era, the Aug. 25, 1968 invasion of Czechoslovakia.

Even as the former dissident playwright Havel and East European liberator Gorbachev met, the first tanks and other combat equipment loaded on rail cars rumbled out of Czechoslovakia to start the three-stage withdrawal, the official Tass news agency said.

In Frenstat, Czechoslovakia, Soviet soldiers Monday loaded tanks and armored personnel carriers from the Soviet Union's 31st Tank Division, 2nd Brigade, on trains headed for the Soviet border.

The 44 T-72 tanks and BMP-1 and BMP-2 armored personnel carriers were loaded aboard Czechoslovak railway flat-cars and when the train's whistle blew signaling its departure, Czech railworkers raised their arms high, showing the V for victory sign with their fingers.

The withdrawal is part of Gorbachev's new policy of ending costly foreign occupations to concentrate on domestic problems.

Soviet troops are leaving Hungary, and Russian vessels have started

pulling out of Cam Ranh Bay in Vietnam.

''To my mind, the deepest wound in our society is the Soviet occupation of 1968,'' Havel told reporters after meeting with Gorbachev. ''But it is, I believe, a thing of the past - especially this evening when a treaty of troop withdrawal has been signed.

''We are aware that the Soviet authorities themselves have been very critical of that invasion,'' Havel said. ''Mr. Gorbachev and I agreed that the best way to deal with the dark pages of our past is to look forward."

The 1968 invasion became the basis of the ''Brezhenv doctrine,'' which sanctioned the use of force to prevent democratic socialism and to keep East Bloc nations from leaving the Soviet-led Warsaw Pact alliance.

Under the three-stage pullout agreement signed by Foreign Minister Eduard Shevardnadze and his Czech counterpart, Jiri Dienstbier, the bulk of the Soviets' 73,500 troops must leave by May 31 with the withdrawl completed by June 30, 1991.

Havel said Gorbachev had even promised to try to bring the troops home ahead of schedule, but the Czech president added he had ''listened with understanding'' to Gorbachev's explanation that critical housing shortages and other ''internal political reasons'' made an early pullout difficult.

Gorbachev, who last November in Milan used the term ''Prague Spring'' for the first time in public and admitted it was right ''for that time and for now,'' broke into a broad smile when the mustachioed Havel entered the Kremlin room for the meeting.

''This is the new stage in our relations for which both our countries now strive,'' Gorbachev said. ''We have perestroika and Czechoslovakia has deep changes in its life. There is much in common, but there are many differences. We have our own histories, our own traditions.''

Gorbachev's closest friend at Moscow University's law school in the early 1950s was Czechoslovak student Zdenek Mlynar, and the two remained in contact as Mlynar rose to a high post in his country's Communist Party but then fell from grace and emigrated after he criticized the 1968 Soviet-led invasion.

Havel, who met with President Bush in Washington before coming to Moscow, said he had told Gorbachev of having waited in a crowd of Czechs to greet the Soviet leader as he left Prague's National Theater during a visit to Czechoslovakia three years ago.

''I stood a few steps away from him, and all of a sudden I found myself waving at him,'' Havel said. ''At that time I was a dissident. I told him

about that (Monday) and he laughed.

''He said that at that time he didn't feel good in Prague - that the air was suffocating, and that he felt the obvious tension and the hopes that were pinned on him. And he was aware that (the tension) signaled a deep dissatisfaction of society with the regime in the country.''

Havel's metamorphosis from imprisoned dissident to president on the wings of a national uprising that ended communist rule in Czechoslovakia is one of the great dramas of the transformation of Eastern Europe in the past nine months.

Havel admitted he felt somewhat awed, in Washington and in Moscow, to meet with the heads of the world's two superpowers.

#90057u1912 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - The 70 candidates thus far registered for 1990 Senate races raised $62 million and spent $28 million last year, with the top performers being Sens. Phil Gramm, R-Texas, and Bill Bradley, D-N.J., who each face little opposition, the Federal Election Commission reported Monday.

The FEC said of the 70 candidates who have thus far said they are running in the 34 Senate races, 22 entered the year having raised more than $1 million and nine spent more than $1 million.

But the report showed that the leading money men were incumbents who will likely face little opposition.

Gramm, who was once served in the House as a Democrat, is believed to be a sure bet to win his second Senate term. Nonetheless, the FEC said he led all candidates by having raised $5,998,884 and having $6,107,353 in his campaign coffers. He was third in spending with $2,211,647.

Bradley also faces little opposition, but nonetheless raised $4,714,342 and led all candidates by spending $2,794,151. He was second in terms of cash on hand with $4,125,665.

The two-term senator and former basketball star is considered a possible 1992 Democratic presidential candidate.

Leading all candidates in terms of money from political action committees was Sen. John Rockefeller, D-W.Va., one of the wealthiest members of the Senate, who is seeking a second term, with $830,200.

#90057u1913 02/26/1990 ~United Press International
WASHINGTON (FEB. 26) UPI - Education Secretary Lauro Cavazos presented President Bush a handbook Monday designed to help parents steer their children away from illicit narcotics.

Bush in turn gave the book, ''Growing Up Drug Free: a Parent's Guide to Prevention,'' to Ann Lynch, president of the national PTA, and said, ''Drug education must begin at home and in the neighborhoods.''

Published by the Education Department, copies of the 52-page handbook are being mailed to the 124,000 school superintendents and principals. Another 104,000 are being sent to parent-teacher organizations.

Additional copies are being sent to thousands of health care professionals.

Members of the public may obtain copies free through the Consumer Information Center, by writing the center at Pueblo, Colo., 81009, or by calling 1-800 624-0100.

Cavazos said, ''Two of the most effective prevention tools are awareness of the problems and knowledge of ways to help motivate our children to resist the pressures to use alcohol and other drugs.''

The handbook, developed in consultation with anti-drug and child development experts, discusses what parents can do to teach values, set and enforce rules and simply talk with their children.

''I think it is going to do a lot of good,'' Bush said.

The president was flanked by a half dozen youngsters who did drawings for the handbook and afterward shook hands with each of them and complimented them on their work.

''Thank you all very much,'' he said.

#90057u1919 02/26/1990 ~United Press International
COPPERHILL, TN (FEB. 26) UPI - The Federal Emergency Management Agency, stung by criticism over its denial of disaster aid to flood-stricken Copperhill, said Monday it may reverse the decision to withhold relief from the ravaged town.

Representatives of FEMA returned to Copperhill last weekend to make new assessments of damage caused by the rampaging Ocoee River, which roared through downtown Feb. 16 and inundated dozens of homes and businesses in the town of 418 people.

''They'll consider the new assessments and the additional damage that may have been discovered,'' FEMA spokesman Carl Suchocki said.

FEMA declared disasters in nine flood-stricken counties across the state line in Georgia, including the town of McCaysville, which is separated from Copperhill by the Ocoee.

The decision Friday to stop aid at the state line and exclude Copperhill outraged officials in Tennessee.

Gov. Ned McWherter immediately filed an appeal. Sen. Albert Gore Jr., D-Tenn., threatened to convene congressional hearings on FEMA's disaster assessment policies.

''I am still astounded at how one community can be split in two simply by a state line,'' Gore said. ''McCaysville, Georgia, and Copperhill, Tennessee, are pulling together in time of tragedy. But for federal officials, one half of the neighborhood suffered a disaster and the other half did not. Families and businesses in both towns need help.

''If the decision is not reversed, it will be obvious that detailed hearings on the decision-making process at FEMA are necessary,'' Gore said. ''The decision to deny disaster assistance to Polk County must be reversed immediately.''

Tennessee also has requested aid for the East Ridge suburb of Chattanooga, where Chickamauga Creek flooded several hundred homes, causing an estimated $8 million in damage. FEMA has not made a ruling on that request.

(FEB. 26) UPI - President Bush described Nicaragua's election as ''free and fair'' today as he hailed the upset victory of U-S-backed presidential candidate Violetta Chamarro. White House spokesman Marlin Fitzwater read a statement from Bush saying there is NO more need for military conflict in Nicaragua. Bush called for an immediate cease-fire. Bush also sent a note saluting defeated Sandinista leader Daniel Ortega on the conduct of the

election and his stated willingness to abide by its results.

The Supreme Court says it woN'T hear appeals from a lesbian soldier and homosexual sailor who challenged a Pentagon policy barring homosexuals from the armed forces. The justices rejected the appeals without comment. The National Gay and Lesbian Task Force expressed disappointment over the high court's decision, saying it shows the court is NOT ''in the mainstream of society.''

Bad weather grounded the space shuttle Atlantis again today. The 48-hour postponement is the fifth delay for Atlantis in as many days. Now, the orbiter woN'T get off the ground until Wednesday, weather permitting. But Air Force meteorologists say there's an 80 percent chance the weather woN'T co-operate. Atlantis skipper John Creighton says the hard-luck crew is ''looking forward'' to its next launch opportunity.

A private memorial service was held today for publishing magnate Malcolm Forbes, who died Saturday of heart failure at his New Jersey estate. He was 70. A Forbes magazine spokesman says the service at an UNdisclosed New Jersey location was attended by friends and family members. A public memorial service is planned for Thursday at St. Bartholomew's Church in New York. About 500 Forbes workers are expected to attend.

#90057u1953 02/26/1990 ~United Press International
WASHINGTON (FEB. 26) UPI - The National Organization for Women said Monday newly proposed civil rights legislation will have a positive impact on women because it will give them better monetary compensation in sex discrimination cases.

The bill, introduced earlier this month by Sen. Edward Kennedy, D-Mass., and Rep. Augustus Hawkins, D-Calif., would reverse four Supreme Court decisions issued during the past year and strengthen the 1964 Civil Rights Act.

''We are supporting the Civil Rights Act of 1990,'' said NOW president Molly Yard. ''It is very important that the legislation be passed because of its impact on sex discrimination.''

Sally Burns, a lawyer with NOW's Legal Defense and Education Fund, said a provision in the bill allows for more monetary compensation in successful sex discrimination lawsuits and than what a plaintiff can presently obtain.

''What we've seen over the years is that plaintiffs who are going to court on sex-based claims ... are struggling very hard to get the kind of compensation they need to make up for the damages they've suffered,'' Burns said. ''What we're seeing with the Civil Rights Act of 1990 is that we will have made more meaningful remedies.''

Burns said a soon-to-be released survey conducted by NOW shows that only

seven states and the District of Columbia have laws that make it possible for women to be awarded sufficient monetary compensation for injuries caused by sexual harassment or sex discrimination.

Yard said her group's efforts to see that the bill is passed will focus on intense lobbying of members of Congress while they are in Washington and when they are working in their districts and states.

''I think all of us understand very will how important this is to women,'' Yard said. ''Lots of our members have themselves been discriminated against. If push comes to shove and we feel like we'll have to do something dramatic, we're perfectly prepared to do it.''

Yard added that she did not know how quickly the bill would come to a full House and Senate vote.

''I'd be very suprised at rapid movement on the part of this bill,'' ''We've got all the leftover bills that they haven't taken care of like daycare and family medical leave ... but the congressional leadership promised us that these bills will move and I hope they do.''

-30- 2541

#90057u1957 02/26/1990 ~United Press International

NEW YORK (FEB. 26) UPI - Iphigene Ochs Sulzberger, 97, whose father owned The New York Times and whose husband was its publisher, died Monday of respiratory failure in her sleep at her home in Stamford, Conn., a Times spokesman said.

Mrs. Sulzberger, who was director emeritus of the Times, also maintained a home on Fifth Avenue in Manhattan, where she had been active for many years in civic, educational and philanthropic organizations.

''I think she was the most remarkable woman our profession has seen in my lifetime,'' said former Times Executive Editor James Reston, a friend for half a century. ''She was an incredible woman.''

Mrs. Sulzberger was the daughter of Adolph Ochs, publisher of the Chattanooga, Tenn., Times who acquired control of the New York Times in 1896.

In 1917 she married Arthur Hays Sulzberger, who later became publisher of the Times. He died in 1968.

A longtime Times trustee, she also was on the boards of nearly two dozen charitable and educational organizations, including her alma mater, Barnard College, where she served on the Board of Trustees from 1937 until 1968, when she was named trustee emeritus.

She was also on the board of trustees of the University of Chattanooga and Hebrew Union College-Jewish Institute of Religion and was also a member of the National Urban League.

Eleanor Elliott, another longtime friend and colleague, recalled Sulzberger as a kind, modest and beautiful woman with a lifelong commitment to fulfilling her father's legacy.

''She had this great desire to do good in the world,'' said Elliott, whose parents knew Sulzberger's parents and who worked alongside the older woman when both were Barnard trustees. ''She was always inspiring other people. She was always giving wise counsel.''

Despite her powerful position, Elliott said, she never lost sight of the ''common good,'' with a subtle management style that often left others unaware she had gotten her way.

Sulzberger also was a longtime member of the New York Botanical Gardens and at the time of her death was honorary chairman of the Central Park Conservancy.

Sulzberger is survived by four children, 13 grandchildren and 24 great-grandchildren.

Her children are Ruth S. Holmberg, publisher of the Chattanooga Times; Dr. Judith P. Sulzberger; Marian Heiskell, whose husband Andrew Heiskell, was chairman of Time Inc.; and Arthur Ochs Sulzberger, chairman of the New York Times Co.

(FEB. 26) UPI - A survey shows a large portion of the nation's schoolchildren favor drug tests for high school students. About 180-thousand children in grades five through 12 participated in the nationwide poll. Nearly 45 percent of the students indicated they favor regular drug testing for high schoolers. Only about 33 percent of those in grades nine through 12 said they would be willing to be tested regularly for drugs.

Near-perfect weather conditions in New Orleans are the icing on the cake for this year's Mardi Gras revelers. 11 processions rolled yesterday, giving thousands of paradegoers opportunity to collect beads an other trinkets tossed by masked float riders. The climax to the hedonistic

weekend celebration was the Bacchus Parade with actor Dennis Quaid as its king. Only three parades are scheduled for today... known as ''Fat Monday''... before tomorrow's final carnival blow-out.

WASHINGTON (FEB. 26) UPI - The conservative cause is a ''spent volcano'' that still sputters but cannot shape politics, New York Mayor David Dinkins said Monday, declaring his brand of progressive idealism is the wave of the future.

''The crest of the conservative flood has passed. The Republicans still occupy the White House, but the conservative coalition has lost its way,'' Dinkins told the National Press Club.

''The Republican economic miracle turned out to be a mirage - all of it except for the national debt,'' Dinkins said. ''Thus, the conservative cause has become a spent volcano - still spitting and sputtering, but no longer capable of reshaping the political landscape. Sadly though, the land the conservatives have left behind is scorched and scarred.''

Dinkins said the Reagan administration's legacy is reduced aid to cities, increased defense funding, attacks on women's right to an abortion, an abandonment of the homeless, tax cuts and an insensitivity to civil rights.

The newly elected mayor, the first black to hold that job in the history of the nation's biggest city, claimed the Reagan legacy is yielding to a resurgence of progressive ideals.

''We have just begun to build this new era in New York City, where I took office only two months ago. In the coming months, we will introduce an imaginative program of social responsibility rooted in fiscal integrity,'' he said.

Burton Pines, senior vice president of the Heritage Foundation, a conservative think-tank, differed with Dinkins' assessment.

''I think that the mayor is as much out of touch with America as all New York mayors have been,'' Pines said. ''You can see the evidence of the triumph of conservatism everywhere - yesterday's election in Nicaragua, communism on the retreat and collapsing everywhere. Conservative issues - whether they are lower taxes, greater individual responsibility or stronger families - are on the ascendency.''

Pines also disagreed with Dinkins' charge that the federal government has retreated from its responsibility to cities.

''The cities ... are responsible for their problems. New York may not be able to handle its problems, but hundreds of cities across America are,'' he said.

Dinkins said his administration will take its ''scant resources'' to build homes for the homeless, find treatments for AIDS, repair the city's infrastructure and educate its children.

''From the ground up, we're building a new foundation upon the rubble of the conservative decade. If progressive ideas were a stock, now would be the time to buy,'' he said.

#90057u1996 02/26/1990 ~United Press International

ANCHORAGE, AK (FEB. 26) UPI - The prosecution's chief expert witness for marine accidents testified Monday that former Exxon Valdez skipper Joseph Hazelwood tried to free his grounded ship from Bligh Reef, endangering the lives of the crew and exposing the leaking tanker to more potential damage.

George Greiner, a Ridgefield, Wash., marine consultant and lawyer attacked by the defense as a ''professional witness,'' testified Hazelwood's actions made matters worse after the crew drove the ship over the rocks.

The 987-foot Exxon Valdez drove 1,100 feet over the underwater rocks in two minutes before coming to a halt at 12:07 a.m. with a Volkswagen-size boulder stuck in the split-open tanker, Greiner said.

Hazelwood had left the bridge 10 or 15 minutes before the wreck, leaving the ship in the hands of allegedly unqualified crewmen, but rushed back to the bridge when the ship hit Bligh Reef.

Back at the controls, Hazelwood moved the rudder back and forth to extricate the tanker from the rocks, Greiner said in his analysis of the events surrounding the grounding.

''The movement of the rudder back and forth is consistent with trying to move the vessel off the rock or off the bottom,'' Greiner said. ''Moving it back and forth exposes the vessel to additional damage.''

These maneuvers, Greiner told the jury, created ''a risk of possible injury or death to people in the engine room'' by potentially subjecting the ship to flooding, additional damage and possibly capsizing.

Charges against Hazelwood include allegations that he recklessly tried to rock the ship off the reef as it sat leaking nearly 11 million gallons of crude oil into Prince William Sound.

The 43-year-old Huntington, N.Y., mariner is charged with reckless endangerment, operating the tanker while intoxicated, negligent discharge of oil and criminal mischief.

Defense lawyer Michael Chalos noted that third mate Gregory Cousins gave the vessel a hard right, then a hard left as it began to run aground.

The defense has maintained that Hazelwood acted diligently in working to keep the ship on the reef to prevent it from rolling off to disaster.

In taped remarks by Hazelwood played earlier for the jury, the skipper said he intended to maneuver off the rocks, but defense lawyers said Hazelwood changed his mind when the chief mate told him the tanker had lost stability.

Jurors will have to weigh contradictory evidence over whether Hazelwood's actions were alcohol-impaired and dangerous or whether they were careful and well-considered.

Greiner said the grounded Exxon Valdez damage was exacerbated when the tide went out and the weighty bulk of the huge tanker was pulled down onto the rocks.

However, Greiner performed his damage evaluation in San Diego, where the refloated tanker was taken for repairs, and defense lawyers tried to discredit his analysis because the ship suffered additional damage en route to San Diego that had nothing to do with Hazelwood's actions.

Greiner said he had a $30,000 contract from the state of Alaska to provide his expert analysis of the accident, which caused the worst spill in U.S. history.

#90057u2052 02/26/1990 ~United Press International

RIO DE JANEIRO, BRAZIL (FEB. 26) UPI - A float representing a waterfall crashed into a high tension wire Monday, killing two people and marring the opening of the 1990 samba carnival parades.

This year the parades, the high point of annual celebrations, entered the high tech era, with computers running elaborate floats with complex lighting and sound systems that made displays more lavish than ever before according to commentators.

But the first of three huge samba school parades, held nightly until carnival ends Ash Wednesday, got off to a shaky start when the waterfall float of the Beija Flor samba school crashed into a high tension wire early Monday morning.

The float caught fire and was destroyed after it hit the tension wire near the Post Office, just as it was to enter the Sambodromo stadium where 80,000 spectators were watching the parade.

Police said two men pushing the float died and a third was injured with burns in the accident.

Parade organizers respected this year's ban by the League of Samba Schools on total nudity, but occasionally women appeared bare-breasted and skimpy costumes were commonplace.

A float with a giant representation of Superman sitting on a toilet with his pants down covered the image's genitals with a cape, as requested by League.

Political spoofs were rampant, a reflection of Brazil's economic crisis in which inflation is running into triple digits.

''Down with democracy and live dictatorship!'' said one placard of the Beija Flor troupe.

Another of its placards said, ''Don't steal. The goverment detests competence.'' A troup of 20 mulatas in miniskirts, but otherwise in the costumes of Catholic nuns, carried signs saying, ''Why can't I do it?'' ''We want to marry,'' and ''For the rights of priests.''

The Santa Cruz samba school, sponsor of the Superman float, also paraded

40 authentic dwarfs dressed in military uniforms in a spoof of the military government that ruled form 1964 to 1985.

The Sambodromo medical center said that it treated 283 persons on the first day of the parades, most of them suffering from cardiac and arterial problems and intoxication.

In another accident, at least 25 people were injured when a car and two motorcycles collided and crashed into a group of dancers Sunday morning on a crowded main street of Belo Horizonte, a city located 210 miles northeast of Rio de Janeiro.

Authorities said the driver of the automobile failed to heed signals at a detour designed to protect the dancers from traffic.

In Roman Catholic countries carnival is celebrated with parties and dances as the final days of permissiveness before the 40 days of fast and penance during Lent.

NEW YORK (FEB. 26) UPI - The dollar moved up smartly against the yen and other major currencies in New York trading Monday as U.S. financial markets rallied in the face of the Tokyo Stock Exchange's latest severe plunge.

Traders said the dollar found firm support as global investors shifted funds out of Japanese investments and the feeble yen. The West German mark gained on the yen too but gave up ground to the firming U.S. currency.

Near the end of the New York trading session the dollar was quoted at 1.6910 German marks, a hefty gain from Friday's 1.6780. The U.S. currency was quoted at 148.67 Japanese yen, well up from 147 last week.

Early Monday the Nikkei Average of 225 selected Japanese stocks lost 1,569 points or 4.5 percent of its value, after losing 2,569 points or 10.3 percent in repeated jolts last week. It was the Nikkei's second-largest

one-day loss, after the October 1987 "Black Monday" crash.

But the New York Stock Exchange went its own way to surge 38 points, while in the fixed-income market, the benchmark 30-year U.S. Treasury bond gained more than 5/8 points, or $6.25 for every $1,000 face value.

The dollar dominated the yen in Asian trading despite intervention by the Bank of Japan estimated at $1.5 billion. Analysts said the BOJ defense lacked credibility in the absence of an interest rate hike.

In New York the dollar was bolstered by the ebullience of the stock exchange and the bond market, which traders monitored.

"The dollar was firmly underpinned all day," said foreign exchange manager Joseph Cambria of the Banque de Paris et des Pays Bas (Paribas). "It was a surprising day, actually, because the call on the stock market was (for it to trade) down and it traded higher all day."

Dealing was made volatile by increased cross-trading, in which the dollar is bypassed in the direct exchange of foreign units. Yet such transactions often move the dollar indirectly by creating market imbalances.

"Cross-trading is having a very large effect on the dollar and is causing trading to be erratic," said Mitsui Bank senior dealer Eric Lehtis. He said a large sale late in the New York session of yen for deutsche marks brought the dollar down against West German unit. "It's very difficult to guess the next move in this market," Lehtis said.

In New York the British pound tumbled to $1.6895 from $1.7098. Other dollar rates: 1.4880 Swiss francs, up from 1.4720; 5.7220 French fancs, up from 5.6810; and 1,250.50 Italian lire, up from 1,240.

In Europe the dollar closed higher against the major currencies, closing in Frankfurt at 1.6880 marks, well ahead from 1.6755 Friday.

The dollar also gained in Zurich, Paris, Brussels and Milan, ending at 1.4830 Swiss francs against 1.4745, 5.7075 French francs against 5.6795, 35.15 Belgian francs against 34.92 and 1,246.75 lire against 1,240.10.

In London the pound slid to $1.6960 against $1.7065. Sterling investors were edgy ahead of release Wednesday of January trade figures, traders said.

In heavy Tokyo trading the dollar soared to an eight-and-a-half month high of 148.65 yen, up 2.18 yen from Friday. Finance Minister Ryutaro Hashimoto deplored the yen's steady fall, insisting, "There has been no change in Japan's economic fundamentals."

Republic National Bank in New York closed cash gold at $409.50, off from the Friday price of $415.25. The New York Commodity Exchange settled gold at $408.60 an ounce, down from $415. Zurich gold fell to $411.50 an ounce from $415.50 an ounce. London gold declined to $411.25 an ounce from $416.

Republic closed cash silver at $5.165 an ounce, off from $5.25. Comex spot silver declined to $5.147 an ounce from $5.238. Zurich silver dropped to $5.25 an ounce from $5.30. London silver ease to $5.23 an ounce from $5.27.

#90057u2090 02/26/1990 ~United Press International

GREENWICH, CT (FEB. 26) UPI - Evian Waters of France Inc., a chief rival of troubled Perrier, launched a new advertising campaign in the United States Monday stressing the health effects of bottled water.

Evian officials said that they had planned the campaign over the last year

and that it was not related to the recall of about 160 million bottles of mineral water ordered by Source Perrier S.A. of France because of benzene contamination.

Beverage industry analysts said, however, that Evian could be in a position to take advantage of Perrier's troubles and claim a larger share of the bottled water market.

"I feel they have a lot to gain and, obviously, their timing in launching the new ads is very good," said Jack Trout, president of Trout & Reis, a marketing strategy firm.

"They were a distant second behind Perrier, and I feel they have a real good chance to close the gap," Trout added. "It will depend, of course, on how long Perrier is off the shelves, and Evian is going to have to spend some money."

Perrier said Monday that more than 144 million of the bottles have been recalled and that the source of small amounts of contamination had been traced to the filtering of natural carbon dioxide gas.

The contamination problem has been solved and new quality control measures were being put in place, Perrier officials said. Perrier said it expected to have its mineral water back on store shelves within six to eight weeks.

Frank C. Walters, director of M. Shanken Communications of New York City, which publishes Impact International, a beverage industry research publication, also said Evian has a chance to move up while Perrier is off the shelves.

"Evian is No. 2 behind Perrier, and if people are going to make the switch but stay with the category of French waters I think Evian is the natural choice," Walters said.

In 1989, Perrier accounted for 57 percent of the sales of imported water in the United States, with 32 million gallons sold, compared with Evian's 17 percent share, or ten million gallons, Walters said. Evian would not disclose how would be spent on the new ad campaign beyond indicating it will be 50 percent more than last year's ad budget.

As part of the campaign, Evian began showing new television advertisements Monday in New York and Los Angeles and planned to reach into the San Francisco, Washington, Miami, West Palm Beach, Fla., and Philadelphia markets during the Academy Awards March 26. The ads also will also be aired in San Diego that week, the company said.

Evian also planned to run full-page advertisements in national daily newspapers in seven markets, including New York and Los Angeles, and in

USA Today in February and March, said spokeswoman Sandy Klinzman.

The advertisements, aimed at "health-conscious adults," carry the message that drinking Evian natural spring water "is one simple way of doing something good for yourself," said Evian's Maryanne Farrell.

MANAGUA, NICARAGUA (FEB. 26) UPI - Hours after the electoral upset in

Nicaragua, a top-ranking Contra leader said rebel forces would be ''on the lookout'' for any Sandinista maneuvering until power is safely handed over to president-elect Violeta Chamorro and her U.S.-backed opposition coalition.

The Contra leader, known only as ''Comandante Ruben,'' said in a taped message released to United Press International, ''We will be on the lookout for any changes that may take place from now on because we know the Sandinistas will be there for a few more days, we are going to be waiting for them to hand over power to Mrs. Violeta Chamorro.''

He said Chamorro and her 14-party National Opposition Union, known by the Spanish-language acronym UNO, which scored a stunning upset Sunday by defeating President Daniel Ortega and the Sandinista National Liberation Front in nationwide elections, had the rebels complete support.

''This is a public manifesto from the Nicaraguan people for change and democracy. As the Nicaraguan resistence, we give all our backing to the candidate Violeta Chamorro,'' Comandante Ruben said.

The Contra leader, whose U.S.-backed rebel forces have waged a guerrilla war against the Sandinistas for eight years, said the Nicaraguan resistance, commonly known as Contras, has always supported the electoral process.

''The Nicaraguan resistance, besides its payment in blood and sacrifice over eight years, has always given its backing to the electoral process as a civic battle front that should be taken advantage of in the middle of thousands of obstacles,'' Comandante Ruben said.

''Before the clear evidence of the well-rounded electoral triumph, with the majority backing of our people, we send our congratulations and our support,'' Comandante Ruben said.

Though some rebels have returned to Nicaragua in recent months, about 10,000 Contras still remain in neighboring Honduras.

#90057u2108 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - The main members of the International Monetary Fund, divided over a capital increase for the U.N. agency, have decided to postpone issuing a decision on the matter, IMF officials said Monday.

The U.N. agency said its 22 executive directors have proposed to the board representing the governors of the 152 member-nations to extend the deadline to rule on the issue from March 31 to no later than June 30. Governors have until March 29 to vote on the draft resolution. The members

were already in disagreement over the issue last year, which forced a first postponement of the deadline from December to March 31.

The IMF's Managing Director, Michel Camdessus, has asked for a doubling of the institution's capital. The United States said that it is willing to consider an increase of about 45 percent, with other industrial countries pushing for hikes of between two-thirds to 100 percent.

A diplomatic source close to the fund, and who asked not to be named, said members cannot agree to increase the fund's capital which is currently $120 billion. They do not agree either about the ranking of France and Britain among the leading IMF shareholders.

The source said France and Britain argue about what country ranks fourth or fifth inside the IMF, with France saying it has a bigger economy than Britain and therefore should have a greater capital quota as well as more voting power.

The source also said that another point of disagreement results from U.S. demands that the IMF sell gold contributions by 11 countries with $5 billion in combined arrears owed the institution and that the proceeds be allocated to augment the fund's capital, the source said.

The United States stated that resolving the arrears issue is a key condition before talks on a capital increase can make any progress, the source added. Selling members' gold, presumably against their will, could require rewriting the IMF's statutes, the diplomatic source noted.

There is consensus among fund members that Japan, now the fifth principal shareholder at the institution, should become the second after the United States, and that West Germany should continue to be the third largest.

Britain is now the second largest shareholder, with France in the fourth position. A country's capital contribution - or its "quota" - in the fund, is loosely based on the size of its economy, determines its voting power.

Although Britain could accept sharing an equal positon with France, it insists that its quota should not fall below six percent of the total fund capital, a demand that would compel other members to diminish their own quotas and voting power, the dipomatic source said. Britain's capital quota in the IMF is now 6.9 percent. The United States' quota represents almost one-fifth of the fund's capital.

#90057u2113 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - The National Science Foundation awarded a Louisiana firm an $84 million contract Monday for construction and the

10-year lease of the first U.S. research ship capable of operating year-round in Antarctica.

Edison Chouest Offshore Inc. of Galliano, La., will build the ship at its shipyard in Larose, La., the science foundation said.

The 300-foot ship, described as the first U.S. research vessel equipped for ice breaking, will be used to study effects of the Antarctic ozone hole and other signs of climate change that may be due to pollution. It will be able to operate safely year-round in the Weddell and Ross seas, and in other Antarctic waters that are often stormy or ice-covered in winter.

Polar regions are especially sensitive to changes in the global environment, and may also influence the speed and degree of climate change through interplay between ocean, atmosphere, ice and land, science foundation officials said.

One of the ship's first projects will involve the western Weddell Sea, a major source of bottom water for the world's oceans. Scientists from the U.S. and Soviet Antarctic programs will together establish a base camp on sea ice from which they will launch studies of ocean circulation and climate.

The ship will also look at winter stages in the life cycles of marine organisms and effects of the annual melting of sea ice on marine productivity.

The research vessel is scheduled to be complete in January 1992. When construction is finished, the science foundation will acquire a 10-year lease.

The contract, valued at $83.8 million, includes the lease, charges for food and accommodations during the lease, installation of winches and compressors, and delivery to Punta Arenas, Chile, expected to be one of the ship's home ports.

The ship, with a crew of 22, will support the research of 37 scientists on board. It will be able to conduct 75-day missions, will have a helicopter landing deck and will be able to house two, four-passsenger helicopters.

Total cost of operating the research ship, including the contract, fuel, port charges and other expenses, is estimated to be about $11 million per year, or $110 million for the 10-year duration of the lease. The contract gives the science foundation the option to buy the ship for $55 million at the end of the lease.

The contract with Edison Chouest is a subcontract entered into by ITT

Antarctic Services Inc. of Paramus, N.J. It has been under contract to the science foundation for the past 10 years to manage station facilities, construction and ship operations in Antarctica.

#90057u2120 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - The government probably will delay any signup for the Conservation Reserve until Congress decides whether to revise the program's goals, Agriculture Secretary Clayton Yeutter said Monday.

Nearly 34 million acres of land have been enrolled in the reserve since it was created in 1985, making it the nation's largest long-term land retirement program ever. In it, farmers are paid an annual rent in exchange for taking highly erodible land out of crop production.

As part of its proposals for the new farm policy law, the Bush administration has proposed focusing the Conservation Reserve on restoring wetlands, preventing runoff from land along waterways and retiring sensitive land near munincipal wells.

Yeutter told reporters "it's not likely" the Agriculture Department would open another enrollment period until Congress has a chance to act on the administration proposals. "It would be appropriate and prudent to let Congress debate the issue ... before we move forward with another signup," he said.

Congressional leaders hope to complete work on the farm bill by mid-summer. The last Conservation Reserve signup was held last July 17-Aug. 4. The government accepted 3.3 million acres at an average rent of $50.99 an acre.

A 1985 law set a target of enrolling at least 40 million acres into the Conservation Reserve by 1990. The adminstration wants to extend the deadline to 1995 but to limit the reserve to 40 million acres.

#90057u2137 02/26/1990 ~United Press International

NEW YORK (FEB. 26) UPI - Stocks shrugged off Tokyo's overnight sell-off to close sharply higher Monday in moderate trading, boosted by a late surge of computerized program buying.

The Dow Jones industrial average, which fell 10.58 Friday, jumped 38.29 to close at 2602.48, breaking a string of five straight losing sessions.

The blue chips led the rally, but broader market gauges also showed solid advances. The New York Stock Exchange composite index rose 1.91 to 181.26 and Standard & Poor's 500-stock index added 4.52 to 328.67. The price of an average share gained 35 cents.

Advances led declines 822-635 among the 1,939 issues crossing the NYSE tape. Big Board volume was 148,910,000 shares, compared with 148,508,670 shares traded Friday.

Analysts said a late bout of computerized program buying, used to profit on price spreads between stocks and stock-index futures, boosted prices from the mixed-to-higher levels which characterized all but the last part of the session.

The market opened with another dramatic decline in Tokyo trading hanging over its head. Prices there nosedived in thin trading, reflecting investors' disappointment with the weak bond market and the dollar's rally to an eight-month high against the yen.

The blue-chip Nikkei index, which lost 2,569.35 points or 10.34 percent last week, plummeted 1,569.10 points - 4.5 percent - to close at 33,321.87. It was the second-largest single-day loss, next only to the "Black Monday" stock crash in October 1987 in terms of points.

The blue chips seemed to have little problem brushing off Tokyo's sharp slide, but issues of smaller companies were just about even until the last hour of trading as the turmoil in Tokyo sent investors straight to high-capitalization issues.

"People are buying the big blue chip names, the ones without a lot of junk-bond debt," said Rodd Anderson, vice president of equity trading at Shearson Lehman Hutton Inc.

As for why Wall Street again did not follow Tokyo with a sell-off of its own, analysts also said a firm bond market and dollar were supportive. The long bond was up 27/32 to 100 5/32 in late trading and the dollar was up sharply against the yen, at 148.63 compared with 147.07 late Friday.

"Also, I think a lot of it is that the word on the Street is the decline of Tokyo is already in the market," said Anderson. "Everyone understands

why it's happening and we're not going to follow them lower," he said. "Tokyo is going down on programs (computerized program selling) and because interest rates there are up."

On the trading floor, Florida Progress was the most active issue, down 1/8 to 37 3/4 in dividend-related trading.

Texas Utilities followed, up 1/2 to 35 1/8, also in trading designed to capture its payout. Pfizer was third, off 1/4 to 56. A class-action shareholder suit was reported filed against the company, alleging Pfizer failed to disclose problems with an artificial heart valve made by its Shiley unit.

Among the blue chips, Texaco rose 7/8 to 58 1/8, American Express gained 3/4 to 58 3/4, General Motors added 1 1/8 to 44 1/2, IBM rose 1 3/8 to 104, AT&T was up one to 39 1/8 and Coca-Cola gained 1 1/4 to 69 1/4.

Elsewhere, Saatchi & Saatchi was down 5/8 to 7 1/8 after saying last week its profits would fall short of expectations this year.

Mercury Savings and Loan, a troubled California thrift seized Friday by federal regulators, plummeted 7/8 to 1/2.

JWP tumbled 2 1/4 to 30 1/8 after reportedly agreeing to acquire Neeco for about $100 million.

Xtra surged 5 1/4 to 30 after saying it had decided to solicit takeover proposals.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 179,425,070 shares, compared with 174,792,910 shares traded in the previous session.

Prices closed lower in active trading on the American Stock Exchange. The Amex Market Value index lost 0.74 to close at 350.36. Declines led advances 308-242 among the 784 issues traded. The price of an average share fell two cents. Composite volume totaled 17,962,230 shares, compared with 17,321,980 shares traded Friday.

Bankers Trust "put" warrants on Japan's Nikkei stock index, which are in effect bets that the Tokyo stock market will fall, led the Amex issues, up 1 3/4 to 12.

The National Association of Securities Dealers composite index rose 1.43 to 420.95.

-30- 4682

#90057u2148 02/26/1990 ~United Press International
SEOUL, SOUTH KOREA (FEB. 26) UPI - A North Korean spy serving a 20-year sentence will be among 1,111 prisoners freed as part of ceremonies marking the 71st anniversary of the Independence Movement against Japan, the Justice Ministry said Monday.

The release, in the form of special parole, will take place Wednesday morning, a ministry spokesman said. Most of those being freed on the anniversary of the March 1, 1919 movement are ordinary prisoners who behaved well while serving their terms.

They will include 22 leftist prisoners who have been held for long terms after their convictions for espionage and charges of breaching public security. Authorities decided to free them in consideration of their repentance for past wrongdoings, the spokesman said.

Among the group will be Suh Sung, 45, who was sentenced to life imprisonment in March 1973 for spying for North Korea. His sentence was commuted to 20 years in December 1988.

A Korean resident in Japan, Suh came to Seoul in 1968 to study at a university. He was arrested in March 1971 on espionage charges.

Suh's case drew keen attention from human rights activists abroad after it became known that he tried to kill himself on April 19, 1971, while under investigation by military authorities.

Justice Minister Huh Hyung-koo said in a statement that the clemency for the 1,111 prisoners was designed to promote national harmony. More prisoners will be freed if they show sufficient remorse over their past wrongdoings, he said.

It is a standing practice for the government to release convicts with good prison records on big holidays and nationally memorable occasions.

On March 1, 1919, Koreans staged uprisings nationwide to protest Japanese colonial rule. The movement was put down and Korea remained under Japanese control until the end of World War II on Aug. 15, 1945.

-30- 2075
#90057u2163 02/26/1990 ~United Press International
ANCHORAGE, AK (FEB. 26) UPI - The prosecution's expert witness for marine accidents testified Monday that former Exxon Valdez skipper Joseph Hazelwood tried to free his grounded ship from Bligh Reef, endangering the lives of the crew and risking more damage to the leaking oil tanker.

George Greiner said Hazelwood tried to drive the rock-impaled tanker

forward over the reef, but he acknowledged that the ship did not move ahead and so no additional damage occurred.

Greiner also acknowledged under cross-examination that if Hazelwood's orders had been followed, the Exxon Valdez would have missed Bligh Reef last March 24.

The Ridgefield, Wash., marine consultant for the prosecution said Hazelwood's commands were good enough to avoid the underwater rocks with a little time to spare and the tanker ''would have missed Bligh Reef.''

Greiner's statement that the ship should have avoided the disastrous wreck based on the skipper's orders echoed testimony by previous prosecution witnesses.

Hazelwood left the controls 10 or 15 minutes before the wreck, leaving orders with allegedly unqualified crewmen, and Greiner said the skipper made matters worse after the crew drove the ship onto the rocks by trying to drive forward and using the rudder.

The 987-foot Exxon Valdez drove 1,100 feet over the underwater rocks in two minutes before coming to a halt at 12:07 a.m. with a Volkswagen-size boulder stuck in the split-open guts of the tanker before it halted hard aground, Greiner said.

''The movement of the rudder back and forth is consistent with trying to move the vessel off the rock or off the bottom,'' Greiner said. ''Moving it back and forth exposes the vessel to additional damage.''

These maneuvers, Greiner told the jury, created ''a risk of possible injury or death to people in the engine room'' by potentially subjecting the ship to flooding, additional damage and possibly capsizing.

To Greiner's charge that Hazelwood tried to drive the grounded tanker forward over more rocks, defense lawyer Michael Chalos said, ''Do you know how much thrust would be required to go even one inch forward? You have no basis for knowing whether Captain Hazelwood's vessel was capable of moving even one inch forward.''

Greiner acknowledged that Hazelwood would have had to drag the grounded tanker 450 feet more over the rocks to before the engine room would have been struck, flooding it and endangering the ship and its crew.

''I don't consider going forward at all prudent,'' Greiner said. ''It was an attempt, but as far as I know, it didn't move forward.''

Charges against Hazelwood include allegations that he recklessly tried to move the ship off the reef as it sat leaking nearly 11 million gallons of

crude oil into Prince William Sound.

The 43-year-old Huntington, N.Y., mariner is charged with reckless endangerment, operating the tanker while intoxicated, negligent discharge of oil and criminal mischief.

Chalos noted that helmsman Robert Kagan failed to turn the ship as much as ordered by third mate Gregory Cousins and that both gave the vessel a hard right, then a hard left as it began to run aground - not Hazelwood.

The defense has maintained that Hazelwood acted diligently in working to keep the ship on the reef to prevent it from rolling off to disaster.

In taped remarks by Hazelwood played earlier for the jury, the skipper said he intended to maneuver off the rocks, but defense lawyers said Hazelwood changed his mind when the chief mate told him the tanker had lost stability.

Jurors will have to weigh contradictory evidence over whether Hazelwood's actions were alcohol-impaired and dangerous or whether they were careful and well-considered.

Greiner said the grounded Exxon Valdez damage was worsened when the tide went out and the weighty bulk of the huge tanker was pulled down onto the rocks.

But Greiner performed his damage evaluation in San Diego, where the refloated tanker was taken for repairs, and defense lawyers tried to discredit his analysis because the ship suffered additional damage en route to San Diego that had nothing to do with Hazelwood's actions.

Greiner said he had a $30,000 contract from the state of Alaska to provide his expert analysis of the accident, which caused the worst spill in U.S. history, and the defense accused him of being a professional court witness in maritime cases with no other job.

#90057u2177 02/26/1990 ~United Press International

WASHINGTON (FEB. 26) UPI - As it became clear Monday the Sandinistas had suffered a stunning loss in the elections in Nicargua, it also became clear the outcome was an embarrassing setback for political pollsters.

Almost without exception, the polls had the Sandinistas ahead. The poll that came closest was conducted by CID-Gallup of Costa Rica in October - about four motnhs before the voting. It had Violeta Chamorro ahead of Sandinista President Daniel Ortega, 40 percent to 29 percent, with 31 percent undecided. That was the only major poll that suggested a Chamorro

victory was possible.

With about three-quarters of the votes counted by late Monday, the results showed Chamorro with 55 percent and Ortega, 42 percent.

One widely quoted poll by Greenberg-Lake, released Jan. 24, had the Sandinistas with 51 percent of the vote and Chamorro's UNO getting only 24 percent.

Robert Warren, of Hemisphere Initiatives, which had distributed the Greenberg-Lake poll in Washington and had favored the Sandinistas, said, ''We stand by the credibility of our polls, but it is hard to understand how there could have been such a large swing in the voting.''

He said, ''It could be that the voters, for their own reasons, did not want to disclose what they really thought, or who they were going to vote for.''

Stanley Greenberg, head of the polling organization, planned to hold a news conference Tuesday in Washington to explain how the projections were so far off.

Greenberg-Lake was not the only poll that failed to predict the results.

Another one, conducted in late 1989 by Opinion Studies and Consulting, known by the Spanish acryonym ECO, also predicted an overwhelming 37 percent to 18 percent by the Sandinistas over UNO.

The Nicaraguan Institute of Public Opinion, in September and October 1989, had the Saninistas ahead 26 prrcent to 21 percent, with 29 percent undecided.

The Manolo Morales Foundation, known as FMM, found the Santinistas leading UNO 37 percent to 10 percent.

State Department officials were also surprised by the result, although spokeswoman Margaret Tutwiler said she had heard predictions on Friday that Chamorro would win.

But other officials said they were surprised by the Chamorro victory and even more surprised by the large margin.

#90057u2194 02/26/1990 ~United Press International

JERUSALEM (FEB. 26) UPI - The Israeli army announced Monday it would permit the reopening of West Bank community colleges that have closed since nearly the start of the Palestinian uprising.

In the Gaza Strip refugee camp of Rafah, at least 40 Palestinians were wounded by army gunfire in violent clashes that began when soldiers raided the home of a man killed Sunday by soldiers, U.N. relief officials and Palestinian sources said.

Rafah residents reported that dozens of people were lightly wounded by rubber bullets, beatings or tear gas, but did not seek treatment.

The reopening of 17 West Bank community colleges is the first easing of restrictions on Palestinian institutions of higher education in the West Bank and Gaza Strip since the army closed them in January 1988, charging they were centers of anti-Israel activity.

A reduction of violence in the West Bank contributed to the decision to reopen the colleges, officials said. The resumption of classes could lead to the reopening of universities if the community college campuses remain quiet, they said.

Six West Bank and Gaza Strip universities with 15,000 students will remain closed. The university closure order is due to expire Wednesday, but the military has given no sign that it will not renew it.

Brig. Gen. Shaike Erez, head of the army's Civil Administration, and Shmuel Goren, the government's coordinator of activities in territories, notified community college directors Monday that classes could resume as early as Tuesday.

About 5,000 students attend the colleges, which provide professional training and certification in such areas of teaching and nursing.

Earlier this year, the military's Civil Administration allowed the reopening of elementary and high schools in the West Bank, which had been shut for most of the uprising. The army adopted a policy of closing individual schools where violent demonstrations occurred.

Israel has been harshly criticized for the school and university closures. In January, the European Parliament approved a non-binding resolution to freeze scientific contacts until the universities were reopened.

At a news conference Monday, Israeli and Palestinian students and academics called for the reopening of the West Bank universities.

''How can nations and governments of the world allow such a collective punishment against students?'' said Narum Zuket, a representative of the Palestinian Student Councils.

In the Rafah refugee camp Monday, violent clashes erupted after soldiers

raided the home of Iyad Al-Hamas, 20, killed by army gunfire Sunday.

Soldiers and Border Police entered Hamas' house as mourners defied a curfew to bring flowers and Palestinian flags. Palestinian youths at the house began throwing rocks, setting off the disturbances that lasted until noon.

The army fired tear gas from helicopters to disperse the stone-throwing youths. U.N. officials said at least 40 residents were treated at U.N. Relief and Works Agency clinics in the camp for wounds caused by live ammunition and round, plastic covered bullets.

Officials at Nasser Hospital in Khan Younis said 18 Arabs were treated for gunshot wounds.

The army spokesman said he had received reports of 15 Gazan Arabs lightly wounded and treated at hospitals.

#90057u2222 02/26/1990 ~United Press International

(FEB. 26) UPI - President Bush says he's looking forward to a peaceful transition in Nicaragua, where U-S-backed candidate Violeta Chamorro beat Sandinista leader President Ortega in balloting yesterday. White House spokesman Marlin Fitzwater says Bush trusts that Ortega will keep his word to help in a peaceful transition. Bush also says Washington supports Chamorro's stated goals of economic reconstruction to rebuild Nicaragua.

Some economic experts are predicting slow growth this year... but see NO

recession during the next three years. The National Association of Business Economists questioned 65 economists. The group predicts inflation for 1990 will hold steady at about four percent compared with four and one-half percent last year. More than 60 percent of the economists say the nation will skate dangerously close to- but manage to avoid- a recession during 1990, 1991 and 1992.

The American father of a girl involved in an international custody battle is in New Zealand in an effort to- as he puts it- ''rescue'' his child. But a New Zealand lawyer specializing in custody cases says the court may base its ruling on what the girl wants. Seven-year-old Hilary Morgan is in Christchurch with her maternal grandparents. Her mother, Elizabeth Morgan, spent 25 months in a Washington, D-C, jail for refusing to reveal her child's whereabouts.

More than 300 inmates today went on a hunger strike at South Africa's Robben Island Prison, which once housed black nationalist leader Nelson Mandela. The prisoners say they consider themselves political prisoners and should be eligible for release under President Frederik de Klerk's racial reforms. The Prisons Service confirms that ''a number of prisoners'' declined food, but says the inmates ''have ample other foodstuffs in their possession.''

#90057u2223 02/26/1990 ~United Press International

MANAGUA, NICARAGUA (FEB. 26) UPI - There was shock and even weeping Monday as supporters of the Sandinista Front watched what appeared to be the end of more than 10 years of control over the Nicaraguan government.

''The people have forgotten everything,'' sobbed Cristina Ramos, shocked at the thought of people voting against the Sandinistas, who liberated Nicaragua from the rule of dictator Anastasio Somoza.

''Everything is lost,'' said her friend, Gabriel Pons, who also wept as President Daniel Ortega gave his concession speech early Monday.

U.S-backed candidate Violeta Chamorro's noisy, crowded victory rally in Managua's downtown Bambana restaurant, echoing with shouts of ''Violeta! Violeta!'' was a study in contrasts with Ortega's victory party turned political wake.

On Sunday night, a bulletin board in Sandinista Front headquarters said Ortega would arrive at midnight to give ''the victory proclamation.'' But the hour came and went.

As the time passed, conversation among several hundred people supporting Ortega's bid for re-election lost some of its animation and picked up an

occasional quick glance or nervous laugh.

Eventually the results were read on national television. Supporters at Sandinista headquarters dropped their heads and shuffled their feet.

Looks of disbelief were soon replaced with music as Ortega's flamboyant wife, Rosario Morillo, coaxed supporters into song. Someone grabbed a guitar. Lively tunes of the Sandinista revolution filled campaign headquarters and spilled out onto the large paved entrance where hundreds of well-wishers had gathered.

The songs of struggle and accomplishment were voiced with feeling and punctuated with an occasional tear.

In contrast, Gloria Chavez screamed with delight as the head of Nicaragua's election commission proclaimed that Chamorro appeared to have won. She said she did not like Somoza, but Ortega was just as bad.

The driver of a car that sped past Chavez's home shouted ''La UNO!'' - the Spanish-language acronym for Chamorro's 14-party coalition, the National Opposition Union.

''La UNO!'' Chavez smiled and screamed back from her doorway where she was watching television. She held up her forefinger in the proud sign of the party. Uno means ''one'' in Spanish.

Ortega's supporters had been counting on support from the big cities such as Managua, the capital, but Chavez and many other Managua residents answered back that the pollsters and Ortega's supporters were wrong.

Explaining why she voted for Chamorro, Chavez said, ''You can see what (the Sandinistas) have done to the economy.'' She said she has been forced to sell cigarettes on the street to get by.

''It's incredible,'' said Albert Rivera, who served as an election judge. He said that in his polling place alone, about 250 people voted for UNO, with about 100 voting for the Sandinistas.

''Ortega is three times worse than Somoza,'' said Virgina Orozca. She pointed to all the UNO signs and banners in her Managua neighborhood to show the support for her point of view.

Sebastian Ortiz, 75, who had lived through the Somoza and Ortega governments, said he was ready for a change. But he eventually soured on Chamorro because he felt she was running on the popularity of her assassinated husband, Pedro Joaquin Chamorro, whose death in 1978 helped spark the Sandinista revolution. Ortiz said he never expected Chamorro to do so well.

When Chamorro - who uses crutches because of an injured kneecap - hobbled onto a stage at the Bambana at 3:20 a.m., more than nine hours after the polls closed, 300 supporters broke into a rendition of Nicaragua's national anthem, followed by chants of ''UNO! UNO!''

''This is the most emotional moment of my life,'' said Luis Sanchez Sancho a leader of the Socialist Party, one of 14 political parties in the UNO coalition.

''I thought we would win, but I thought it would be close. I never imagined we would win like this,'' said Luis Humberto Guzman, editor of the La Cronica weekly and an UNO politician.

Chamorro, as she does in every public speech, invoked the memory of her husband. She shouted to be heard above the cheers at the Bambana: ''Nicaragua will again be a republic.''

There was little attention paid to a ban on liquor sales, and UNO activists hugged and danced with each other in celebration, giving little thought to the political and economic problems Chamorro's government will face.

#90057u2250 02/26/1990 ~United Press International

(FEB. 26) UPI - Heavy buying drove prices of crude oil for May and June delivery higher than current delivery contracts on the New York Mercantile Exchange Monday, reversing the situation that normally exists.

The benchmark West Texas Intermediate crude for April delivery gained 37 cents to $21.79 a barrel, with May delivery rising 41 cents to $21.88 a

barrel and June climbing 44 cents to $21.86 a barrel.

On the U.S. Gulf Coast cash market, WTI rocketed 70 cents to $21.80 a barrel. May delivery first moved higher than April delivery WTI contract by five cents Friday, and Monday trading confirmed the move.

"The market wants to move into contango," said Robert Baker, senior energy analyst with Prudential-Bache Securities Inc. Contango is a term used to describe an unusual commodities futures pricing situation in which prices get progressively higher as the contracts go further out.

"It's not a normal thing at this time of year," said Randall Rothenberg of Dean Witter Reynolds' International Energy Futures Group in New York. Normally, the price of the near-term Merc crude contracts is higher than contracts for later delivery, reflecting greater immediate demand. But near-term demand has slackened.

"In general, there's an oversupply of crude oil," Rothenberg said, adding that the oversupply is probably attributable to higher prices on the U.S. market attracting unusually large volumes of foreign crude.

On the Merc, the current March delivery contract for unleaded gasoline fell 0.02 cent to 59.83 cents a gallon. But the later months' contracts all experienced healthy gains, reflecting anticipated higher demand in the warm-weather driving months.

April delivery gasoline rose 0.68 cent to 61.65 cents a gallon and the May contract rose 0.78 cent to 66.18 cents a gallon. On the important New York Harbor cash market, however, unleaded gasoline remained steady at 58.10 cents a gallon.

Heating oil climbed 0.75 cent to 59.05 cents a gallon on the New York Harbor spot market, a mirror image of its trading on the Merc market. On the European spot market, Britain's widely traded North Sea Brent crude gained 40 cents to $19.35 a barrel. The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - moved up 45 cents to $16.50.

#90057u2304 02/26/1990 ~United Press International

MONTEVIDEO, URUGUAY (FEB. 26) UPI - A senior police official Monday formally challenged a newspaper publisher to a duel, seeking to redeem honor he said was tarnished in a story accusing him of possible corruption.

Uruguay's chief police inspector, Saul Claveria, sent his seconds to Federico Fasano, editor of the tabloid La Republica, to follow through formally on a recent threat to challenge the newspaperman to a duel.

Though legal, dueling is rare in Uruguay, which permits the practice in a law dating to 1920.

The newspaper, under the direction of Fasano, reported Jan. 24 that Claveria was the registered owner of two cars seized by Montevideo police on the suspicion of having been used to import goods illegally.

The police inspector denied responsibility for the case and called for an Honor Court to be formed to judge his conduct.

An Honor Court is made up of three or four people designated by executive, congressional and judicial officials to decide whether the petitioner has a legitimate offense and the right to make the challenge.

The court decided that Claveria was innocent and that the government, through the Uruguayan Interior Ministry, authorized the challenge of Fasano to a duel.

The court held Fasano responsible for information published in his newspaper despite his absence from the country the day the report was published.

''I am going to listen to what (Claveria's) seconds have to say, and then I will decide what I am going to do,'' Fasano said.

The editor had offered space in his paper to Claveria so that he could exercise ''his right to respond,'' but the police official rejected the offer, opting to take up arms to ''make amends.''

Claveria designated the General Inspector of the police, Ubaldo Genta, and Col. Alfredo Rubio to represent him as seconds against Fasano.

Fasano named journalist Danilo Arbilla, a vice president of the Inter-American Press Society, and Leonardo Guzman, editor of the newspaper Lea, as his personal representatives.

Fasano said he felt the era of dueling has passed but said he could ''not ruling anything out. To fight a duel in the current days would be an anachronism.''

If Fasano accepts the challenge, his seconds will meet with Claveria's representatives to decide the details, including the weapons to be used and whether the duel would be to first blood or to the death.

Despite strong criticism from politicians, Claveria forged ahead with legal preparations for the duel while the Uruguayan Press Association backed Fasano.

The press association said the dispute should be resolved in the courts.

''The freedom of expression is unrestricted in Uruguay and the only limit is that written in the law,'' it said. ''Before (the law) is where persons should go who feel injured by the press and not before Honor Courts.''

Though it has been some 20 years since a public duel was fought in Uruguay such encounters were common in the 1960s, when a half-dozen were fought.

#90057u2339 02/26/1990 ~United Press International

LONDON (FEB. 26) UPI - Britain and Argentina reopened embassies in Buenos Aires and London Monday as they resumed full diplomatic relations for the first time since the Falklands War in 1982, British Foreign Office officials said.

The two countries broke off diplomatic relations in a dispute over the sovereignty of the Falkland Islands that began in April 1982 after Argentine armed forces invaded the islands.

The dispute escalated when Britain declared war on Argentina and sent troops to the South Atlantic to recover the islands, which today remain under British control.

Reconciliation talks that began last year in Madrid yielded agreements between the countries to remove all trade barriers and to restore full diplomatic relations.

Since 1982, British interests in Argentina have been handled by the Swiss Embassy and Argentine interests in Britain by the Brazilian Embassy.

Britain's new charge d'affaires in Buenos Aires is Alan Hunt; his Argentine counterpart in London is Santos Goni.

#90057u2460 02/26/1990 ~United Press International

SEATTLE (FEB. 26) UPI - Nordstrom Inc. said Monday it established a $15 million fund and a process to reimburse employees who claim they have performed unpaid work for the company, but a union official said the fund ''barely scratches the surface'' of the money owed to the retailer's nationwide workforce.

In an apparent reversal of its previous stand about the back-pay issue, Nordstrom said it would reimburse employees with lump-sum payments based on the length of time they have worked.

The company said employees claiming back pay who had been with Nordstrom six months or less would receive $300, workers employed between six and 18 months would get $700 and anyone with 18 months or more would receive $1,000.

Employees also have the option to submit claims for larger amounts if they can substantiate the claims with detailed information, Nordstrom said.

The company said the claims reserve was partly responsible for poor fourth-quarter earnings, which slumped 34 percent to 31.4 million, or 39 cents a share, on sales of $857.4 million.

The complaints were highlighted last week by a lengthy and unflattering front-page story in The Wall Street Journal, which detailed employee complaints about the back-pay issue as well as what was portrayed as a dog-eat-dog working environment.

James Nordstrom, co-chairman of the board, said in a statement the Nordstrom family ''personally cares so much about our employees.''

However, UFCW Local 1001 President Joe Peterson said the $15 million fund established by Nordstrom did not go nearly far enough.

In a related development, Nordstrom said it anticipates being sued by investors because of the back-pay controversy. The basis of a complaint probably would be that Nordstrom knew of the potential effect of the back-pay issue on its earnings but failed to inform the public, the company said.

#90057u2503 02/26/1990 ~United Press International

TROY, MI (FEB. 26) UPI - K mart Corp., which has been battling an earnings slump, announced Monday a five-year, $2.3 billion program that calls for opening about 250 new stores and enlarging, relocating and refurbishing hundreds of existing outlets.

The Michigan-based firm also announced a $640 million provision to cover all expenses associated with the store modernization program and other non-recurring charges. The charge will be taken against 1989 earnings.

Chairman Joseph Antonini said the program will involve almost all K mart's U.S. discount stores.

He said there will be approximately 250 new, full-size stores, 620 enlargements, 280 relocations and 30 closings.

About 1,260 stores will be refurbished to bring their layout and fixtures up to new store standards, he said.

The program is aimed at ''making the right changes, right now,'' Antonini said.

K mart, which has more than 4,000 retail outlets in the United States, Puerto Rico and Canada, saw its profits slip 16 percent for the first nine months of last year.

Antonini recently spoke of the intense competition in the retail industry and the difficulty of synchronizing the pace of change within his 91-year-old company ''with the competitive pressures of the outside marketplace.'' He vowed K mart's performance ''will be back up next year.''

In Monday's announcement, Antonini said the new program actually is an acceleration of previous initiatives. Customer reaction to recently enlarged, relocated and prototype stores has been very good, with sales exceeding expectations, he said.

''This program is the best investment we can make in our core discount store business and clearly demonstrates the company's commitment to discount store retailing,'' Antonini said. ''The acceleration of this strategic store restructuring program will improve the shopping environment for our customers and will clearly show the excellent quality of our merchandise through an improved presentation.

''The fine quality of the branded merchandise we carry will become more evident in a more modern store environment.''

-30- 2323

#90057u2510 02/26/1990 ~United Press International

(FEB. 26) UPI - At least 10 people are dead following a fierce storm that blew through the British Isles and France today. Officials report 100-mile-an-hour winds and heavy rains pushed trees onto buses and downed utility poles in Britain. One official compares this storm to the January tempest that left 94 people dead across Britain and Europe.

Arctic weather continues to grip the East Coast with record-low temperatures. In West Virginia, the mercury fell to 20-degrees BELOW zero, and threatened to damage North Carolina's peach crop. The brutal cold and snowstorms are being blamed for at least 32 deaths across the Midwest and East since Saturday.

President Bush says election results from Nicaragua- in his words- ''moves us closer to the day when every nation in this hemisphere is a democracy.'' Bush is also praising Nicaraguan President Daniel Ortega for

his conduct during the election and his pledge to stand by the results that have him losing his job.

In Managua, U-S-backed opposition presidential candidate Violeta Chamorro declared victory after a stunning upset win over Ortega. The Sandinista leader indirectly conceded defeat by declaring Nicaragua is heading down ''a new road.'' The latest returns show Chamorro leading by nearly 12 percentage points.

A national gay rights group says it's ''very disappointed'' with today's Supreme Court refusal to hear appeals from a lesbian soldier and homosexual sailor who challenged a Pentagon policy barring homosexuals from the armed forces. The justices rejected the appeals without comment.

#90057u2524 02/26/1990 ~United Press International

BOSTON (FEB. 27) UPI - The troubled Bank of New England Corp. has abandoned plans to sell 53 branches throughout the region, a company spokeswoman said Monday.

The decision was made because ''our strategy and circumstances have obviously changed'' since the company disclosed plans in October to sell branches in all four states where it operates, said Marcia Ryan, the spokeswoman.

The change is the enormous $1.11 billion loss Bank of New England had for 1989, which prompted the company to purge top management, embark on a $6 billion asset sale and consider selling off even its biggest banking subsidiaries.

Ryan said it did not make sense for the company to shed branches while it was negotiating sales of the entire operating subsidiaries of which the branches are a part.

The corporation had said the branches, 21 in Connecticut, 24 in Massachusetts, seven in Maine and one in Rhode Island ''do not work effectively in our network system.''

Meanwhile, a spokesman for the Office of the Comptroller of the Currency, the federal agency that regulates Bank of New England, said the bank probably would sign a cease and desist order Wednesday that was issued by the O.C.C. The order would set out the measures the O.C.C. wants to the bank to undertake to shore up its capital position and restore itself to financial stability.

The O.C.C. spokesman, Dean DeBuck, said the order will be more than 40 pages long.

#90057u2534 02/26/1990 ~United Press International
MONTREAL (FEB. 27) UPI - Communications company Quebecor Inc. Monday reported 1989 earnings of $15.4 million, or 66 cents a share, down 43 percent from $26.9 million, or $1.35 a share, in 1988.

Revenues at Quebecor increased to $1.46 billion up from $1.18 billion in 1988.

The company said earnings fell because of $7.5 million in losses mainly connected to the Montreal Daily News, the company's English-language newspaper.

Quebecor also said a decrease in demand and prices for newsprint and the

increased value of the Canadian dollar in the latter half of 1989 significantly affected its bottom line.

Quebecor is a diversified communications company with interests in publishing, printing and forest products. The company's newspapers include French-language dailies in Montreal and Quebec City and an English-language paper in Winnipeg.

#90057u2888 02/26/1990 ~United Press International

(FEB. 26) UPI - President Bush congratulates Nicaragua's new president-elect... a killer winter storm lashes Britain and Europe... another shuttle delay. U-P-I has it all, next:

The White House says it's looking into a trade and aid package for Nicaragua following the victory of the U-S-backed presidential candidate.

President Bush hailed Violeta Chamorro's victory over Sandinista leader Daniel Ortega , saying ''the people of Nicaragua have spoken.''

Bush says he sent his congratulations to Chamorro... as well as to Ortega for ''the conduct of the election and his pledge to stand by its results.''

Bush says he will be speaking with Central and South American leaders about trade and economic measures to support Nicaragua's new government.

Bush spokesman Marlin Fitzwater says the president has NOT decided whether to lift economic sanctions against Nicaragua. But Fitzwater says Bush will consider ending the economic embargo imposed during the Reagan administration.

The election is NOT only bringing a truce to Nicaragua, but in the U-S Congress as well. Capitol Hill... once a battleground over aid to the Nicaraguan Contra rebels... today is united on the issue of aid to the democratic opposition that toppled Ortega.

In the words of Senate G-O-P leader Robert Dole- ''We're talking about big bucks in aid.''

In Managua, Chamorro declared victory early today after election results showed her leading by nearly 12 percentage points. Chamorro told cheering supporters that she is committed to ''national reconciliation.''

Ortega indirectly conceded defeat, calling the returns ''a tendency which caN'T be ignored.'' The Marxist leader also promised that his government will- quote- ''respect the election mandate.''

#90057u2941 02/26/1990 ~United Press International
(FEB. 26) UPI - Astronaut John Creighton, the skipper of the space shuttle Atlantis, says the crew is ''looking forward'' to their next opportunity to blast-off into space. The launch of Atlantis was delayed for the fifth day in a row, this time because of bad weather.

Creighton says the crew is disappointed today's launch had to be scrubbed, but he adds the launch team made the correct decision.

NASA spokesman Hugh Harris says a minimum of 48-hours is necessary in order to replenish the liquid hydrogen and liquid oxygen and to give the launch team a well-deserved break.

But Air Force meteorologists are calling for an 80 percent chance of weather conditions that would violate the tough post-Challenger safety guidelines at liftoff time Wednesday.

If the shuttle is delayed for a sixth time, that would tie a shuttle record set in 1986. The exact lift-off time is classified because it's a military mission, but sources report the shuttle is scheduled for launch very early Wednesday morning.

A Pentagon policy barring homosexuals from the U-S armed services stands today following the Supreme Court's refusal to hear appeals challenging the ban.

The justices rejected without comment the appeals from a Lesbian Army reservist and a male homosexual Navy reservist.

The National Gay and Lesbian Task Force says- ''The community is very disappointed in the court's decision NOT to hear these cases.'' The group also says the court is ''NOT in the mainstream of society.''

39-year-old Navy reservist James Woodward was placed on inactive duty in 1974 and eventually discharged at the end of his six-year mililtary obligation after saying he was gay.

Technical Sergeant Miriam Ben-Shalom, an admitted lesbian, was discharged from the Army reserves in Milwaukee. But in 1980, a federal court ordered the Army to re-enlist her. A federal appeals court reversed that decision in August.

#90057u2989 02/26/1990 ~United Press International
(FEB. 26) UPI - Czechoslovak President Vaclav Havel and Mikhail Gorbachev

are talking in Moscow today in a meeting expected to end with a troop withdrawal agreement.

As the playwright-turned-politician arrived in the Soviet capital, the first of 73-thousand-500 Soviet troops began leaving Czechoslovakia.

The Kremlin has said the bulk of the pullout from Czechoslovakia will be finished by June, but the withdrawal will NOT be completed until 1991.

Havel says he wants all Soviet troops and equipment out of his country by the end of this year.

Despite the apparent discord over timing, the Soviets appear willing to compromise. The Soviet news agency Tass quotes a Soviet military official as saying ''there are NO fundamental differences.''

During his visit, Havel also plans to lay a wreath at the grave of Andrei Sakharov. The Soviet human rights activist was one of the defenders of the Prague reform movement that ended in Soviet troops invading Czechoslovakia in 1968.

The Soviet Union is confirming election results that show a pro-independence movement sweeping to power in the republic of Lithuania.

Tass quotes a spokemsan for Lithuania's Council of Ministers as predicting a ''new phase in the republic's history.'' He says- ''Communists will probably NO longer play the leading role'' in Lithuania.

Even more dramatic words were voiced by a leading member of Lithuania's Sajudis nationalist movement, who predicts the republic's secession from the Soviet Union is- quote- ''attainable this year.''

Official results released today from Saturday's balloting show 90 deputies have so far been elected to the 141-member Lithuanian Parliament. 72 of those deputies were backed by Sajudis, an umbrella group backing the drive for the republic's independence.

The new parliament, however, canNOT convene yet because two-thirds of its members have NOT been elected. There will be runoff elections in 45 races in which NO candidates won more than half the votes. Six races will be held again because of irregularities.

#90057u3019 02/26/1990 ~United Press International

(FEB. 26) UPI - A Florida trade school president today appeared before a Senate subcommittee studying fraud within the federal student loan program and repeatedly invoked his Fifth Amendment right against

self-incrimination.

Joseph Calareso, president of the American Career Training Corporation in Pompano Beach, Florida, took the Fifth Amendment six times. Calareso's refusal to testify followed the testimony of a former employee who said Calareso altered required forms to help unqualified students get taxpayer-backed loans.

The Permanent Investigations Subcommittee says fraud and other abuses are rampant in the student loan program and used the Florida school, known as A-C-T, as a case study of a trade school that received large amounts of guaranteed loan money.

Subcommittee investigators say A-C-T received nearly three-Million dollars in federal loans in 1985 and 44-Million dollars in 1988. Investigators add Calareso and his brother took home more than 12-and-a-half-Million dollars in salaries and benefits from 1986 to 1989.

#90057u3169 02/26/1990 ~United Press International

(FEB. 26) UPI - Lawmakers long divided on the issue of Contra aid are united in calling for economic aid to Nicaragua in the wake of the election of the U-S-backed opposition presidential candidate. Senate G-O-P leader Robert Dole says the big question is how best to allocate American foreign aid.

Health and Human Services Secretary Louis Sullivan says the Bush administration will ''keep an open mind'' on the possibility of steeply raising excise taxes on cigarettes and alcohol. His comments to a House panel appear slightly at odds with Bush's repeated vow of ''NO new taxes.''

President Bush and the nation's governors today joined forces and hailed as historic a plan to revitalize America's education system. Although both sides are praising the objectives, it's still NOT clear how the program will be financed.

Israel's defense minister says the conditions are right for peace talks involving U-S, Israeli and Egyptian officials. In Cairo, an Egyptian Foreign Ministry spokesman says ''there are signs the peace process is moving forward.''

A co-defendant in the trial of Panamanian General Noriega is discussing a possible plea bargain with prosecutors. Lieutenant Colonel Luis Del Cid is accused of acting as a liaison between Noriega and the Colombian drug cartels.

The General Accounting Office released a study indicating race to be a

factor in the death penalty. The congressional watchdog agency says people who kill whites are more likely to get the death penalty than those who murder blacks.

South Africa's defense minister is refusing to heed calls that he resign over allegations of military involvement in political killings. Magnus Malan also says a white activist slain in 1989 was a paid informant for the government.

In Washington, House speaker Tom Foley says a congressional delegation will visit South Africa this week to assess recent changes. Foley says the group will meeti with both sides in the nation's racial conflict.

Riot police in the African nation of the Ivory Coast used stun grenades and batons to break up an anti-government march by some 150 students today. The students are calling for a multi-party system and economic improvements.

A rebel Iranian radio station says about five-thousand people staged anti-government protests in the streets of Tehran today. The report, monitored in Athens, says revolutionary guards fired on the crowd, killing at least one person and wounding several others.

#90057u3422 02/26/1990 ~United Press International

(FEB. 26) UPI - Nicaragua's election results are bringing cheers of surprise and elation from leaders of democracies worldwide. Argentina's President Carlos Menem says Violeta Chamorro's victory fortifies ''democracy in the region.'' There was NO immediate reaction from Cuba, with the nation's official news agency saying the Castro government will NOT have a response until official election results are released.

Jesse Jackson says he will NOT be a candidate for mayor of the District of Columbia. The two-time Democratic presidential candidate spurred intense political speculation about his political plans by moving to the nation's capital last summer. But, Jackson said today that he has always said he has NO plans to run for mayor. In his words- ''I didN'T and I doN'T.''

The National Organization for Women backs a civil rights bill introduced earlier this month by Massachusetts Senator Edward Kennedy. NOW says the legislation will lead to better monetary compensation for women in sex discrimination cases.

A Tennessee appeals courts today awarded a mechanic 19-thousand-570 dollars because a police siren sounded while a state trooper gave the 53-year-old man a speeding ticket. The siren startled the man collapsed and suffered damaged to his knee and ear. The court ruled the trooper was

negligent when he accidentally bumped the siren button.

In London today, a Moslem group asked a high court for permission to sue writer Salman Rushdie and his publishers for blasphemy in the novel ''The Satanic Verses.'' Under tight security, the British Moslem Action Front argued Rushdie's book was an insult to their religion.

#90057u3701 02/26/1990 ~United Press International

(FEB. 26) UPI - Nicaraguan President Ortega is putting the best possible face on his election defeat to U-S-backed newspaper publisher Violeta Chamorro. The Sandinista leader said today he will respect the popular mandate. In an emotional concession speech that had government officials weeping openly, Ortega said he's proud to know his nation is embarking on a new road in which- quote- ''war will disappear and the Contras will disappear.''

U-S observers in Lithuania are saluting the results of a recent election that has brought a pro-independence legislature into power for the first time in 50 years. California Representative Christopher Cox says- quote- ''It was a referendum on independence and independence won.'' The four U-S congressman were denied a visa to visit Lithuania until Soviet Foreign Minister Shevardnadze intervened on their behalf.

The nation's governors and President Bush are hailing a plan aimed at revitalizing the country's educational system. The program has high ambitions for improving education and stresses giving states more power and flexibility to achieve that goal. But, it's still NOT clear who's going to finance the program. The framework for the proposal was decided upon five months ago when the governors met with Bush in Virginia.

Czechoslovak President Havel says ''the deepest wound'' in his nation's society is being healed with the withdrawal of Soviet troops. Havel spoke to reporters in Moscow after a meeting with Mikhail Gorbachev in which an agreement was signed to pull all Soviet soldiers out of Czechoslovakia. As the two leaders spoke, the first Soviet troops and equipment began pulling out of Czechoslovakia.

-30- 1857

#90057u3722 02/26/1990 ~United Press International

(FEB. 26) UPI - A London newspaper says Britain in 1939 devised a plan to destabilize the Soviet Union by stirring up unrest in areas where violence has broken out in recent weeks. The report says the government apparently did NOT act on the destabilization plan that involved inflaming Moslem and ethnic hostility in the Soviet's Caucasian and Central Asian republics.

Michigan Representative John Dingell says he has his doubts about the Food and Drug Administration's ability to regulate the medical device industry. The Democrat's comments come along with a congressional report that concludes a mandatory registry might have reduced more than 250 deaths linked to the failure of mechanical heart valves.

Mardi Gras revelers in New Orleans nursed hang-overs and aching feet today as they slowed down from a weekend of partying and parade-watching. The climax takes place tomorrow- or ''Fat Tuesday'' as it's called- when many people don masks and indulge in the Big Easy's massive street party. Four people were injured in a gang-related shooting along a parade route last night. But police report fewer incidents than last year.

In Brazil, The samba carnival celebrations in Rio De Janeiro got off to a rough start today when a float representing a waterfall crashed into a high tension wire, killing two people and injuring another. Parade organizers respected this year's ban on nudity by the League of Samba Schools, but occasionally women appeared bare-breasted and skimpy costumes were commonplace.

-30- 1684
#90057u3979 02/26/1990 ~United Press International
(FEB. 26) UPI - NASA is giving tired rocket engineers a break... delaying a sixth attempt to launch the shuttle Atlantis until Wednesday. The spaceplane was grounded again early today- this time by high winds and clouds at Cape Canaveral. The repeated delays aren't just fraying nerves. Officials say the cost of fueling the shuttle and keeping the launch team ready around the clock stands at more than two-point-seven-MILLION dollars.

The woman who spent two years in jail for refusing to disclose her daughter's whereabouts during a bitter custody battle is eager to travel to New Zealand, where her daughter has been living with her maternal grandparents. Lawyers for Elizabeth Morgan were in Washington, D-C, Superior Court today, seeking the return of Morgan's passport so she can leave the country. The court confiscated Morgan's passport in 1986 when she was held in contempt.

Two animal rights activist groups are denying involvement in the ambush-slaying of a veterinary college dean. The groups are denouncing police for creating what they call ''mass hysteria'' by issuing a nationwide alert against the possibility of assassination plots. The police alert went out last week following the killing of Hyram Kitchen... dean of the University of Tennessee College of Veterinary Medicine.

Rocky Balboa is down for the count, at least for now. Workers today chipped the statue of Sylvester Stallone's character from its base at the top of the steps of the Philadelphia Museum of Art. The city's art

commission is debating what to do with the bronze movie prop used during the filming of ''Rocky 3.'' Art museum President Robert Scott has told the panel he doesn't want the statue anywhere near the museum. For now, the statue will return to its familiar location outside the Spectrum sports arena in South Philadelphia.

#90057u4132 02/26/1990 ~United Press International

(FEB. 26) UPI - The latest news from around the world and across the nation... from the wires of United Press International.

Nicaraguan President Ortega delivered an emotional concession speech today following his stunning defeat by opposition candidate Violeta Chamoro.

Speaking in Managua, Ortega said the Sandinista Front had opened a ''new road'' of democracy in the Central American nation.

Ortega said he and the Sandinista government will respect and obey the election results. Many government officials reacted emotionally to Ortega's words. They wept openly and broke into a heartfelt rendition of the Sandinista anthem with raised fists.

Official returns based on 82 percent of the vote give Chamorro a 55-point-two percent, with Ortega trailing at just under 41 percent. Chamorro, the 60-year-old widow of a pre-revolutionary publisher, was NOT expected to win the election. She is scheduled to assume the presidency on April 25th.

President Bush is hailing the election of Violeta Chamorro as Nicaragua's next president, saying ''the people of Nicaragua have spoken.''

Bush already has begun consultations that could lead to the lifting of economic sanctions against Nicaragua. An aid and trade package for the depressed Central American nation also is in the works.

Bush says he telephoned Chamorro to extend his congratulations and told her- ''This is a great day for the Nicaraguan people.''

Reaction on Capitol Hill was swift. Now that the question of whether to bankroll the Contras is NO longer an issue, most lawmakers are calling for the lifting of economic sanctions ordered in 1985 by former President Reagan. As far as economic aid is concerned, Senate Republican leader Robert Dole said- ''We're talking about big bucks here.''

In response to questions about the Nicaraguan election, White House spokesman Marlin Fitzwater did point out that Cuba now stands alone as the only communist nation in the western hemisphere.

#90057u4153 02/26/1990 ~United Press International
(FEB. 26) UPI - Mikhail Gorbachev says the Soviet Union and Czechoslovakia have- in his words- ''moved beyond what was negative in our relations.''

The Soviet leader met with Czechoslovak President Haval in Moscow today. The meeting ended with both nations signing an agreement for the total withdrawal of Soviet troops from Czechoslovakia.

Havel told reporters after meeting Gorbachev that he views the Soviet invasion of his nation in 1968 as ''the deepest wound'' of his society. But the playwright-turned president says he and Gorbachev agree the best way to deal with the dark parts of the past is to look forward.

The three-stage pullout outlined in the accord has the withdrawal completed by June 30th 1991. But Havel says the Soviet president promised he'd try to complete the pullout even sooner.

As Gorbachev and Havel spoke today, the first Soviet troops and tanks began rumbling out of Czechoslovakia.

President Bush and the nation's governors agree the nation needs to improve education. They don't, however, agree on how to pay for it.

The goals approved by the National Governors Association were presented today to Bush, who called them ''a dramatic turning point for our country.''

The proposals involve giving states more flexibility in improving education, but the outline does NOT say how the goals can be achieved.

Bush agrees the federal government has a responsibility in increasing the graduation and adult literacy rate. While Bush says he'll encourage Americans to support such efforts, he is NOT saying what the government will do.

New York Governor Mario Cuomo says he took Bush's words to mean Bush favors increases in local real estate and sales taxes. The Democrat says that way you don't have to raise- quoting here- ''rich people's income taxes.''

But Cuomo says he's pleased with Bush's willingness to agree to a federal responsibility, which Cuomo describes as ''an acknowledgment,'' NOT a ''bold commitment.''

-30- 2167
#90057u4163 02/26/1990 ~United Press International
(FEB. 26) UPI - A group of economists say the U-S economy is hovering in a ''danger zone.''

But the group also predicts the economy will grow slowly during 1990 and avert a recession over the next three years.

The Cleveland-based National Association of Business Economists reached its conclusions in a survey of 65 economists.

The economists questioned by the group believe inflation will hold near four percent for the year and maintain that level through 1991. The prediction echoes the opinion of Federal Reserve Board Chairman Alan Greenspan.

The survey found more than 60 percent of the economists polled believe the nation will avoid a recession in the next three years. But it also warns the risk of a recession is NOT trivial.

Jesse Jackson says he will NOT be a candidate for mayor of the District of Columbia. But, Jackson says he'll continue trying to persuade Congress to make Washington, D-C, the nation's 51st state.

The two-time presidential candidate says many members of the Washington community have encouraged him to run for mayor. But Jackson says- quote- ''I've always said I had NO plans to run for mayor.''

There has been intense speculation surrounding Jackson's plans ever since he moved to the nation's capital last summer.

Jackson consistently has said he would NOT seek the mayoral office if Mayor Marion Barry, a close political ally since the 1960's, sought a fourth term. Barry has been indicted on federal drug charges and is in a substance abuse treatment center. It's NOT clear if the embattled mayor will seek re-election.

Jackson says- ''The District is divided and dispirited. I want to be part of the healing process.''

-30- 1864
#90057u4180 02/26/1990 ~United Press International
(FEB. 26) UPI - A rebel Iranian radio station says about five-thousand anti-government protesters filled the streets of Tehran today, demanding freedom.

Radio Iran, monitored in Athens, reports at least one person was killed and several others injured when revolutionary guards began firing on the crowd. The report says demonstrators poured into the streets chanting ''Death to Khamenei'' and ''Death to Rafsanjani ,'' referring to Iran's Spiritual Leader Ali Khamenei, and President Hashemi Rafsanjani.

The rebel broadcast says crowds attacked shops displaying pictures of the ruling clerics. The radio statio also broadcast appeals from exiled leaders for Iranians to continue their struggle for freedom, as people in Eastern Europe have done.

Spontaneous anti-government protests erupted more than one week ago when angry soccer fans, protesting the sudden cancellation of matches, began chanting slogans against Khamenei and Rafsanjani. They also tore up a large picture of the late Ayatollah Khomeini.

The ethnic violence that had the Kremlin sending in troops to two republics in recent months was envisioned by Britain as far back as 1939.

London's Independent newspaper says Britain devised a secret plan to destabilize the Soviet Union by stirring up Moslem and ethnic hostility.

The newspaper says it viewed the document late last year until the government repossessed the file that deals with the Soviet regions that have recently been the scene of extreme civil unrest.

The paper speculates the documents are now sensitive because London and Washington- quoting the Independent- ''are now operating agents provocateurs behind Soviet lines.''

The author of the plan said it could be crucial if Moscow used the opportunity of war between Britain and Germany to invade Afghanistan and Iran.

-30- 2010

#90057u4294 02/26/1990 ~United Press International

(FEB. 26) UPI - President Bush has began consultations on an aid and trade package for Nicaragua in the wake of yesterday's election of U-S-backed candidate Violeta Chamorro. The White House says Bush also spoke by telephone to Chamorro.

Bush says he sent a message to defeated Sandinista President Ortega , thanking him- quote- ''for the conduct of the election and his pledge to stand by its results.''

A spokesman for Lithuania's Sajudis nationalist movenent says the group's leader is in Moscow to discuss Saturday's parliamentary elections with the

Kremlin. Official results show the Sajudis sweeping to victory... clearing the way for the first non-Communist dominated republic Parliament in the Soviet Union.

Soviet President Gorbachev and Czechoslovak President Havel met in Moscow today and signed a pact for the total withdrawal of Soviet troops sent to Czechoslovakia 22 years ago to crush Prague's democratic reforms.

Even as the leaders met, the Soviet news agency Tass reported the first tanks and other combat equipment loaded on rail cars rumbled out of Czechoslovakia. The three-stage withdrawal is to be completed by June 30th 1991.

The federal judge in Miami hearing the case against Panama's Manuel Noriega and five co-defendants says he is thinking about setting their drug-trafficking trial for late November. The defense has estimated it would take up to two years to try the case.

#90057u4310 02/26/1990 ~United Press International

(FEB. 26) UPI - The National Weather Service says some parts of Alaska were warmer than much of the Northeast today. The arctic-like cold reached deep into the heart of Dixie... threatening early-blooming peach trees in North Carolina.

At least 27 people were killed today by a fierce storm that lashed the British isles and northern Europe. Britain was hardest hit, and meterologists warn the rain and high winds would rage into the night across the nation.

Britain and Argentina reopened embassies in each other's capital cities today. The move marks the resumption of full diplomatic relations for the first time between the two countries since the Falklands War in 1982.

Police in Brussels, Belgium, say the leader of a group protesting the treatment of Albanians living in Yugoslavia was killed by a professional assassin. The man was shot in the head while driving his car yesterday.

A private memorial service was held today for publisher Malcolm Forbes at an undisclosed place in New Jersey. A spokesman for Forbes magazine says a public memorial service will be held Thursday at St. Bartholomew's Church in New York. Forbes died Saturday at age 70.

The ashes of former Italian President Sandro Pertini were placed in his family tomb in a private ceremony today. The man many Italians regarded as ''the best of all presidents'' died in his sleep Saturday. He was 93.

A murder suspect profiled on last night's ''America's Most Wanted'' t-v show wasted little time in turning himself in. Early today, 45-year-old James Noel walked into a Los Angeles police station and surrendered. He was wanted in the October 1989 killing of an 18-year-old woman.

-30- 1846

#90057u4458 02/26/1990 ~United Press International

(FEB. 26) UPI - A study released in Washington today found nearly one-fourth of American black men ages 20 to 29 are behind bars or under supervision for criminal violations. That's the highest percentage ever recorded. The report by The Sentencing Project is based on an analysis of 1989 figures from the Bureau of Justice Statistics. The report concludes the annual cost of incarcerating and supervising these 609-thousand men is at least two-and-a-half-BILLION dollars.

By comparison, the study says one in 16 whites and one in 10 Hispanics are under control of the criminal justice system... meaning they are in prison or in jail, on probation or under parole.

Medicare beneficiaries may soon have an easier way to get quicker responses to routine questions. Medicare carriers in 10 states have begun testing a new automated telephone service that would give beneficiaries a recorded update on as many as three Medicare claims. Medicare carriers are contractors that administer Medicare Part-B claims, which cover doctors fees and outpatient services.

Partygoers in New Orleans slowed down today to nurse their hang-overs and rest aching feet following a weekend of reveling and parade-watching. The carnival celebration will reach its peak tomorrow- or ''Fat Tuesday'' as it's called- with the traditional donning of masks. Today, Mayor Sidney Barthelemy gave over control of the city to Rex, king of Carnival, who stepped ashore from the Coast Guard tall ship, Eagle, berthed on the Mississippi River.

The political changes sweeping Europe have opened the door for Poles to enjoy one of the bigger delights of capitalism- American T-V. An agreement announced today by Poland's government and a U-S entertainment company says soap operas, sitcoms, police dramas and even the Academy Awards will soon air for the first time on Polish television. Terms of the deal were NOT disclosed.

#90058b0015 02/27/1990 ~Business Wire

NEW YORK (FEB. 27) BUSINESS WIRE - John W. Teets, chairman, president and chief executive officer of The Greyhound Corp., announced here Tuesday that the company has changed its name to Greyhound Dial Corp.

The change was approved at the company's board meeting on Feb. 15, 1990 and is effective immediately.

The name, ''Greyhound Dial Corp.,'' was selected to capitalize on the company's strong position in the consumer products market through its flagship subsidiary, The Dial Corp., as well as to differentiate the company from Greyhound Bus Lines, a unit that was sold in 1987. Together, the two companies -- Greyhound and Dial -- represent 120 years of tradition in American family life.

Greyhound Dial's largest subsidiary, The Dial Corp., has an established position in the consumer market, manufacturing and marketing such well-known products as Dial and Tone bar soaps, Purex laundry products, Lunch Bucket microwave meals, Liquid Dial antibacterial soap, Brillo, Borax and Armour Star canned meats.

Despite the company's strategic focus on selected market niches through Dial, Premier Cruise Lines and other subsidiaries, management has been concerned that in the years since the sale of the bus lines, the company continued to remain synonymous in most people's minds with the bus business.

Before deciding to change the name, the company conducted a survey of institutional investors, shareholders and the general public. The majority of respondents believed that the new image would accomplish the following:

-- Clarify the nature of the company.
-- Convey a stronger consumer orientation.
-- Imply colleagueship with other consumer product giants.
-- Connote a more modern, up-to-date image.
-- Reflect that the company has changed.

In the new logotype, the Grehound and Dial names are on two lines but linked by sharing the ''d'' space, stressing both of the well-known and trusted names. The typeface is Futura Bold. The new Greyhound logo contains a modernized running dog presented in a graphically stylized manner.

Greyhound Dial will continue to hold the ''G'' listing on the New York Stock Exchange.

#90058b0018 02/27/1990 ~Business Wire

SANTA MONICA, CA (FEB. 27) BUSINESS WIRE - An outraged computer dealer has filed the first-ever lawsuit of a dealer against a major computer vendor, seeking to force Hyundai Computer Corp. to honor its promise to replace a pair of 286-C computers used by Father Tom Jones, a Paulist priest, to support his efforts to meet the pastoral needs of the UCLA community and bring the Catholic Gospel into the academic dialog there.

Steven Laff, president of Friendly Computers Inc., an authorized dealer for Hyundai since before the company introduced its problem-plagued 286-C computers, has at his own expense already replaced Father Jones' two defective computers with new Hyundai models.

Laff alleges Hyundai shipped problematic computers, that it authorized replacement of the troublesome 286-C computers with a new newer model on a case-by-case basis, and that it specifically promised to replace Father Jones' two computers.

The first of the two computers was shipped to Hyundai for replacement in November 1989. After four fruitless months of repeated phone calls and requests for the company to provide a replacement, Laff is now taking the huge Korean conglomerate to court.

But neither Friendly Computers nor Father Jones have received the replacement computer from Hyundai, nor has Hyundai documented that it was

sent.

Laff feels Hyundai's actions in this case have been particularly outrageous because Father Jones has become an innocent victim of corporate mismanagement or short-sighted politics and because the source of the problem is not a giant American corporation but a giant Far Eastern one doing business in this country.

Although pursuit of the case against Hyundai may threaten his relationships with Compaq, Epson, Zenith, AST, Novell and other prominent computer manufacturers, Laff says he intends to win a judgement against Hyundai, whatever the cost. He is already exploring the potential for a class action suit against the company.

Laff suggests that hundreds or thousands of disgruntled users will sign up for his class action suit, demanding compensation for the company's problem-stricken products and punishment for its lack of effort to solve the problem.

Laff, 30, is founder and president of Friendly Computers, one of the oldest and most successful computer retailers in the Los Angeles market. Clients include major hotel chains, CPA firms and medical practitioners, as well as the film industry's major studios, production companies, producers, directors and writers. Friendly Computers has corporate clients in Chicago and New York and has pioneered such concepts as providing one-on-one instruction with every system sold, after-hours hotline support, an unconditional satisfaction guarantee and free loaner program.

For more information, contact: Steven Laff, Friendly Computers, 1844 Lincoln Blvd., Santa Monica, Calif. 90404; telephone: 213/450-5700.

#90058b0033 02/27/1990 ~Business Wire

OAKLAND, CA (FEB. 27) BUSINESS WIRE - The Clorox Company (NYSE/PSE:CLX) Tuesday announced that it is introducing nationally two new products including a cholesterol-free, low-fat bottled salad dressing called Take Heart.

The five-flavor line is an addition to the company's popular Hidden Valley Ranch brand of bottled salad dressing and dry mix.

Also rolling out nationally is Liquid-plumr Professional Strength drain

opener which has been developed to be particularly effective in moving through standing water to work on clogs.

The company said that in the Take Heart line of dressing, its popular Original Ranch flavor is cholesterol-free and 91 percent fat-free, containing only one gram of fat and 20 calories per serving. Take Heart's other flavors - Thousand Island, French, Italian and Blue Cheese - contain no cholesterol and are 97 percent fat-free.

The Original Ranch and Italian flavors will be available in 8- and 16-ounce bottles, the other flavors in 8-ounce bottles. The new line is targeted at health-conscious consumers and will position The Clorox Co. in what is expected to become a rapidly growing segment of the $1 billion salad dressing market.

The company describes Liquid-plumr Professional Strength drain opener as a thicker, visco-elastic product which penetrates standing water more quickly and, because it remains concentrated, has more time to be effective on clogs. This feature also makes the product very effective for drain maintenance.

There is no other drain opener like Liquid-plumr Professional Strength, according to Clorox, which also markets regular Liquid-plumr in the $80 million liquid segment of the drain opener category.

Both Liquid-plumr Professional Strength drain opener and Take Heart salad dressing will be available to consumers nationally in March.

The Clorox Company is a diversified manufacturer of household grocery products marketed in the United States and internationally; products and equipment for the food service industry; bottled water and water filter systems.

SAN JOSE, CA (FEB. 27) BUSINESS WIRE - TeleVideo Systems Inc. (OTC:TELV) announced that its Tele386/25 computer system, which utilizes the Intel 386 microprocessor, has been certified by Santa Cruz Operation (SCO) as having passed that company's tests for both Unix and Xenix operation.

SCO's extensive testing procedure ran a balanced load under Unix 3.2.0 plus UFA 1.0 and Xenix 2.3.2 GT. The Tele386/25 has previously been certified by Novell for use as a dedicated or non-dedicated server or workstation under Novell's NetWare, Advanced NetWare, SFT NetWare and the recently released NetWare 386.

The Tele386/25 system is a high-performance system for such applications as LAN file servers, CAD systems, desktop publishing, business automation and software development. Its 80386, 25-MHz processor delivers the speed required for computer-intensive applications. The standard system comes with 4 MB of RAM and 32 Kbytes of 25 nanosecond cache memory.

The system also features a 1:1 sector interleave ESDI hard disk controller space for two full-height and two half-height devices, 12 expansion slots (9 available), and support for both the Intel 80387 and Weitek 3167 co-processors to support numeric calculation applications. The Tele386/25 Model NH, configured with a 1.2-MB floppy drive and no hard disk drive, carries a U.S. suggested list price of $4,795.

The Tele386 Model 150, configured as above and with a 170-MB hard disk drive, lists for $6,895.

TeleVideo Systems Inc. is a leading supplier of industry-standard, high-performance LAN file servers and workstation products, low-cost video display terminals, computer enhancement products and application-specific integrated circuits. Corporate offices are located at 550 E. Brokaw Rd., P.O. Box 49048, San Jose, Calif, 95161-9048. Telephone: 408/954-8333.

LOUISVILLE, KY (FEB. 27) BUSINESS WIRE - Skolniks Inc. (ASE:SKN, Warrants:SKNWS) reported a sharp increase in earnings for the second fiscal quarter ended Jan. 27, 1990.

For the quarter, Skolniks earned $217,006, compared to a loss of $49,201 for the like period a year ago. Total revenue increased 46 percent to $3,613,316 vs. $2,468,692 last year. Earnings per share jumped to 10 cents, compared to (2 cents) for the like quarter last year.

Earnings for the first six months of the current fiscal year improved to $353,286 (16 cents per share) vs. $49,385 (2 cents per share) last year, on a 35 percent revenue increase to $6,559,537, compared to $4,841,397 a year ago.

Skolnicks' Chairman Joe R. Love attributed a sharp earnings increase to the company's normally strong December sales, continued efforts to reduce corporate adminstrative expenses and improving franchise revenues.

Louisville based Skolniks operates 36 bakery/restaurant stores under the name ''Skolniks Bagel Bakery Restaurants'' in Ohio, Pennsylvania, Illinois New Jersey, Wisconsin, Maryland, Virginia and Kentucky.

SALT LAKE CITY (FEB. 27) BUSINESS WIRE - Grand Valley Gas Co. (OTC:GVGC) is pleased to announce the execution of long term Gas Purchase Contracts with three natural gas utilities.

These contracts will provide Grand Valley with 40,000 MMBtu per day of natural gas sales for terms averaging five years. As the result of these contracts, over 70 percent of Grand Valley's revenue from gas marketing activities will be derived from long term sales commitments.

As more of Grand Valley's traditional gas marketing business converts to long term contracts, management is increasing its efforts to expand the company's asset base. Activities are underway to investigate investment opportunities within the energy industry. Grand Valley believes that its industry knowledge and expertise can enhance the profitability of these

potential investments.

In an effort to further align the interests of management and the shareholders, Grand Valley has revised its employee compensation system. This revision will result in an estimated 15 percent reduction in total compensation paid by Grand Valley during the current fiscal year, including the additional compensation for five new employees hired during this year.

Grand Valley Gas Co. is a natural gas gathering and marketing company serving the western United States and Canada. Grand Valley is one of the largest independent marketers of natural gas in the western region, providing competitive and reliable gas supplies to select utility and industrial markets. The company also installs and operates natural gas gathering and compression facilities serving the needs of gas producers and markets.

COSTA MESA, CA. (FEB. 27) BUSINESS WIRE - PDA Engineering (NASDAQ:PDAS) demonstrated its PATRAN software at IBM's announcement of their new Risc System/6000 workstation last week.

PATRAN is one of a few selected MCAE application software packages invited to take part in the announcement. Customer shipments of PATRAN will coincide with IBM's volume shipments of the new workstations in the second quarter.

PDA Engineering will support IBM's full workstation product line, including 2-D and 3-D workstations, and 2-D netstations. Support for IBM's GraPHIGS and 3-D are also planned for release later this year.

''PDA has been working closely with IBM in porting PATRAN to these new workstations,'' said Thomas Curry, vice president and general manager of the PATRAN Software Products Division.

''PATRAN's performance on the 6000 is excellent. Features such as an advanced floating point processor, 27.5 MIPS and superscalar processors help optimize the performance of the hardware and software together.''

PDA Engineering, based in Costa Mesa, designs, develops and markets leading mechanical engineering software under the PATRAN brand name. The software provides pre- and post-processing capabilities, modeling, finite element analysis and other specialty analysis software used in the product

development process.

PDA Engineering distributes its products through sales offices in eight U.S. cities and company-owned subsidiaries in the United Kingdom, France, Germany, Italy and the Netherlands, and independent distributors elsewhere.

Formed in 1972, the company provides advanced technology products and specialized engineering services to both commercial and government market segments through its Engineering Services Division.

HOUSTON (FEB. 27) BUSINESS WIRE - The Coastal Corp. and Union Enterprises Ltd., whose subsidiaries are sponsors of the Empire State Pipeline, Tuesday announced that Rochester Gas and Electric Corp. (RG&E) has signed a letter of intent to acquire a 20 percent equity interest in the Empire project.

Already committed to become a significant Empire customer, RG&E has entered into the upstream transportation and storage arrangements

necessary to commence service from the project.

Empire is a proposed $82.5 million, 155-mile intrastate pipeline that will run between Niagara Falls and Syracuse, N.Y.

Designed to move an average daily volume of 150 million cubic feet of natural gas, the new pipeline will offer natural gas users in western and central New York state competitively priced transportation, as well as access to every major supply basin in the North American continent.

A request to construct and operate the Empire State Pipeline was filed with the New York Public Service Commission in June 1988. A decision on that application is expected soon.

''We feel RG&E's equity participation in Empire would add the unique benefit of a highly regarded local company that is a major energy provider in New York state and eminently familiar with energy interests there,'' said James F. Cordes, executive vice president of The Coastal Corp.

Rochester Gas and Electric supplies electric and natural gas service wholly within the state of New York and is engaged in the production, transmission, distribution and sale of these services in a nine-county area centering around the city of Rochester.

Union Enterprises, a subsidiary of Unicorp Canada Corp., is a Toronto-based integrated natural gas firm with $2 billion in assets and operations in natural gas production, marketing, transportation, storage and distribution.

The Coastal Corp. is a Houston-based energy holding company. It has consolidated assets of more than $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

GOLDEN, CO (FEB. 27) BUSINESS WIRE - ConferTech International Inc. (NASDAQ:CFER), a leading provider of digital audio teleconferencing equipment and services Tuesday announced results for its fourth quarter and year ended Dec. 31, 1989.

The company reported net income of $454,144, or 14 cents per share, on revenue of $9,542,495 for the year compared with net income of $163,361, or 5 cents per share, on revenue of $6,248,509 in the previous year. Both the revenue and net income figures for fiscal 1989 were record highs for the company.

For the fourth quarter ConferTech reported net income of $80,699, or 2 cents per share, on revenue of $2,710,881 compared with a net loss of $74,634, or 2 cents per share, on revenue of $1,821,706 in the comparable quarter a year ago.

H. Robert Gill, president of ConferTech, attributed the record year-end results primarily to a 147 percent increase in revenue from the company's ConferCall Services division, which grew from $1.8 million to $4.4 million. To accommodate this growing demand for ConferCall Services, ConferTech made a significant investment during the year in equipment, personnel and additional space.

''During the year we focused on expanding ConferCall Services and completing development of the next generation of teleconferencing equipment -- the ALLEGRO,'' Gill said. The ALLEGRO product line, which will enhance and complement ConferTech's standard TEMPO product line, is a high capacity teleconferencing system designed to handle very large conferences. Initial shipments of ALLEGRO are expected in the second quarter of fiscal 1990.

''We're especially pleased with our record earnings since they were achieved in spite of a $156,000 write-off during the year of the discontinued Talk-24 talkline business,'' Gill said. ''We also invested a significant amount in ALLEGRO-related development during the fourth quarter. While further development investments are expected during fiscal 1990, they should be offset by sales of the new product.''

ConferTech capped its year by raising $2 million in subordinated convertible debenture offering.

DENVER (FEB. 27) BUSINESS WIRE - Forest Oil Corp. announced Tuesday that in connection with its recent sale of two million shares of $2.125 convertible preferred stock, its underwriters have exercised an option to purchase 300,000 additional shares from the company at a price of $25 per share.

The underwriters are Shearson Lehman Hutton Inc., Drexel Burnham Lambert Inc., Smith Barney, Harris Upham & Co. Inc. and Howard, Weil, Labouisse, Friedrichs Inc. The sale of the additional shares closed Tuesday.

The net proceeds of the offering will be used to reduce the company's outstanding subordinated debt. Each share of the convertible preferred stock is convertible into 1.6556 shares of comon stock of the company (equivalent to an initial conversion price of $15.10 per share of common stock), subject to adjustment in certain events.

The convertible preferred stock is redeemable at the option of the company initially at $26.06 per share commencing Feb. 15, 1993 and at declining prices thereafter to $25 per share.

Forest Oil Corp. is engaged in the exploration for and acquisition, development and production of oil and natural gas. The company's principal producing properties are located offshore Louisiana and in Texas, Wyoming, Oklahoma and Canada. The company's preferred stock is traded on the NASDAQ/NMS system under the FOILP symbol.

#90058b0109 02/27/1990 ~Business Wire

PHOENIX (FEB. 27) BUSINESS WIRE - Talley Industries Inc. Tuesday reported net earnings of $25.9 million, or $2.08 a share, for the year ended Dec. 31, 1989, compared with $10.9 million, or 87 cents per share, in 1988.

After-tax earnings from continuing operations, before a gain on the sale of Talley's air bag operations and the establishment of a reserve on the company's realty assets, were $12.6 million, or $1.01 per share, up from $11.2 million, or 89 cents per share recorded in 1988.

Revenue for the year was $421.1 million, 17 percent higher than the $359.9 million recorded in 1988.

Fourth quarter earnings were $1.9 million, or 15 cents per share on revenues of $109.7 million. Earnings for the comparable quarter in 1988 were $3.2 million, or 25 cents per share on revenue of $104.9 million.

William H. Mallender, chairman and chief executive officer, said, ''1989 was a very rewarding and profitable year for Talley. Excluding the gain on the sale of our air bag business and the real estate reserve, earnings from continuing operations increased 13 percent.

''The fourth quarter, while down from last year, reflects market problems that have generally been recognized, he said. Declining prices in the stainless steel industry and poor operating performance of our real estate investments caused a decline in earnings.

''We anticipate significant increases in air bag royalties during 1990 due to extremely positive response by automotive manufacturers and consumers '' Mallender said.

''We also note that lower U.S. defense spending, recession fears and uncertain capital markets will create challenges in the months ahead. Fortunately, the diverse nature of Talley Industries allows greater flexibility to deal with changing conditions as they arise.''

Talley Industries is a diversified designer, manufacturer and supplier of aerospace, industrial and commercial products and services, including high-reliability electronic components and stainless steel rod and bar products.

Talley also invests in and develops real estate, primarily in the Phoenix area and operates a federally chartered savings bank as an autonomous, wholly owned subsidiary, which specializes in serving the Asian population in the greater Los Angeles area.

LOS ANGELES (FEB. 27) BUSINESS WIRE - First Capital Group Inc. (FCG), a California-based company announced Tuesday that its nominees and proposals received approximately 60 percent of the votes cast at the BFS Bankorp annual meeting.

BFS Bankorp Inc. (NASDAQ:BFSI) is a New York-based holding company whose principal subsidiary is Bankers Federal Savings Bank.

''It is unusual for shareholders to successfully oppose the management of a publicly listed company, but the shareholders have done so at BFS and are demanding substantive changes,'' said Richard Kazan, president of FCG.

FCG, in opposition to management of BFS, solicited proxies in support of shareholder proposals generally requesting BFS to (i) increase the size of its board of directors from five to seven members, and (ii) use best efforts to identify and pursue transactions that would maximize shareholder value. In addition, FCG solicited proxies to elect one nominee to the BFS board if it remained at five members, and two nominees if such board was increased to seven members.

The BFS board announced at the beginning of the annual meeting that regardless of shareholder opinion, it would not increase its board membership from five to seven members. Accordingly, James B. Rosenwald won one of the two board seats up for election at the annual meeting; James A. Randall, BFS president, won the other seat and Eldon C. Hanes,

the former BFS chairman of the board, lost his bid for reelection.

The results of the shareholder vote are being challenged in federal court by BFS. ''It appears that management is prepared to spend sizeable sums of shareholder money and waste it on attorneys in an attempt to disenfranchise those same shareholders. Management is obviously out of touch with the shareholders and is now responding bitterly to their decisions. Also, more than on week after they lost the election, management still refuses to seat Rosenwald on the board.

SAN FRANCISCO (FEB. 27) BUSINESS WIRE - MacroMind Inc. and Microsoft Corp. Tuesday announced a joint technology licensing agreement.

Under the agreement, announced at the Fifth International CD-ROM Conference, Microsoft will license MacroMind's animation playback technology running in the Microsoft Windows environment for inclusion in future Microsoft systems software products.

Software licensed by MacroMind to Microsoft plays animation, text, graphics and audio sequences in the Windows environment. The sequence can be executed as a stand-alone application or integrated with parts of a broader application. This integration is accomplished via the Windows Dynamic Link Library (DLL) architecture. The data format used is compatible with that of MacroMind Director on the Macintosh, so the Mac can be used today to author multimedia sequences for playback on a PC.

Microsoft and MacroMind agreed to explore cooperative efforts in related areas, including OS/2-based versions of animation run-time software.

In a related announcement today, MacroMind announced its MacroMind Windows player, a run-time environment that will allow MacroMind Director documents to be played back on a PC running future versions of Microsoft Windows. The MacroMind Windows Player will be available to certified MacroMind developers in the second quarter 1990; it offers a preview of multimedia capabilities to be available in future systems software from Microsoft.

Microsoft Corp. (NASDAQ: MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM

products for the microcomputer marketplace.

MacroMind, established in 1984, is the premier multimedia software company. The company offers MacroMind Director 1.0.1, available today in retail stores. The product is designed for communication, learning and technical professionals as well as content producers. MacroMind recently announced MacroMind Director version 2.0 ($695), an enhanced version of Director 1.0.1. Enhancements include interactivity, control over external audio and video recording devices, and 24-bit color images.

The new version will be available in retail stores in April 1990. The company also offers MacroMind Accelerator ($195), and clip sound and animation sequences available in CD-ROM format ($195) or floppy disk format ($59.95 per disk).

ANAHEIM, CA (FEB. 27) BUSINESS WIRE - Daisy/Cadnetix (DAZIX) Tuesday announced that its computer-aided engineering suite of applications running on the Sun-4 family of workstations has been released for shipment in March.

The tools included in the new release are: VHDL Design System and VHDL Design Export; PLD Master, an advanced analysis tool for designing PLDs; AdvanSIM, a comprehensive ASIC and system simulator for digital design; ERC, the DAZIX electrical rules checker; Apex, an IC and board-level analog simulator.

Also included in the release are interface support for the MegaLOGICIAN and GigaLOGICIAN accelerators and a network accessible physical modeler (PMX).

In addition, DAZIX will begin shipping its UNIX network design interfaces to the DNIX network. These tools allow design transfers between DNIX and UNIX, and provide UNIX access to and continued use of DNIX simulation

tools and databases.

These interfaces allow DNIX to be a productive part of the users design environment and provide an efficient upgrade path to the new UNIX tools.

This release also bolsters DAZIX commitment to system standards such as X Windows, NFS, and TCP/IP. DAZIX will be shipping its electronic design interchange format netlist reader (ENR) and EDIF netlist writer (ENW) on the Sun-4.

Daisy/Cadnetix Inc. (DAZIX), the operating company subsidiary of Daisy Systems Corp., designs, manufactures, markets and supports computer-aided engineering, design, and manufacturing systems used to automate the electronic design engineering process.

The company's products are used to design, simulate, and layout application specific integrated circuits, very large scale integrated circuits, and printed circuit boards. The company has a worldwide customer base covering a wide range of industries including military/aerospace, computers, semiconductors, telecommunications and consumer electronics.

Sun-4 is a trademark of Sun Microsystems Inc.

UNIX is a registered trademark of AT&T.

#90058b0171 02/27/1990 ~Business Wire

DENVER (FEB. 27) BUSINESS WIRE - Oxford Consolidated Inc., a Denver-based oil and gas company, announced Tuesday that it held a special shareholders' meeting Tuesday which adopted a proposal affecting Oxford's common stock.

The net effect of the proposal was to reverse split the current common stock by 20 to 1 with the company purchasing for cash the shares of those shareholders who, prior to the meeting, owned fewer than 300 shares of Oxford common.

This was a two-step transaction which first issued one new share of Oxford common for each 300 shares. Oxford will buy any fractional shares for 23 cents per pre-split share. The second step of the proposal would be a forward split of 15 to 1.

Oxford said the split will reduce the high cost of administering over 3500 small investors accounts which represent approximately 2 percent of the

outstanding common stock and will provide liquidity to small shareholders who have not been able to dispose of their shares without incurring expenses which are substantial relative to the market value of their stock.

Additionally, the company expects better access to capital markets than have been available.

The special shareholders' meeting also adopted a proposal to convert the 17,114 outstanding shares of Oxford Series A $10 Par Value Convertible Preferred stock to common stock for each share of preferred.

Oxford Consolidated common stock will trade the NASDAQ system on a when issued basis with the symbol OXCIV starting on Feb. 28, 1990.

#90058b0174 02/27/1990 ~Business Wire

LOS ANGELES/SAN FRANCISCO (FEB. 27) BUSINESS WIRE - J.P. Morgan & Co. has announced the appointment of George W. Rowe as managing director of the firm's California Private Banking Group.

Rowe will oversee the firm's Los Angeles and San Francisco private banking offices, which provide a full range of financial resources to meet the sophisticated investment and banking needs of a targeted group of individuals, family groups, closely-held corporations, and philanthropic organizations throughout California.

''We have always believed that strong local presence is the only way to understand clients' needs and offer them the benefits of our international network," said Dennis Weatherstone, chairman of the board of J.P. Morgan & Co. Inc.

Rowe noted that J.P. Morgan is expanding its California operations: ''We are increasing our presence in Los Angeles and San Francisco to make more directly available to our clients the specialist skills and capital markets products they require.''

Rowe joined Morgan Guaranty Trust Co., the firm's principal banking subsidiary, in 1962, and was appointed a vice president in 1970, and a senior vice president in 1981. In addition to a broad range of assignments, including more than eight years as senior banking officer responsible for business in the western United States, Rowe headed the firm's largest New York office, the Municipal Bond Department and the worldwide financial institutions group. Immediately prior to his assignment to California, he directed J.P. Morgan's corporate finance

activities in the United Kingdom and Scandinavia.

In addition, Rowe was chairman of Morgan Guaranty International Bank with offices in Los Angeles, San Francisco, Miami and Houston from 1983 to 1987.

Rowe attended St. Paul's School in Concord, N.H., and graduated Harvard College in 1962. He is married to the former Kate R. Munson and the couple has two college-age children, Katherine and William.

J.P. Morgan & Co. Inc. provides banking and other financial services to corporations, governments, institutions, and individuals throughout the world. Its activities include providing corporate finance advice and arranging financing for clients, underwriting and trading securities, and managing pension and other investment funds.

In the United States, Private Banking offices are located in New York, Los Angeles, San Francisco, Palm Beach and Wilmington.

DENVER (FEB. 27) BUSINESS WIRE - Forest Oil Corp. announced Tuesday that Clayton G. Dorn, chairman of the board and chief executive officer, and David F. Dorn, president, have been appointed co-chairmen of the board of the company.

Both will continue to serve as directors and as members of Forest's executive committee. William L. Dorn was appointed president and chief executive officer to fill the offices previously held by David F. Dorn and Clayton G. Dorn.

William Dorn is a native of San Antonio, Texas, and a graduate of Phillips Academy, Andover, Mass., and the University of Texas, Austin, Texas, where he graduated in 1971 with a bachelor of arts in history.

He has 19 years of service with the company, beginning as a scout in Midland, Texas, in 1971. He later became a landman in Mobile, Ala., and thereafter area exploration manager for Forest's Canadian office. He moved to Denver in 1976 to assume the position of Rocky Mountain division manager and was elected a director of the company in 1982.

He became vice president of the company in 1984 and was elected a member of the executive committee in 1988. In August 1989 he became executive

vice president.

Dorn, who is 41, his wife, Meg, and their two children will continue to reside in Denver.

Forest Oil Corp. is engaged in the exploration for and acquisition, development and production of oil and natural gas. The company's principal producing properties are located offshore Louisiana and in Texas Wyoming, Oklahoma and Canada. The company is traded on NASDAQ under the FOIL symbol.

PHOENIX (FEB. 27) BUSINESS WIRE - Frank J. Mirabella Jr. has been named president and chief executive officer of MeraBank, Arizona's largest thrift.

Thomas S. Ruth, MeraBank's managing agent, said Mirabella's appointment by the Resolution Trust Corp. is effective March 12. MeraBank was placed into conservatorship on Jan. 31.

Ruth will continue to serve as MeraBank's board of directors.

''Mr. Mirabella was selected by the RTC because of his extensive financial and savings and loan background, along with his knowledge of RTC rules and regulations,'' Ruth said.

''His experience with Arizona and Texas real estate makes him ideal to

help prepare MeraBank to be sold or merged,'' he said.

Mirabella, 40, joined Southwest Savings in 1982 as executive vice president and chief operating officer, and was named president in 1988. After Southwest was placed into receivership in 1989, Mirabella continued as president and chief executive officer.

Southwest Savings is a $1.7 billion thrift with 47 branches throughout Arizona.

''Frank worked closely with the RTC and has been instrumental in helping prepare for the sale of Southwest while simultaneously working to maximize the thrift's franchise value,'' Ruth said.

Before joining Southwest Savings, Mirabella was senior vice president and chief financial officer of Home Savings, a $500 million thrift in Houston, where he worked for five years. From 1972 to 1974 he was an auditor with Arthur Andersen in Houston.

He received a bachelor's degree in accounting from Lamar University in Beaumont, Texas, in 1972, and is a certified public accountant.

He currently serves as director of the Arizona League of Savings Institutions, and is past president of the Gulf Coast Chapter of the Financial Managers Society. He is also a member of the American Institute of CPAs.

Headquartered in Phoenix, MeraBank is the largest savings institution in Arizona with combined assets of $7.5 billion, and 76 branches in 33 cities in Arizona and Texas.

MILWAUKEE (FEB. 27) BUSINESS WIRE - Milwaukee Insurance Group Inc. (OTC:MILW) Tuesday reported a fourth quarter net loss of $1,102,000, or 36 cents per share compared to net income of $961,000, or 31 cents per share for the like period last year. Net income for the 1989 year was $1,897,000, or 62 cents per share vs. net income of $4,079,000, or $1.33 per share for the 1988 year.

On Jan. 1, 1989, the company adopted Financial Accounting Standards Board Statement No. 97 (FASB 97). FASB 97 provides that the majority of deposits received on long-duration contracts, such as universal life insurance products, be excluded from revenues. 1988 results have been

restated to reflect adoption of FASB 97, resulting in a decrease of previously reported premium revenues of $826,000 and an increase in net income of $41,000 for the year.

FASB 97 also provides that pre-tax realized capital gains or losses be included in revenues. Included in net income are pre-tax realized gains of $235,000, or 8 cents per share for the fourth quarter of 1989 compared to $53,000, or 2 cents for the fourth quarter of 1988, and pre-tax realized gains of $292,000, or 9 cents per share for the 1989 year compared to the pre-tax realized losses of $175,000, or 6 cents per share, for the 1988 year. Property-Casualty Insurance-

Milwaukee Insurance Group Inc.'s property-casualty insurance segment produced a net loss of $1,507,000, or 49 cents per share for the fourth quarter of 1989 compared to net income of $885,000, or 29 cents per share in the corresponding period of 1988.

''Claim severity in the auto liability line has caused underwriting losses to mount, and this is being addressed with rate adjustments,'' said Robert W. Doucette, president and chairman of Milwaukee Insurance Gourp Inc. ''More significantly, we felt it prudent to increase our estimate for the ultimate cost of outstanding losses incurred prior to the fourth quarter of 1989. The company's share of non-recurring strengthening of loss reserves during the fourth quarter amounted to $1,200,000.'' Life Insurance-

The life insurance segment of Milwaukee Insurance Group Inc. contributed net income of $405,000, or 13 cents per share during the fourth quarter of 1989 compared to $76,000, or 2 cents per share in the corresponding period of 1988.

''Life insurance premiums increased 52 percent for the quarter while profitability remained strong compared to the abnormally high mortality experience in the fourth quarter of 1988,'' Doucette said.

Milwaukee Insurance Group Inc. provides property and casualty insurance through two subsidiaries, Milwaukee Guardian Insurance Inc. and Milwaukee Safeguard Insurance Co.; and life insurance through its subsidiary, Milwaukee Life Insurance Co. It is traded on the NASDAQ National Market System under the symbol MILW.

TULSA, OK (FEB. 27) BUSINESS WIRE - Geodyne Resources Inc. (NASDAQ:GEOD),

Tuesday announced record sales of $31.6 million in January with the completion of the partnership offering of two PaineWebber/Geodyne Energy Income Limited Partnerships.

Geodyne also announced record sales of $114 million of 1989, up from $97 million in 1988. Cumulative sales for the PaineWebber/Geodyne Energy Income Limited Partnerships through Jan. 31, 1990 are approximately $435 million since the offerings began in 1984.

The PaineWebber/Geodyne Energy Income III-C began marketing on Jan. 5 and closed Jan. 31 with subscriptions totalling approximately $24.6 million from 1,500 investors. In addition, subscriptions of approximately $7 million were received in January from 770 investors for the PaineWebber/Geodyne Institutional/Pension Energy Income P-5.

Open since November 1989, the P-5 Limited Partnership closed Jan. 31 with approximately $11.8 million from 1,200 investors. Michael Tomasso, president, said these sales resulted from a special marketing effort made by PaineWebber in January for the programs sponsored by PaineWebber/Geodyne.

With headquarters in Tulsa, Geodyne Resources Inc. manages the PaineWebber/Geodyne Energy Income Programs I, II and III and PaineWebber/Geodyne Institutional/Pension Energy Income Partners and evaluates, acquires, manages and develops oil and gas reserves for its limited partnerships. The company also has offices in Houston and San Antonio.

No offer of units in either PaineWebber/Geodyne Energy Income Program III or PaineWebber/Geodyne Institutional/Pension Energy Income Partners is being made hereby. Any such offer may only be made by a prospectus covering the respective program.

LOS ANGELES (FEB. 28) BUSINESS WIRE - The formation of Triton Pictures, a new North American theatrical distribution company was announced Tuesday by its President and Chief Executive Officer Jonathan Dana.

Dana is partnered in Triton with Mitch Blum, Jim Gould and Jeff Ivers, all of whom previously worked together as senior executives at Atlantic Entertainment Group.

The principal equity partner in the venture is Kadokawa Productions US Inc., Hiroshi Sugawara and Lloyd Phillips, both based in Los Angeles, will represent Kadokawa's interest in the venture.

Peter Dekom, of the law firm of Bloom, Dekom and Hergott, was instrumental in the formation of the company and his firm will serve as Triton's general counsel.

Triton will provide full distribution services throughout North America which will range from acting as a ''service agent'' for producers with financing already in place to cases where Triton will offer completion financing in the 20 percent to 50 percent range.

Triton plans to release between five and seven features in its first year increasing to eight to 10 next year. Two films are already slated for 1990 release. Additional product will be acquired on the open market.

Triton's first release will be James Toback's (''The Gambler,'' ''The Pick-Up Artist'') ''The Big Bang'' produced by Florida financier Joseph H. Kanter (''Ironweed''). This amusing and often outrageous documentary about man's view of himself and the universe will have its premiere in New York in early May.

Kadokawa Productions US will also provide American-based English-language product to Triton Pictures in the $3 - $ 8 million range while still producing films at a higher budget level in conjunction with major studios.

Triton will have headquarters in Los Angeles at 9000 Sunset Boulevard and will operate division offices in New York, Chicago and Atlanta. Canadian distribution will be handled through a Canadian concern and is currently being negotiated.

At Atlantic Entertainment Group, Dana and Blum presided over such successful films as ''Extremities,'' ''Teen Wolf,'' ''Stormy Monday,'' ''Cop,'' ''Wish You Were Here'' and ''A World Apart.''

Prior to Dana's tenure at Atlantic, he was associated with the Samuel Goldwyn Co. and EMI Television in development and production capacities.

Blum was Crown International's vice president and general sales manager before joining Atlantic, where he most recently served as president, theatrical marketing and distribution.

Triton's executive vice president and chief financial officer, Jeff Ivers, also shared a similar title at Atlantic. Previously he was senior vice president of MGM/UA Telecommunications, where he spent six years as a senior executive in MGM/UA's home video, pay television and syndication operations.

Gould serves as executive vice president in charge of motion picture financing and business development. Prior to joining Atlantic as executive vice president, motion picture financing, Gould was involved in real estate and professional sports management where he was a founding member of the United States Football League and an officer of the Trump Organization.

BALDWINVILLE, MA (FEB. 28) BUSINESS WIRE - Employees at Temple Stuart Co. a Baldwinville furniture manufacturer, filed a class action lawsuit today in Federal District Court for their employer's failure to give them sixty days advance notice before closing the plants where they worked on Jan. 5.

The suit is based on the Federal Plant Closing Notification Law, the Worker Adjustment and Retraining Notification Act, 29 U.S.C. Section 2101, et. seg., popularly known as the WARN ACT. This is the first suit under the WARN ACT filed in Massachusetts and one of only a few filed nationwide so far.

This law, passed in 1988, became effective in 1989. It requires employers with more than one hundred employees to provide sixty days written notices to employees before plant closings or mass layoffs.

The employees at Temple Stuart received no notice when Temple Stuart abruptly closed its plants in Baldwinville and Winchedon, Mass. Approximately 150 people lost their jobs as a result of the Temple Stuart's actions.

The idea of a class action suit was first explored at a meeting Suhoski organized among the workers and persons from the State's Industrial Service Program at Mount Wachusett Community College earlier this month. Over 100 people attended the meeting, looking for solutions to their unemployment situation.

The employees' attorney, Edward Kelly, partner in the Boston firm Schapiro Hays & Kelly, P.C., described the 60-day notice provision of the WARN ACT as a ''minimal requirement designed to enforce a basic level of corporate responsibility.''

Kelly said, ''The notice gives workers and their families some time to adjust, to find new jobs, and, when appropriate, to receive retraining so that they may successfully compete in the job market.''

Kelly noted that, ''The WARN ACT provides that an employer, such as Temple Stuart, which fails to give the required notice before closing its plants, is liable to its employees for one day's back pay for each day of notice not given. For Temple Stuart that amounts to 60 days of back pay for each employee. That is what the employees are seeking in the lawsuit filed today.''

John Ilinitch, who worked at Temple Stuart for over 20 years summed up the feelings of many workers when he said, ''The Stuarts feel they're above the law -- that they're big people and we're little peons.''

#90058b0609 02/27/1990 ~Business Wire

SANTA ANA, CA (FEB. 27) BUSINESS WIRE - Alpha Microsystems (NASDAQ:ALMI) and its AMS Products Group (AMS) Tuesday introduced to the company's growing network of AMS dealers a suite of hard-hitting and lucrative marketing and sales support programs.

Designed to help dealers sell, the innovative and results-oriented marketing programs were introduced at the first annual AMS Dealer Meeting, Feb. 22-24, on the Queen Mary in Long Beach, Calif.

Included in the announcement were an outstanding co-operative advertising program; a results-proven direct mail and lead-generation program; professional sales training and sales consulting; as well as marketing, advertising and public relations advisory services.

With a successful history of generating sales leads and sales productivity improvements, the AMS programs are based on Alpha Microsystems' 13 years of experience in developing and supporting its vertical-market oriented AMOS dealer organization.

After extensive research and planning, Alpha Microsystems determined that the worldwide applications software base of over 4,000 industry-specific solutions available in Pick represented a significant opportunity for the company to capitalize on its 13 years of successful dealer distribution and vertical market experience.

With a worldwide installed base of over 36,000 business computers, Alpha Microsytems is well-positioned to aggressively leverage its considerable

vertical marketing expertise, marketing support programs, manufacturing resources and nationwide field services capabilities for a successful entry into the Pick market.

The co-operative advertising program provides each dealer a pool of advertising funds based on three per cent of the dealer's sales over the previous rolling six-month period. These funds can be used by the dealer to offset the full costs, up to the maximum of the dealer's co-op pool, of almost any type of advertising or sales promotion activity including dealer advertising, yellow page listings, trade shows, sales literature, promotional items or public relations.

The direct-mail program provides dealers with a resource for generating sales leads within specific vertical markets. AMS-generated campaigns are based upon vertical markets that represent the broadest potential for the entire dealer organization.

However, individual dealers, often on a cost-sharing basis, are able to work directly with the company in developing direct-mail campaigns for specific markets served by the dealer. The direct-mail programs are customized based on the size, geographic make-up and individual characteristics of each selected vertical market.

The life blood of any dealership is the ability to effectively sell its vertical market solutions. In support of this, AMS provides a series of on-site and regional sales training and sales consultation seminars for its dealers.

Provided at no charge to the dealer, these programs are conducted by industry sales leader Frank Watts, president of San Clemente, Calif.-based F. Watts and Associates. With over 25 years of successful personal sales, sales management and sales training experience, Watts's training programs have resulted in substantial increases in dealer sales productivity.

With headquarters in Santa Ana, Alpha Microsystems with its AMS Products Group and RBM Products Group manufactures, markets and services multi-user multitasking computer hardware and software products.

#90058b0613 02/27/1990 ~Business Wire

MILPITAS, CA (FEB. 27) BUSINESS WIRE - For the three months ended Dec. 31 1989, Diasonics Inc. (ASE:DIA) reported net income of $31.5 million, or 41 cents per share, compared to net income of $2.7 million, or 4 cents per

share, in 1988.

For the year ended 1989, net income was $32.6 million, or 43 cents per share, compared to net income of $9.8 million, or 14 cents per share, in 1988.

Fourth quarter results include a gain on disposal of discontinued operations of $60.5 million, or 79 cents per share, net of discontinued operating losses and taxes.

On Nov. 21, 1989, Diasonics completed the sale of its Magnetic Resonance Imaging business to Toshiba America Medical Systems Inc., for $167.5 million, plus the assumption of certain debt associated with the MRI business and change in net equity in the MRI business between March 31, 1989 and closing.

The fourth quarter results do not reflect any adjustment due to change in net equity in the MRI business, as the determination of such adjustment is still in process.

For the three months and year ended Dec. 31, 1989, revenues for continuing operations were $54.3 million and $198.3 million, respectively, compared to $55.8 million and $180.0 million, respectively, in 1988.

Loss from continuing operations for the three months and year ended Dec. 31, 1989 were $29.0 million and $21.5 million, respectively, compared to income of $3.1 million and $11.6 million, respectively, in 1988.

The fourth quarter loss was largely due to decisions made in the fourth quarter relating to the Ultrasound business which resulted in reserves and write-offs of certain inventories and other related assets. Additionally fourth quarter results were impacted by delays relating to the FDA approval of the Therasonic Lithotripsy system.

Diasonics' European and other international operations as well as the X-Ray Division had excellent fourth quarter and total year results.

The board of directors also announced that it had authorized the company to repurchase up to 12 million shares of the company's outstanding common stock following the filing of the company's Form 10K with the Security and Exchange Commission and the release of the company's earnings for the first quarter.

Such repurchases would be made in the open market or in privately negotiated block transactions from time to time as market conditions permit. The company expects to announce its earnings for the first quarter in mid-April.

Diasonics is a leader in the development, manufacture and distribution of medical ultrasound, high performance X-ray and therapeutic medical instrumentation.

MILPITAS, CA (FEB. 27) BUSINESS WIRE - Diasonics Inc. (ASE:DIA) announced Tuesday that pursuant to the terms of the asset purchase agreement entered into with Toshiba America Medical Systems Inc., in connection with the sale of the MRI Division, in January Diasonics requested a further payment of an additional $23 million, reflecting changes in the net equity of the division for the period from March 31 through Nov. 21, the closing date of the transaction.

Toshiba has disputed this claim and has in turn submitted a claim for a refund of $19 million from the purchase price previously paid to Diasonics. Under the terms of the agreement, various mechanisms exist for the resolution of disputes over the purchase price.

MILPITAS, CA (FEB. 27) BUSINESS WIRE - Diasonics Inc. is pleased to announce the appointment of Lawrence A. Heimlich as vice president for the Ultrasound Division.

Heimlich will be responsible for the U.S. sales of all Diasonics Ultrasound products, including the new multicomputer whole body SPECTRA Ultrasound System.

Heimlich rejoins Diasonics where he had worked for seven years, most recently as regional sales vice president for MRI. He brings over 20 years of experience in sales and marketing management with Hewlett-Packard Becton Dickinson, and Brattle Instruments.

Heimlich has a bachelor's of science degree in electrical engineering and a master's of science degree in BioEngineering from the Polytechnic Institute of Brooklyn and a master's of business administration from Northeastern University.

As stated by Stewart Carrell, Diasonics chairman and chief executive

offier: ''We are committed to providing cost-effective solutions for the diagnosis and treatment of disease to help the medical community provide the highest quality of patient care. Experienced management, such as Larry Heimlich, along with innovative products like SPECTRA are making these exciting times for Diasonics.''

''We look forward to having Larry back at Diasonics. His outstanding leadership and extensive background in sales, marketing and engineering will make him a most valuable member of our Ultrasound Division management team,'' said Carrell.

Diasonics Inc. is a leader in the development and manufacture of computer-based medical instrumentation. Diasonics corporate headquarters are located at 1565 Barber Lane, Milpitas, CA 95035, 408/432-9000.

SAUSALITO, CA (FEB. 27) BUSINESS WIRE - Autodesk announced Monday that Carolyn Aver has been appointed to the position of chief financial officer.

Aver takes over these duties from Donald W. Lohin, who leaves the company after five months as CFO to rejoin his family in Massachusetts.

''Carolyn has played a vital role in the success of this company,'' stated Alvar Green, president and chief executive officer for Autodesk.

''We feel that Carolyn's extensive experience and professionalism make her the ideal choice to head up Autodesk's financial operations.''

Aver joined the company as controller in 1984. Prior to joining Autodesk, Carolyn worked as a certified public accountant for the accounting firm Arthur Young & Co. (now Ernst & Young).

Autodesk develops, markets and supports a family of computer-aided design, engineering and animation software products for desktop computers and workstations.

Autodesk shares are traded in the United States on the NASDAQ National Market System under the symbol ACAD. For more information please call 415/331-0356 or GO ADESK on COMPUSERVE.

SAN FRANCISCO (FEB. 27) BUSINESS WIRE - Andersen Consulting's Change Management Services (CMS) has assembled an experienced development team in Dallas to embark on an ambitious project: the creation of Performance Support Systems (PSS) - multimedia databases - to provide their clients with interactive performance support solutions to a variety of business problems.

The PSS team will be demonstrating several applications in the Intel Corp. exhibition booth at the International CD-ROM Conference which runs from Feb. 27 through March 1 in San Francisco. These interactive multimedia applications include: a geographic information system designed for a railroad; a product information/sales training system for a pharmaceutical company; and an emergency preparedness information system for executives of a petroleum refinery.

The CMS consultants are also developing a ''proof of concept'' system scheduled for availability in early fall of 1990 at the firm's Systems Integration Center in Dallas.

The Performance Support Systems will use DVI Technology and include computer-based training, interactive video instruction, procedures, on-line reference and help, and expert system diagnosis and documentation as components.

The core PSS team created Andersen Consulting's award-winning Process Analysis Workbench using DVI. The development team's areas of experience include: DVI, instructional design, expert systems, interactive video and computer-based instruction, audio and video production and systems integration, along with a wide range of industry expertise, according to Ziegler.

Andersen Consulting's Change Management Services practice answers business needs in all aspects of implementing and managing organizational change. CMS is organized around three service lines that address the essential ingredients of change: the organization (Organizational Change), the individual (Knowledge Transfer), and the integrated use of technology (Technology Assimilation).

Over 700 consultants in 25 Andersen Consulting offices worldwide currently support this practice. By 1992, that number is forecast to reach 1,600.

Andersen Consulting has helped organizations apply technology for competitive advantage since 1954 when it installed the first computer application for commercial use. The firm helps clients use information in all phases of their management activities - strategic, industry,

operations and financial.

Andersen Consulting's worldwide client base has access to more than 18,000 highly trained professionals serving clients through 157 offices in 45 countries. Andersen Consulting is part of the Arthur Andersen Worldwide Organization.

#90058b0631 02/27/1990 ~Business Wire

BOSTON (FEB. 27) BUSINESS WIRE - The Boston Bancorp (NASDAQ:SBOS), the holding company for South Boston Savings Bank, Tuesday reported net income of $3,691,000, or 52 cents per share, for the quarter ended January 31, 1990.

For the same three months of fiscal 1989, the company earned $3,967,000, or 51 cents per share. Per share figures for the recent quarter reflect a reduced number of shares outstanding due to a repurchase of 770,000 shares of common stock, completed on December 15, 1989.

The results for the first quarter of fiscal 1990 represent an annualized return on average equity of 15.53 percent and a 1 percent return on average assets. Total assets were $1.47 billion at January 31, 1990. Stockholders' equity was $94,300,000 at the end of the latest quarter, equivalent to $13.52 per share.

''The Boston Bancorp continues to rely on its low cost operations, conservative lending standards and solid capital base to produce stable financial performance in a difficult market and economic cycle,'' said Richard R. Laine, president and chief executive officer.

Net interest income before provision for loan losses was $8,333,000 for the first three months of fiscal 1990, compared with $9,501,000 for the same quarter of fiscal 1989. The interest rate spread was 1.96 percent and 2.30 percent for the quarters ended January 31, 1990 and 1989, respectively.

Total other income was $2,164,000 for the quarter ended January 31, 1990, compared with $900,000 in the same fiscal 1989 period. This advance was largely attributable to a gain on the sale of mortgage servicing, as well as increases in gains on sales of securities, fees and service charges, and other income.

The Boston Bancorp is the holding company for South Boston Savings Bank, a

state-chartered stock savings bank headquartered in South Boston, Massachusetts. South Boston also has full-service offices in Dorchester, Quincy and Weymouth, Massachusetts. The Boston Bancorp's common stock is traded on the NASDAQ National Market System under the symbol ''SBOS''.

#90058b0637 02/27/1990 ~Business Wire

SALT LAKE CITY (FEB. 27) BUSINESS WIRE - Plexus Tuesday reported a second quarter loss of $261,000 for the three months ended Dec. 31, 1989 vs. a $169,600 loss for the comparable period last year.

Revenues totaled $148,000 in the current quarter vs. $144,600 for the previous year's first quarter.

The six month loss has accumulated to $522,000 vs. $219,100 last year while revenues have risen to $306,185 as compared to $273,571 for the same six month period last year.

Michael D. Fowler, vice president and chief financial officer of Plexus stated that the increased loss for the six month period was primarily due to increased general and administrative expenses related to higher personnel costs, consulting and audit fees and write-offs of abandoned projects.

In addition, interest expense was higher than the previous year due to issuance in March of 1989 of the company's 10.5 percent debentures.

Plexus Resources Corp. is an expanding diversified U.S. natural resources

organization with extensive base base metal and precious metal interests and oil and gas production, the company's shares are traded through the Toronto Stock Exchange (PXS) and in the United States on NASDAQ (PLUSF).

NEW YORK (FEB. 27) BUSINESS WIRE - Management Company Entertainment Group Inc. (NASDAQ: MCEG, MCEGW, MCEGL) Tuesday announced that Sentinel Program Investors, L.P., an affiliate of Kagan Capital Management Inc., has caused a $2.5 million credit enhancement to be issued in connection with the company's domestic video operations.

This transaction establishes a film financing program designed to provide Sentinel with a participation in the domestic video marketplace. Sentinel's rate of return is based solely on revenues derived from the company's domestic video unit sales on certain designated feature films.

The company noted that the structure is intended to serve as a model for larger transactions which may be entered into between the parties in the future.

Independent Production Resources Inc., the company's financial services unit, initiated and negotiated the transaction.

Management Company Entertainment Group Inc. is a diversified entertainment company with a talent base, primarily engaged in entertainment talent management; entertainment production, distribution and marketing; and entertainment financing.

MOUNTAIN VIEW, CA (FEB. 27) BUSINESS WIRE - KnowledgeSet Corp., a leading developer of software systems for information management, Tuesday announced that it has licensed HyperKRS, its full-text retrieval engine for HyperCard stacks, to Apple Computer Inc. for corporate, worldwide applications.

Under the terms of the contract, Apple will include HyperKRS in information products such as reference materials, product information and technical documentation for internal distribution and third-party developers.

Apple is currently using HyperKRS for several applications including Phil and Dave's Excellent CD, a compilation of technical support information that has been distributed to thousands of certified Apple developers, and the Information Source CD-ROM which provides technical and reference information for Apple field sales representatives.

In addition, Apple's Integrated Systems division uses HyperKRS as the primary source of information for all of its product groups.

According to Chris Bowman, vice president of marketing and operations at KnowledgeSet: ''We are pleased that Apple has selected HyperKRS as a search engine for company information products and expect this agreement to spur widespread use of HyperKRS within Apple's numerous divisions.''

HyperKRS allows HyperCard users to quickly and easily search for a single word or build a complex query. Every word in a stack is pre-indexed so all the cards that meet the search criteria are located within seconds. The program also features search methods that are versatile and easy to use including And, OR, But Not, Exact Order, Wildcard, Proximity and Field Specific searching.

HyperKRS works equally well for information stored either on magnetic media or CD-ROM.

Based in Mountain View, Calif., KnowledgeSet Corp. designs, develops and markets productivity tools for information management. Applications for KnowledgeSet products include technical and reference manuals, engineering plans, catalogs, encyclopedias, legal and medical documents and other research materials that can be readily adapted to optical disc technology.

The company's licensees include American Airlines, Apple Computer, British Airways, Ernst & Young, IBM, Information Handling Services, Siemens and Sony.

#90058b0642 02/27/1990 ~Business Wire

SAN FRANCISCO (FEB. 27) BUSINESS WIRE - KnowledgeSet Corp. Tuesday announced that its Knowledge Retrieval System (KRS) technology has been licensed to IBM for use with the company's new RISC System/6000 computers.

Under the terms of the agreement, an IBM AIX version of KRS, called InfoExplorer, will be used as the retrieval engine for the CD-ROM-based documentation for the RISC System/6000 computers. With InfoExplorer, users will be able to access all of the documentation for the AIX-3 operating system and system hardware from a single CD-ROM disc that will be read by CD-ROM drives built into most models.

KnowledgeSet will demonstrate searches of the technical documentation on one of IBM's new workstations at Booth 311 of the International CD-ROM Conference and Exposition occurring this week in San Francisco.

According to Chris Bowman, vice president of marketing and operations at KnowledgeSet: ''IBM's use of a built-in CD-ROM drive in its new RISC workstations is a significant step for the CD-ROM industry in penetrating large corporate environments that have been hesitant to invest in CD-ROM hardware.''

He added: ''We see the introduction of IBM's RISC workstations as a major opportunity for KnowledgeSet to work with IBM corporate customers to develop in-house CD-ROM applications.''

As IBM takes advantage of the tremendous storage capacity of CD-ROM for automating the 16,000 pages of documentation for the RISC System/6000 computers, KnowledgeSet's KRS technology will play a vital role in making this information easily and quickly accessible.

KnowledgeSet's retrieval systems run under the three major operating environments -- DOS, UNIX and Macintosh -- and are designed to search text and display associated graphics. KRS features several search methods to help users locate information including And, Or, But Not, Exact Order and Wildcard searching.

Based in Mountain View, Calif., KnowledgeSet Corp. designs, develops and markets productivity tools for information management. The company's licensees include American Airlines, Apple Computer, British Airways, Ernst & Young, IBM, Information Handling Services, Siemens and Sony.

#90058b0647 02/27/1990 ~Business Wire

NEEDHAM, MA (FEB. 27) BUSINESS WIRE - Cognex Corp. (NASDAQ:CGNX), a leading supplier of machine vision systems, Tuesday announced the appointment of Neil R. Bonke as the company's chief operating officer.

Bonke will join Cognex on March 5, filling the position left vacant by the resignation of Allan Wallack earlier this month.

Bonke previously served as president of the Xynetics Division of General Signal Corp. where he was responsible for its multi-million semiconductor equipment business. General Signal Corp. has been a major customer of Cognex since 1986.

''Through Cognex's business affiliation with General Signal Corp., I have had the opportunity to become acquainted with Neil on both a professional and personal level, and I have tremendous respect for his capabilities,'' said Dr. Robert J. Shillman, president and chief executive officer of Cognex Corp.

''Neil's extensive management experience, coupled with his understanding of the industries to which we currently market our products, make him ideally suited to oversee Cognex's day-to-day operations. In addition, he brings to us sales and marketing expertise that will be instrumental in guiding Cognex into new markets and territories.''

Bonke, who holds a bachelor's degree in engineering/technical marketing, has held senior-level executive positions with General Signal Corp. since 1980. Prior to that, he served as vice president of sales and marketing at a division of Sybron Corp. In total, he has more than 25 years of management experience.

Cognex also announced today that William Silver, a founder and vice president of research & development, has been appointed acting vice president of engineering. Silver replaces Kent Blackett who resigned from the company on February 23 for personal reasons.

Cognex Corp. designs, develops, manufactures and markets a family of machine vision systems -- computers that can ''see.'' The company's products are used to replace human vision in a wide range of manufacturing processes in the semiconductor, electronics, pharmaceutical and aerospace industries.

BENTONVILLE, AR (FEB. 27) BUSINESS WIRE - Wal-Mart Stores Inc. (NYSE/PSE:WMT), Tuesday reported record sales and profits for the fourth quarter and year ended Jan. 31, 1990.

Unaudited sales were $25,810,656,000, up from $20,649,001,000 a year ago, a 25 percent increase. Unaudited net income increased 29 percent to $1,075,900,000, up from $837,221,000 a year earlier. Fully diluted net income per share was $1.90 for the year ended Jan. 31, 1990, as compared with $1.48 per share a year earlier. Return on the beginning of the year shareholders' equity was 36 percent as compared with 37 percent a year ago.

Fourth quarter sales increased 24 percent to $8,107,486,000 from $6,530,736,000 in the like quarter last year. Net income increased 32 percent to $425,862,000 from $323,186,000 in the prior year's final quarter.

The costing of inventories under the LIFO method reduced net income $19,667,000, or three cents per share this year as compared with $55,921,000, or 10 cents per share, last year.

Commenting on the company's performance this past year, President and Chief Executive Officer, David Glass, said: ''We are extremely pleased to report another record year of sales and earnings.

At Jan. 31, the company operated 1,402 Wal-Mart stores, 123 Sam's Wholesale clubs, and three Hypermart USA units, compared with 1,259 Wal-Mart stores, 105 Sam's Wholesale clubs, 14 dot Discount Drug stores, and one Hypermart USA unit at the same time last year.

The dot Discount Drug stores were sold effective with the start of business on Feb. 1, 1990.

Wal-Mart operates in a 29 state trade territory and its securities are listed on the New York and Pacific stock exchanges.

#90058b0651 02/27/1990 ~Business Wire

IRVINE, CA (FEB. 27) BUSINESS WIRE - Laser Precision Corp. (NASDAQ:LASR) Tuesday announced financial results for the year ended Dec. 31, 1989.

In 1989 Laser Precision earned net income of $157,000, or 4 cents per share on net sales of $26,164,000, compared with net income of $1,855,000, or 51 cents per share on net sales of $26,521,000 for the year ended Dec. 31, 1988.

In the fourth quarter of 1989, the company incurred a net loss of $514,000 or 13 cents per share on net sales of $6,718,000 compared with net income of $620,000, or 16 cents per share on net sales of $7,626,000 for the corresponding quarter of the prior year.

David M. Goodman, chairman and chief executive officer, stated that the company was disappointed with the performance of its analytical instruments division in 1989. A restructuring of management and of the sales and marketing organization did not begin to produce the anticipated pick-up in sales bookings until the fourth quarter of the year.

Additionally, the fourth-quarter and year-end results were negatively impacted by sales discounts and inventory write downs, that severely cut gross profit performance in both of its operating divisions.

Despite the below-plan 1989 results, strong new order bookings of $8,295,000 in the fourth quarter leads management to be cautiously optimistic about the outlook for the new year. The noted bookings brought 1989 year-end backlog to $3.76 million.

The 3M lawsuit against Laser Precision Corp. filed on Dec. 28, 1989, in Federal District Court in Albany, N.Y., was heard on Feb. 9, 1990, and is now in settlement negotiations. The settlement is due to be completed on March 1, 1990. As part of the agreement, Laser has agreed not to employ Peter Milstead, the former 3M employee whose hiring by Laser precipitated the lawsuit, until August 1, 1990, during which time his salary and fringe benefits will be paid by 3M. As part of the settlement, 3M will dismiss all of its claims for damages against Laser Precision.

Laser Precision is a manufacturer of test and measurement instruments combining advanced optical designs with microprocessor technology. The company's products are used in fiber optic telecommunications, laser research, quality control and chemical analysis.

Its radiometric and fiber optic division is located in Utica, N.Y. and its analytical instrument division and corporate headquarters are located in Irvine, Calif.

#90058b0654 02/27/1990 ~Business Wire
LOVELAND, OH (FEB. 27) BUSINESS WIRE - Baldwin Piano & Organ Co.'s sales for the 12 months ended Dec. 31, 1989, decreased 7 percent to $126,106,000 from $135,440,000 last year.

Net earnings decreased 63 percent to $2,067,000 from $5,545,000 in the prior year. Earnings per share decreased 62 percent to 53 cents from $1.41 a year earlier. The decrease in net earnings for the 12 months ended Dec. 31, 1989, compared to the like period in 1988 was a result of lower sales, higher interest rates on borrowing and a writedown of certain inventory primarily related to the electronic contracting and electronic keyboard businesses. Such writedown reduced net earnings for 1989 by approximately $1.5 million (37 cents per share).

For the three months ended Dec. 31, 1989, Baldwin sales decreased 24 percent to $33,619,000 from $43,986,000 a year ago. Baldwin's net earnings and earnings per share for the three months ended Dec. 31, 1989, decreased 85 percent from the comparable period a year ago. Net earnings for the three month period was $313,000, 8 cents per share in 1989, comapred to $2,132,000, 54 cents per share, in 1988.

The decrease in net earnings for the fourth quarter of 1989 compared to the same period in 1988 was a result of lower sales and a write down of certain inventory primarily related to the electronic contracting and electronic keyboard businesses. Such writedown reduced the net earnings for the fourth quarter of 1989 by approximately $1.2 million (31 cents per share).

Decreased sales have occurred throughout the keyboard industry as consumers have cut back on discretionary spending. Although the company's sales have declined, the company believes it has increased its domestic market share.

Baldwin Piano & Organ Co. is the largest domestic manufacturer of keyboard musical instruments, and also manufactures grandfather and other quality clocks, printed circuit boards and wooden cabinets.

#90058b0655 02/27/1990 ~Business Wire

HOUSTON (FEB. 27) BUSINESS WIRE - Reliability Inc. (NASDAQ: REAL) Tuesday announced revenues and results of operations for the year ended Dec. 31, 1989.

Revenues for the twelve months ended Dec. 31, 1989 were $38,073,000, down 9 percent from revenues of $41,817,000 for the like period in 1988. Operations for the 12 months ended Dec. 31, 1989 resulted in net income of $92,000, or two cents per share, compared to net income of $1,073,000, or 25 cents per share for the year ended Dec. 31, 1988.

Revenues for the fourth quarter of 1989 were $8,602,000, down 23 percent from revenues of $11,101,000 for the like period a year earlier. Operations for the fourth quarter of 1989 resulted in a net loss of $584,000, or 14 cents per share, compared to net income of $815,000, or 19 cents per share for the quarter ended Dec. 31, 1988.

Backlog as of Dec. 31, 1989 was $7,909,000, reflecting a three percent increase over the Sept. 30, 1989 backlog of $7,698,000. Backlog at Dec. 31 1988 totalled $9,240,000.

The excess capacity in the semiconductor industry and resulting decline in prices, particularly in one Meg DRAMS, led to a sharp reduction in demand for equipment in the fourth quarter. Although our service and power products business held up reasonably well, they were not sufficient to offset the revenue decline in the equipment segment.

The resulting loss in the fourth quarter reduced full year profits to only $92,000, or 2 cents per share.

Reliability Inc. is based in Houston with operating facilities in Durham, N.C.: Singapore; Slough, England; Tokyo, Japan; and Nenagh, Rupublic of Ireland. The company maintains technology centers in Sunnyvale, Calif.

and Wakefield, Mass.

Reliability and its subsidiaries manufacture burn-in and test equipment, loading and unloading equipment, and other peripherals for sale to manufacturers and volume users of integrated curcuits.

The company also manufactures a line of power sources, including DC-to-DC power converters, and provides conditioning and testing services for integrated circuits in Singapore and Durham. After-sales installation and field service of equipment is available to customers worldwide.

COSTA MESA, CA (FEB. 27) BUSINESS WIRE - CIMCO Inc. (NASDAQ:CIMC) Tuesday announced record sales for its third fiscal quarter.

As anticipated, net income demonstrated strong improvement over the preceding quarter, but was slightly below last year's third quarter.

Consolidated sales for the three months ended January 31, rose to an all-time high of $14,825,133 from $14,033,485 for the like period a year ago. Net income for the period was $703,212, or 23 cents per share, vs. $755,188, or 25 cents per share, for the previous fiscal year.

For the nine months of fiscal 1990, net sales were $40,578,262, with a net income of $920,019, or 30 cents per share. For the like period a year ago net sales amounted to $41,118,441, with a net income of $2,420,622, or 80 cents per share.

''We are pleased with the progress CIMCO has made thus far in building earnings momentum through the second and third quarters,'' said Russell T. Gilbert, president and chief executive officer.

''Order backlogs have increased; our utilization of plant capacity is up; and we have moved into production on several important product lines that had been in start up phases. We see these positive improvements continuing in the months ahead.''

Gilbert also said the company's two-year-old materials compounding plant in Charlotte, N.C., has begun to penetrate the large market in the southeastern United States with its sophisticated reinforced thermoplastics. The Charlotte facility has recently shown significant progress and is expected to continue this trend in subsequent quarters.

Founded in 1959, CIMCO, a major manufacturer of high-precision thermoplastic custom products and supplier of the custom polymeric compounds, serves more than 100 original equipment manufacturers in the electronics, computer, transportation, health care and defense industries.

#90058b0660 02/27/1990 ~Business Wire

HAMPTON, NH (FEB. 27) BUSINESS WIRE - The Timberland Co. (AMEX:TBL) Tuesday announced its financial results for the fourth quarter and year ended Dec. 31, 1989.

Net income for the fourth quarter was $2,468,000, or 23 cents per share, compared to $384,000, or 4 cents per share, for the fourth quarter of 1988. Net sales for the fourth quarter of 1989 were $44.4 million, a 28 percent increase over the same period of the prior year.

Net sales for the year 1989 were $156.1 million, 18 percent higher than $132.6 million for the same period of 1988. Net income for 1989 was $6,380,000, or 60 cents per share, as compared to $8,077,000, or 76 cents per share, for the year, 1988.

Sidney Swartz, president and chairman, stated that he was pleased with the progress made by the company during 1989, and the financial results for the fourth quarter. He also indicated that in December, the company completed a private placement of $35 million of long-term financing with a group of institutional lenders.

These senior notes have a final maturity of 10 years with payments of interest only for the first five years; the interest rate is 9.70 percent, annually. The company primarily used the proceeds to pay off loans under an existing revolving credit agreement.

The Timberland Co. designs and manufactures premium quality footwear, accessories, and apparel for men and women, sold nationally and in 18 countries worldwide through specialty stores, better-grade department stores and shoe stores.

The company has been a leader in technical innovation, developing the first guaranteed waterproof leather boots, mastering the traditional art of handsewn shoes, and introducing Gore-Tex laminate technology to the footwear industry. The company's world headquarters are in Hampton, N.H.

#90058b0662 02/27/1990 ~Business Wire

MIAMI (FEB. 27) BUSINESS WIRE - Ryder System Inc. (NYSE: R) has filed a registration statement with the Securities and Exchange Commission for a public offering of Fixed Rate Auction Preferred Stock (FRAPS) with a total par value of $150 million, it was announced Tuesday by Chairman, President and Chief Executive Officer M. Anthony Burns.

The offering will consist of 1.5 million shares, issued in 1000-share units, with a par value of $100 per share.

The new issue would carry a fixed dividend rate for an initial term, expected to be three years. Thereafter, the dividend would be determined every 49 days in competitive bidding by investors.

The FRAPS would also carry event risk covenants, which provide for the convertibility of the preferred shares into common shares upon the occurence of certain designated events.

Ryder System plans to use the proceeds of the FRAPS to redeem $100 million of the company's currently outstanding Dutch Auction Rate Transferable Securities (DARTS) series A and B preferred issues, and to reduce indebtedness.

In addition, the proceeds may be used to finance subsidiaries' capital expenditures, to repurchase Ryder System common stock under the repurchase program announced in 1989, or to invest temporarily in short-term marketable securities.

FRAPS issues differ from DARTS in that they carry a fixed dividend rate for an initial term, after which the Dutch auction process determines the dividend every seven weeks. FRAPS are not redeemable during the fixed-rate period except, at the company's option, on the business day before the first auction at $100,000 per unit plus accumulated unpaid dividends.

After the fixed-rate period, the company may redeem FRAPS units on any dividend payment date.

Salomon Brothers Inc. and Merrill Lynch Capital Markets will be underwriters and co-managers of the proposed offering.

Ryder System Inc. is the parent of a group of companies which provide

high-quality transportation and aviation services. The company is a component of the Dow Jones Transportation Average and the Standard & Poor's 500 Index.

#90058b0663 02/27/1990 ~Business Wire

LOUISVILLE, KY (FEB. 27) BUSINESS WIRE - Kentucky Medical Insurance Co. (NASDAQ:KYMDA) Tuesday reported improved revenues and earnings for 1989.

For the year ending Dec. 31, operating earnings were $3.2 million, 63 percent higher than the previous year. Net income, whichincludes tax credits, increased 49 percent to $4.0 million from $2.7 million. Total revenues rose 12 percent to $22.9 million.

On a per share basis, operating income rose 28 percent to $3.25 from $2.55 per share. Per share calculations for 1989 are based on a weighted average 978,000 shares outstanding, compared with 765,000 shares the previous year.

Also, shareholders' equity increased 73 percent to $11.5 million, or $10.65 per share. Total assets expanded 17 percent to $66 million.

''We're very pleased with the company's exceptional performance in the highly competitive environment we faced during 1989,'' said Chief Operating Officer David W. Lester.

Lester attributed the improved performance to increased investment income, lower-than-expected claims and related loss payments and new earnings from the company's reinsurance subsidiary. For the fourth quarter, revenues increased to $5.8 million from $4.6 million for the fourth quarter of 1988. Operating income was $858,000, or 88 cents per share, compared with $602,000, or 78 cents per share, in the last quarter of 1988.

Net income was $858,000, or 88 cents per share, versus $956,000, or $1.24 per share. Net income for the fourth quarter of 1988 included an extraordinary tax credit of $354,000, or 46 cents per share. The company exhausted these tax credits during the third quarter of 1989.

Lester said the company is unlikely replicate the exceptional growth of 1989, but he said: ''We expect 1990 to be a year of strong, steady advancement.''

Kentucky Medical Insurance Co. offers medical professional liability insurance to Kentucky physicians, dentists, oral surgeons, other health

care professionals, hospitals and other health care facilities. The company also offers investment, leasing and other insurance services to the Kentucky medical community.

#90058b0666 02/27/1990 ~Business Wire

EAST HARTFORD, CT (FEB. 27) BUSINESS WIRE - TRC Cos. Inc. (AMEX:TRR) announced Tuesday that its board of directors has authorized the purchase of up to 375,000 shares of its common stock.

Purchases will be made on the open market from time to time during the fiscal year ending June 30, 1990.

The actual number of shares that the company will repurchase will depend on prevailing market conditions and if all of the 375,000 shares are repurchased, this would represent approximately 7 percent of the outstanding shares of the company's common stock.

Management stated that the company's current book value per share is approximately $5.44 and with the company's stock selling at $3.875, the buyback plan is a good use of the company's cash. The buyback should have a positive effect on earnings per share in fiscal 1991.

TRC Cos. Inc. and its engineering, laboratory and instrument subsidiaries service clients from 14 offices throughout the U.S.

#90058b0667 02/27/1990 ~Business Wire

ANAHEIM, CA (FEB. 27) BUSINESS WIRE - AT&T Network Systems Tuesday announced five new frequency-control components that time, or recover timing from, information transported in digital systems.

The five products constitute a broad set of timing-recovery devices for use in equipment compatible with the data rates of an emerging industry standard for fiber-optic telecommunications networks of the future.

The emerging Synchronous Optical Network standard (SONET), specifies common rules to ensure efficient, high-volume transport of digitized voice image or data communications on fiber-optic networks. This allows communication between different vendors' equipment in a standard form,

requiring no special adaptations to pass information between networks.

The standard is also expected to promote lower costs in fiber-optic network systems.

''AT&T supports the SONET standards and is working at the component level to help system designers as they devise equipment that offers network providers the benefits of efficient SONET-based fiber communications,'' says Paul Gagnon, manager, Component Product Planning, AT&T Network Systems.

Introduced at Nepcon West, the timing components clean up the incoming stream of digital data and recreate it exactly as it was sent from remote transmitting equipment.

The new products are:

- The TRU-200C Clock Recovery and Data Retiming Module - an integrated SONET-compatible device that extracts the clock signal and retimes the data from a digital information stream. This low phase-noise (low-jitter) device has an error rate of less than one bit per billion bits of extracted data. The TRU200C module eases the burden on the system designer by combining into a single compact package the dual functions of clock recovery and data retiming.

- Three SONET-compatible Retiming Surface Acoustic Wave (SAW) Filters, which meet the SONET standards for high data rate systems. With reliability based on proven technology, these devices exceed other retiming circuits in jitter performance.

- The 157-type VHF Voltage-Controlled Crystal Oscillator with a wide range of nominal frequencies, encompassing two of the SONET-specified data rates.

All five timing components are available today.

NEW YORK (FEB. 27) BUSINESS WIRE - Westvaco Corp. (NYSE:W), a major manufacturer of paper, packaging and chemicals, reported Tuesday at its 102nd annual meeting its sales and earnings for the first quarter of fiscal 1990 and reviewed with shareholders the company's progress toward the objectives of its growth program and its commitment to the environment.

First quarter sales for the period ended Jan. 31 were $585,493,000, a new record, compared to $554,622,000 for the comparable period in 1989, an increase of 5.6 percent from last year's first quarter record.

Pretax income for this quarter was $82,338,000 and exceeded the first quarter record set last year by 1 percent, while net income was $46,438,000, or 71 cents per share, compared to $48,650,000, or 75 cents per share, a decrease of 5 percent from last year's first quarter record.

First quarter results for fiscal 1990 included two unusual costs which totaled 9 cents per share. They were associated with a temporary interruption of production on one of the company's large paper machines to equip it to produce new products and the adverse impact of the very severe cold weather which affected the southern part of the country at year end.

During the first quarter of fiscal 1990, Westvaco's shareholders received record dividends of 25 cents per share, which were 9 percent greater than the 23 cents per share in the same period last year.

When the company's board of directors increased the dividend rate in the latter part of fiscal 1989, it was the 20th time in the past 26 years that the dividend was increased.

WHITE PLAINS NY (FEB. 27) BUSINESS WIRE - Lotus Development Corporation and IBM Tuesday announced Lotus 1-2-3/M(a), an IBM System/370(a) application based on Lotus 1-2-3 Release 3 technology and designed to facilitate Enterprise Spreadsheet Computing.

By integrating personal computer and host spreadsheets, Enterprise Spreadsheet Computing allows users throughout an organization to build enterprise-wide applications and tap resources such as IBM relational databases. Lotus 1-2-3/M was developed by Lotus. As an IBM Program Product, it will be exclusively marketed, serviced and supported by IBM.

"A wide set of our customers have identified a need to manipulate, transfer, and consolidate spreadsheet data across an enterprise," said Joseph M. Guglielmi, IBM vice president and president, Application Solutions Division. "We will use Lotus' spreadsheet expertise and IBM's experience with large systems and relational databases, utilizing IBM's worldwide marketing channels, to meet those customer needs with the

1-2-3/M solution."

"Through the familiar environment of Lotus 1-2-3 (b), Enterprise Spreadsheet Computing with Lotus 1-2-3/M brings compatibility and consistency to customers who need to integrate their personal computer and mainframe applications in a networked computing environment," stated Jim Manzi, president and CEO of Lotus.

"Enterprise Spreadsheet Computing combines the familiarity and responsiveness of 1-2-3 running on personal computers with the data resources and centralized services of mainframes to provide users with a single applications environment."

Lotus 1-2-3/M serves as the "hub" of an Enterprise Spreadsheet Computing model in which mainframe spreadsheets can be connected to 3270 terminals or to multiple personal computers running versions of Lotus 1-2-3, including 1-2-3 Release 2.01, 1-2-3 Release 2.2, 1-2-3 Release 3 and 1-2-3/G.

Enterprise Spreadsheet Computing provides an effective environment for distribution of standard spreadsheet templates, organization-wide consolidation of spreadsheets, host database access and analysis, and streamlined processing of compute-intensive applications.

As a complement to personal computer versions of 1-2-3, Lotus 1-2-3/M creates a bridge between end-user computing and traditional MIS services. Through the familiar interface of 1-2-3, Lotus 1-2-3/M facilitates end-user programmability at the mainframe and personal computer levels.

End-users can quickly produce spreadsheet applications which can be executed on either platform. Enterprise Spreadsheet Computing has been validated by the nearly two dozen early-installation customers who have been using Lotus 1-2-3/M since August.

SEBRING, FL (FEB. 27) BUSINESS WIRE - First Home Federal Savings and Loan Association will pay a cash dividend of six cents per share to its stockholders of record on March 12, announced Stanley H. Davis, chairman of the board, president and chief executive officer, after a meeting of the board of directors held on Feb. 26.

Davis stated that payment of such dividend is scheduled for March 30.

First Home Federal had assets of $207.8 million and equity of $23.7

million at Dec. 31, 1989 and operates from eight offices in Highlands and Hillsborough Counties in south central Florida and on Florida's west coast.

The Association's common stock is traded in the over-the-counter market and quoted on the NASDAQ system under the symbol ''FSEB.''

PARIS (FEB. 27) BUSINESS WIRE - Digital Equipment Corp. Tuesday announced new capabilities and products that significantly help Information Systems managers cope with ever-increasing competitive pressures and technology change.

The new generation of products and services fully integrate transaction processing and fault tolerance into the indstry's leddig enterprise computing environment that can be distributed where needed on a global basis.

Today's announcements enhance transaction processing applications like order processing, inventory management, funds transfer, and cellular telephone billing in market segments such as manufacturing, financial services, telecommunications and retail sales.

The Next Generation -

Extending the Leading Range of High Availability Solutions

Digital extended its industry-leading range of high availability solutions by adding fault-tolerant technology to the VAX family line. The VAXft 3000 Model 310 is the first in a series of fault-tolerant systems to be added to the VAX family.

The announcement included:

-- The new VAXft 3000 Model 310 fault-tolerant VAX system, the first fault-tolerant system in the industry to run a mainstream operating environment, VMS, is also the first in which every component, including the backplane, is mirrored. In the event of a power failure, the complete in-cabinet system is kept operational for up to fifteen minutes by its own built-in power supply.

-- Two new disk storage options, and a new tape drive incorporate data reliability features including error detection and checking, read-back verification and automatic switch-over in case of failure. In addition,

enhancements to VMS Volume Shadowing, a software product that extends the availability of information stored on disk drives, includes support for the VAXft 3000 Model 310. The two disk options are priced at US$9600 and US$8500 and are available in June; the tape drive costs US$7100 and is available in June.

Digital Equipment Corp., headquartered in Maynard, Mass., is the world's leading manufacturer of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

PARIS (FEB. 27) BUSINESS WIRE - Information Builders Inc. (IBI) announced Tuesday, at the DECtp II press event, that FOCUS for VAX system, the leading fourth generation language (4GL) will immediately support the new releases of Digital Equipment Corporation's Rdb/VMS version 4.0 and DBMS version 4.2 database systems.

IBI's FOCUS tightly integrates with Rdb and DBMS database systems to provide a comprehensive set of application development and decision support tools. "Digital's new Rdb database system will further enhance the comprehensive security and data integrity capabilities currently available

to FOCUS users by ensuring data integrity across distributed networks," said Melissa Webster, vice president of Information Builders' VAX System Division.

"Improved performance, coupled with other new Rdb features, such as support of triggers, and two-phase commit, make FOCUS and Rdb database system a powerful solution for enterprise-wide information management. The new Rdb release in conjunction with the new fault-tolerant VAX system, provides FOCUS users a high-availability system for rapid deployment of mission-critical, distributed applications," Webster said.

The availability of FOCUS for Rdb 4.0 and DBMS 4.2 database systems further enhances Information Builder's plan to deliver Network Application Support (NAS) and ALL-IN-1 Phase II integration for true multi-vendor solutions from desktop to the data center.

FOCUS provides tools for users at all levels of existence. Application developers can build sophisticated transaction and decision support applications, while end-users have the tools to easily generate reports, graphics, statistics, and spreadsheets, as well as perform ad hoc queries.

These facilities have access to all of an enterprise's data, whether it resides in Rdb, RMS, DBMS database systems, third-party databases, data residing on mainframes, or PCs in Local Area Networks.

Information Builders also delivers application development and decision support solutions to ALL-IN-1 users with the FOCUS for ALL-IN-1 Interface. The interface seamlessly combines the rich functionality of FOCUS with ALL-IN-1's productivity services to provide the most powerful integrated environment for creating intelligent office systems, and improving the productivity of the ALL-IN-1 developer and the end-user.

Information Builders Inc. is a privately held company, incorporated in 1975, and is one of the top independent software vendors, with 1989 revenues of approximately $155 million.

HACKENSACK, NJ (FEB. 27) BUSINESS WIRE - The Alpine Group, Inc. (ASE:AGI) Tuesday announced that it had settled its disputes with ATP Holdings Corp. arising out of the September 1988 sale by Alpine of 92.5 percent of its American Trim Products, Inc. (''ATP'') subsidiary.

As part of such settlement, Alpine exchanged a $10.95 million promissory

note and $1 million of Preferred Stock of ATP's parent corporation, together with its remaining 7.5 percent interest in ATP, for $4.5 million of 8 percent Cumulative Preferred Stock of ATP, redeemable in 1996 and 1997, and $2 million of Alpine's 10 percent Cumulative Convertible Preferred Stock held by ATP. All litigation between the parties has been terminated.

In addition, Alpine and ATP have entered into an Asset Purchase Agreement pursuant to which Alpine (or its assignee) has the right to purchase the Button Division of ATP for a nominal purchase price plus assumption on a non-recourse basis of $12 million of allocable senior debt. The closing of The Asset Purchase Agreement is contingent upon certain third party consents, including ATP's senior lender. Alpine may in its sole discretion terminate the Agreement at any time.

Steven S. Elbaum, the Chairman of Alpine, stated that the restructuring of the ATP indebtedness and related securities and settlement of the litigation was in the best interest of Alpine shareholders after evaluating all the relevant circumstances. Mr. Elbaum further stated that Alpine's objective is to recapitalize or resell the Button Division on terms that reasonably protect Alpine's remaining book values in the restructured ATP securities.

The Alpine Group, Inc. is a holding company with subsidiaries organized as two business groups. The Industrial Products/Services Group provides specialty coatings of parts and components used in the defense, aerospace and other industries. The Information Display Group is developing the PolyVision flat panel display technology. Flat panel display technologies are utilized for the electronic display of information and graphics on screens and other display media including portable computer terminals, automobile and aircraft instrument panels and video displays. The Information Display Group also provides indoor menuboard display systems and components to fast food and convenience stores and specialized products for the audiovisual display industry.

#90058b0687 02/27/1990 ~Business Wire

COSTA MESA, CA (FEB. 27) BUSINESS WIRE - In a key strategic move to improve the quality, productivity, and efficiency of its advertising customer service operation, Pacific Bell Directory has purchased two image processing systems from FileNet Corp. (NASDAQ:FILE).

Pacific Bell Directory, a subsidiary of Pacific Bell, is one of the largest directory publishers in the country. The value of the contract is approximately $3 million.

Pacific Bell Directory will use the FileNet systems to maintain advertising contracts and artwork, as well as to access a mainframe system that handles customer claims and billing.

"We view our purchase of the FileNet systems as a strategic move in our effort to improve operations," said Bob Cunningham, executive director of customer service for Pacific Bell Directory. "Our new FileNet systems will allow our advertising customer service representatives to resolve a greater number of customer claims on the initial call."

Using the FileNet system, customer service representatives will be able to access all types of information -- images of contracts, artwork and other documents, plus on-line data entry screens with customer billing information -- from a single FileNet workstation. As a result, Pacific Bell Directory will be able to provide better service to its customers.

The Pacific Bell Directory installation will be one of the largest single-application FileNet systems to date and will eventually include more than 160 workstations.

FileNet Corp. is the worldwide leader in manufacturing and marketing image processing systems used in fundamental business applications. A pioneer in its field, FileNet today has more than 300 system installations in 25 countries.

The image processing market is projected to generate U.S. sales of approximately $1.7 billion in 1993. The company, which is headquartered in Costa Mesa, has sales offices in the United States, Canada, France and Germany. FileNet systems also are sold in 21 other countries by Ing. C. Olivetti & C., S.p.A. and other distributors.

#90058b0692 02/27/1990 ~Business Wire

NORTHRIDGE, CA (FEB. 27) BUSINESS WIRE - Pacific Southwest Corp. (OTC) Tuesday announced a net loss of $2,685, or less than $.01 per share, on revenues of $770,704 for the first quarter of fiscal 1990 ended Oct. 31,

1989.

For the first quarter of fiscal 1989, the company reported net income of $48,628, or $.03 per share, on revenues of $635,384.

President Jerry Fraschilla said that the increase in revenues primarily reflected the expansion of Pacific Southwest's mortgage banking operations through the acquisition in July 1989 of Midland Pacific Mortgage Corp., an originator and reseller of FHA/VA and conventional mortgages with seven offices in the San Francisco Bay area.

He said that net income declined in the period mainly because of an increase in general and administrative expenses related to the costs of integrating Midland Pacific into the company's existing mortgage banking operations.

''We expect the costs of integrating Midland Pacific and Consumer Mortgage Inc., Santa Ana, Calif., a wholesaler of FHA/VA and conventional mortgages acquired in December 1989, to be fully absorbed by the end of the third quarter, so our expanding mortgage banking business should begin making a positive earnings contribution in this years's second half,'' Fraschilla said.

Since its formation in 1980, Pacific Southwest Corp. has increased shareholders' equity more than 20-fold by identifying and purchasing real estate and other assets on favorable terms. The company also has built, largely through acquisition, complementary mortgage banking and financial service businesses that provide the medium to further enhance and unlock the value of Pacific Southwest's growing asset base.

#90058b0695 02/27/1990 ~Business Wire
ST. CHARLES, MD (FEB. 27) BUSINESS WIRE - Interstate General Co. L.P. (ASE:IGC) Tuesday reported record operating results for the year ended Dec. 31, 1989, and increases in the year's fourth quarter revenues and earnings.

IGC, a diversified real estate development and building organization, announced net income for 1989 was $12.7 million, or $1.27 per unit, up from 1988 profit of $12.3 million, or $1.23 per unit.

Revenues in 1989 rose to $61.7 million, compared to $58.7 million the previous year.

For the final three months of 1989, net income rose 32 percent to $3.3

million, or 33 cents per unit, compared to $2.5 million, or 25 cents per unit, in the 1988 fourth quarter. Revenues were $19.0 million, an 18 percent increase over $16.1 million for the same period in 1988. The quarterly earnings were the second-best ever for the firm.

James J. Wilson, chairman and chief executive officer of IGC, said that 1989 operating earnings were much improved over the previous year, considering that 1988 earnings included $4.2 million from the sale of the cable television system serving Charles County, Md.

Wilson attributes the company's success in 1989 to its diversity and the strength of its land assets.

The CEO emphasized that IGC's operating results should be evaulated over an extended period of time due to the cyclical nature of the company's business.

In 1989, IGC paid cash distributions totalling 74 cents per partnership unit, which represents a 23 percent increase over the amount paid the previous year.

Headquartered in St. Charles, IGC is engaged in four related areas of operation: community development, homebuilding, investment properties and management services.

Listed on the American and Pacific stock exchanges, the company is a master limited partnership.

#90058b0696 02/27/1990 ~Business Wire

PALO ALTO, CA (FEB. 27) BUSINESS WIRE - Hewlett-Packard Co. Tuesday announced that customers can replace paper documentation and updates to operating systems on magnetic tape with CD-ROMs (compact disc read-only memory), significantly cutting their costs and the time it takes to access needed information.

The program -- called HP CD-ROM integration -- provides support material related to the operation of HP minicomputers and workstations on CD-ROM. This material includes technical user's manuals, software-status bulletins application notes, operating- system software and subsystem software.

CD-ROM is an extension of the technology found in audio-compact discs. The same platter on which the music industry places 70 minutes of digital sound also can store the equivalent of hundreds of floppy diskettes.

HP CD-ROM integration, which is designed for system managers, system administrators and software engineers, addresses the HP MPE/V, MPE/XL, and HP-UX operating-system environments. Documentation on CD-ROM is updated monthly for HP MPE and HP-UX customers. In addition, HP distributes software for the MPE/V operating system on CD-ROM.

By placing data on CD-ROM, the customer instantly can locate specific information instead of manually paging through paper documentation. In the case of software distribution on CD-ROM, the user can reduce software installation time by 50 percent.

''Both approaches enable customers to do more themselves, which lowers the cost of owning an HP computer,'' said Douglas R. Chapin, product-marketing manager for HP's Application Support Division.

In the past, HP customers automatically received documentation and software on paper as part of their support contracts. If a customer preferred the information on compact discs, an extra charge was incurred.

For example, an HP MPE/XL minicomputer customer who requires more than one set of documentation will pay 70 percent less for the additional sets on CD-ROM as compared to paper.

To achieve this price reduction, HP built an information- manufacturing process that automates much of the CD-ROM production.

The HP CD-ROM integration program is expected to be available in the United States in April and elsewhere in July.

To complement its CD-ROM services, HP markets two CD-ROM drives. HP's half-height, 5 1/4-inch CD-ROM drive for a standard PC is $1,095 U.S. list price. The HP Series 6100 stand-alone CD-ROM drive, which connects directly to an HP minicomputer or HP workstation via an HP-IB interface, is $1,995 U.S. list.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

NEW YORK (FEB. 27) BUSINESS WIRE - The New York State Metropolitan Transportation Authority consisting of Long Island Railroad, Metro North Commuter Railroad, Triborough Bridge and Tunnel Authority, and the New York City Transit Authority and Cable Applications Inc. (NASDAQ Symbol: CBLE) entered into a letter of intent Tuesday to negotiate a license agreement for the installation, maintenance and operation and ownership of a common carrier fiber optic Metropolitan Area Network (MAN), in selected rights of way in the New York subway system. The initial license agreement to be negotiated will be for a 14 mile fiber optic network through subway routes of NYCTA in the boroughs of Manhattan and Brooklyn connecting areas from 59th South to the Wall Street area with a fiber leg to the Metrotech complex in Brooklyn. The term of the license agreement shall be co-terminus with the MTA agency's lease for its rights of way with the city of New York, up to a maximum term of 60 years.

Cable Applications has successfully installed fiber optic networks as well as cable and microwave in some of the largest telecommunication systems in the northeast, among them are, Columbia University, Sloan Kettering, and Consolidated Edison. They have done so working for such companies as, IBM, Rolm, NYNEX, AT&T, and Northern Telecom.

After installation of the system, Cable Applications can offer to New York City businesses and government a wide variety of telecommunication services some of which do not exist today, because they can only be provided through the utilization of a wide band with fiber optic network.

BIRMINGHAM, AL (FEB. 27) BUSINESS WIRE - Protective Life Corp. (NASDAQ:PROT) announced Tuesday that its 1989 consolidated net income was $21.8 million or $1.58 per share compared to $1.2 million or 9 cents per share in 1988.

The company also announced that its consolidated net income for the fourth quarter of 1989 was $5.6 million or 41 cents per share compared to a loss of $8.9 million or 64 cents per share in the 1988 fourth quarter. In 1988 the company's earnings were reduced in the fourth quarter by nonrecurring charges of $11.5 million or 82 cents per share.

Included in its 1989 fourth quarter earnings are realized investment losses of 5 cents per share compared to realized investment gains of 6 cents per share for the first nine months of 1989.

The company's 1989 results reflect improved earnings in all of its major lines. Individual life sales measured by new annualized premium increased 21 percent over 1988. Deposits totaling $107 million were received during

1989 for individual annuity and guaranteed investment contracts, both of which are new lines for Protective.

The company also announced that the overall quality of its investment portfolio continues to be excellent. Approximately 53 percent of its bond portfolio is invested in U.S. Government-backed securities or AAA rated corporate bonds, while only 6 percent of its bond portfolio is rated less than investment grade.

Also, its mortgage portfolio consists primarily of higher quality commercial mortgages with a delinquency rate of less than 2 percent and no significant anticipated loss of principal.

#90058b0708 02/27/1990 ~Business Wire

STATEN ISLAND, NY (FEB. 27) BUSINESS WIRE - ATLANTIC EXPRESS INC. (NASDAQ:ATEX) Tuesday announced results for the three and six month periods ended Dec. 31, 1989.

Revenues for the quarter ended Dec. 31, 1989 increased 15 percent to $22,844,365 as compared to $19,799,291 for the corresponding quarter in 1988. Net income for the second quarter was $214,078 or 5 cents per share as compared to net income of $1,117,679, or 21 cents per share reported for the second quarter ended Dec. 31, 1988.

Revenues for the six month period ended Dec. 31, 1989 increased 18 percent to $35,023,910 from $29,759,180 for the first six months of the prior fiscal year. The company reported a net loss for the six months of $1,392,431, or 25 cents per share, as compared to net income of $53,249, or 1 cent per share for the six months ended Dec. 31, 1988. Fiscal 1989 six month results included a $675,000 payment from a transportation equipment supplier.

The company also announced that current projections indicate a small loss for the fiscal year ending June 30, 1990 as compared with net income of $1,789,419 for the year ended June 30, 1989.

Commenting on the results, Domenic Gatto, president and CEO stated, ''Due to the start-up costs associated with the acquisition of additional transportation businesses, operating costs increased considerably resulting in lower net income for the three and six months ended Dec. 31, 1989 as compated to the same year ago periods. During the first six months of fiscal 1990, a substantial portion of the company's loss was primarily attributable to the acquisition of its charter, tour and

commuter bus business, which commenced operations in August 1989.

The company presently anticipates that this segment of its business may not become profitable until fiscal 1991. However, these acquisitions position ATLANTIC EXPRESS as a full-service bus transportation company, enhancing the long-term growth potential of our company.''

ATLANTIC EXPRESS INC. is one of the largest contract bus carriers in New York City with a fleet of 1,400 buses currently transporting approximately 65,000 school children daily. The company also provides charter and commuter bus transportation services.

NASHVILLE, TN (FEB. 27) BUSINESS WIRE - Surgical Care Affiliates Inc. (NASDAQ/NMS:SCAF) the Nashville-based owner and operator of outpatient surgery centers announced a quarterly cash dividend of 2 cents per share.

The dividend will be paid on March 12, 1990, to stockholders of record on Feb. 28, 1990. Surgical Care initiated its dividend in the fourth quarter of 1989.

Net revenues for the quarter ended Dec. 31, 1989, were $22,657,233, compared to net revenues of $16,080,895 for the comparable quarter of 1988 reflecting an increase of 41 percent for the quarter. The company reported record net income for the quarter of $1,832,183, or 16 cents per share, compared to $1,163,391, or 11 cents per share in the like quarter of 1988, reflecting an earnings increase of 57 percent and the fifteenth consecutive increase over comparable quarterly earnings.

For the year ended Dec. 31, 1989, net revenues were $82,157,222, compared to net revenues of $52,967,559 for the comparable period of 1988 which was an increase of 55 percent for the period. SCA reported net income of $6,306,537, or 57 cents per share for the twelve month period ended Dec. 31, 1989, compared to $3,506,178, or 34 cents per share for the year ended Dec. 31, 1988, an earnings increase of 80 percent.

Gordon added: ''The excellent operating results achieved by the company make payment of this dividend possible. Cash flow continues to be strong and the expansion program of developing and acquiring new facilities will not be interrupted by this dividend.''

Surgical Care currently operates 26 outpatient surgery centers, a diagnostic center and an HMO. The stock is traded under the symbol of SCAF on the National List of the Wall Street Journal.

WINDSOR LOCKS, CT (FEB. 27) BUSINESS WIRE - Dow Corning Wright, Arlington Tenn., and Xi Tech Inc. (OTC:XITEC), Windsor Locks, Conn., announced Monday an exclusive multi-year agreement under which DCW will distribute Xi Tech's Xiscan 1000 Portable X-ray Imaging System.

Under the terms of the agreement, DCW will initially purchase

systems for use by its sales representatives. John Temple, president, said ''the Xiscan 1000 will receive tremendous exposure through DCW's large sales organization.'' Temple expects that Xi Tech's gross sales will more than triple over the prior year as a result of this agreement and other developments.

Dow Corning Wright (DCW) is a wholly owned subsidiary of Dow Corning Corp. Midland, Mich., and is engaged in the manufacture and sale of implantable orthopaedic as well as plastic surgery products.

Xi Tech manufactures the only proprietary portable radiographic and fluoroscopic imaging device for use by physicians in offices, surgery centers and operating rooms. At $30,000 per system, these uses make the device a very cost effective tool for physicians, hospitals and out patient centers.

This agreement follows the successful trial pilot program initiated in September 1989.

BRANFORD, CT (FEB. 27) BUSINESS WIRE - Jon P. Leckerling of Madison, Conn., has been elected vice president, general counsel and corporate secretary of Echlin Inc. Echlin's Chairman and Chief Executive Officer Fred Mancheski made the announcement.

Leckerling previously held the same position at Armtek Corp. until 1989, when he became a managing director of Long Wharf Capital Partners, Inc. Prior to his work at Armtek, he was a partner in the New Haven law firm of Thompson, Weir & Barclay.

''Jon Leckerling's experience at Armtek makes him well qualified for his role at Echlin,'' Mancheski said. ''We look forward to his unique insights and contributions to this important corporate staff function.''

Leckerling graduated from the United States Military Academy, and earned a J.D. degree from the Washington and Lee University School of Law. He is a member of both the Connecticut and New Haven County Bar Associations, and the American Society of Corporate Secretaries. Leckerling and his wife Nancy, have two sons, Peter, age 11 and Kit, age 9.

Echlin is a worldwide manufacturer and distributor of motor vehicle replacement parts, with annual sales of $1.5 billion.

COHASSET, MA (FEB. 27) BUSINESS WIRE - The board of directors of Cohasset Savings Bank (NASDAQ:CHTB) has declared a quarterly cash dividend of 6 cents per share, payable April 2, 1990 to stockholders of record March 16, 1990.

This continues the dividend rate that prevailed throughout 1989, and is

the ninth quarterly cash dividend paid since the bank converted to stock form in 1987. The bank has 1,002,978 shares outstanding.

Cohasset Savings is a 145-year-old community thrift institution serving a popular residential area of Massachusetts' South Shore.

Total assets at Dec. 31, 1989 were $65,512,000 and stockholders' equity was $12,629,000 at that date.

#90058b0732 02/27/1990 ~Business Wire
ARLINGTON, TX (FEB. 27) BUSINESS WIRE - Total Assets Protection Inc. reported Tuesday that due to recent price movement in its stock, and resulting questions from the financial community, it is necessary to comment on current corporate events and position.

President J.C. Matlock noted the company's common stock traded in the over-the-counter market dropped from $2 bid and $2.25 asked at the close Oct. 27, 1989 to 75 cent bid and $1.00 asked on Feb. 12, 1990, before rising to $1.13 bid and $1.38 asked in the past few days.

''We do not believe that the price deline between October and February accurately depicts what is happening within our operations. Internally, we are as strong, as we were last October'' he said. ''Backlog is still at about $10 million.''

The chief executive estimated that the company's revenues for 1990 should easily top $20 million, up from an estimated $14 million for 1989. He said the company is looking to achieve solid profitability this year vs. previous years' losses.

Matlock stated that the company's annual audit for its fiscal year ended

Dec. 31, 1989 has just begun, so he could not be more specific about fourth quarter and year end results. However, he stated, it is no secret the company will report a large loss for the year, based alone on the $2.9 million it lost in the first half of 1989.

Matlock also noted that Girvan Corp. Ltd. of Australia, which owns a little more than one-third of TAP, is in liquidation. He said it is believed Girvan's stock in TAP, which is unregistered, will not be sold on the U.S. open market.

TAP is an international architectural, engineering and consulting company providing fail-safe solutions for information system environments. TAP services include the planning and design of computer centers and other technologically enhanced facilities, communications consulting, security analysis, contingency planning and technology integration. The company has international representatives in Canada and Australia and maintains corporate headquarters and regional offices in the United States.

HARTFORD (FEB. 27) BUSINESS WIRE - Jack D. Kuehler, president of IBM Corp. and an IBM director, has been nominated as a director of Aetna Life & Casualty.

Election of directors will take place at the company's annual meeting April 27.

Kuehler joined IBM in 1958 as an associate engineer. He advanced through a number of technical, management and executive positions, and was elected vice president in 1980 and senior vice president in 1982.

He was elected to IBM's board of directors in 1986 and was named executive vice president in 1987. Kuehler became vice chairman of the board and a member of the executive committee in 1988. He was elected president in 1989.

Aetna Chairman James T. Lynn said, ''Jack Kuehler's extensive background

in technology and his broad management experience will make him a valuable addition to the board. We are delighted that he has accepted the board's nomination, and we look forward to him joining us.''

Kuehler is a member of the National Academy of Engineering, a trustee of Santa Clara University, a fellow of the Institute of Electrical and Electronics Engineers, a member of the board of directors of Olin Corp., and a director of the National Association of Manufacturers.

He is also a member of the engineering advisory board of Cornell University's College of Engineering, a member of MIT's visiting committee for sponsored research, a member of the board of directors of the National Action Council for Minorities in Engineering, and a member of the board of directors of the New York State Business Council.

Kuehler holds a B.S. degree in mechanical engineering and an M.S. degree in electrical engineering from Santa Clara University.

HORSHAM, PA (FEB. 27) BUSINESS WIRE - Advanta Corp. (NASDAQ: ADVN)

announced Tuesday that its subsidiary, Colonial National Bank USA, has signed a letter of intent to sell approximately 65,000 credit card accounts without recourse to Household Bank N.A., Salinas, Calif.

The receivables in these accounts total approximately $50 million, or roughly 5 percent of its total $1 billion credit card portfolio.

Upon consummation of the transaction, expected by the end of the first quarter, Advanta will receive a premium of approximately $11.5 million, yielding a pretax gain of approximately $9 million after deduction of related deferred acquisition costs and transaction expenses.

Management anticipates, however, that this gain will be partially offset by first quarter charges related to the continued strengthening of the balance sheet, primarily increased loan loss reserves. While this sale will add significantly to the company's earnings, the company expects positive operating income for the first quarter and the full year exclusive of this transaction.

President and Chief Operating Officer Richard Greenawalt commented: ''This sale allows us to take advantage of the attractive premiums which continue to prevail in the credit card market in order to further build the capital base of the company.

''At the same time, we remain firmly committed to growing our credit card business. During 1989, we originated approximately 500,000 new accounts and expect to continue an active credit card solicitation program in 1990.''

Advanta Corp. is a financial services holding company that oeprates through its subsidiaries to market credit cards, home equity loans, equipment leases, and deposit products to consumers nationwide. The company manages assets in excess of $1.9 billion at Dec. 31, 1989, including more than $600 million of receivables serviced for investors.

HARTFORD, CT (FEB. 27) BUSINESS WIRE - The Hartford Steam Boiler Inspection and Insurance Co. (NASDAQ:HBOL) announced Tuesday the execution of an agreement in principle to acquire privately held Keith-Stevens Inc., headquartered in Eden Prairie, Minn., a suburb of Minneapolis.

Keith-Stevens' annual revenues are approximately $4 million and the

company operates with a staff of 49.

Founded in 1966, Keith-Stevens specializes in the development and sale of computerized maintenance management systems and consulting services. These systems and services help to increase productivity and reduce labor costs, unplanned down-time, and parts inventory carrying costs.

Keith-Stevens will operate as a division of Diagonal Data Corp., a Hartford Steam Boiler company that specializes in maintenance management systems.

Keith-Stevens' Chief Executive Officer, James E. Sutherlin, and President Ray Oliverson, will join Diagonal Data Corp.

Hartford Steam Boiler's President and Chief Executive Officer Wilson Wilde said, ''The acquisition of Keith-Stevens will enhance tha capabilitias of our Diagonal Data subsidiary, whose activities are closely aligned with our insurance and engineering services. This will help us to do an even better job for our customers in increasing plant and equipment reliability and efficiency.''

Founded in 1866, Hartford Steam Boiler is a specialist in the insurance industry, insuring machinery, equipment and property - risks requiring special technical a expertise - and providing related inspection and engineering services.

NEW YORK (FEB. 21) BUSINESS WIRE - Benetton Group S.p.A. announced Tuesday that the Federal Trade Commission (FTC) has closed its investigation of Benetton in the U.S., and has determined that no proceedings will be initiated against the company.

The FTC informed Benetton of its decision in a letter to the company dated February 5, 1990.

Benetton originally disclosed the FTC's investigation in a Registration Statement filed in connection with the sale of securities in the United States in June, 1989.

The FTC investigation, which commenced in December, 1988, related to the issue of whether Benetton is a franchisor within the meaning of a Franchise Rule promulgated by the FTC requiring that franchisors make

certain specified disclosures to franchisees located in the United States.

The investigation also examined the fairness of Benetton's U.S. business practices. It was Benetton's position throughout the investigation that it was not a franchisor within the meaning of the FTC Franchise Rule and that it had not engaged in unfair or deceptive practices in the course of its U.S. business operations.

Benetton is gratified that, having completed its investigations, the FTC has determined that no further action against Benetton is warranted.

#90058b0760 02/27/1990 ~Business Wire

TOLEDO, OH (FEB. 27) BUSINESS WIRE - Owens-Brockway Plastic Products has concluded an agreement to become a major purchaser of high density polyethylene resin produced by Wellman Inc. from recycled plastic containers.

Owens-Brockway will employ specially developed technology to use the recycled material in the production of new plastic containers.

The purchase agreement is a key step toward implementing Owens-Brockway's strategy to support recycling by providing a significant market for recycled plastic materials, according to Richard L. Kolp, business unit manager -- plastics recycling.

Kolp said that Owens-Brockway's participation means that major companies now are involved in all three of the main steps in the plastics-recycling process -- collection, processing and the incorporation of the recycled material into new products.

He noted that Wellman, the nation's leading recycler of plastics, recently concluded an agreement to purchase plastic containers collected by Browning-Ferris Industries Inc., through BFI's waste processing and curbside collection programs.

Obtaining the recycled material from outside sources enables Owens-Brockway to focus its development efforts on the product and process technology involved in producing the containers.

A leading maker of plastic containers, Owens-Brockway began using recycled

plastic in the production of high density polyethylene (HDPE) containers in 1989 and plans to increase production significantly in 1990. Owens-Brockway will supply major customers with rigid containers, made partly from recycled plastic, to package detergents, automotive products, personal care items, and other products.

The recycled material, obtained from plastic milk bottles, accounts for up to 25 percent of the plastic resin used to make the containers. Owens-Brockway has developed a three-layer design, with the recycled HDPE sandwiched between layers made of virgin HDPE resin.

Ongoing development efforts by Owens-Brockway include programs to produce containers incorporating a wide range of recycled plastics, including HDPE PET, PVC, polypropylene, and multilayer plastic containers. Another area of emphasis is developing the capability to produce such products on a variety of high-productivity forming machines.

''Our goal is to develop the capabilities to make our products 100 percent recyclable and to incorporate recycled material into as many products as possible,'' Kolp said. ''Although we're at an early stage, I'm pleased that we're already providing a significant market for recycled plastic.''

Owens-Brockway Plastic Products is a unit of Owens-Illinois Inc., one of the world's largest and most diversified producers of packaging products. Owens-Illinois had sales of $3.6 billion in 1989.

DALLAS (FEB. 27) BUSINESS WIRE - Vinland Property Trust (NASDAQ:VIPTS) Tuesday announced a loss of $6.4 million, or $1.07 per share, for the year ended Nov. 30, 1989.

This compares with a loss of $7.7 million, or $1.29 per share, for the year ended Nov. 30, 1988. Revenues for the years 1989 and 1988 were $6.1 million and $5.9 million, respectively.

Vinland recorded a loss of $3.0 million, or 50 cents per share, on revenues of $1.2 million for the fourth quarter ended Nov. 30, 1989. The trust recorded a loss of $4.3 million, or 71 cents per share, on revenues of $1.4 million for the same period in 1988.

Vinland's losses reflect continuing problems in the trust's real estate portfolio. The trust recorded a $2.2 million provision for losses in 1989 $1.6 million of which was set aside in the fourth quarter. This compares with a $10.0 million provision for 1988.

The 1989 provision was taken to reflect a property foreclosure in the fourth quarter and for reserves against the trust's remaining properties.

CLEVELAND (FEB. 27) BUSINESS WIRE - Ameritrust Corp. announces the completion of the previously disclosed acquisition of MVestment, the trust and investment subsidiary of MCorp, headquartered in Dallas.

The name of the newly acquired company will be Ameritrust Texas Corp.

The combination of Ameritrust's trust department with MVestment creates a trust operation that is among the top 20 in the United States. Ameritrust's combined activities in Ohio, Texas and Indiana generated $126 million in fees on a base of customer assets of nearly $50 billion in 1989.

According to Jerry V. Jarrett, Ameritrust chairman and chief executive officer, ''This expansion of our trust business into the southwest is the

beginning of a new era for Ameritrust. We now have a truly national trust operation with the ability to deliver the service, stability and expertise demanded in the business environment of the 1990s.''

MVestment Chairman and CEO James M. Spellings, who becomes chairman of Ameritrust Texas Corp., commented, ''The completion of this transaction is the start of a new era for trust customers in the Southwest. A strong and profitable parent company permits us to provide the broader array of services made possible by a national organization.''

MVestment's former parent company, MCorp, is currently in Chapter 11 bankruptcy proceedings. MVestment itself was not in bankruptcy.

Ameritrust Corp. is a $11.2 billion multi-bank holding company headquartered in Cleveland. Ameritrust's principal subsidiaries are Ameritrust Company National Association, which operates offices in major metropolitan areas in Ohio and Ameritrust Indiana Corp., a commercial banking subsidiary with offices in Indiana and southern Michigan.

#90058b0791 02/27/1990 ~Business Wire

ORANGE, CA. (FEB. 27) BUSINESS WIRE - John B. Joseph, chairman and president of West Coast Bancorp, said Tuesday the California multi-bank holding company's continued focus on improving profitability and controlling costs resulted in record earnings for the year.

Addressing the coming year, he said, ''There remain many opportunities for each of our subsidiaries to control expenses and leverage our current network of branches and employees. We believe that capitalizing on these opportunities will lead to continued improvement in profitability in 1990.''

For the year ended Dec. 31, 1989, earnings increased 27 percent to $2 million, or 22 cents per share, in 1989 from $1.6 million, or 18 cents per share in 1988.

The company's return on average assets and return on average equity showed continued improvement, reaching 0.47 percent and 5.83 percent respectively. Net interest income for the year grew 15 percent to $26.9 million from $23.5 million in the prior year.

The net interest margin declined to 5.22 percent due to higher interest rates paid on time deposits and an increase in higher cost time deposits

as a percentage of total deposits.

However, the net interest margin continues to be higher than most of West Coast Bancorp's peers. In addition, a 22 percent increase in non-interest bearing deposits moderated the increase in the total cost of funds.

Non-interest expenses continued to decline as a percentage of average assets - to 5.33 percent in 1989 from 5.89 percent in 1988 -- as operating costs were spread across an expanding base of deposits and loans and cost control measures kept the actual growth in non-interest expenses to less than 10 percent.

Non-interest income increased 25 percent to $4.7 million as fee income increased with the larger loan and deposit base.

For the fourth quarter, earnings grew 6 percent to $633,000 from $595,000 in the same quarter a year ago. Net interest income was up 14 percent to $7.3 million from $6.4 million in 1988.

West Coast Bancorp has continued to experience strong growth in both deposits and loans. Total assets increased 19 percent during the year to a record $478.5 million. Net loans increased at a slower pace -- 14 percent to $373 million -- improving the company's liquidity.

Deposits reached a new record, climbing 21 percent to $431.9 million. Shareholder's equity increased to $35.3 million or $3.85 per share.

Joseph commented, ''Management is proud of realizing our growth and profit objectives in the past year. However, we recognize that West Coast Bancorp must still improve its returns on assets and equity. In the coming year, we will continue to focus on increasing profitability and enhancing shareholder value.

''Also in 1990, West Coast Bancorp will continue its efforts to improve asset quality. The high level of loans charged off led to an increase in our provision for loan losses during the year. We believe this was appropriate and in line with our policy of recognizing and resolving problem loans on a timely basis. Management believes that the reserve is sufficient in light of our understanding of current non-performing loans.''

West Coast Bancorp is the largest independent bank holding company headquartered in Orange County, with banking subsidiaries in the rapidly growing markets of Sacramento and Orange Counties. Established in 1984, with approximately $40 million in assets, the company has grown to over $475 million in assets today.

The company has three banking subsidiaries: Sunwest Bank, the largest independent bank based in Orange County; Sacramento First National Bank,

the fifth largest independent bank in Sacramento County; and Heritage Thrift & Loan Association, the fifth largest thrift & loan in Orange County. West Coast Bancorp trades on the NASDAQ National Market System under the symbol WCBC.

ARMONK, NY (FEB. 27) BUSINESS WIRE - The IBM Board of Directors has elected Robeli J. Libero an IBM vice president.

He will continue his responsibilities as president and general manager of IBM Latin America at its headquarters in Mt. Pleasant, N.Y.

Mr. Libero joined IBM in 1963 as a data processing systems engineer trainee in Brazil. He held various marketing positions before being named branch manager in Belo Horizonte, Brazil, in 1968. He became the north district cross industry sales manager in 1972 and director of personnel in Rio de Janeiro in 1975. In 1978 he became chief executive officer of IBM Brazil and in 1979 he was appointed president and chief executive officer of IBM Brazil.

In 1986 Mr. Libero was named vice president and general manager of line operations in the Latin America Division. Later that year he became group vice president and president of the Latin America Division. He assumed his current position in 1988.

Mr. Libero earned a bachelor's degree in mechanical electrical engineering from the State University of Minas Gerais in Brazil in 1961. He is chairman of the IBM Latin America Board of Directors and belongs to the Board of Directors for the Council of the Americas, Brazilian-American Chamber of Commerce and the Brazil-U.S. Business Council.

COLUMBUS, OH (FEB. 27) BUSINESS WIRE - Consolidated Stores Corp.

(NYSE:CNS) Tuesday reported that during the fourth quarter of 1989 it recorded a pre-tax charge of approximately $17 million principally for the cost of refocusing its business operating strategies.

This charge includes the write-off of certain facility costs, personnel costs related to recent changes in senior management, and inventory markdowns to support a return to the company's original merchandising programs.

''As a result of the restructure, the company will report a net loss for the year. This is the first step in preparing the way for a change in merchandise direction, as we are going back to what has made us successful '' William G. Kelley, recently elected chairman and chief executive officer, stated. ''Our niche has been first and foremost in close-out marketing and I want to return us to a merchant driven business, which is the key factor to success in our markets.''

Kelley continued, '' Unfortunately, in accelerating the development of operation and systems necessary to control our rapidly growing business of over 300 stores, we slipped away from our roots as an entrepreneuring and opportunistic retailer of close-out deals.'' Kelley concluded, '' We now have the people and the systems to continue the growth of the business, and I am committed to directing whatever it takes to return us to what has made Consolidated Stores the nation's dominant close-out retailer.''

Consolidated Stores Corp. is the largest retailer and wholesaler of close-out merchandise in the United States. It currently operates 336 specialty stores under the names ''Odd Lots'' and ''Big Lots'' which sell close-out merchandise at substantial discounts from original retail prices in 13 midwestern states and southeastern states.

CHARLOTTE, NC (FEB. 27) BUSINESS WIRE - The Cato Corp. (NASDAQ/NMS:CACOA) Tuesday announced that it expects to report a significant loss for the fourth quarter ended Feb. 3, 1990, and a loss for the year modestly higher than in the prior year.

The company expects to release audited results in April.

The company previously announced relocation of its buying offices from New York to Charlotte in September and a series of closings of unprofitable stores with no upside potential. By year-end, the company had closed 10 Cato Division stores and 12 $6 & $8 Fashions units, resulting in pre-tax writeoffs of approximately $2,000,000. These actions will contribute to productivity and profitability increases in 1990.

Additionally, as indicated in the company's third quarter report, Cato entered the holiday season with heavy inventory levels. Due to extraordinary price promotions throughout the industry, excess undesirable sweater inventory, insufficient flow of key items and unseasonable weather the company's planned sales levels did not materialize.

Gross margins were depressed by abnormal markdown activity required to liquidate excess inventories, contributing significantly to the poor performance indicated above.

These merchandising problems should be largely non-recurring, as they are attributable to major changes in the merchandise function including the New York office relocation, extensive restaffing, sourcing modifications and expanded private label development activities.

Cato Division sales were $61.2 million and $225.1 million for the 14-week fourth quarter and 53-week year, respectively, representing increases of 11.2 percent and 9.7 percent over the 13-week fourth quarter and 52-week year last year.

Excluding the effect of the additional week, sales for the fourth quarter and fiscal year 1989 increased 4.3 percent and 7.9 percent, respectively. Same store sales (stores open at least one year) during the comparable fourth quarter and full year increased 2.6 percent and 6.7 percent, respectively.

Wayland H. Cato Jr., chairman and chief executive officer, remarked, ''With our restructuring activities and inventory cleansing process now

largely completed, we are confident that we have established the framework for a fundamentally sound business going into 1990.

The company's shares are traded over the counter under the National Market System symbol CACOA.

HARTFORD, CT (FEB. 27) BUSINESS WIRE - Society for Savings Bancorp Inc. (OTC, NASDAQ: SOCS) Tuesday announced its affiliation with Financial Services Marketing Inc. (FSM), a full-service securities brokerage with headquarters in Winter Park, Fla.

According to the agreement, FMS will provide comprehensive investment services for 'The Xchange at Society,' the bank's financial services network.

FSM is a technologically-driven broker-dealer that offers banking institutions investment-related products and services, including securities sales management, operations and communications, research and compliance.

It is a subsidiary of Financial Services Advisors, which is affiliated with J.K. Schofield & Co. Inc., one of the nation's largest wholesale distributors of financial products on Wall Street.

Society for Savings, an FDIC-insured institution, has 36 offices throughout Connecticut and is one of the largest publicly owned savings banks in New England. Its parent company, Society for Savings Bancorp Inc. had over $4.4 billion in assets and more than $2.8 billion in deposits as of Dec. 31, 1989.

To date, its 'Xchange' program has provided brokerage services to over 15,000 customers who have purchased over $400 million in general securities, mutual funds and insurance products.

According to Peter K. Mulligan, executive vice president of Society's Retail Banking Division, ''FSM brings to Society the technological advances that will help us to manage our brokerage program in a more cost-effective manner, thereby enabling us to provide a higher level of personalized service to our customers.

Their direct on-line access to Wall Street and their direct electronic trading to most mutual fund vendors is a compelling advantage.''

Brian M. Storms, chief executive officer of FSM, said, ''Society for Savings has operated one of the finest full-service in-bank securities brokerage programs in the country. We are honored they have chosen us as their broker-dealer.''

PROVIDENCE, RI (FEB. 27) BUSINESS WIRE - Nortek Inc. (NYSE:NTK) announced Tuesday that an Oregon state court judge has reduced the judgment award to the former owners of Nortek's Bend Millwork subsidiary by $10,000,000.

In addition to reducing the judgment by $10,000,000 in respect of punitive damages, the judge awarded the plaintiffs' attorneys fees and costs of $1,226,500 and denied Nortek and Bend Millwork's Post-Trial motion for a new trial.

In December, an Oregon state court jury had awarded $22.35 million to the former owners of Nortek's Bend Millwork subsidiary in a suit against Nortek in connection with the acquisition.

A Nortek spokesperson said that the company has never believed that the merits of the case supported the original jury award and, although pleased by this latest ruling, will continue vigorously to pursue the appeal process.

Nortek Inc. is a diversified Fortune 500 corporation, manufacturing and marketing residential and commercial building products and commercial ventilating and air conditioning systems.

NEW YORK (FEB. 27) BUSINESS WIRE - Shorewood Packaging Corp. (NASDAQ:SHOR) Tuesday, at an investment seminar for analysts and institutional holders of Shorewood's stock, reported revenues and earnings for the third quarer ended Jan. 27, 1990 and also announced the introduction of a new packaging

concept called ''That's A Wrap.''

Revenues for the third quarter ended Jan. 27, 1990, were $33,575,000 as compared to revenues of $32,396,000 for the corresponding period of last year. Revenues for the 39 week period ended Jan. 27, 1990, were $104,092,000 as compared to $93,547,000 for the corresponding prior period.

Net earnings for the current 13 week period amounted to $3,532,000 (27 cents per share) as compared to net earnings of $3,624,000 (28 cents per share) for the corresponding prior period.

Net earnings for the 39 week period ending Jan. 27, 1990, were $12,534,000 (96 cents per share) as compared to net earnings of $11,132,000 (85 cents per share) for the corresponding prior period.

''Net earnings for the quarter were adversely affected by several factors '' said Paul B. Shore, chairman, president and chief executive officer. ''Amongst them was a temporary disruption of production and operations in our LaGrange, Georgia facility and longer than anticipated test runs of new products for some of our existing and prospective customers.

At the seminar, Shore introduced a new gift packaging concept, called ''That's A Wrap''. ''That's A Wrap'' is a unique pre-wrapped gift box which will be manufactured and marketed by Shorewood to department and specialty stores and mass merchandisers.

''That's A Wrap'' -- which is patent pending, represents Shorewood's first consumer product line targeted at the $3 billion gift packaging market. Shorewood has designed, developed, and built an automated production system which will manufacture this pre-wrapped gift box in exciting, contemporary, fashion conscious designs.

Shorewood Packaging Corp. and its subsidiaries print and manufacture high quality paperboard packaging for such industries as music, home video, food, tobacco, film, cosmetics and toiletries. The company is based in New York City, with key operations in Farmingdale, N.Y.; LaGrange, Ga.; Andalusia, Ala.; Roanoke, Va.; Toronto, Canada; and Amersham, England.

PISCATAWAY, NJ (FEB. 27) BUSINESS WIRE - Unitronix Corp. (NASDAQ, NMS:UTRX) announced on Dec. 22, 1989 that it was engaged in discussions regarding a corporate partnership relationship with a European company.

Unitronix announced Tuesday that those discussions have been terminated.

Frank Zimmer, president and CEO said, ''We were not able to resolve several major issues, in spite of serious discussions which began late in 1989. We continue to believe that a Corporate Partner is of strategic importance in broadening our market presence with PRAXA. Accordingly, we will continue to seek other partnerships, or similar alliances, in the coming months.''

Zimmer added, ''Unitronix Corporation elected not to renew its agreement with Gilford Securities Inc. and Basic Technologies Inc., who were engaged last year to evaulate Corporate Partner opportunities.

Unitronix Corp. is engaged in the business of selling manufacturing software applications, under the trade name of PRAXA, and distributes computer equipment manufactured by Digital Equipment Corp., NCR, and UNISYS Corp.

STAMFORD, CT (FEB. 28) COMTEX - National Medical Enterprises Inc., the Santa Monica, CA-based hospital chain, has distributed 65 percent of the stock of its wholly-owned Hillhaven Corp. subsidiary.

Hillhaven has 345 nursing homes in 38 states, 120 retail and institutional pharmacies in 23 states and 24 retirement homes in 14 states, according to a Securities and Exchange Commission filing.

Under the Jan. 31 distribution, NME stockholders received one Hillhaven common share for each of their NME common shares, or a total of 81.6 million shares.

NME retained a 35 percent stake in Hillhaven -- 14.4 million shares and warrants to buy another 30 million shares.

Before the distribution, NME transferred to Hillhaven the primary portions of its long-term care operations in the United States, including the nursing homes, pharmacies and retirement centers.

NME retained all the property, plant and equipment related to 115 nursing homes and to three retirement housing centers and leased them back to Hillhaven.

Other business assets, including NME's long-term care group, were also retained.

NME is now primarily engaged in specialty and general hospital operations.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 26, 1990

STAMFORD, CT (FEB. 28) COMTEX - As part of a major restructuring, Vacu-dry Co., the Santa Rosa, CA, fruit products developer, is liquidating its Apple Time Co. unit and selling the assets to Knouse Foods Cooperative Inc., the Peach Glen, PA, fruit products company, for about $5 million.

The asset sale includes machinery and equipment, trademarks, package design, retail slots and inventories relating to the ''Apple Time'' applesauce and apple juice business, according to a filing with the Securities and Exchange Commission.

The asset sale was organized to take place in two parts.

On Feb. 7, Knouse Foods paid for the trademarks, package designs, retail slot and approved applesauce and apple juice finished goods inventory.

On March 30, Knouse Foods will pay for the machinery and equipment, spare parts and supplies inventory.

TOKYO (FEB. 27) - Canon Sales Co. Inc. said Tuesday it had acquired a 35 percent equity stake in Metrolight Studios Inc., a U.S. computer graphics firm, for four million dollars.

Canon Sales said the contract guaranteed exclusive rights to market in Japan computer graphics systems developed by Los Angeles-based Metrolight Studios.

Canon Sales is a wholly-owned subsidiary of Canon Inc., Japan's major manufacturer of cameras and office automation equipment.

TOKYO (FEB. 27) - Matsushita Electric Industrial Co. Ltd. said it had established a joint venture company to sell dental equipment in Japan with Heraeus Edelmetalle GmbH of West Germany.

Matsushita, one of the world's largest consumer electronics manufacturers, and Heraeus, a major West German dental equipment maker, will hold half of the new company, called Pana Heraeus Dental Co. Ltd., which will start operations in Osaka in March.

Matsushita will fund the new company through its wholly owned subsidiary, Matsubo Equipment and Instrument Corp.

The company, capitalized at 50 million yen (344,827 dollars), will sell Heraeus products.

TOKYO (FEB. 27) - Japan's exports of cars, trucks and buses dropped 6.6 percent in January from a year earlier to 499,520, the fifth monthly decline, the Japan Automobile Manufacturers Association (JAMA) said Tuesday.

The association attributed the drop to an 11.4 percent plunge in shipments to the United States, which declined to 179,850 vehicles, reflecting reduced demand and increased car production by Japanese automakers there.

Shipments to Europe also declined, 1.8 percent to 187,169, it said.

Passenger car exports fell 2.0 percent to 395,550, truck exports were down 20.8 percent to 100,873, and bus exports dropped 14.4 percent to 3,095.

Exports of Nissan Motors Co. suffered a 35.8 percent plunge to 68,672 vehicles, Fuji Heavy Industries Ltd. a 21.4 percent drop to 15,272 and Mazda Motor Corp. a 9.9 percent decline to 63,568.

But exports of Honda Motors Co. rose 4.4 percent to 69,431 vehicles, while Toyota Motor Corp.'s shipments increased 1.5 percent to 145,330.

#90058e0028 02/27/1990 ~Latin America New Agency
PANAMA CITY (FEB. 27) EFE - Nine ex-memebrs of the defunct Panamanian Defense Forces (PDF) were arrested Tuesday and charged with murdering dozens of their colleagues in the aftermath of last October's failed coup against then-ruling military strongman Gen. Manuel Antonio Noriega.

Leslie Loaiza, the head of Panamanian police CID, said Asuncion Eliecer Gaitan, the chief of Noriega's personal bodyguard unit, was being sought on the same charges.

Gaitan has remained holed up in the Papal Nunciature since the invasion by U.S. troops last December that toppled Noriega from power.

The nine officers and NCOs charged with the killings later swore loyalty to Noriega's successor, Guillermo Endara, and joined the scaled-down Public Force, a policing body that replaced the PDF.

Eleven subalterns who mutineed against Noriega died during the attempted coup in October, according to information given out by the PDF at the time.

But officials of the new U.S.-installed administration have said up to 60 soldiers who took part in the uprising were killed, many of them shot in cold blood after the coup had been quashed.

After first taking refuge in the Papal Nunciature, Noriega surrendered to the invading U.S. troops and was flown to Florida, where he faces drug-related charges.

SALT LAKE CITY (FEB. 27) PR NEWSWIRE - Bonneville Pacific Corp. (NASDAQ: BPCO) announced today the appointment of Stephen D. Nadauld as vice-chairman and chief financial officer.

Dr. Nadauld has served as the president of Weber State University in Ogden Utah since 1985.

Robert L. Wood, Bonneville's chairman and CEO said that, "Dr. Nadauld will bring a wealth of experience in finance and administration to the company and he is a fine example of the high quality professionals entering the field of independent power production."

Nadauld is a 1967 graduate of Brigham Young University and holds an MBA in finance from Harvard University and a PhD in finance and economics from the University of California at Berkeley. He started his career in mergers and acquisitions on Wall Street, and has subsequently served as an instructor of finance at the Universities of Utah and California. He was also an associate professor of finance and the director of the MBA Program at Brigham Young University.

Prior to being named president of Weber State, he was CEO of Intermountain Milk Producers, a cooperative with annual sales of $300,000,000. Nadauld has served on a number of boards of directors, including Bonneville Pacific, Intermountain Health Care, and O.C. Tanner Corp. He held the position of vice-chairman for the Utah Housing Finance Agency for eight years, and served in numerous other civic positions in the Utah community.

Due to the need for an orderly transition at Weber State University, Nadauld will devote approximately 50 percent of his time during the next month to the University and will then assume full-time duties as vice-chairman and chief financial officer at Bonneville Pacific.

Bonneville Pacific is a developer and owner of independent power facilities, presently completing construction on 28.5 megawatts of new power with an additional 740 megawatts of capacity under construction, development, or acquisition and having an estimated value of over $1 billion. The company has completed 28 projects valued at $284 million and representing 186 megawatts of generating capacity.

#90058p0027 02/27/1990 ~PR Newswire

MENLO PARK, CA (FEB. 28) PR NEWSWIRE - MEDIAGENIC (NASDAQ: MGNC), one of the largest publishers of cartridge, floppy-disk and optical media-based entertainment software, announced today an agreement with Fujitsu Limited, a leading computer manufacturer in Japan. Under the agreement, MEDIAGENIC will develop entertainment software for the Fujitsu FM TOWNS(TM), an Intel 80386-based multimedia computer system with a built-in CD ROM drive. The first title to be available on this new system will be "the Manhole," the award-winning interactive adventure by Activision, MEDIAGENIC's publisher of action/arcade, simulation and multimedia entertainment software.

Introduced in Japan in March 1989, the FM TOWNS features a bit-mapped graphical user interface with pull-down menus and icons. Its digital image processing, coupled with high resolution, VGA-quality 256-color graphics that support a palette of 16 million colors, makes its graphics capabilities superior to any personal computer available in Japan. According to Yoshihiro Satoh, Fujitsu Ltd.'s general manager, Personal Computer Systems Engineering Division, more than 35,000 systems have been sold, approximately 80 percent of which have been to consumers who desire its multimedia features. "MEDIAGENIC is recognized as a leader in the development of optical media-based entertainment," said Satoh. "This experience as well as their strong technical and creative achievements in other entertainment categories, make the company especially attractive for a long-term relationship," he added.

"We're excited about the opportunity to support the FM TOWNS because it raises the common denominator in interactive multimedia computing," said Bruce L. Davis, chairman and CEO of MEDIAGENIC. According to Davis, the graphics and sound capabilities, combined with the easy-to-use graphical interface, make it an ideal home computer and will expand the boundaries of traditional entertainment by allowing more creative and sophisticated applications to be developed. "The advanced, yet affordable, FM TOWNS impressively demonstrates the technology and pricing that will make multimedia entertainment thrive in the home markets," Davis added.

The FM TOWNS version of "the Manhole" is being developed using MEDIAGENIC's Multimedia Applications Development Environment (M.A.D.E.(TM)), created for efficient design and development of entertainment and other multimedia applications. M.A.D.E. provides multimedia tools by which high-resolution color graphics, and CD-quality music and sound effects can be compressed and combined with simple, intuitive interfaces to create sophisticated interactive entertainment products.

"The Manhole" represents a new genre of "non-linear" computer

entertainment and has been heralded by computer experts and press alike, since its introduction. Last year, "the Manhole" received the 1988 Software Publishers Association's Excellence in Software Award for Best New Use of a Computer. The program features more than 600 interconnected screens, which form a multi-directional adventure, allowing players to travel forward, backward, sideways, and up and down. Players explore "the Manhole" with a colorful cast of characters including a sleepy walrus, a friendly rabbit, a super-cool dragon and other delightful creatures that welcome players to their world. Players can simply point and click to meet and interact with characters that will lead them through the hours of adventure in the program.

Hard-disk versions of "the Manhole" are available in the United States and Japan for the Apple Macintosh and in the United States for IBM/compatibles. An Apple Macintosh version of the CD-ROM product is also available. The FM TOWNS CD-ROM version will be available in Japan in late spring of 1990. MEDIAGENIC is a diversified, international publisher of floppy-disk, cartridge and CD-ROM-based entertainment software headquartered in Menlo Park, with offices in Japan and Europe. The company publishes Activision, Infocom, Gamestar, Electric Dreams and ZSoft software and serves as an exclusive distributor for Absolute Entertainment Interplay Productions, Dynamix Inc., Sierra On-Line, System 3, Vivid Images Ltd. and Motion Picture House.

FM TOWNS is a trademark of Fujitsu Ltd. M.A.D.E is a trademark of MEDIAGENIC.

#90058p0029 02/27/1990 ~PR Newswire

SAN FRANCISCO (FEB. 27) PR NEWSWIRE - Activision, a pioneer in CD-ROM entertainment, today announced the eagerly awaited "Cosmic Osmo" for CD-ROM. Specifically designed for the CD-ROM environment, "Cosmic Osmo" is made up of more than 100 megabytes of code and music, making it one of the largest entertainment software products ever.

"Cosmic Osmo's" simulated 3-dimensional graphics and animated characters are interconnected by advanced linking technology. This technology enhances the exploration of the program. For example, players will find that there is more than one way to travel to the different worlds and that there are dozens of secret passages waiting to be discovered.

An original music soundtrack runs simultaneously with gameplay, allowing music to play in the foreground of a scene, as opposed to a mere underscore. Such innovative technology represents a step toward

interactive movies on computers, permitting human interaction with the game at the same time that high-quality music is played from the disc. A blend of jazz, rock, bebop, and new-age styles creates a musical atmosphere tailored to particular scenes and characters found in the program.

Bruce Davis, chairman and CEO of MEDIAGENIC (NASDAQ: MGNC), refers to "Cosmic Osmo" as "the cutting edge of optical disc technology and one of the best representations of what the medium can deliver." As one editorial reviewer put it, "'Cosmic Osmo' is a show-and-tell model of what multimedia is all about."

"Cosmic Osmo" is a non-linear, multi-directional program with seven animated worlds rich with adventure. Players travel through a magical solar system with a super-cool alien, "Osmo," who rockets to different worlds, including the Vegetable Moon and the Paper Planet. In "Cosmic Osmo," anything is possible ... make flowers grow and stars appear at the click of the mouse; find unusual yet familiar creatures hiding in Osmo's kitchen cabinets; take a boat ride to a mysterious island; or discuss cosmic affairs with the leader of Osmo's world.

The CD-ROM version of "Cosmic Osmo" goes way beyond its floppy-disk predecessor. Players will discover many new worlds where they can explore a museum and tap a tune on the bones of a Percussisaurus; meet Professor Osmostein and examine exotic specimens under a giant microscope; or have a jam session in a galactic garage. New animated characters come to life with digitized voices, including a whimsical dog chomping on dinosaur bones, a digging ant living on an ant farm, and Princess Osmorella sitting on her throne surrounded by lava lamps.

Unique to "Cosmic Osmo" are a number of games within the game such as "Ship Chip Lander," a functional simulated coin-op arcade machine that players can modify by exchanging simulated ROM chips to create new games and arcade sequences. On another planet, players venture into a science lab where, depending on one's chemical combinations, a variety of scientific experiments can be performed -- some with explosive outcomes.

The CD-ROM version of "Cosmic Osmo" was developed by Cyan in cooperation with Activision's technology department. It will be available in June at a suggested retail price of $79.95. "Cosmic Osmo" for CD-ROM requires an Apple Macintosh Plus, SE, or II with 1 megabyte of RAM, and AppleCD SC(TM) and a hard drive. A floppy disk version of "Cosmic Osmo" is now available.

Activision, a division of MEDIAGENIC, located in Menlo Park, Calif., publishes action arcade, simulation, strategy and fantasy exploration entertainment software. Activision titles are distributed exclusively by MEDIAGENIC. MEDIAGENIC shares are traded on the NASDAQ (National Market System) under the symbol MGNC.

AppleCD SC is a trademark of Apple Computer Inc.

#90058p0030 02/27/1990 ~PR Newswire

SAN FRANCISCO (FEB. 27) PR NEWSWIRE - San Francisco-based Transcisco Industries Inc. (AMEX: TNIA and TNIB) announced that it has signed a letter of intent to acquire the Texas Southern Passenger Railroad Corp. located in San Antonio. The Texas Southern operates a first-class dinner train called the "Texan" out of San Antonio on a year-round, three-to-five nights per week basis. They also lease a locomotive and railcar repair and maintenance shop in which they provide support services to the dinner train and perform other third party passenger car work.

The dinner train operation will become part of Transcisco's newly formed subsidiary, Transcisco tours. The passenger railcar shop will be integrated into Transcisco Rail Services Corp. Acquisition of both the shop and dinner train operations will accelerate Transcisco Industries' expansion into the passenger rail industry.

Mark C. Hungerford, chairman and chief executive officer, said, "Moving into the passenger rail industry represents a major growth area for Transcisco Industries. The resurgence in passenger rail travel should provide long-term growth potential in an industry that is undergoing a renaissance. This acquisition of Texas Southern has a two- fold benefit for Transcisco: (1) The San Antonio dinner train operation gets Transcisco Tours generating revenues, earnings, and cash-flow, plus provides experienced people and systems to aid Transcisco in its start- up of its California cruise trains that begin operation in October 1990; and (2) the passenger car shop operation in San Antonio provides Transcisco Rail Services its entry into passenger car retrofitting and maintenance capability.

"In addition, Texas Southern has some excess passenger equipment that can be used to start other dinner or tour trains in the Southwest. We think San Antonio is an excellent location with a population of over 1.3 million and the city greets over 10.5 million convention and tourist visitors annually, the highest number in Texas.

"Texas Southern already has a contract to rebuild a series of baggage cars for Amtrak, and Transcisco should provide the additional financial and managerial resources to allow the San Antonio facility to garner more similar business from both Amtrak and private railcar owners. By 1991, all 200 private passenger cars in the United States must have head-end

power under new Amtrak regulations, a $30,000-50,000 conversion per car.

"In short, this is a strategic acquisition; one whereby both organizations will benefit immediately."

Transcisco Industries is an industrial services company engaged in the maintenance, retrofitting, and manufacturing of railroad equipment. Transcisco's railcar maintenance operation is the largest non-railroad owned railcar maintenance operation in the United States.

SAN FRANCISCO (FEB. 27) PR NEWSWIRE - MEDIAGENIC (NASDAQ: MGNC), an emerging leader in interactive multimedia entertainment, premieres its Multimedia Applications Development Environment (M.A.D.E.)(TM) here today at the CD-ROM Conference and Exposition. M.A.D.E. is a set of multimedia technology tools for the integration of high-quality graphics, animation, and CD-quality audio and sound effects in interactive media products.

Based on more than 10 man-years of development, M.A.D.E. uses an object-oriented design system that enables developers to compress and combine multimedia elements with simple interfaces in the creation of multimedia products on current and future personal computers and video game hardware.

Using M.A.D.E., developers can create compelling interactive applications for several key multimedia target markets, including education, presentation, entertainment, reference and training. M.A.D.E. enables developers of interactive multimedia to:

-- Display and integrate into a product high-quality natural images, art and graphics.

-- Synchronize CD music and sound effects with graphics. In addition, M.A.D.E. supports MIDI boards and add-on sound cards, such as Ad-Lib, Roland MT-32 and SoundBlaster.

-- Incorporate animation from a wide selection of sources.

-- Provide CD geography optimization (i.e. control placement of multimedia elements for high performance on a variety of CD-ROM hardware).

-- Customize and define any element of M.A.D.E. through fully modifiable, object-oriented programming tools.

MEDIAGENIC anticipates that M.A.D.E. will be licensed to multimedia developers in the future. The technology is currently incorporated in Activision's "the Manhole," announced today for the Headstart and Fujitsu FM TOWNS personal computers. Winner of the 1988 SPA Excellence in Software Award for Best New Use of a Computer, "the Manhole" represents a new genre of non-linear multimedia entertainment. The CD-ROM versions of "the Manhole" include all of the features in the original Macintosh CD-ROM program plus additional music sequences and better CD-ROM performance.

"The synchronization of sound and graphics in "the Manhole" simulates an environment that's much like experiencing a movie -- players experience full-screen displays of high-resolution art and animation at the same time a music soundtrack is played," said Bill Volk, director of multimedia at MEDIAGENIC.

A partial list of the technical capabilities of M.A.D.E. includes:

-- State-of-the-art graphics, music and sound effects including cinemagraphic visual effects, wipes and fades.

-- Simple point-and-click interfaces.

-- Efficient porting of designs from the target hardware system to other 8- and 16-bit hardware platforms.

-- High performance, up to 4:1 compression of 256-color images to allow large amounts of art in multiple graphics modes.

-- High-quality playback of compressed digital audio as well as CD-Audio (i.e., 360K IBM floppy disk holding up to 130 seconds of sampled digital audio).

-- A fully extendible/modifiable system that allows new functions to be added in traditional programming languages.

-- Allows for a large number of images to be pre-loaded to eliminate repetitive CD-ROM input/output, and allows for CD-Audio playback.

-- Virtual memory for programs, images, audio and music.

MEDIAGENIC is an established leader in publishing for a variety of interactive entertainment media and has introduced two CD-ROM titles, "the Manhole," the award-winning fantasy now available on multiple hardware platforms, and "Cosmic Osmo," the newest animated interactive adventure for the Apple Macintosh. The company is a diversified international publisher of cartridge, floppy-disk and optical media-based products. Its publishers include Activion, Gamestar, Infocom, ZSoft and Electric Dreams. MEDIAGENIC shares are traded on the NASDAQ (National Market System) under

they symbol MGNC.

M.A.D.E. is a trademark of MEDIAGENIC.

#90058p0032 02/27/1990 ~PR Newswire

SAN DIEGO (FEB. 27) PR NEWSWIRE - GTI Corp. (AMEX: GTI) today reported a 27 percent increase in revenues, a 36 percent increase in pre-tax profits and generation of $3.6 million in cash from operating activities for the year ended Dec. 31, 1989.

For the year revenues increased to $41,390,000 from $32,602,000 and pre-tax profits rose to $2,949,000 from $2,172,000. Net income increased to $1,969,000 from $1,864,000 after reflecting a 15 percent increase in the company's effective tax rate, from 18 percent to 33 percent, for 1989. The gain in both revenues and income was due in part to the acquisition of Electronic Supply Corp. in the second quarter of 1988. On a per share basis, net income was flat year to year at $.29 because of the higher effective income tax rate in 1989 and an increase in the number of shares outstanding.

For the fourth-quarter ended Dec. 31, 1989, net income was $425,000 or $.06 per share compared to $722,000 or $.11 per share for the fourth quarter of 1988. Revenue for the fourth quarter also declined to $9,238,000 from $10,646,000 for the equivalent quarter in 1988.

Order backlog stood at $11,816,000 on Dec. 31, 1989, compared to $13,347,000 on Dec. 31, 1988. The decrease in the backlog was primarily because of decreased orders for circuit boards from automotive industry related customers as well as decreased orders from electronic component piece part customers.

GTI Corp. is a multi-plant distributor and manufacturer of electronics components, circuit boards and electronic component processing equipment for the automotive, instrumentation, industrial, electronics and computer industries.

#90058p0034 02/27/1990 ~PR Newswire

PRINCETON, NJ (FEB. 27) PR NEWSWIRE - CYTOGEN Corp. (NASDAQ: CYTO) announced today that the U.S. Patent and Trademark Office has issued an

additional patent on the company's second generation antibody-linker technology.

Titled "Antibody -- Therapeutic Agent Conjugates," U.S. Patent No. 4,867,973 covers methods for preparing and using pharmaceutical compositions in which a therapeutic agent is attached either directly or with a linker to an antibody or antibody fragment. These antibody-based conjugates are also covered by composition of matter claims allowed in the patent.

The resultant products deliver therapeutic agents to sites of disease for the treatment of a variety of cellular disorders including cancer, cardiovascular disease and autoimmune diseases.

S. Leslie Misrock, senior partner in the law firm of Pennie & Edmonds and the company's special patent counsel, said, "This patent provides broad protection for many of CYTOGEN's and its licensees' proposed therapeutic products. Along with the company's two previously issued patents, this new patent provides strong coverage for CYTOGEN's product commercialization programs."

CYTOGEN has received the necessary regulatory approvals for Phase I clinical trials with its own antibody therapeutic conjugate OncoTher(R), for the treatment of adenocarcinomas including lung, breast and colorectal malignancies. In the aggregate, these cancers account for nearly half the new cases each year in the United States.

In addition to its own program, CYTOGEN has entered field of use licenses with Eli Lilly and Co., American Cyanamid Corp. and Farmitalia Carlo Erba, S.p.A. for use of the patented technology in their cancer drug delivery programs. CYTOGEN is currently in discussions with additional companies regarding other field of use licenses.

CYTOGEN Corp. is a biopharmacuetical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at CYTOGEN are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

SAN DIEGO (FEB. 27) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced that it has executed a non-binding letter of intent for private equity

financing of between $3 million and $4 million of convertible preferred stock. The investment will be led by Euro-American-I LP of Menlo Park, Calif., and will include the Siparex Group of Lyon, France, and Adler & Co., of New York.

The purchase will be divided into two series of preferred stock. The Series A shares will be convertible to common at $2 per share and carry a dividend of 7 percent, and the Series B shares will be convertible at $2.50 per share and carry a dividend of 9 percent. The stock is nonredeemable for the first seven years, and thereafter may be redeemed at the option of the company. The transaction is subject to satisfactory completion of due diligence, documentation and the renegotiation of IRT's existing banking arrangements with Sanwa Bank and Citicorp (NYSE: CCI). The anticipated closing date is March 30, 1990.

IRT also announced that is has commenced negotiations with its lending banks to achieve revised agreements with those institutions satisfactory to the new investor group. While preliminary indications from both Citicorp and Sanwa Bank are encouraging, there can be no present assurances that the existing bank credit agreements can be successfully renegotiated to the satisfaction of the investor group.

Clifford V. Brokaw III, chairman and chief executive officer of IRT, said, "Management of IRT is extremely pleased to have reached this preliminary agreement with this eminent investor group. The assistance that the Company expects to gain, both domestically and internationally, from this potential association enhances the obvious advantages of obtaining greatly needed equity funding."

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed, and is the technology leader in automated X-ray inspection systems with computerized defect-recognition capability. The company develops and manufactures inspection and process monitoring systems, including integrated systems for electronics, automotive, aerospace, and defense applications. IRT also operates a commercial radiation processing facility, which provides high-energy electron-beam processing for a number of commercial applications. Company headquarters are in San Diego.

CONTACT: Vicki L. Foote, 619-450-4343, ext. 402, or John W. Battin, 619-450-4343, ext. 403, both of IRT Corp.

#90058p0038 02/27/1990 ~PR Newswire

TROY, MI (FEB. 27) PR NEWSWIRE - Du Pont Automotive Products will begin specifying safety features, such as anti-lock braking systems (ABS) and air bags, on new company cars, based on the recommendation of an employee

safety group.

"This initiative, generated by our employees through a driving safety committee, demonstrates our support of the auto industry's safety efforts, as well as our longstanding commitment to safety," said Ross W. Fasick, group vice president - automotive products.

The adoption of safety equipment in Du Pont fleet cars and mini-vans will be implemented over the next several years as Du Pont renews its national fleet and as ABS and air bags become available on more models.

The incorporation of ABS and air bags into the department's 523-car fleet is expected to help employees prevent accidents, reduce injuries and cut vehicle downtime and repair costs, said Edward J. Zinser, business manager for engineered services and chairman of the Du Pont Automotive Products Driving Safety Committee.

Du Pont Automotive Products supplies engineering materials and technology for ABS systems manufactured by Robert Bosch Corp., ITT Automotive's Teves Division, Kelsey-Hayes Co. and Allied-Bendix. They include "Thick Film" for ceramic circuitry; "Pyralux" and "Kapton" flexible laminates for flex-rigid circuits and interconnect systems; and "Riston", a photo-imaging system material for circuit boards.

The company also supplies materials to TRW, Allied-Bendix and Morton International for air bag systems, including "Nylon Type 715" yarn for inflatable bags, "Dym 150" polyester elastomer for deployment doors in instrument panels and steering wheels and "Rynite SST" thermoplastic polyester for crash sensor housings.

Other Du Pont products for automotive safety include "Butacite" PVB resin for anti-lacerative sheeting for side windows and windshields to protect from laceration and ejection; "Zytel" nylon, "Dymetrol" elastomeric tape, "Delrin" acetal resin and "Hytrel" polyester elastomer for shoulder harnesses, seat belt mechanisms and child-proof door lock latches; and "Selar" barrier resin for plastic gas tanks that are more resistant to impact and corrosion than conventional metal tanks.

According to the National Safety Council, Du Pont's safety record is 16 to 20 times' better than the average industrial company, based on the incidence of occupational injuries and illnesses.

With world headquarters in Troy, Du Pont Automotive Products offers more than 100 product lines to automakers worldwide, including plastics and advanced composites, elastomers, finishes, fibers, electronics, fabricated products and specialty chemicals and lubricants.

MIAMI (FEB. 27) PR NEWSWIRE - Claire's Stores, Inc. (NYSE: CLE) today reported on an unaudited basis that net income for the 53-week fiscal year ended Feb. 3, 1990 increased 174 percent to $19.5 million from $7.1 million for the 52-week fiscal period last year, while net sales for the year rose 49 percent of $190.1 million from $127.3 million one year ago. Earnings per share for the year were 97 cents versus 36 cents in the prior year.

Net income for the 14-week fourth quarter increased 42 percent to $11.7 million from $8.3 million, in the 13-week fourth quarter last year. Net sales increased 55 percent during the fourth quarter to $78.3 million from $50.7 million. Fourth quarter earnings per share advanced to a record 58 cents from 42 cents a year ago.

Rowland Schaefer, Claire's chairman and president said, "This outstanding performance represents net income as a percent of sales of 10.2 percent for the full year. This was the result of both strong unit growth and enhanced sales productivity at existing stores made possible by our well-focused merchandising efforts," Schaefer concluded.

Claire's Stores, Inc., the nation's premier retailer primarily specializing in one-stop shopping for popular priced women's fashion accessories, currently owns and operates 834 stores in major enclosed malls in 47 states.

#90058p0047 02/27/1990 ~PR Newswire

GOTEBORG, SWEDEN (FEB. 27) PR NEWSWIRE - SKF (NASDAQ: SKFRY), the world's largest manufacturer of bearings, today reported that group income after financial income and expense (equivalent to pre-tax income) rose 62.6 percent from Swedish kronor (SEK) 1.519 billion in the preceding year to SEK 2.470 billion for 1989. Sales increased 18 percent during the same period, from SEK 21.248 billion to SEK 25.066 billion.

Group sales were favorably affected by continued growth in the world economy. SKF also reported an improvement in income due to efficient production units, successful major rationalization projects, an intensified focus on marketing and an increasingly more efficient organization.

The balance of demand and supply reached in the rolling bearings market in 1988 continued to influence operations in 1989. The favorable sales trend placed a growing demand on the Group's production resources, which responded with a substantial increase in volume. In the aftermarket, another thousand distributors signed agreements with SKF, thereby authorizing them to assume the identity of an SKF dealer. Efforts in the service and maintenance segments were further intensified.

The trend in Europe for the SKF Tools business area was satisfactory. The weak economy in Brazil adversely affected the results of the company in Sao Paulo, which influenced the total income reported by SKF Tools.

The SKF Component Systems business area continued to develop positively, reporting higher sales and improved earnings. All operations in the business area capitalized on the potentials offered by the favorable business climate by strengthening their positions in the various markets.

Group Earnings Operating income in 1989 rose 66.6 percent, compared with 1988, amounting to SEK 2.599 billion (SEK 1.560 billion), after depreciation according to plan of SEK 826 million (SEK 779 million). Net financial expense increased during the year to SEK 129 million from SEK 41 million in 1988, mainly due to developments in the high-inflationary countries.

Group income after financial income and expense amounted to SEK 2.470 billion (SEK 1.519 billion), of which rolling bearings accounted for SEK 2.032 billion (SEK 1.208 billion), tools for SEK 127 million (SEK 142 million) and component systems for SEK 328 million (SEK 209 million). Taxes for the year, after extraordinary items and taxes on extraordinary items, including taxes paid and deferred, amounted to SEK 989 million (SEK 543 million), corresponding to 40.0 percent (35.7 percent) of income after financial income and expense.

Earnings per share before extraordinary items and conversion, but after full tax, were SEK 14.15 (SEK 9.05). Return on capital employed was 20.0 percent (14.3 percent), and return on adjusted shareholders' equity 14.0 percent (10.1 percent).

Group liquid assets at year-end totaled SEK 3.417 billion (SEK 3.611 billion). In total, short- and long-term loans were reduced by SEK 521 million to SEK 4.121 billion (SEK 4.642 billion). Year-end inventories, as a percentage of sales, amounted to 33.4 percent (33.6 percent) corresponding to SEK 8.382 billion (SEK 7.130 billion). Capital expenditures during the year amounted to SEK 1.290 billion (SEK 1.119 billion). The average number of employees was 46,667 (43,331), of which 5,436 (5,125) were located in Sweden.

Parent Company Beginning January 1989, the

operations of the Parent Company include only the staff functions for the Group and business area management. The industrial operations in Goteborg were transferred to separate companies on Jan. 1, 1989. Parent Company income after financial income and expense amounted to SEK 328 million (SEK 191 million). Operating income, representing the net of central administration costs in the Group, was a loss of SEK 99 million compared with a loss of SEK 168 million in 1988.

A sale/leaseback agreement was reached during the year covering one of the Company's properties in Goteborg. The proceeds from this transaction are shown as an extraordinary gain of SEK 235 million. Provisions have been made in the financial statements for the year to cover the expected costs related to discontinuing the plasma activities. This amount is reported as an extraordinary expense of SEK 230 million. Net income for the year was reported as SEK 357 million (SEK 351 million).

Forecast for 1990 Management expects the industrial production growth to be somewhat lower in 1990 than in 1989, but sufficient for SKF to maintain its current level of profitability.

Proposed Dividend The board of directors proposed a dividend of SEK 4.25 per share (SEK 3.50 per share). The total amount of the proposed dividend is SEK 459 million (SEK 378 million).

The annual general meeting will be held on Thursday, April 26, 1990.

NOTE: At Dec. 29, 1989, 6.1850 SEK equaled one U.S. dollar.

BOSTON (FEB. 27) PR NEWSWIRE - XTRA Corporation (NYSE: XTR) issued the following comment concerning the XTRA Corporation Independent Stockholders Committee lawsuit filed yesterday, seeking to block a sale of the company.

"The XTRA board has determined to solicit acquisition proposals for the sale of the company and, accordingly, acted to postpone its annual meeting of stockholders to afford stockholders sufficient time to become fully informed of this important development. As previously disclosed, the company is actively pursuing recent expressions of serious acquisition interest by potential buyers."

Charles F. Kaye, chairman of the board of XTRA, stated, "The favorable market activity in the company's stock yesterday reflects support for the board's decision to sell the company. The opposition committee has ignored the XTRA board's sincere open invitation to participate in the efforts of the board and its financial advisors, Goldman, Sachs & Co., to achieve a satisfactory transaction for all stockholders. The committee is apparently steadfast in refusing to consider a sale of the company and is thereby depriving XTRA stockholders of the opportunity to receive premium value for their shares. The election of the opposition committee would result in putting XTRA in the hands of Gintel and his group without the XTRA stockholders having any prospect of receiving a control premium. In our judgment, the committee's actions are contrary to the stockholders' economic interest and do not advance the interests of any stockholders other than themselves."

MIAMI (FEB. 27) PR NEWSWIRE - In a continuing effort to strengthen U.S. education in science and engineering, GM will donate an estimated $35 million to select schools this year, a senior executive said here today.

Gary W. Dickinson, vice president of the Technical Staffs Group, highlighted GM's involvement with the academic community at the University of Miami's International Conference on the Management of Technology.

"Companies and universities have a joint responsibility to interest young people in math and science, and then help ensure a top-notch education," Dickinson said. "For the past five years, GM's annual cash grants, scholarship assistance and equipment donations have averaged over $35 million. Our 1990 contributions are expected to be comparable."

Dickinson said 80 percent of GM's educational cash contributions support science and engineering activities. The remainder goes to various business education programs. More than half of the funds are given to 75 colleges and universities on GM's Key Institution list, selected primarily for the quality of their curriculums.

"Naturally, those are the schools we tend to recruit from, and those are many of the same institutions we rely on for R&D contracts," Dickinson explained. In 1989, GM's Technical Staffs spent approximately $3 million for research and development projects at 35 colleges and universities. That accounted for about 75 separate contracts.

"These contractual agreements allow us to tap the best resources available without adding permanent employees and while maintaining a pure research environment," Dickinson said. "The schools and students also benefit by having a business partner and the funding to explore a new area of science."

Citing additional GM commitments to various educational foundations, Dickinson announced that GM recently approved a $225,000 grant for the Mathcounts Foundation. Mathcounts is a national mathematics competition for junior high school students. "Each year, the top three national winners receive GM scholarships of $10,000, $6,000 and $4,000 as part of GM's grant," he said.

Contributions are paid through a separate GM Foundation.

DRESHER, PA (FEB. 27) PR NEWSWIRE - The board of directors of Selas Corporation of America (AMEX: SLS) today declared a 2-for-1 split of the company's outstanding common stock.

Shareholders of record on March 12, 1990, will be entitled to receive one additional common share for each common share held. Certificates for the

additional shares will be mailed on April 2.

The Selas board also declared today a cash dividend of $0.03 per share on the post-split shares. The dividend will be payable on April 2, 1990, to stockholders of record on March 12. Selas last paid a cash dividend in 1981.

Selas also today reported record net income of $3,383,000 or $1.53 per share on the post-split shares ($3.05 on the pre-split shares) on sales of $51,435,000 compared to net income of $653,000 or $.30 per share ($.59 on the pre-split shares) on sales of $41,026,000 reported for the year ended Dec. 31, 1988. The results include a tax benefit from a net operating loss carryforward in 1989 and 1988 of $.23 and $.13 per share, respectively, on the post-split shares.

For the quarter ended Dec. 31, 1989, net income was $1,480,000 or $.67 per share ($1.33 on the pre-split shares) on sales of $21,632,000, compared to net income of $80,000 or $.04 per share on the post-split shares on sales of $8,346,000 reported for the same period in 1988. The results include a tax benefit from a net operating loss carryforward in 1989 and 1988 of $.11 and $.05 per share, respectively, on the post- split shares.

Company President and Chief Executive Officer Stephen F. Ryan, stated, "We are extremely pleased with record earnings for the year. We also continue to be optimistic for the coming year based upon strong backlog. We are delighted that the stock market has reflected our improving performance and that we are able to split our shares to obtain wider distribution and improve marketability of our stock. We are also happy that our cash position permits the payment of a cash dividend to our shareholders."

Selas is an international design, development, engineering and manufacturing company.

NEW YORK (FEB. 27) PR NEWSWIRE - Kodak Legal Systems (KLS) introduced its

new Document Management System Monday at Legal Tech '90 at the New York Hilton. The new system allows law firms to catalog, track and retrieve information about documents produced as part of daily work procedures in a fast and more efficient manner.

Cutting down the time and effort expended to locate existing work product is a major consideration at law firms today. The new KLS Document Managment System is designed to save that time-and-effort by successfully combining several key features such as an integrated firm-wide database, an exclusive graphical user interface, and a solution that is designed only for law firm use.

According to Jim Clarke, KLS director of product marketing, "Effective document management systems in the 1990s will be the key to linking multiple offices and workgroups. These systems will provide a clear and uniform means for filing and retrieving law firm work product. Moreover, they will give each staff member access to the entire firm's 'institutional memory' regardless of where information is stored."

The KLS Document Management System consists of five components: (1) a fixed-field index filing system; (2) revision control for recreating versions of the document at any stage; (3) statistics for cost capture and productivity management; (4) full-text retrieval; and (5) archiving for tracking the location of documents stored off-line.

Bibliographic information captured by KLS Document Management is stored in a powerful relational database allowing flexible access and reporting. Documents may be located by searching on any combination of that information.

Revision control logs all modifications to documents capturing the author's name and date of the change, as well as the number of lines deleted or inserted. A complete journal of changes is saved with the document so the user can recover the exact document as of any specific date or named revision. Only the changes to documents are maintained, thereby reducing system overhead. The KLS Document Management System is the newest part of the KODAK Legal Management System family of products. Kodak Legal Systems is a division of Electronic Pre-Press Systems, Inc., a wholly owned subsidiary of Eastman Kodak Company.

SAN JOSE, CA (FEB. 27) PR NEWSWIRE - Keegan Management Co. (NASDAQ: KMCI) today reported record revenues and income for the fourth quarter and year ended Dec. 31, 1989.

For the fourth quarter, net income was $385,000, or 13 cents per share, compared with a loss of $53,000, or 2 cents per share for the prior year's fourth quarter. Revenues for the fourth quarter increased 45.1 percent to $12.9 million, compared with revenues of $8.9 million in the year ago period.

Net income for the year ended Dec. 31, 1989, increased 76.8 percent to $1.8 million, or 59 cents per share, over the $1.0 million or 34 cents per share, in net income reported for the year ended Dec. 31, 1988. Revenues rose 62.8 percent to $49.4 million for the year, compared with revenues of $30.4 million for the prior year's period.

Commenting on the results, Ken Keegan, president and chief executive officer, said: "The substantial increase in revenues and earnings reflect the combination of an aggressive acquisition program and our company's professional marketing and management skills for our 65 Nutri/Systems Weight Loss Centers."

Keegan added, "We are gratified that the initial public offering of Keegan Management stock last December was favorably received in the marketplace. We are committed to enhancing stockholder value through the consistent improvement of merchandising and client services. During 1989 we successfully acquired three centers and opened 12 centers and our strategic plan includes acquiring an additional 35 centers during the next two years. We are optimistic that 1990 will further reflect the continued growth and prosperity of our organization."

Keegan Management Co. is the largest franchisee of Nutri/System Weight Loss Centers based on revenues. According to information published by the franchiser, Nutri/System Inc., the Nutri/System Weight Loss Program is one of the weight loss industry's largest personally and professionally supervised complete weight loss and weight control programs in North America. Keegan Management owns and operates an aggregate of 65 centers in five counties of the metropolitan San Francisco Bay Area and in certain areas of Iowa, Kansas, Kentucky, Nebraska and Ohio.

BEAVERTON, OR (FEB. 27) PR NEWSWIRE - Epitope Inc. (NASDAQ: EPTO) today announced that Organon Teknika Corp., an AKZO company, extended for two years its exclusive worldwide marketing agreement for the sale of Epitope's EPIblot(R) AIDS confirmatory test.

"Organon Teknika has been an important marketing partner for Epitope, tripling sales of the EPIblot(R)-HIV-1 product from 1987 to 1989 and making it the best-selling product in Epitope's diagnostic product line. We expect that the renewed agreement will enable further revenue gains for this product in fiscal 1990 because of increasing orders and two price adjustments, one of which went into effect last September," stated Michael Hubbard, Epitope president and CEO.

The EPIblot(R)-HIV-1 kit contains reagents to perform up to 20 individual tests. Sold primarily to small-to-medium-volume laboratories, it is one of several AIDS confirmatory tests developed by Epitope. Two other kits for confirming HTLV-1 and HIV-2 virus infection are marketed by Genetic Systems Corp. In 1989, Epitope introduced an automated AIDS confirmatory test system, which also detects the presence of antibodies to HIV, HTLV-1, and HIV-2, is marketed as well by Genetic Systems Corp.

Epitope Inc. is a 10-year-old Oregon company utilizing biotechnology to develop diagnostic tests for AIDS, therapeutic drugs for protozoan diseases and, through its agricultural unit, Agritope Inc., agronomically superior new plant varieties.

PITTSBURGH (FEB. 27) PR NEWSWIRE - Bayer USA Inc., the U.S. management holding company of Bayer AG, West Germany, today announced that its 1989 consolidated net income increased by 23.7 percent to $153.9 million, compared with $124.4 million last year.

Consolidated net sales increased 15.0 percent to $5.4 billion, up from $4.7 billion in 1988.

Dr. Konrad M. Weis, president and chief executive officer of Bayer USA, reported solid increases in all segments of its businesses (chemicals, healthcare and imaging technologies). "On balance, we are very pleased with the results. Our healthcare company, Miles, once again reported strong growth. The acquisition of the diagnostics company, Technicon, also increased and broadened our healthcare portfolio. Our imaging technologies company, Agfa, had a good turn-around year, and our chemical company, Mobay, had solid growth, despite the downturn in key markets, such as automotive and housing," said Weis.

Of Bayer USA's total sales, 42 percent is in chemical products (polyurethanes, engineering plastics, agricultural chemicals, dyes and pigments, inorganic, organic and rubber chemicals, textile fibers and

animal health products), 40 percent in healthcare (pharmaceuticals, diagnostics, OTC products and household products), and 18 percent in imaging technologies (photographic products, medical diagnostic imaging systems and electronic graphic imaging systems).

Bayer USA is the U.S. management holding company of Bayer AG, West Germany one of the world's largest and most diversified chemical companies, including major businesses in healthcare and imaging technologies. Worldwide, Bayer AG and its subsidiaries employ more than 170,000 people in some 460 affiliated companies in over 70 countries.

CINCINNATI (FEB. 27) PR NEWSWIRE - United Brands Company (NYSE: UB) announced today that it will change its name to Chiquita Brands International, Inc., effective March 20, 1990.

"We are taking this step," said Keith E. Lindner, president and chief operating officer, "to increase the company's recognition with its many publics, including shareholders, associates and the financial and business communities.

"United Brands changed significantly in the 1980s," said Lindner. "We have expanded our product line and marketing network to become the world's largest marketer of fresh fruit and vegetable products. In addition, we

continue to build upon our successful value-added prepared foods business.

"We believe our preeminent Chiquita name -- one of the few brands recognized worldwide for superior quality and nutrition -- can best communicate the consumer marketing thrust of our company today," he added.

"This change does not affect our fundamental business strategy. In fact, we believe the new name is more closely linked to our mission to produce long-term growth in earnings per share and shareholder value as a global leader in premium branded foods," Lindner explained.

He pointed out that the company recently completed its sixth consecutive year of earnings per share growth of at least 15 percent annually.

"Our basic strategy is the foundation for increased profitability in all areas. To that end, we are continuing to focus on strengthening and extending the use and value-added benefits of Chiquita, and our other brands, such as Pascual, John Morrell, Rath Black Hawk and Numar," he added.

American Financial Corporation, which holds approximately 82 percent of United Brands' common stock, has approved the name change, and no further shareholder action is required.

#90058p0066 02/27/1990 ~PR Newswire

TROY, MI (FEB. 27) PR NEWSWIRE - Arbor Drugs, Inc. (NASDAQ: ARBR), which currently operates 92 drugstores in Michigan, today announced a 15.8-percent increase in net income and a 12.0-percent increase in net sales for the second quarter ended Jan. 31, 1990.

Eugene Applebaum, chairman, president and chief executive officer, attributed the record performance to strong sales growth and ongoing expense discipline.

Arbor's second-quarter net income was $3,658,000 or $.38 per share, up from $3,158,000, or $.33 per share, in the comparable period of fiscal 1989.

Net sales for the second quarter were $90,492,000 vs. $80,815,000 last year. Comparable store sales increased 7.9 percent for the quarter.

Net income in the first half of the year was $6,057,000, up 28.1 percent over last year's $4,729,000. Earnings per share for the six months increased from $.50 to $.64.

Sales for the first half of the year were $169,669,000, up 14.3 percent from $148,436,000 in the first half of the prior year. Comparable store sales were up 10.0 percent for the six-month period.

The Board of Directors of the Troy-based retailer today also declared a regular quarterly cash dividend of $.04 a share, payable April 3, 1990, to holders of record as of March 20, 1990.

Commenting on the results, Applebaum said: "Our second quarter, traditionally the highest quarter in terms of sales and profits, represented the best performance in the history of our company. Importantly, the second quarter builds on the success of the first three months of the fiscal year and provides an optimistic outlook for another record year. We also believe that our excellent six-month performance reflects our commitment to managing profitable growth. We are pleased to report the results achieved in our comparable stores, including exceptional strength in our growing pharmacy department."

Applebaum also noted: "A key part of our growth strategy has been the opening of new drugstores. In the second quarter, Arbor opened five new stores and we are pleased with their performance to date. Also in the second quarter, our company initiated a number of technological programs that will improve our ability to provide customers with superior service. Along with introducing Arbortech Plus, an enhancement to our pharmacy computer system, we completed our pilot program of a point-of-sale system. These are two of several projects currently in progress to advance Arbor's technological edge."

In addition to the five drugstores opened in the second quarter, Arbor Drugs, the nation's 22nd-largest drugstore chain, opened another store thus far in the third quarter of the current fiscal year. The company plans to open at least six more units during the remainder of the current fiscal year.

NEW YORK (FEB. 27) PR NEWSWIRE - Net income of Woolworth Corporation (NYSE: Z) rose to record levels for the thirteen and 52 weeks ended Jan. 27, 1990, Harold E. Sells, chairman and chief executive officer, reported today. For the thirteen-week period, net income increased 22 percent to $175 million, or $2.73 per share, from $144 million, or $2.23 per share, in the comparable 1988 period. For the fifty-two weeks ended Jan. 27, 1990 net income rose 14 percent to $329 million, or $5.11 per share, from $288 million, or $4.47 per share, in the prior year.

Sells noted that changes in foreign-currency translation rates did not have a material effect on revenues or operating profit comparisons in either the thirteen- or fifty-two-week period.

Revenues Revenues for the thirteen weeks ended Jan. 27, 1990, increased 9.8 percent to $2,795 million from $2,546 million in the comparable 1988 period. Specialty store revenues increased 17 percent and general merchandise revenues increased 5.4 percent. Domestic revenues increased 12 percent and foreign revenues, expressed in U.S. dollars, rose 7.6 percent.

For the fifty-two weeks ended Jan. 27, 1990, revenues increased 9.1 percent to $8,820 million from $8,088 million in the prior year. Specialty store revenues increased 19 percent and general merchandise revenues increased 3.1 percent. Domestic revenues rose 9.9 percent and foreign revenues, expressed in U.S. dollars, increased 8.0 percent.

Operating Results For the thirteen-week period ended Jan. 27, 1990, operating profit (income before unallocated items) rose 33 percent to $307 million from $231 million in the comparable 1988 period. Domestic operating profit rose to $161 million from $119 million, and foreign operating profit rose to $146 million from $112 million. Included in domestic operating profit for the thirteen weeks ended Jan. 27, 1990, was a $24 million LIFO credit compared to an $18 million LIFO charge in the comparable 1988 period. Specialty store operating profit rose to $139 million from $97 million. General merchandise operating profit rose to $168 million from $134 million.

For the fifty-two weeks ended Jan. 27, 1990, operating profit rose 20 percent to $657 million from $549 million in the comparable 1988 period. Domestic operating profit rose to $399 million from $345 million, and foreign operating profit rose to $258 million from $204 million. Domestic operating profit included a $7 million LIFO credit in 1989 compared to a $33 million LIFO charge in 1988. Specialty store operating profit rose to $350 million from $287 million. General merchandise operating profit rose to $307 million from $262 million.

BLUE BELL, PA (FEB. 27) PR NEWSWIRE - U.S. Healthcare Inc. (NASDAQ: USHC) one of the nation's leading providers of managed health care services, today announced a 30 percent increase in its regular cash dividend.

The quarterly dividend on common stock was increased from $.0575 to $.075 per share and on Class B stock from $.05175 to $.0675 per share. The first quarterly cash dividends under the new rates will be paid on March 26, 1990, to shareholders of record as of March 13.

This is the third increase in dividends announced by U.S. Healthcare during the past 12 months. The company increased its quarterly cash dividend 25 percent in March 1989 and again 15 percent in September of the same year.

Leonard Abramson, president of U.S. Healthcare, said that the increase in cash dividends reflects the belief by management and the board of directors that increased profitability merits higher dividends to shareholders.

Abramson also noted that 1989 was an eventful year for U.S. Healthcare. Membership in the company's health maintenance organizations (HMOs) passed the 1 million mark and revenue exceeded $1 billion.

U.S. Healthcare owns and operates health maintenance organizations in Pennsylvania, New Jersey, New York, Delaware, Connecticut and Massachusetts. The company also provides comprehensive managed health care services to self-insured and other employers. In addition, the company has an agreement with Blue Cross and Blue Shield of Missouri under which it developed and now provides operational and administrative services to an HMO in St. Louis and has similar arrangement with HMO of Northeastern Pennsylvania Inc.

#90058p0071 02/27/1990 ~PR Newswire

DALLAS (FEB. 27) PR NEWSWIRE - Metro Airlines, Inc. (NASDAQ: MAIR) today announced financial results for the fiscal third quarter and nine months ended Jan. 31, 1990. The company also announced the termination of its stock repurchase program instituted Oct. 29, 1987.

For the third quarter, operating revenues were $48.9 million, and the net loss was $6.3 million, or $1.03 per share. In the same period last year, operating revenues were $35.1 million, and the net loss was $4.8 million, or 83 cents per share.

For the nine-month period, operating revenues were $139.4 million, and the net loss was $15.3 million, or $2.51 per share. For the same period a year ago, operating revenues were $113.0 million, and net income was $6.4 million, or $1.10 per share, including $8.0 million, or $1.37 per share, from a change in accounting for aircraft engine overhauls.

J.L. Seaborn, president, attributed the loss primarily to three factors -- continuing losses at the company's Atlanta operations, where Metro is affiliated with Eastern Air Lines; a dramatic increase in fuel prices during the fiscal third quarter, and soft traffic in the company's Metro Air Northeast operations.

Metro, one of the nation's oldest and largest regional airlines, operates more than 100 turboprop aircraft and serves 78 cities in the southwestern and eastern United States and the Caribbean.

NEW YORK (FEB. 27) PR NEWSWIRE - Bio-Technology General Corp. (NASDAQ: BTGC) announced today the initiation of a third clinical study utilizing its recombinant hepatitis-B vaccine. In addition to clinical trials already well under way in an Eastern-bloc country and Singapore, the new study will be a multicenter trial taking place in Thailand and coordinated by Scitech Medical Products Pte., Ltd., BTG's licensee in the Far East.

The vaccine integrates the S, the pre-S1 and the pre-S2 viral proteins. The presence of the pre-S1 and pre-S2 proteins should significantly enhance the protection against infection afforded by the vaccine. Other commercially available recombinant hepatitis-B vaccines lack the pre-S1 and pre-S2 proteins and consequently are less immunogenic (i.e. afford less protection) as judged by immune studies in animals. Bio-Technology General's vaccine is produced in mammalian cells providing excellent yields of the purified viral components.

"Enhanced protection and comparatively low production cost could allow Bio-Technology General's vaccine to emerge as among the more clinically and commercially viable hepatitis-B vaccines currently being developed," stated Sim Fass, Bio-Technology General Corp.'s president. Worldwide sales for hepatitis-B vaccines are projected to exceed $500 million annually.

Bio-Technology General Corp. is engaged in the research, development and manufacture of genetically engineered products for human and animal health care.

WASHINGTON (FEB. 27) PR NEWSWIRE - Nycal Corporation (NASDAQ: NYCL) today announced financial results for the six months ended Dec. 31, 1989, reporting a gain for the first time in 15 years.

During the first half of its fiscal year, Nycal engaged in a complete financial restructuring, including the raising of new equity funds and settlement of substantially all of the company's debts. A combination of cash and equity were employed in the settlement of debts and largely contributed to the total gain during the period of $1,108,099. This gain was sufficient to offset a loss from operations of $399,408 and other company losses of $255,545. The resulting net gain of $453,146 provided a per share gain of 19 cents for the six-month period.

With its financial restructuring essentially complete, Nycal indicated that it does not expect any further significant gains to result from debt settlements during the remainder of its fiscal year. The company noted that the reported gain will not result in a year-end tax liability due to prior year and projected current year operating losses.

Nycal also announced that Irwin Singer was appointed as a director of Nycal Corporation at a Feb. 15, 1990 board meeting. Singer is a lawyer and private investor residing in Toronto, Canada.

PHILADELPHIA (FEB. 27) PR NEWSWIRE - International Mobile Machines Corp. (NASDAQ: IMMC) announced today that BellSouth Services Inc., a wholly

owned subsidiary of BellSouth Corp. (NYSE: BLS), intends to use IMM's Ultraphone(R) 100 System for regional deployment.

BellSouth Services has issued a regional letter reporting the results of the product evaluation of the Ultraphone System.

The issuance of this regional letter will pave the way for future Ultraphone installations in 1990. Use of the Ultraphone 100 System has come after extensive field testing at several BellSouth sites including Ripley, Miss.; Selma, Ala., and Clarksdale, Miss. There is no question that product testing is extremely thorough and time consuming. However, this process is essential to insure that BellSouth's standards remain impeccable in providing quality service to customers.

Concurrent to this product evaluation, BellSouth indicated that they intend to purchase five Ultraphone Systems in the first quarter of 1990. The five systems will include four Ultraphone 100 Systems and one Ultraphone 200 Transportable System. The Ultraphone 200 Transportable System will be used for restoring high-quality telephone communications following an emergency or natural disaster such as Hurricane Hugo's ravaging of South Carolina. The Ultraphone 200 helps restore critical local loop sections of a telephone network within a matter of hours.

In commenting about BellSouth's product evaluation, William J. Hilsman, president and chief executive officer of IMM, stated, "I am personally delighted that our Ultraphone System has passed BellSouth's rigorous testing and has been accepted into their product stream. Moreover, now with acceptance from a Regional Bell Operating Company, we should be able to move much faster in the other Bell markets."

IMM is a world leader in wireless digital access technologies. The company is engaged primarily in the production, sale and installation of Ultraphone, a digital radiotelephone system currently operated by telephone companies located in 13 states, Canada and Mexico.

MIAMI (FEB. 27) PR NEWSWIRE - Atlantis Group, Inc. (AMEX: AGH) announced today that its board of directors has declared a 5 percent stock dividend on the Class A Common Stock and Class B Common Stock of Atlantis.

Each holder of record of Class A Common Stock and Class B Common Stock on the close of business on Friday, March 9, 1990 (the "Record Date") will be entitled to receive the dividend. The dividend will be payable in Class A Common Stock, with each holder of Class A Common Stock and Class B Common

Stock entitled to receive one share of Class A Common Stock for every 20 shares of Class A Common Stock or Class B Common Stock held of record on the Record Date.

In lieu of issuing fractional shares, Atlantis will pay cash to each stockholder otherwise entitled to receive fractional shares in an amount equal to the fractional number of shares to which such stockholder is entitled multiplied by $3-3/8, the closing price per share of the Class A Common Stock on Feb. 21, 1990 as reported by AMEX.

The distribution date for the shares of Class A Common Stock to be issued in connection with the stock dividend and the cash payable in lieu of fractional shares will be March 30, 1990. 3,126,901 shares of Class A Common Stock and 3,733,529 shares of Class B Common Stock were outstanding on Jan. 31, 1990 and without accounting for fractional shares, it is estimated that approximately 3,469,922 shares of Class A Common Stock and 3,733,529 shares of Class B Common Stock will be outstanding subsequent to the stock dividend.

Atlantis, headquartered in Miami, is committed to growth through acquisitions and internal expansion in key segments of the plastics and furniture manufacturing industries.

#90058p0082 02/27/1990 ~PR Newswire

FAIRFIELD, CT (FEB. 27) PR NEWSWIRE - As anticipated, Acme United Corporation (AMEX: ACU) today reported a net loss of $1,556,069, or 49 cents per share, for the fourth quarter ended Dec. 31, 1989. This compares to a net loss of $244,059, or 7.5 cents per share, for the fourth quarter of 1988.

Fourth quarter net sales were $8,427,876 in 1989, compared to net sales of $8,632,917 in 1988.

The company reported a net loss of $1,408,307, or 44 cents per share, for the year ended Dec. 31, 1989. This compares to net income of $25,932, or one cent per share, for 1988.

Net sales for 1989 were $37,749,286, compared to $37,316,681 for 1988. In reporting the results, Henry C. Wheeler, president and chief executive officer, said that, "As we announced in a statement on January 16, the company took an after-tax charge of approximately $1 million, or 32 cents per share, in discounting a line of enteral feeding products, a segment of its medical products business."

In addition, an after-tax loss of approximately $580,000, or 18 cents per share, resulted from higher overhead costs incurred from a planned $2.6 million reduction in inventories. The reduction has increased cash flow and will improve profitability by $240,000 annually on a long-term basis, Wheeler said.

Acme United is entering 1990 with its medical product business on a profitable basis, Wheeler noted. The company had reduced field selling and manufacturing costs and achieved a higher gross margin on its medical products.

The company's consumer products will be bolstered by the recent acquisition of Emil Schlemper GMBH & Co., West Germany's largest manufacturer of scissors, shears and manicure implements.

Acme United is a leading producer of metal disposable surgical instruments sterile procedure trays, germicidal products and wound-care packs for hospitals and the after-care market as well as the country's largest producer of household shears, scissors, wooden rulers and yardsticks for the consumer. There were 3,173,000 common shares outstanding as of Dec. 31, 1989.

WILMINGTON, DE (FEB. 27) PR NEWSWIRE - Du Pont (NYSE: DD) today announced it will consolidate production of high-performance coatings by closing its Moberly, Mo., plant and a finishes operation at Parlin, N.J., by early 1991.

The action will affect about 250 employees.

"The consolidation will reduce excess capacity and align supply capabilities with the forecast needs of customers," said Louis F. Savelli, finishes division director, Du Pont automotive products. "We regret the impact this decision will have on affected employees, but we believe it is necessary to improve our long-term competitiveness."

Needed manufacturing capacity from Moberly and Parlin will be consolidated at other facilities.

According to Savelli, customer acceptance of newer high-performance coatings technology and manufacturing productivity improvements for those newer products have led to the excess capacity. "In a highly competitive business environment, we must respond with the most efficient and

effective supply capability that will meet customer needs," he said.

Du Pont will do everything possible to ease the impact on affected employees, he said. Among benefits available to those who are laid off are extended medical benefits, severance pay and job relocation assistance.

#90058p0087 02/27/1990 ~PR Newswire

CHICAGO (FEB. 27) PR NEWSWIRE - Oce'-USA entered the very-high- volume copier market today with the introduction of the Oce' 2500, a powerful photocopier system operating at 100 copies per minute.

Designed for the 100,000-500,000 copies per month user, the Oce' 2500 features Oce''s unique copying process that provides superior offset-quality copies and increased reliability.

Unlike conventional xerographic processes the Oce' dual-belt system transfers or presses the image directly onto the surface of the paper in one operation, similar to conventional printing techniques. In contrast, the xerographic process requires the image to "jump" from the photoconductor to the paper via an electrical charge; as the photoconductor ages, copy quality will gradually decrease. Oce' is also the only company to use a monocomponent toner, eliminating the need for developer or fuser oil, which also can age. For the copier user, these Oce' innovations offer more consistent copy quality, more accurate reproduction of half tones, and longer equipment life.

Among the features that contribute to the copier's reliability are the Oce' 2500 one-pass duplexing system and short paper path, which reduce static electricity and lower the potential for paper jams. In addition, the Oce' 2500 can automatically duplex from either paper tray, increasing productivity.

Key to the Oce' 2500's design is Oce's dedication to continuous copying. The copier system offers increased productivity to the operator by permitting routine operations, such as paper and toner replenishment, while the copier is running. According to Morgan, the Oce' 2500 is the only copier in the industry with this in-process capability for both paper and toner.

Complementing these productivity features is a next-job programming function that enables the operator to program and activate up to 10 subsequent jobs while the copier handles a current task, again eliminating unnecessary wait time. Other features include a 4,500-sheet paper compartment -- the largest of any copier in its class -- and the ability

to automatically switch trays when the paper supply is depleted.

The Oce' 2500 offers companies more than increased productivity. As concern for safety in the workplace intensifies, management will appreciate that the Oce' 2500 is also environmentally friendly. Due to its design, the Oce' 2500 emits no excess toner dust, has the lowest ozone emission in its class at less than 0.04 mg/m3, and operates at a low noise level of less than 75 dB. Moreover, the copier also saves energy -- and operating costs -- through a programmable, automatic on/off time switch that shuts down the copier during off-hours, when users often forget to turn off the system.

Oce'-USA, Inc., is headquartered in Chicago, and is a wholly owned subsidiary of Oce'-van der Grinten, N.V. (NASDAQ: OCENY), a world leader in reprographic equipment.

KANATA, ONTARIO (FEB. 27) PR NEWSWIRE - Newbridge Networks Corporation (NASDAQ: NNC) is expecting to announce third quarter results imminently. Third quarter performance was lower than analysts' expectations. A number of European contracts expected to be completed for the third quarter were not concluded. This business is now expected to contribute to the fourth quarter results.

The U.S. and the Canadian and Asia Pacific regions performed substantially according to plan. Direct sales of corporate backbone networks were higher than plan and represented 60 per cent of U.S. sales.

Order backlog at third quarter end was the highest in the company's history.

Significant improvements in accounts receivable have been achieved in the month of February.

The company is expecting strong fourth quarter growth. Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in Canada, the United States and the United Kingdom.

Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the

United States.

NEW YORK (FEB. 27) PR NEWSWIRE - Ramtron Australia Ltd. (ADRs - NASDAQ: MEMRY) today announced that its majority owned, Colorado Springs-based subsidiary, Ramtron International Corporation, has signed an additional multi-million-dollar agreement with NMB Semiconductor Company Ltd. of Japan (NMBS) to co-develop a second generation of high speed 4-million bit (4MB) Dynamic Random Access Memories (DRAMs). The new 4MB DRAMs, as well as the first generation of 4MB DRAMs now entering production in NMBS' semiconductor fabrication plant in Tateyama, Japan, will be sold exclusively through Intel's worldwide sales force of 1,500 people. Intel Corporation (NASDAQ: INTC) is the world's market leader in microprocessors.

The worldwide market for 4MB DRAMs is forecasted at $2.8 billion in 1991, growing to $11.6 billion by 1994, according to the latest forecast by Dataquest, the market research subsidiary of Dun and Bradstreet Corporation. Under the terms of the agreement with NMBS, which have not been disclosed, Ramtron is earning development and licensing fees as well as ongoing royalties from the sale of all of the co-developed 4MB DRAMs.

Ramtron will retain ownership of the products, which are expected to be commercially available during the second half of 1990.

Richard Horton, president of Ramtron International Corporation, commented, "The new generation of 4MB DRAMs being co-developed with NMBS for worldwide sale by Intel significantly increases the potential for greater worldwide sales and market share of our 4MB DRAM products."

Horton continued, "The very high operating speed of these 4MB DRAMs will allow computer system designers to implement zero wait state memory (no waiting time memory) directly interfaced with today's most advanced high speed 32-bit microprocessors without the need for Static Random Access Memory SRAM-based cache (buffer) storage in many cases."

In addition to traditional computer system applications, these new 4MB DRAMs are expected to be used in new high growth applications such as laptop computers, digital facsimile machines (faxes), laser copiers and printers as well as solid state chip replacements for magnetic disks currently in use in computer systems.

NMB Semiconductor Company Ltd. is one of the world's leading semiconductor manufacturers specializing in high speed DRAMs. NMBS' facilities at

Tateyama, Japan are acknowledged by experts to be the most highly automated semiconductor plants in operation. NMBS is a majority owned subsidiary of The Minebea Company Ltd. of Japan, a multinational corporation with sales in excess of $3 billion annually.

Ramtron International Corporation is a majority-owned subsidiary of Ramtron Australia Ltd. Ramtron develops leading-edge semiconductor memory products based on proprietary ferroelectronic materials and advanced processing and design technologies.

#90058p0098 02/27/1990 ~PR Newswire

MINNEAPOLIS (FEB. 27) PR NEWSWIRE - Michael Foods, Inc. (NASDAQ: MIKL), today reported financial results for the year ended Dec. 31, 1989.

Fourth quarter 1989 net earnings were $4,022,000, compared to $3,721,000 in the same period the previous year. This represented an 8 percent increase and established a new quarterly earnings record for the company. This also represented a sharp improvement from the previous three quarter's earnings results. Earnings per share were $.36 versus $.33. Fourth-quarter sales rose 44 percent to $76,685,000 versus $53,356,000 in the fourth quarter of 1988.

Net earnings for 1989 were $12,015,000, a decrease of 2 percent from 1988's record level of $12,310,000. Earnings per share were $1.06, compared to $1.20, reflecting 11 percent additional shares outstanding. Net sales rose to $255,336,000, a 35 percent increase from 1988's $188,747,000.

In commenting about the 1989 results and Michael Foods' outlook, CEO Richard Olson said, "We were pleased that profits recovered in the fourth quarter, allowing us to nearly match 1988's record annual net income. Profit trends are currently favorable in all four of our business segments and are expected to remain as such through the year. Market development of Easy Eggs(TM), our ultrapasterized liquid egg product, and volume trends for this new and innovative product are encouraging.

"Our Egg business experienced exceptional shell egg profitability during 1989, but this was more than off-set by losses from Easy Eggs. Those losses diminished greatly in the second half of the year and were modest in the fourth quarter. Our Refrigerated Distribution Division had an excellent year and Dairy results were very good. Potato company results reflected a substantial decline in earnings, relating to the impact of poor

weather conditions on the potato crop.

"1989 was a year in which we made significant strategic investments in plant and equipment, market development and people. We expect to see benefits from these investments in 1990. Our corporate strategic direction remains focused on innovative products, low-cost production, expanded distribution and acquisitions."

Michael Foods is a Minnesota-based, diversified food processor and distributor with particular interests in eggs and value-added egg products refrigerator case products, frozen and refrigerated potato products, and dairy products, including pasteurized and ultrapasteurized ice milk mix, ice cream mix, milk and specialty products. Subsidiaries and affiliates include Crystal Foods, Inc.; Northern Star Company; Kohler Mix Specialities, Inc.; the Milton G. Waldbaum Company; Morning Glory Eggs, Inc.; Wisco Farm Cooperative; Farm Fresh Foods, Inc.; Drallos Potato Co., Inc.; Country Queen, Inc.; and Reddi Egg America, Inc.

MINNEAPOLIS (FEB. 27) PR NEWSWIRE - Officials of EnScan, Inc., a unit of Minneapolis-based Diversified Energies, Inc. (DEI) (NYSE: DEI), said today that Commonwealth Electric Company (COM/Electric) of Massachusetts has purchased an evaluation package of the AccuRead(R) automated meter reading system for testing on its electric meters.

COM/Electric, which serves more than 325,000 customers in 41 communities including New Bedford, Plymouth, Cambridge and the geographic area comprising Cape Cod, is a subsidiary of Cambridge, Mass.-based Commonwealth Energy System (NYSE: CES).

The AccuRead system is a patented product of Minneapolis-based EnScan, Inc.

COM/Electric joins 16 other investor-owned and public utilities -- including its sister company -- Commonwealth Gas (COM/Gas) -- who are either doing large-scale installations of the AccuRead system, or who are testing the system, on their gas, electric or water meters.

The AccuRead system, which operates through advanced radio frequency technologies and computer software applications that are proprietary to EnScan, enables utilities to read their customers' gas, electric or water meters simply by driving by their homes at normal traffic speeds in specially equipped vehicles. One specially equipped vehicle can read up to 24,000 meters in an eight-hour period, compared to 250-400 meters that can be read the traditional way of walking routes and manually reading meters.

EnScan's parent company, Diversified Energies, Inc., is an energy services products and communications corporation that is traded on the New York Stock Exchange under the symbol: DEI.

NAPERVILLE, IL (FEB. 27) PR NEWSWIRE - First Midwest Bancorp (NASDAQ: FMBI) today announced that a definitive agreement has been signed whereby it will acquire the $75 million Plainfield National Bank, Plainfield, Ill. Terms of the agreement were not disclosed.

Located in Will County adjacent to the fast-developing I-55 corridor, Plainfield is experiencing the rapid growth that much of southwest metro Chicago is enjoying. Commenting on the acquisition, Robert P. O'Meara, president of First Midwest Bancorp, said, "The Plainfield market represents tremendous opportunity and complements well our recently established presence in the adjoining Bolingbrook market, and, indeed, our overall presence in Will County, where we are the largest bank. In addition, Plainfield National is a high asset quality, very well performing bank that consistently ranks amongst metro Chicago's highest performing banks. Entry into a strong market via a very clean, high performing bank is what this acquisition is about," concluded O'Meara.

The acquisition is subject to the customary approvals with consummation being expected in the third quarter.

This acquisition represents a continuation of First Midwest's strategic plan to focus its business in the fast growing markets of metropolitan Chicago. The addition of Plainfield will enhance First Midwest's already strong southwest metro Chicago-Will County presence, where it currently operates five banking offices with assets exceeding $700 million.

With assets exceeding $2 billion, First Midwest Bancorp is one of Illinois' largest bank holding companies, currently operating 35 banking offices and five trust offices primarily in northern Illinois.

#90058p0111 02/27/1990 ~PR Newswire

DURHAM, N.C. (FEB. 27) PR NEWSWIRE - The Board of Directors of CCB Financial Corporation (NASDAQ: CCBF) has adopted a Shareholder Rights plan of one preferred share purchase right ("Right") for each outstanding share of common stock of CCB. The Rights are designed to enable all of the shareholders of CCB Financial Corporation to realize the full value of their investment and to receive fair and equal treatment in the event that a hostile proposal is made to acquire control of CCB. At this time, CCB is not presently aware of any effort on the part of any person or other company to acquire control of CCB Financial.

The Rights are not designed to prevent an acquisition of CCB at a price deemed fair to all shareholders. The Plan is designed to encourage anyone interested in acquiring CCB to negotiate with its Board of Directors prior to making any proposal.

Each Right, when and if exercised, will entitle the holder thereof to purchase a one-hundredth interest in a share of a new series of preferred stock of CCB at an exercise price of $100.00 per share. Initially, the Rights will not be exercisable and will transfer with and only with the shares of common stock. The Rights will be exercisable and separately transferable twenty business days after an announcement that a person or group of persons (an "Acquiring Person") has acquired, or commences or announces an intention to commence a tender or exchange offer to acquire, 15 percent or more of the common stock of CCB Financial Corporation. In this case, each Right will entitle its holder (other than the Acquiring Person) to purchase a number of shares of common stock of CCB having a market value of twice the exercise price of the Right. Additionally, if CCB is acquired in an unsolicited merger or business combination transaction, each Right will entitle its holder to purchase, at the then-current exercise price of the Right, a number of shares of common stock of the acquiring company having a market value at that time of twice the exercise price of the Right.

The Rights were distributed to shareholders of record on February 26, 1990. The Rights will expire ten years later on February 26, 2000. The distribution of the Rights is not taxable to shareholders.

DALLAS (FEB. 26) PR NEWSWIRE - Edisto Resources Corporation (AMEX: EDS) announced today that its board of directors approved a 1990 capital expenditure budget of approximately $76.0 million, a 74 percent increase over 1989 capital expenditures totaling $43.6 million. $19.5 million has been budgeted for exploration and development of onshore prospects and $56.5 million for the exploration and development of offshore prospects, primarily in the Gulf of Mexico.

Edisto also reported that a preliminary reserve report showed proved oil and gas reserves of 9.6 million barrels of oil and 134.6 billion cubic feet of gas at Dec. 31, 1989, compared with 8.4 million barrels of oil and 149 billion cubic feet of gas for year-end 1988. The present value of proved oil and gas reserves at Dec. 31, 1989 was $194.2 million (discounted at 10 percent and before income taxes), compared with $177.3 million at Dec. 31, 1988. Reserves for the year ended Dec. 31, 1988 have been adjusted to show the pro forma effects of the previously reported property sale in April 1989.

James R. McNab Jr., chairman and CEO, said: "The reserve report for the year ended December 31, 1989 is presented on a preliminary basis because the company is still engineering proved reserves with respect to two offshore wells, located on the West Cameron 628 and Grand Isle 82 blocks,

which were drilled in late December. It is expected that when the reserve report is finalized and includes quantities attributable to these two wells, proved reserves on a natural gas equivalents basis will be basically flat when compared to year-end 1988 pro forma proved reserves and proved reserves reported at June 30, 1989. I am pleased that we were successful in maintaining Edisto's reserve levels during 1989. We were able to achieve this by replacing reserves produced with capital expenditures significantly lower than those budgeted for 1990."

Edisto Resources Corporation is a Dallas-based, Delaware corporation incorporated in 1970. Edisto's consolidated activities include the production of oil and gas, the exploration for, and development of, oil and gas reserves and the acquisition of oil and gas properties.

ROCHESTER, NY (FEB. 27) PR NEWSWIRE - The board of directors of Bausch & Lomb (NYSE: BOL) today approved a 14 percent increase in the quarterly dividend on the company's common stock to 33 cents per share from the previous level of 29 cents per share. The new annual dividend rate of $1.32 per share compares to the former rate of $1.16.

In announcing the increase, Daniel E. Gill, chairman and chief executive officer, said, "Bausch & Lomb concluded the decade of the 1980s with record sales and earnings results for the seventh year in a row. We enter the new decade with extremely strong momentum and leading market positions in virtually every product line around the world. This dividend increase reflects our confidence that future results will be consistent with our long-term goals and the outstanding performance of the past few years."

The dividend is payable April 1, 1990, to shareholders of record on March 9, 1990.

Bausch & Lomb's last dividend increase was effective on April 1, 1989.

HOUSTON (FEB. 27) PR NEWSWIRE - Enron Oil & Gas Company (NYSE: EOG) announced today that Edward Randall III has been elected to the company's board of directors. The election brings the number of EOG board members to five.

"Mr. Randall will provide us invaluable experience with his background of more than 42 years in the financial arena," said Forrest E. Hoglund, EOG chairman. "We are very pleased that he has joined our board and look forward to working with him."

Randall began his career at Rotan Mosle Inc. in 1948 and became a partner in 1954. He was named senior vice president of the firm in 1966 and later served as president, CEO and chairman of the board until 1985. He also served as president, CEO and chairman of the board of Rotan Mosle Financial Corp. from 1974 to 1985. He currently serves as a partner in the private investment banking firm of Duncan, Cook & Co., a position he has held since September 1985.

Randall holds a bachelor's degree in economics from the University of Texas at Austin. He serves as a director for the American Oil and Gas Corporation, Kilroy Company of Texas, Inc., PaineWebber Group Inc., and Starcraft, Inc.

Enron Oil & Gas Company is one of the largest independent (non-integrated) oil and gas companies in the United States in terms of domestic proved reserves. The company had 1.561 trillion cubic feet of natural gas equivalents at the end of 1989. Approximately 91 percent of the reserves are domestic and approximately 91 percent are natural gas.

CAMDEN, N.J. (FEB. 27) PR NEWSWIRE - Campbell Soup Co. (NYSE: CPB) said

today it will bring together two operating units, Campbell U.S.A. and Campbell Soup Co. Ltd. (Canada), into a major new division, the North America Division.

Herbert M. Baum, executive vice president and president-Campbell U.S.A., is promoted to president of the North America Division.

David W. Johnson, Campbell president and chief executive officer said, "The change addresses the exciting and enormous potential of an American Common Market arising from the Canada-U.S. Free Trade Agreement and is pivotal for Campbell's future. It will provide us with a strong network of manufacturing and marketing systems and will strengthen our competitive stance in North America as we face a unified Europe and an aggressive Pacific rim. The Canadian and U.S. units will retain their separate legal identities but will achieve much greater synergy under the new structure.

"I am particularly pleased to place Herb Baum at the helm. He is a seasoned leader in the industry with a splendid record of accomplishment as president of Campbell U.S.A., which gives me much confidence that he will excel with the additional responsibility," Johnson said.

Campbell Soup Co. Ltd (Canada) was formerly a part of the International Division of Campbell Soup Co. The Canadian company is headquartered in Toronto, and will continue under its chairman, president and chief executive officer, C. David Clark. Clark will now report to Baum.

Baum joined Campbell in February 1978 as associate director, New Products, in the Canned Foods Division. Five months later he was promoted to director-Marketing Services.

He was named corporate vice president of Marketing in January 1980. In March 1981, he was named vice president-Marketing for the U.S. Division and general manager-Soups. In April, 1985 he was named president-Campbell U.S.A., Campbell's largest operating unit. In March 1986, he was given the additional title of senior vice president of Campbell Soup Co. He was named a Campbell executive vice president in November 1989.

Before joining Campbell, he was a vice president at Needham, Harper & Steers advertising agency. He supervised Needham's Campbell Soup Co. account from 1971 to 1977. Previously he was an account executive with Doyle Dane Bernbach and Stern, Walters & Simmons agencies.

CAMDEN, SC (FEB. 26) PR NEWSWIRE - Builders Transport Incorporated (NASDAQ: TRUK) and Comcar Industries, Inc. announced today that they have entered into a letter of intent providing for the combination of their companies through the acquisition by Comcar of all the outstanding common stock of Builders for a cash price of $15 per share.

The letter of intent is subject to a number of conditions, including completion of due diligence, negotiation of a definitive acquisition agreement and the method for handling Builders' subordinated debentures, the obtaining of financing and the receipt of a fairness opinion by Builders. The letter of intent is not binding on the parties and there is no assurance that a transaction will be concluded.

Comcar Industries is a privately held company headquartered in Auburndale, Fla., which is the parent company of seven diversified nationwide and regional motor carriers. Comcar, one of the nation's leading truckload carriers, has over 40 years experience in the trucking industry.

Builders Transport also announced that its results of operations for the fourth quarter ended Dec. 31, 1989, were adversely affected by severe weather conditions and sharply increased fuel costs during the month of December as well as required increases in workers compensation and other reserves. Accordingly, the company expects to report a loss for the fourth quarter.

Builders Transport, Incorporated is a truckload carrier transporting a wide variety of general commodities in both interstate and intrastate commerce. The company is headquartered in Camden and conducts operations throughout the continental United States, pursuant to authority granted by federal and state regulatory agencies.

#90058p0159 02/27/1990 ~PR Newswire
ROCHESTER, N.Y. (FEB. 27) PR NEWSWIRE - Ford Motor Company will show its all new 1991 Ford Escort and Ford Explorer to New York car and truck buyers for the first time tonight at the 1990 Rochester Auto Show, which runs through Sunday at the Rochester Convention Center.

"The Escort and Explorer will allow Ford to continue to maintain its sales leadership into the 1990s," said Roger Olsen, Ford Division's Buffalo district sales manager.

"When the all-new Escort -- the world's best-selling nameplate for the decade of the '80s -- goes on sale this April as a 1991-model, it will usher in a new era at Ford in terms of quality, manufacturing and design."

The Escort, available in three body styles -- two-door hatchback, four-door hatchback and four-door station wagon -- is part of a family of cars which will be sold in all major worldwide markets, including 500,000 in North America.

The $1.9 billion project is the largest association program any auto company has attempted, and represents a maturing of Ford's partnership with Mazda, which was responsible for Escort's engineering. The interior

design, as well as Ford's traditional aerodynamic exterior design, were wholly Ford's responsibility.

The Escort will be assembled at Ford's Wayne (Mich.) Integral Stamping and Assembly Plant with additional production at the company's Hermosillo plant in Mexico.

Unveiling the Ford Explorer -- recently named by 4-Wheeler Magazine as its 1990 Truck of the Year -- and, an all-new entry in the fast- growing sporty compact utility vehicle market segment, Olsen said:

"First-time truck buyers should like Explorer when it goes on sale in March. It combines truck toughness and versatility with many of the comfort and convenience features associated with our cars."

The lineup includes two- and four-door, two-wheel and four-wheel- drive models. The four-door Explorer model should appeal to families who want the added versatility of a utility vehicle. The two-door model should suit the younger buyer who wants the versatility along with unique and bolder styling cues, Olsen said.

The Explorer is powered by a 4.0-liter electronically fuel-injected (EFI) V-6 engine -- the largest ever in a Ford compact light truck. It generates 155 horsepower and is teamed with a standard five-speed manual overdrive or optional four-speed automatic overdrive transmission.

PLAINVIEW, N.Y. (FEB. 27) PR NEWSWIRE - Professional Care, Inc. (AMEX: PCE) announced today that the Appellate Division of the Supreme Court of the State of New York reversed a lower court decision that had denied summary judgment to the deputy attorney general for Medicaid Fraud Control of the State of New York in its civil action against PCE for treble damages under Social Service Law sub section 145-b. In doing so, the

court stated that the attorney general was entitled to summary judgment in the amount of $2 million against PCE.

Martin Weissman, president of PCE, stated that PCE will seek leave to appeal the decision to the New York State Court of Appeals. Weissman added that there is currently pending in the Supreme Court of the State of New York a motion for summary judgment against the attorney general by PCE which, if granted, would render the attorney general's summary judgment moot. PCE's motion for summary judgment is based upon a recent U.S. Supreme Court case, decided subsequent to the attorney general's motion for summary judgment, which applied constitutional principles of double jeopardy to cases such as this. Weissman stated further that PCE would pursue its existing action against the attorney general for $7.5 million in damages.

WASHINGTON (FEB. 27) PR NEWSWIRE - United Press International Managing Editor Bill Ferguson will return to Chicago from Washington in April to enable UPI to better coordinate broadcast with newspaper editorial operations.

Ferguson, a 39-year veteran of UPI, transferred on assignment to Washington more than three years ago as managing editor, duties he assumed in 1986.

UPI Executive Vice President-News Jim Whyte said, "Management of many of UPI's current projects requires Ferguson, as managing editor, to return to Chicago and to be more involved with broadcast operations headquartered there.

"Ferguson travels frequently between Washington and Chicago," Whyte said. "By returning the ME's office to Chicago, he will be able to devote more time to the critical coordination of broadcast and newspaper operations."

Ferguson, who was based at UPI's Chicago bureau for 30 years, moved to Chicago with UPI's broadcast division in 1957, rising in 1982 to the post of vice president and executive editor.

Whyte said Ferguson's duties will be largely unchanged by the return to Chicago. Whyte said Ferguson plays key roles in leading UPI's editorial projects and Ferguson will continue to work closely with UPI's assistant managing editors and with UPI Senior Vice President/Executive Editor Al Rossiter Jr.

Ferguson joined predecessor United Press' Atlanta bureau in 1950 and served there in numerous reporting and editorial roles.

United Press International, founded June 21, 1907, has more than 180 bureaus and is represented in 90 nations. UPI is owned by Infotechnology Inc. (NASDAQ-NMS: ITCH), an information and communications company.

DENVER (FEB. 27) PR NEWSWIRE - Inter-Regional Financial Group (IFG) through its two major subsidiaries, Minneapolis-based Dain Bosworth Inc. and Dallas-based Rauscher Pierce Refsnes Inc., has selected MCI Telecommunications Corp. to provide its voice communications network.

The two-year, multi-million dollar agreement calls for MCI Vnet Service, a virtual private network, to link 71 national locations for these investment banking firms.

John Schwartz, Dain Bosworth vice president, said, "Our objective was simple: a long-term solution for our communication needs that would maximize our savings and enable us to best serve our customers. MCI's Vnet is that solution. It's a leading-edge technology which will grow with us.

"For example, the Vnet Network Information Management System allows us access to MCI's Vnet data base, so we can monitor network activity and use the traffic and billing data for analyzing our usage patterns. We'll use Vnet's Customer Information Manager feature to make traffic-flow changes such as dialing plans. Real-time network management capabilities such as these will significantly increase our control over long-distance usage.

"In addition," continued Schwartz, "Our past customer service history with MCI has been superior. We are confidently embarking upon a long-term partnership that will be mutually beneficial for both MCI and our organization."

Said MCI West Division President Tom Wynne, "We're pleased to strengthen our relationship with these distinguised firms. Once again, MCI's flexibility has resulted in providing the most responsive and cost-effective solution for its customer."

Inter-Regional Financial Group provides securities, brokerage and investment banking services in the western United States through its subsidiaries, Dain Bosworth and Rauscher Pierce Refsnes, which are both

members of the New York Stock Exchange and the Securities Insurance Protection Corp. Headquartered in Minneapolis, and Dallas, respectively, these firms have a combined network of approximately 1,000 registered representatives in 71 offices in 19 states.

MCI, headquartered in Washington, provides a full range of global telecommunication services to businesses, residences and government agencies by employing advanced fiber optics, digital microwave, satellite and digital switching technologies. The company owns and operates one of the world's most extensive communication networks which utilizes state-of-the-art technology to transmit voice, data and video worldwide. MCI West Division, headquartered in Denver, is responsible for marketing, sales and operations in 15 western states.

VALLEY FORGE, PA. (FEB. 27) PR NEWSWIRE - UGI Corp. (NYSE: UGI) reported today that Cyrus H. Holley, executive vice president and chief operating officer of Engelhard Corp., and Quentin I. Smith Jr., retired chairman and chief executive officer of Towers, Perrin, Forster & Crosby, have been elected directors of the Pennsylvania gas utility and national distributor of propane.

The election of Holley and Smith increases the size of UGI's board to 11 members.

Holley, 53, has served more than 30 years in executive and managerial positions in the chemical industry. He joined Engelhard in 1979 as a senior vice president and general manager of its former Minerals & Chemicals Division. Prior to becoming executive vice president in 1985, he was a senior vice president and president of the firm's Specialty Chemicals Division.

He is a director of Engelhard and a trustee of the Independent College Fund of New Jersey and Bloomfield College. He is also an executive-in-residence at Bloomfield and an advisor to both Fairleigh Dickinson and Texas A&M universities. Holley is a graduate of Texas A&M and a resident of Far Hills, N.J.

Smith, 62, retired from Towers, Perrin, Forster & Crosby at the end of 1987 with 30 years of service, including 17 years as chief executive officer. He joined the company's New York office in 1957 as a consultant and became chairman in 1981. Previously, he served as president, executive vice president, vice president and manager of the New York office. He was

elected to the board in 1967.

He is presently a director of Omnicom Group Inc., The Guardian Life Insurance Company of America and Lawson Mardon Group Limited, Toronto. Smith is a graduate of Yale University and the Advanced Management Program of the Harvard Graduate School of Business. He is a resident of East Orleans, Mass.

SAN FRANCISCO (FEB. 27) PR NEWSWIRE - San Francisco-based PLM International Inc. (AMEX: PLM) today announced the opening of a London office. Gary A. Gerttula will head the London office as vice president of International Marketing. Gerttula will be responsible for the company's business development activity in Europe and its expansion into other international markets. He will also assist with equipment acquisition and remarketing efforts.

Gerttula, 36, formerly held the position of vice president, Portfolio Acquisition at the company's San Francisco headquarters. He graduated with an MBA from Harvard Business School. In his new position, Gerttula will report to Marc J. Anderson, senior vice president, Marketing for PLM Transportation Equipment Corp., a subsidiary of PLM International.

"With PLMI's increasing presence in international markets, our London office will enhance PLMI's current lessee relationships in Europe and allow us to develop new contacts for our leasing and syndication businesses. The major economic changes taking place in the European community offer us an exciting opportunity for expansion over the next few years," Anderson said.

PLM International's London office is located at 100 Park Lane, Office 215, London, W1Y 4AR England. The telephone number is 011-44-1-491-1098.

PLM International is an integrated equipment leasing company engaged in the leasing and management of transportation equipment and in operating leases domestically and internationally, as well as the syndication of capital equipment leasing investments. The company operates and manages over $1.2 billion of transportation equipment and related assets for its own account, various sponsored partnerships and other third party accounts.

CHICAGO (FEB. 27) PR NEWSWIRE - The Amoco Corporation board of directors today elected Robert C. Carr, 49, as vice president and controller effective March 1.

Carr will replace Frederick j. Saathoff, 55, as Amoco's controller. Saathoff has elected to take early retirement effective April 1.

Carr currently is managing director and chief administrative officer of the Deerpath Group, Inc. of Lake Forest, Ill., a diversified financial services and merchant banking firm.

Prior to joining Deerpath, Carr spent 24 years with Mobil Corporation and subsidiaries, leaving in 1988 as chief financial officer of Montgomery Ward, Inc., a position he had held with the Chicago-based subsidiary since 1983.

The native of Hanover, N.H., is a 1962 graduate of Harvard University with a bachelor's degree in political science. He earned a master's degree in international affairs from Johns Hopkins' school of advanced international studies in 1964.

Saathoff was named Amoco's controller in 1988 after having served as deputy controller since 1982. He joined Amoco in 1956 and has spent his career in the company's financial and accounting areas, including being named assistant controller in 1979 and director of corporate accounting in 1981.

PITTSBURGH (FEB. 27) PR NEWSWIRE - Virginia Natural Gas, Inc., a recently-acquired subsidiary of Consolidated Natural Gas Company (NYSE: CNG), has asked the Virginia State Corporation Commission for approval to extend natural gas service into eight counties immediately north and east of its existing southeastern Virginia service area. The counties are Essex King and Queen, Lancaster, Mathews, Middlesex, Northumberland, Richmond and Westmoreland.

At the same time, the Norfolk-based utility announced that it has signed a 25-year contract to serve a 650-megawatt, combined cycle electric power plant to be built near Richmond.

Gas for both the plant and the new eight-county area would be delivered through extensions from a proposed 120-mile intrastate pipeline to be built by Virginia Natural Gas, along a route that runs from northern Virginia to the Hampton Roads area.

Virginia Natural Gas will deliver up to 125 million cubic feet of gas a day to fuel the plant, scheduled for a Dec. 1, 1991 start-up. Approved Feb. 13 by the State Corporation Commission, the $400 million facility will be the largest independent producer of electricity on the East Coast. The plant's output will be sold to Virginia Power, an electric utility subsidiary of Richmond-based Dominion Resources, Inc., at wholesale rates to be approved by the Federal Energy Regulatory Commission.

The plant's developer, Doswell Limited Partnership, will begin construction later this year. Doswell is a unit of Los Angeles-based Diamond Energy, Inc., which is a wholly-owned subsidiary of Japan's Mitsubishi Corporation.

With about 160,000 customers, Virginia Natural Gas is the state's second largest retail gas distributor. The company recently became the sixth local gas utility in the Consolidated system when it was purchased from Dominion Resources for about $160 million.

Consolidated is one of the country's largest producers, transporters and distributors of natural gas. Its primary marketing areas for natural gas are in Ohio, Pennsylvania, West Virginia, New York, and other states in the Northeast. The company explores for and produces gas and oil throughout the United States and in Canada.

BOSTON (FEB. 27) PR NEWSWIRE - When NYNEX introduces its INFO-LOOK Gateway Service here on March 1, it will not only be adding a major market but will also be rolling out a faster, more colorful version of its 14-month-old videotex service.

The Boston INFO-LOOK service will have more than 130 services on line. The INFO-LOOK service in New York City has 155 services on line and 40 others in a "test mode." The Vermont gateway which was the first to be introduced in December 1988 has 60 on-line services.

"The introduction of the Boston gateway signals a major expansion for INFO-LOOK as well as an opportunity to initiate innovations we've learned from more than a year's experience in the videotex business," said Ellen Powley, director-product development at the NYNEX Service Company.

The NYNEX INFO-LOOK service is aimed at the mass market of telephone customers who have personal computers and modems. Customers can dial up the gateway without having to pay any fixed monthly gateway charge. They pay for usage of the gateway and information providers' services. Charges are included on their phone bills under a separate heading called "Data

Services."

One of the innovations that users of the Boston and other gateways will experience is the improved, easier-on-the-eye graphics. Thanks to a new graphics software package distributed free to INFO-LOOK users, NYNEX will offer customers a bright new look in its gateway format as well as access to any one of the three different graphic formats used by information providers. This package will be available initially for computers that operate with DOS-compatible systems.

In addition, NYNEX has also made changes in the user interface in order to make it easier for customers to navigate through the gateway, according to Powley.

"Users still input their calling card numbers, but now the first screen is the category screen, which is what people are most interested in," she said. "Customers no longer have to type in the name of the category they want -- just a number. This makes it faster for the user to get through the front door of the gateway."

NYNEX Science & Technology developed the user interface and made all technical modifications to the gateway under the direction of Artur Urbanski, supervisor-transaction services Lab.

OYSTER BAY, NY (FEB. 27) PR NEWSWIRE - Reflecting the company's explosive growth, Acclaim Entertainment, Inc. is moving to new, expanded corporate headquarters in Oyster Bay. The company's finance, sales, marketing and distribution operations will be housed at the new site.

"Since its inception in 1987, Acclaim has seen more than $125 million in sales," said Robert Holmes, president and chief operating officer for Acclaim. "With such phenomenal growth, our employee base this past year increased significantly and our operational needs became greater. Moving into a larger, state-of-the-art facility while staying in Oyster Bay sets the stage for a smooth transition and provides us with further room for

growth."

One of the largest companies in Oyster Bay, prior to this move Acclaim was located at 189 South St. in Oyster Bay. Acclaim's new 10,000-square-foot headquarters, located at 71 Audrey Ave., is designed to house approximately 60 employees and is nearly triple the size of its former facility.

Acclaim also operates a subsidiary in Japan, Acclaim Japan, Ltd., as well as a European office based in Munich, West Germany.

Acclaim Entertainment, Inc. is a leading publisher, marketer and distributor of home entertainment products. These include Nintendo Entertainment System software, Nintendo Game Boy compact video system software, wireless remote controllers and hand-held electronic video games.

#90058p0205 02/27/1990 ~PR Newswire

PHILADELPHIA (FEB. 27) PR NEWSWIRE - Granisetron, a specific 5-HT3-receptor antagonist, is undergoing clinical evaluation by SmithKline Beecham (NYSE: SBH) as an antiemetic for the acute treatment of emesis (nausea and vomiting) associated with chemotherapy and radiotherapy in cancer patients.

Clinical studies to date indicate that granisetron offers a high degree of efficacy and safety in the treatment of such patients.

In accordance with regulatory requirements, life-long oral dosing studies in rats and mice have been undertaken with granisetron to support possible use for chronic indications. Because of the requirement to use doses at which unwanted effects begin to appear and because of the exceptional tolerability of granisetron, doses up to 1,250 times the likely clinical dose were employed. Preliminary data from these studies have indicated that oral administration of granisetron for 2 years at doses 125 - 1,250 times the likely clinical dose resulted in an increase in the incidence of liver tumors over those seen in control groups. However, no such increase was detected at dose levels 25 times the likely clinical dose. These data have been reported to Regulatory Authorities and clinical investigators.

SmithKline Beecham consider that these findings do not diminish the major benefit of granisetron as an antiemetic for patients receiving cytostatic therapy. Only short courses of treatment with granisetron are required to control the severe nausea and vomiting otherwise experienced in patients receiving cancer chemotherapy or radiotherapy. The company,

therefore, will continue its development plans for this indication. In particular, the imminent filing of the Marketing Authorization application for granisetron in the U.K. and subsequently elsewhere will continue as planned.

Granisetron itself will not be developed for other indications such as migraine, anxiety or irritable bowel syndrome. This decision will have no effect on the overall research program to develop 5-HT3-receptor antagonists for a range of other indications. Follow-up compounds at the clinical and pre-clinical phases are not affected by these findings.

ST. LOUIS, MO (FEB. 27) PR NEWSWIRE - Kellwood Company (NYSE: KWD) results for the third quarter and nine-month period ended Jan. 31, 1990, were disappointing, according to William J. McKenna, president and chief executive officer.

Net earnings for the quarter were $1,262,000, or $.11 per share, on sales of $170,946,000, compared to net earnings of $6,275,000, or $.52 per share on sales of $190,636,000 for the same quarter last year. Sales for the quarter fell 10 percent and earnings 80 percent.

For the nine-month period, net earnings were $17,439,000, or $1.45 per share, on sales of $588,363,000, in contrast to last year's comparable period net earnings of $23,767,000, or $1.98 per share, on sales of $554,497,000. Sales for the period rose 6 percent while earnings declined 27 percent.

The board of directors declared a quarterly dividend of 20 cents per common share, payable March 23, 1990, to shareowners of record March 9, 1990.

Kellwood Company is an international manufacturer and marketer of apparel, home fashions, and camping soft goods.

HOUSTON (FEB. 27) PR NEWSWIRE - The Coastal Corporation (NYSE: CGP) and

Union Enterprises Ltd. ("UEL") (Toronto: UEL), whose subsidiaries are sponsors of the Empire State Pipeline, today announced that Rochester Gas and Electric Corporation ("RG&E") (NYSE: RGS) has signed a letter of intent to acquire a 20 percent equity interest in the Empire project.

Already committed to become a significant Empire customer, RG&E has entered into the upstream transportation and storage arrangements necessary to commence service from the project.

Empire is a proposed $82.5 million, 155-mile intrastate pipeline that will run between Niagara Falls and Syracuse, N.Y.

Designed to move an average daily volume of 150 million cubic feet of natural gas, the new pipeline will offer natural gas users in western and central New York State competitively priced transportation, as well as access to every major supply basin in the North American continent.

A request to construct and operate the Empire State Pipeline was filed with the New York Public Service Commission (PSC) in June 1988. A decision on that application is expected soon.

"We feel RG&E's equity participation in Empire would add the unique benefit of a highly regarded local company that is a major energy provider in New York State and eminently familiar with energy interests there," said James F. Cordes, executive vice president of the Coastal Corporation.

Rochester Gas and Electric supplies electric and natural gas service wholly within the state of New York and is engaged in the production, transmission, distribution and sale of these services in a nine-county area centering around the city of Rochester.

Union Enterprises, a subsidiary of Unicorp Canada Corporation, is a Toronto-based integrated natural gas firm with $2 billion in assets and operations in natural gas production, marketing, transportation, storage and distribution.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of more than $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

LOS ANGELES (FEB. 27) PR NEWSWIRE - Advertising revenues for Times

Mirror's Newspaper Publishing group for the five weeks and year-to-date ended Feb. 4, 1990, decreased 3.5 percent to $153,666,000 from $159,282,000 in the prior year.

The first period of 1990 contained five Sundays, compared to six Sundays in the 1989 period. Excluding the benefits of the one additional Sunday in the first period of 1989, the Newspaper Publishing group would have reported a modest revenue gain. The Los Angeles Times' advertising volume would have shown year-over-year increases in total run-of-press linage, with strength in retail and classified advertising. At the eastern newspapers, the advertising volume declines were also affected by the unfavorable 1990 period calendar.

PHILADELPHIA (FEB. 27) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) said today that Unit 2 at the Peach Bottom Atomic Power Station in York County, Pa., will be taken off line this weekend for a planned, four-week, mid-cycle outage.

PE said the outage was planned for the half-way point between the unit's restart in April 1989, and its next refueling outage scheduled for February 1991. At nuclear power plants, one-third of a reactor's fuel is replaced every 18 months to two years.

During the outage, plant personnel will perform maintenance activities, surveillance testing and instrument calibration that cannot be done while the unit is operating. The mid-cycle activities are designed to ensure the unit's continued safe, efficient operation.

Plant operators will begin reducing power on the unit on Friday evening,

March 2, in preparation for taking it off line on Saturday, March 3. It is scheduled to return to service by the end of March.

The other reactor at Peach Bottom, Unit 3, will continue to operate during the outage at Unit 2.

GLENVIEW, IL (FEB. 27) PR NEWSWIRE - Churny Company, Inc., a subsidiary of Kraft General Foods, Inc., announced today that it has acquired Anco International Corp., a privately owned leading producer, distributor and importer of specialty cheese.

In making the announcement, David Blue, president of Churny, said, "We are delighted to have Anco join the Churny family. Anco brings quality trademarks, excellent manufacturing and distribution capabilities and a proven management team -- all of which will help us better compete in the growing $1 billion U.S. specialty cheese category."

Anco's Rondele brand is the leader in the spiced soft cheese segment, and its Athenos brand is the second largest selling feta cheese. The company has manufacturing plants in Wisconsin and Minnesota and distribution facilities in New Jersey and Florida, and is the country's largest cheese importer.

Churny Company, a subsidiary of Kraft General Foods since 1983, is a leading producer of specialty cheese, with such brands as Churny, May Bud and Hoffman's.

"I am very pleased that we could reach this agreement with Churny," said Claude Bourguignon, chairman of the board of Anco International. "Both businesses benefit from this association. Each has resources and capabilities the other can use. This will accelerate the growth of the total business."

Blue added, "Together, we can now offer a complete line of specialty and deli cheese. No other company can provide consumers with as wide a range of products."

Anco's management, including its president, John McLoughlin, have agreed to continue with the company.

Terms of the transaction were not disclosed.

Kraft General Foods, based in Glenview, Ill., is the multinational food

business of Philip Morris Companies Inc. (NYSE: MO).

DALLAS (FEB. 27) PR NEWSWIRE - Metro Airlines, Inc. (NASDAQ: MAIR) today announced financial results for the fiscal third quarter and nine months ended Jan. 31, 1990. The company also announced the termination of its stock repurchase program instituted Oct. 29, 1987.

For the third quarter, operating revenues were $48.9 million, and the net loss was $6.3 million, or $1.03 per share. In the same period last year, operating revenues were $35.1 million, and the net loss was $4.8 million, or 83 cents per share.

For the nine-month period, operating revenues were $139.4 million, and the net loss was $15.3 million, or $2.51 per share. For the same period a year ago, operating revenues were $113.0 million, and net income was $6.4 million, or $1.10 per share, including $8.0 million, or $1.37 per share, from a change in accounting for aircraft engine overhauls.

J.L. Seaborn, president, attributed the loss primarily to three factors -- continuing losses at the company's Atlanta operations, where Metro is affiliated with Eastern Air Lines; a dramatic increase in fuel prices during the fiscal third quarter, and soft traffic in the company's Metro Air Northeast operations.

Metro, one of the nation's oldest and largest regional airlines, operates more than 100 turboprop aircraft and serves 78 cities in the southwestern and eastern United States and the Caribbean.

SAN FRANCISCO (FEB. 27) PR NEWSWIRE - MacroMind(R) Inc., the leading vendor of multimedia software, announced today Windows Player, a run-time environment that allows users to playback MacroMind Director documents on a PC running future versions of Microsoft Windows.

"This announcement was prompted by requests from both our commercial and corporate customers who wish to be able to use their Macintoshes and PCs to distribute multimedia information," said Michael Grant, MacroMind product marketing manager. "Now multimedia developers have a dual-platform delivery and content distribution solution with the security of future Windows system software compatibility."

The functionality of the Windows Player is similar to that of the MacroMind Macintosh Player that currently ships with every copy of MacroMind Director. Documents created with MacroMind Director will be able to be played back under the Windows environment with full support of 4-bit and 8-bit color graphics, animation, transitions, audio and interactivity.

The Windows Player is based on, and offers a preview of the same technology that has been licensed to Microsoft for inclusion in future systems software. Both the technology licensed to Microsoft and the MacroMind Windows Player assure future playback compatibility with Macintosh-based MacroMind Director documents. In addition, the MacroMind Windows Player supports the playback of the interactive portions of those documents.

The MacroMind Windows Player will require a minimum hardware configuration to run properly including a 286 or 386 processor, VGA or VGA Plus graphics adaptor, and a minimum of 640K (one megabyte or more is recommended). A hard disk is recommended for large multimedia documents, and an audio adaptor board for sound generation.

Windows Player will be available in two product stages. The first, the developer version ($99), available in the second quarter 1990, will be released only to MacroMind certified developers. The second release, called MacroMind Windows Player 1.0 ($99), will be available direct from

MacroMind in the third quarter 1990. Commercial applications created in MacroMind Director and distributed with the MacroMind Windows Player will require the same one-time licensing fee of $250 per application that now applies to the Macintosh Player. For more information on MacroMind Windows Player licensing or becoming a MacroMind certified developer, please call Developer Relations at MacroMind, 415-442-0200.

MacroMind will also support most of the current methods for connecting Macintoshes and PCs.

PALM BEACH GARDENS, FL (FEB. 27) PR NEWSWIRE - "Developing truck- like service across-the-board -- with consistency and reliability like no railroad has ever had before," is Consolidated Rail Corp.'s (Conrail) (NYSE: CRR) new strategy for attracting more intermodal business, James A. Hagen, the company's chairman, president and chief executive officer, told a meeting of the Intermodal Marketing Association here today.

"Our target market is controlled by trucks," Hagen said. "Tackling that market requires extremely tight management and an intense focus on precisely what potential intermodal customers want, when they want it -- with no excuses."

Hagen explained that Conrail is seeking to develop new business in its target markets -- particularly intermodal -- by "raising the various elements of our service package to new and higher plateaus. We're combining new service initiatives and improvements in our physical plant with the introduction of enhanced computer systems for improving our entire service support structure."

Specific initiatives underway at Conrail include:

-- the reorganization of its customer service functions into a single unit to improve the company's ability to respond quickly to customer concerns;

-- advancements in simplified pricing and billing systems, and the electronic filing of rates which customers can access from their remote computer terminals; and,

-- the launching of computerized car scheduling for each shipment, including local delivery performance and monitoring.

Hagen also listed the improvements Conrail has made, or is making, to its physical plant in order to attract new intermodal traffic, including: the completion by the end of this year of a $90 million program to open all of the key markets on its system to double-stack traffic, and terminal

improvements in Harrisburg, Pa., Marysville, Ohio, and northern New Jersey.

CLARKSBURG, W.VA. (FEB. 27) PR NEWSWIRE - Alamco Inc. (AMEX: AXO) today announced its operating results for the fourth quarter and year 1989.

Alamco earned net income of $2,903,000, or $1.12 per share, in the fourth quarter on total revenues of $4,774,000, compared to net income of $2,308,000, or $1.13 per share, and revenues of $3,697,000 in the fourth quarter of 1988. For the full year 1989 Alamco earned net income of $4,729,000, or $1.83 per share, on total revenues of $12,712,000 compared to 1988 net income of $236,000, or $0.14 per share, on total revenues of $11,227,000. Results for the fourth quarter 1989 and the year include extraordinary gains of $119,000 for the quarter and $669,000 for the year, or $.04 and $.26 per share, respectively. Results in 1988 included an extraordinary loss of $159,000, or $.07 per share, in the fourth quarter and $9,000, or $.01 per share, for the year.

Revenues in the fourth quarter and full year 1989 included $2,291,000 related to the company's gas contract reformation agreement with CNG Transmission Corp. ("CNG"), its largest utility customer. Revenues in the fourth quarter and full year 1988 included $1,214,000 from the partial settlement of disputes with Columbia Gas Transmission Corp. ("Columbia'). Total revenues for the fourth quarter of 1989, excluding the effect of the CNG agreement and the Columbia settlement in 1988, were virtually equal to fourth quarter 1988 revenues. While fourth quarter gas and oil sales declined 3 percent or $56,000 to $1,867,000 in 1989 from $1,923,000 in 1988, well drilling service fees of $38,000 and higher well tending income offset the decline.

Alamco, headquartered in Clarksburg, W.Va., is an independent producer of gas and oil in the Appalachian Basin with a major operating concentration in West Virginia gas fields.

COLUMBUS, OH (FEB. 27) PR NEWSWIRE - Leslie H. Wexner, chairman and chief executive officer of The Limited, Inc. (NYSE/LSE/TSE: LTD) announced effective today the appointment of Ms. Susan Falk as president of the Henri Bendel division. Falk succeeds Mark Shulman who has resigned to

pursue other interests.

Falk joined The Limited, Inc. in February 1985 as vice president -- general merchandise manager of the Express division. In 1987, she was named executive vice president by Express President Michael Weiss. Since joining Express, the business has grown from 133 to 469 stores. In the last three years alone, sales have nearly tripled and profits have grown more than three-fold.

Wexner said, "I have the greatest respect for Susan's proven merchant skills and especially her sense of style. She will be an outstanding president. I'm confident Bendel's expansion plans for 1990 and its potential for the future will be fulfilled under Susan Falk's leadership. I am very pleased with Susan's enthusiastic acceptance of this new challenge."

Falk stated, "The last few years have been the most exciting and gratifying in my life. The leadership and support given by Michael Weiss and the Express associates made this opportunity possible. And now the chance to work with Les and the Henri Bendel associates is a once in a career opportunity."

Henri Bendel will open stores in Columbus, Chicago and Boston this summer. The 57th Street Henri Bendel store in New York will move to 712 Fifth Avenue in September.

The Limited, Inc., through the Limited, Express, Victoria's Secret, Henri Bendel, Lerner, Lane Bryant and Abercrombie & Fitch, presently operates 3,168 specialty apparel stores throughout the U.S. and distributes apparel nationally through the Victoria's Secret, Lerner, Lane Bryant and Roaman's catalogues.

#90058p0248 02/27/1990 ~PR Newswire

BOULDER, CO (FEB. 27) PR NEWSWIRE - Syntex Chemicals Inc. today dedicated its new, $4 million pharmaceutical production unit.

The 12,000 square-foot facility employs state-of-the-art manufacturing technology for the production of finished pharmaceuticals. Its primary function will be to produce the active ingredient employed in the new prescription medication, ticlopidine.

Ticlopidine is for potential use in preventing stroke in individuals who are at risk for stroke. An application for approval for Syntex to market this new drug is currently pending at the U.S. Food and Drug Administration (FDA).

The architectural design work for the facility was done by James D.

Copeland Architects Inc. of Boulder, and the mechanical design work was done by Behrent Engineering Inc. of Denver. Construction management services were provided by Quinlan Construction Inc. of Boulder. Construction took place over a 10 month period and involved 15 different local contractors and subcontractors. At its peak, the project employed 125 construction workers and craftsmen on a daily basis.

The dedication ceremonies were performed by the current vice president and general manager of Syntex Chemicals, Mr. Gerald Hoerig, together with all the past general managers of the plant: Dr. Richard Waugh (1947 - 1972), Dr. William Coleman (1972 - 1979), Mr. Robert Ells (1980 - 1983) and Ms. Jacqueline den Boer (1983 - 1986). Also in attendance was Mr. Thomas Gutshall, executive vice president, Syntex Corp.

Syntex Chemicals, based in Boulder, is involved in chemical process research and development and the production of active ingredients which are used in human pharmaceutical compounds. It is a wholly owned subsidiary of Syntex (U.S.A.) Inc.

Syntex Corp. is an international health care company that discovers, develops and markets prescription pharmaceutical products and medical diagnostic systems.

ATLANTA (FEB. 27) PR NEWSWIRE - Contel Corp. (NYSE: CTC) and Contel Cellular Inc. (NASDAQ: CCXLA) today announced the completion of a previously announced $1.3 billion acquisition of the Kentucky, Alabama and Tennessee cellular telephone properties of McCaw Cellular Communications, Inc. (NASDAQ: MCAWA).

In October 1989, Contel announced that Contel Cellular had signed a definitive agreement with McCaw Cellular to purchase the properties. The $1.3 billion purchase price represents an average price-per-POP of $205, excluding property, plant, and equipment of the systems purchased. ("POPs" refers to the population of a market area multiplied by the company's percentage ownership in the cellular system serving that market.)

The acquisition, the largest in Contel's history, nearly doubles the size of Contel Cellular's company-controlled operations, and moves the company from the 13th to the sixth largest cellular company in the U.S. Contel Cellular added 13 new metropolitan statistical areas (MSAs), six of which are in the top 90 markets in the U.S. Markets acquired include Nashville Memphis, Knoxville, Johnson City, Chattanooga and Clarkesville, Tenn.; Louisville and Lexington, Ky.; and Birmingham, Tuscaloosa, Florence, Anniston and Gadsden, Alab.

As a result of the acquisition, Contel Cellular is now the controlling or general partner in 36 MSAs and has an ownership interest in 31 markets, for a combined total of 18.6 million POPs. In addition, Contel Cellular has been named as the prospective operator of cellular systems in 45 Rural Service Areas (RSAs) and a nonoperating partner in 14 other RSA systems, representing approximately 3.5 million POPs.

Contel Cellular is a 90-percent owned subsidiary of Contel Corp., which retains controlling interest in the company through its ownership of 90 million shares of Class B common stock.

Contel, a company with more than $3 billion in annual revenues and sales, provides a broad range of telecommunications products and services.

LONGMONT, CO (FEB. 27) PR NEWSWIRE - Nutronics Corp. announced the completion of an agreement to sell $2,600,000 of its "Nu-Charge(TM)" product to a subsidiary of American Marketing Complex Inc., a 26-year- old

company. This sale, along with other sales successes, assures positive earnings for Nutornics' current fiscal year ending March 31, 1990.

"Nu-Charge," developed and manufactured by Nutronics Corp., is an automotive engine load management system which monitors and controls the load (charge) the alternator places on an engine. Improved engine efficiency results in enhanced performance, lower fuel consumption and a consequential reduction of harmful emissions.

"Growth in sales of the 'Nu-Charge' continues to demonstrate increasing acceptability of the product" stated Duke Otter, executive vice president. "The completion of this sale will provide the company with a strong foundation to begin fiscal year 1991 on a positive note. Nutronics will now have the ability to qualify for NASDAQ listing under current standards."

DENVER (FEB. 27) PR NEWSWIRE - Scientific Software-Intercomp Inc. (SSI) (NASDAQ: SSFT) announced today execution of a letter of intent with Halliburton Company (NYSE: HAL) providing for an investment by Halliburton in SSI and for an operating agreement between the two companies so that they may provide a more comprehensive service to their respective customers. Halliburton is one of the world's largest diversified oil field services and engineering and construction companies with offices throughout the world and with revenues for 1989 in excess of $5.6 billion. For the past several years SSI has been working with a subsidiary of Halliburton on the development of reservoir monitoring technology.

The agreement provides for Halliburton to purchase $3 million of SSI convertible exchangeable subordinated debentures. At such time as SSI shareholders approve the authorization of preferred stock, the debentures will be exchanged for such preferred stock at $5 per share. Both the debentures and the preferred stock are convertible into common stock at the same $5 per share price.

Dr. E.A. Breitenbach, chairman of SSI, explained that the agreement with Halliburton represents a major opportunity for the company. The operating agreement with Halliburton will provide SSI with worldwide distribution channels for both current and future products, including SSI simulators, and particularly for the SSI Workbench which is a family of computer software programs which will be available for use on desktop computers by a wide range of personnel of operating oil companies.

Closing of the transaction is subject to the execution of a definitive contract and operating agreement.

SSI, for more than the past 20 years, has provided high technology software and consulting services to the oil and gas industry. The company has offices in Denver; Bakersfield, Calif.; Houston; Calgary; London and Cairo, Egypt.

DALLAS, (FEB. 27) PR NEWSWIRE - Comstock Resources Inc. (NASDAQ: CMRE) (the "company") today announced that it has executed an engagement letter and is presently negotiating with an investment banking firm to underwrite a proposed public offering of Common Stock, 50 cents par value, on a firm commitment basis. The Common Stock would be registered under the Securities Act of 1933 and the offering would be made only by means of a prospectus. The offering is anticipated to take place in May 1990.

M. Jay Allison, president and chief executive officer said that the net

proceeds from the public offering would be used to retire bank debt and for other corporate purposes.

In addition, the company announced today the call of a Special Meeting of Shareholders for the purpose of (i) approving an Amendment to the company's Articles of Incorporation to reduce the number of authorized shares of Common Stock, (ii) providing for a reverse stock split of the Common Stock of the company on a 1-for-4 (1:4) basis, and (iii) providing for the payment of cash in lieu of fractional shares (the "Proposal").

In calling the Special Meeting of Shareholders, the board of directors of the company seek to better position the company so that the stock will trade in a price range that is more attractive to brokers and certain institutional investors in oil and gas equity securities. Allison stated, "The reverse stock split will reduce the outstanding number of shares and should accomplish an anticipated corresponding increase in the price of the company's Common Stock." Allison further stated that the reverse stock split is an important first step affecting not only the liquidity of the Common Stock, but also the company's ability to raise the proposed additional capital through a sale of equity securities.

The Proxy Statement for the announced meeting to be held March 14, 1990 was also mailed to shareholders today. Shareholders of record on Feb. 26, 1990 will be entitled to vote on the Proposal. A majority vote of shareholders of the outstanding Common Stock of the company is required to approve the Proposal. On the record date there were 10,523,742 shares of Common Stock outstanding.

Comstock Resources Inc. owns and manages cash producing assets in oil, casinghead and natural gas, precious metals and real estate, with subsidiary operations since 1865. The oil and gas portfolio represents the company's primary income stream and currently includes ownership interests in more than 90,000 acres and nearly 400 properties in four states. The company's stock is traded on the NASDAQ National Market System under the symbol CMRE.

Additional information about Comstock Resources Inc. may be obtained by contacting M. Jay Allison at 5005 LBJ Freeway, Suite 1150, Dallas, Texas 75244, telephone number 214-701-2100. CONTACT: M. Jay Allison of Comstock Resources Inc., 214-701-2100

NEW YORK (FEB. 27) PR NEWSWIRE - Oppenheimer Capital, L.P. (the "Partnership") (NYSE: OCC) today reported net income of $3,213,000 or $.40 per unit for the fiscal quarter ended Jan. 31, 1990, compared to net income of $2,761,000 or $.35 per unit for the fiscal quarter ended Jan. 31

1989, an increase of 16.4 percent. For the nine months ended Jan 31, 1990 net income amounted to $9,638,000 or $1.20 per unit compared to net income of $8,210,000 or $1.03 per unit for the nine months ended Jan. 31, 1989, an increase of 17.4 percent.

The Partnership owns a 32.3 percent general partnership interest in Oppenheimer Capital (the "Operating Partnership"), one of the largest independent investment management firms in the United States.

RESULTS OF THE OPERATING PARTNERSHIP

Joseph M. La Motta, Oppenheimer Capital's president and CEO, reported that the operating partnership reached new highs for the quarter in investment management fee revenue and operating income. Assets under management increased significantly from the prior year's level.

-- Total assets under management were $18.7 billion at Jan. 31, 1990 up 19.0 percent from $15.7 billion at Jan. 31, 1989.

-- Investment management fee revenue increased 44.9 percent to $19.2 million for the quarter ended Jan. 31, 1990, from $13.3 million for the quarter ended Jan. 31, 1989. For the nine months ended Jan. 31, 1990 investment management fee revenue increased 27.0 percent to $50.8 million from $40.0 million for the nine months ended Jan. 31, 1989.

-- Operating income for the quarter ended Jan. 31, 1990 was up 27.3 percent to $8,058,000 from $6,330,000 for the quarter ended Jan. 31, 1989. For the nine months ended Jan. 31, 1990, operating income increased 25.6 percent to $23,502,000 from $18,715,000 for the nine months ended Jan. 31, 1989.

As previously reported, on Oct. 24, 1989 the partnership increased its regular quarterly distribution to $.40 per unit or $1.60 annually effective with the Nov. 30, 1989 distribution. This represents an increase of 18.5 percent from the $1.35 annual distribution rate in effect since July 9,1987. Including the partnership's regular distribution of $.3375 per unit declared July 21, 1989 and a special distribution of $.10 per unit declared June 5, 1989, the partnership has declared total distributions so far this fiscal year of $1.2375 per unit.

#90058p0280 02/27/1990 ~PR Newswire

NEW YORK (FEB. 27) PR NEWSWIRE - USLIFE Corporation (NYSE: USH) today reported fourth quarter and year end operating results for 1989. Both 1989

and 1988 results reflect adoption of FASB Statement No. 97.

In the fourth quarter of 1989, net income increased to $20.1 million versus $19.2 million for the fourth quarter of 1988, with earnings per share increasing to $1.17 compared to $1.10 for the 1988 period. Excluding capital gain transactions, fourth quarter 1989 earnings per share increased to $1.15 compared to $1.08 for the 1988 period. The company's "employer/employee" group life and health line results, particularly the latter, improved substantially in the fourth quarter adding approximately $8 million pre-tax (or 31 cents per share) in the year to year comparisons. On the other hand, significantly less favorable individual life mortality experience, as well as an adverse swing in both life and health results of the Association Group line (mass marketing) offset the gains recorded by the "employer/employee" group lines.

For the year ended Dec. 31, 1989, operating results before an extraordinary charge increased to $80.3 million versus $68.9 million for 1988, with earnings per share increasing to $4.63 compared to $3.87 for 1988.

Net income for the year 1989, after a $6.5 million extraordinary charge, amounted to $73.8 million or $4.25 per share compared to $68.9 million or $3.87 per share for 1988. Excluding capital gain transactions and the extraordinary charge, 1989 earnings per share increased to $4.07 compared to $3.69 for the 1988 period. Total revenues were $1.2 billion for 1989 versus $1.1 billion for 1988.

The extraordinary charge related to a judgment upheld against a subsidiary of the Company by the Eighth Circuit Court of Appeals in September 1989. The judgment stemmed from a class action lawsuit initiated in 1975 that related to an acquisition by a company that was subsequently acquired by USLIFE Corporation.

NEW YORK (FEB. 27) PR NEWSWIRE - Isramco, Inc. (NASDAQ: ISRL), reported today that 13-3/8 inch pipe was set on the Yam 2 well being drilled in the Mediterranean off the coast of Ashdod, Israel, beginning on Feb. 24 between the depths of approximately 6,500 feet and 10,500 feet. On Feb. 26 drilling resumed with a 12-1/4 inch bit. Current depth is 10,620 feet.

In reporting the resumption of drilling in the Yam 2, which is targeted for a total depth of 17,000 feet, Joseph Elmaleh, chairman, noted that the Yam I, drilled approximately one-half mile away, experienced a blowout in

June 1989 at approximately 11,000 feet. Extra care is being taken in anticipation of encountering this high pressure zone in the Yam 2, he said.

HATO REY, PUERTO RICO (FEB. 27) PR NEWSWIRE - The stockholders of Banco Popular de Puerto Rico, BanPonce Corporation (NASDAQ: BDEP), and Banco de Ponce today approved, at special meetings of stockholders, the mergers of Banco Popular, BanPonce and Banco de Ponce.

The proposed mergers required the affirmative vote of 75 percent of the total number of common shares entitled to vote for each of Banco Popular and BanPonce, and the affirmative vote of 75 percent of the total number of common and preferred shares entitled to vote thereon, voting together as a class, of Banco de Ponce.

Banco Popular announced that 87.72 percent of all common shares entitled to vote on the mergers were voted in favor of the mergers; BanPonce announced that 82.10 percent of all common shares entitled to vote voted in favor of the mergers; and Banco de Ponce announced that 98.57 percent of the total of all common and preferred shares (taken together) entitled to vote voted in favor of the mergers.

Of the total number of shares entitled to vote on the mergers, 88.34 percent of Banco Popular shares were voted, of which 99.30 percent voted in favor. In the case of BanPonce, 83.04 percent of shares were voted, of which 98.87 percent voted in favor, and for Banco de Ponce, 98.70 percent of shares were voted of which 99.87 percent voted in favor.

The consummation of the mergers remained conditioned, among other things, on obtaining the approval of the commissioner of financial institutions of Puerto Rico and the board of governors of the Federal Reserve System.

DALLAS (FEB. 27) PR NEWSWIRE - Vinland Property Trust (NASDAQ: VIPTS) today announced a loss of $6.4 million, or $1.07 per share, for the year ended Nov. 30, 1989. This compares with a loss of $7.7 million, or $1.29 per share, for the year ended Nov. 30, 1988. Revenues for the years 1989 and 1988 were $6.1 million and $5.9 million, respectively.

Vinland recorded a loss of $3.0 million, or 50 cents per share, on revenues of $1.2 million for the fourth quarter ended Nov. 30, 1989. The trust recorded a loss of $4.3 million, or 71 cents per share, on revenues of $1.4 million for the same period in 1988.

Vinland's losses reflect continuing problems in the trust's real estate portfolio. The trust recorded a $2.2 million provision for losses in 1989, $1.6 million of which was set aside in the fourth quarter. This compares with a $10.0 million provision for 1988. The 1989 provision was taken to reflect a property foreclosure in the fourth quarter and for reserves against the trust's remaining properties.

Vinland Property Trust is a combination mortgage and equity real estate investment trust.

#90058p0299 02/27/1990 ~PR Newswire

CALGARY, ALBERTA (FEB. 27) PR NEWSWIRE - Canadian Occidental Petroleum Ltd. (Montreal: CXY) reports net income for 1989 of $40.6 million on net sales of $550.2 million as compared to net income of $38.9 million before extraordinary item for 1988 on net sales of $555.7 million. An extraordinary gain of $14.3 million, resulting from the utilization of a loss carry forward was reported in 1988. Earnings per common share were 61 cents for 1989 compared to 58 cents for 1988 before extraordinary item (80 cents after extraordinary item).

Net income for the fourth quarter of 1989 was $9.6 million (15 cents per common share) as compared to $2.8 million (4 cents per common share) for the corresponding quarter of 1988. Net sales were $139.5 million and $133.3 million for the fourth quarters of 1989 and 1988 respectively.

Operating profits for 1989 were $96.5 million as compared to $89.5 million for 1988, before giving effect in 1988 to a gain of $134.0 million from the sale of a 6 percent interest in the Syncrude Project and a 5 percent interest in the OSLO Project, and to non-recurring accelerated depreciation and depletion of $118.9 million in heavy oil projects in both Canada and the United States.

Operating profits for the fourth quarter of 1989 were $19.3 million as compared to $9.6 million for 1988. During the fourth quarter of 1988 additional depletion of $8.4 million was recorded on heavy oil properties.

Funds flow from operations before exploration expense for 1989 was $196.0 million as compared to $215.0 million for 1988. Increased contributions from Canadian oil and gas operations and from the United Kingdom ''V'' fields were more than offset by reduced gas deliveries in the United States, together with higher interest expense, the result of less interest capitalized on major development projects. For the fourth quarter, funds flow from operations before exploration expense amounted to $49.0 million in 1989 as compared to $50.4 million in 1988.

Capital and exploration expenditures excluding acquisitions were $163.4 million during 1989 as compared to $146.3 million for 1988. Emphasis continued on new international exploration ventures and on the expansion of sodium chlorate plants. Expenditures in the Alternate Fuels division declined by $20.9 million in 1989 as a result of the completion of the Capacity Addition Project at Syncrude during 1988.

Acquisitions for 1989 totaled $51.0 million represented by the purchase of a natural gas processing facilty and associated natural gas reserves located in southern Alberta.

The board of directors has declared the regular quarterly dividend of 10 cents per common share payable April 1, 1990, to shareholders of record on March 14, 1990.

SAN DIEGO (FEB. 27) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced it will demonstrate a new, advanced imaging capability on its CXI-5400 Automated Solder Quality Inspection System at NEPCON West 90. The show is being held Feb. 27 through March 1, 1990 in Anaheim, Calif.

The new imaging system provides higher-resolution images and a lower-noise electronic signal, which speeds image-acquisition times. The CXI-5400, which was first demonstrated publicly at NEPCON West 88, combines high-quality real-time X-ray imaging with computerized control and analysis to give high-volume electronics manufacturers an in-line process monitoring and inspection tool.

During the exhibition, IRT will also demonstrate an automated application on its new electronic process monitoring and inspection system, the CXI-1100 Real-Time X-Ray Imaging System.

"The new imaging capability demonstrated on the CXI-5400 is another step in meeting the demanding process control requirements of advanced electronics manufacturers," said Thomas W. Stroebel, Electronics Systems marketing manager for IRT. "The system was already providing critical viewing of very small features in electronics assemblies. The new imaging system takes that fine- pitch capability even further."

The CXI systems allow manufacturers to monitor and control the quality of solder connections on circuit boards with surface- mounted components, where solder integrity is critical since it alone maintains the position and connection of components on a board. IRT's systems are used in high-volume production environments for in-line process monitoring and in quality and product development laboratories for off-line research, development, and inspection applications.

IRT's CXI systems now include the CXI-5400; the CXI-1100, which provides high-quality imaging and analysis of electronic components or assemblies at a low price; and the CXI-4100, which offers versatile, five-axis manipulation of electronic assemblies for off- line process engineering and quality-control analysis.

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed, and is the technology leader in automated X-ray inspection systems with computerized defect recognition capability. The company develops and manufactures inspection and process monitoring systems, including integrated systems for electronics, automotive, aerospace, and defense applications. The company also operates a commercial radiation processing facility which provides high-energy electron-beam processing for a number of commercial applications. Company headquarters are in San Diego.

DALLAS (FEB. 27) PR NEWSWIRE - Metro Airlines, Inc. (NASDAQ: MAIR) today announced financial results for the fiscal third quarter and nine months ended Jan. 31, 1990. The company also announced the termination of its stock repurchase program instituted Oct. 29, 1987.

For the third quarter, operating revenues were $48.9 million, and the net loss was $6.3 million, or $1.03 per share. In the same period last year, operating revenues were $35.1 million, and the net loss was $4.8 million, or 83 cents per share.

For the nine-month period, operating revenues were $139.4 million, and the net loss was $15.3 million, or $2.51 per share. For the same period a year ago, operating revenues were $113.0 million, and net income was $6.4 million, or $1.10 per share, including $8.0 million, or $1.37 per share, from a change in accounting for aircraft engine overhauls.

J.L. Seaborn, president, attributed the loss primarily to three factors -- continuing losses at the company's Atlanta operations, where Metro is affiliated with Eastern Air Lines; a dramatic increase in fuel prices during the fiscal third quarter, and soft traffic in the company's Metro Air Northeast operations.

Metro, one of the nation's oldest and largest regional airlines, operates more than 100 turboprop aircraft and serves 78 cities in the southwestern and eastern United States and the Caribbean.

#90058p0306 02/27/1990 ~PR Newswire

MELBOURNE, FL (FEB. 27) PR NEWSWIRE - Harris Corporation's Semiconductor Sector announced today plans to relocate its Santa Clara, Calif., manufacturing operations to several of its other U.S. manufacturing sites.

The transfer will be accomplished in several phases over the next eighteen months and will affect approximately 350 manufacturing employees.

The action applies only to the company's manufacturing operations and does not include Santa Clara employees or functions involved in the data acquisition product lines' marketing, engineering, R&D and other customer support functions.

Harris said it was issuing this announcement now in the interest of customers and employees. "Even though the manufacturing transfer will take 18 months to complete, and we don't anticipate actual workforce reductions to start until January 1991," said Joe Boarman, VP of Manufacturing for domestic operations, "it's best to clarify our intentions now so that affected employees can make plans well in advance. Additionally, openness allows us to involve all levels of our organization and to work closely with customers in the extensive process of moving products to other facilities."

Boarman said Harris was taking this action as part of its continuing plan following the acquisition of GESS in November 1988 to rationalize manufacturing by consolidating sites with similar or duplicate process technology capabilities. Despite the close of the manufacturing operation, the company will continue to headquarter managment of its data acquisition product line in Santa Clara at the current (formerly Intersil) location on Walsh Avenue.

"We are continuing to make investments in the people and product development activities in Santa Clara," said Jeff Peters, VP and General Manager of Harris' Commercial Products Division, "because these are critical to our marketing strategy to be a leader in signal processing and control. Data acquisition is a vital part of that product profile."

According to Dataquest, a San Jose, Calif.-based market research firm, Harris ranks second worldwide in data conversion, a semiconductor technology which comprises the majority of the data acquisition category.

To ensure continuity of service and delivery, Harris said it will not transfer any products from Santa Clara until its new manufacturing locations have been fully qualified. The company also confirmed that no major reductions will be made to its data acquisition product portfolio as a result of the move.

On the contrary, said Peters, "We are currently working on the development of almost two dozen new data acquisition and linear products that will be based on a new BiCMOS process technology we have developed and will

continue to refine. We continue to hire and recruit new engineering and marketing personnel and new product development and market introductions are proceeding according to schedule."

Harris plans to finalize details of the manufacturing consolidation and transfer over the course of the next several months. The company currently has several alternate U.S. sites in Melbourne, Fla.; Findlay, Ohio; Reasearch Triangle Park, N.C.; and Mountaintop, Pa., that are not only compatible with the Bipolar and CMOS fab lines of its Santa Clara facility, but are also more advanced and more competitive.

Manufacturing employees affected by today's announcement will receive comprehensive severance and benefits packages and will be provided with outplacement and employment counseling services during the transition.

CHARLESTON, W.VA (FEB. 27) PR NEWSWIRE - Eagle Bancorp, Inc. (NASDAQ-NMS: EBCI), the parent company of First Empire Federal Savings and Loan Association, today reported the Association's favorable settlement of litigation against the Internal Revenue Service which was pending in the U.S. Federal District Court for the Southern District of West Virginia, in which the Association sought a refund of taxes and interest paid in prior years.

The settlement, in the amount of $1,247,000, represents a refund of taxes and interest thereon. The Company estimates that after providing for current and deferred taxes on the refund, the settlement will result in additional net income of approximately $700,000 or $.55 per share in the first quarter of 1990 and for the year 1990.

The Association's position was that recognizable losses from reciprocal sales of mortgage loans were incurred in the early 1980's. Additionally, the Association's position was that penalty income received in the early 1980's from the early withdrawal of certificates of deposit constituted income from the discharge of indebtedness and was therefore subject to deferred recognition.

The Association was represented in the litigation by Charleston lawyers William E. Hamb and Robert W. Kiefer, Jr. of the firm of Hamb, Poffenbarger & Bailey. The government was represented by attorneys for the United States Department of Justice-Tax Division of Dallas, Texas.

First Empire Federal Savings and Loan Association operates ten offices in southern West Virginia. Eagle Bancorp, Inc. is traded on the NASDAQ SYSTEM (SYMBOL EBCI).

FRANKLIN PARK, IL (FEB. 27) PR NEWSWIRE - Binks Manufacturing Co. (AMEX: BIN) announced today that it has retained Continental Partners as its financial adviser to seek alternatives to the unsolicited offer of Illinois Tool Works to acquire Binks.

On Feb. 24, the board of directors of Binks voted unanimously not to accept the ITW offer which Binks President Burke B. Roche deemed as "... not to be in the best interest of the company, its stockholders, employees and customers."

Roche added, "We will take the time required to properly explore and evaluate our alternatives which include remaining independent, a possible

recapitalization, a stock repurchase program and other possibilities."

Continental Partners Group, Inc. is the mergers and acquisitions affiliate of Continental Bank N.A., formed by former managing directors of a major investment banking firm.

Binks Manufacturing Co. is a leading designer, manufacturer and distributor of spray finishing and coatings application equipment. It distributes its products through 14 branch offices with warehouse facilities, 27 sales offices and a network of over 5,600 distributors in the United States, and subsidiaries with manufacturing facilities and a sales distribution force thoughout much of the world.

STAMFORD, CT (FEB. 27) PR NEWSWIRE - Following major charges related to marketing and organizational restructuring taken in the third quarter 1989 Savin Corporation (NYSE: SVB) today announced further charges that, combined with an operating loss, will result in a loss of approximately $10 million for the fourth quarter 1989, which compares to a net loss of $13.4 million for the fourth quarter 1988.

These charges were primarily related to non-recurring items such as relocation costs, proxy costs, as well as increased receivable and inventory reserves. William T. Smith, president and chief operating officer, estimated the loss for the year ended Dec. 31, 1989 would be approximately $46 million, compared to net income of $8.6 million for 1988. The 1988 earnings include a $24.4 million extraordinary gain from the early extinguishment of debt, partially offset by lawsuit settlement charges of $7.7 million and IRS interest and related estimated state and local taxes and interest of $14.9 million. The company expects to report final results in several weeks.

Savin Corporation also announced that proxy materials had been mailed to its shareholders for a special meeting to be held on March 22, 1990. In November 1989 a new Savin management, led by Chairman Charles A. Muench and Chief Executive Officer E.P. van den Boogaard, launched a major strategy initiative to strengthen the future viability of Savin's operations, product offerings, dealer network and financial structure. Approval of the proxy proposals will help Savin implement this strategic plan.

Savin Corporation, founded in 1959, distributes a full line of office copiers and facsimile products through a North American network of over 380 dealers and ten company-owned branches at more than 600 selling and servicing locations. Savin also markets certain products in Europe through the HCS/Savin joint venture. Savin is the only distributor of copier products in North America offering the customer a choice of toner

technologies.

#90058p0333 02/27/1990 ~PR Newswire

ATLANTA (FEB. 27) PR NEWSWIRE - Health Images Pennsylvania Inc., a wholly owned subsidiary of Health Images Inc. (NASDAQ: HIMG), an Atlanta-based publicly held company, last Friday filed a lawsuit alleging violation of Section 2 of the Sherman Act by Francis M. Powers Jr., M.D., Cancer Treatment Associates P.C. and Divine Providence Hospital, all of Williamsport, Pa.

The antitrust lawsuit was filed Feb. 23 in the United States District Court for the Middle District of Pennsylvania in Scranton, Pa.

The lawsuit alleges that Powers, Cancer Treatment Associates, a corporation owned by Powers, and the hospital conspired to create and perpetuate an unlawful monopoly in the provision of radiation therapy service to cancer patients in the relevant area in and around Williamsport Pa.

Health Images Pennsylvania ("HIP") owns and operates the Williamsport Regional Radiation Oncology Center, a cancer treatment facility which opened on Jan. 15 and is situated on the campus of the Williamsport Hospital and Medical Center. The company's facility competes directly with a cancer treatment center which is located in the Divine Providence Hospital and for which Cancer Treatment Associates, which is owned by Powers, is the exclusive provider of medical and radiation oncology services.

In its complaint, HIP contends that Powers and Cancer Treatment Associates joined Divine Providence Hospital in a pattern of sham and false litigation which was designed to inflict costs on HIP and to deter HIP from exercising its right to compete by owning and operating a radiation therapy treatment center.

HIP's parent, Health Images Inc. was named as one of several defendants in a lawsuit filed over a year ago by Powers and Cancer Treatment Associates. In that lawsuit Powers and Cancer Treatment Associates alleged that Health Images and the Williamsport Hospital and others had violated the federal Racketeer Influenced and Corrupt Organizations Act by conspiring to implement a scheme to establish the radiation therapy treatment center without first applying for and receiving a Certificate of Need from the Pennsylvania Department of Health. The defendants have denied all claims in that lawsuit which is also pending in federal district court in Scranton, Pa.

SAN JUAN, PUERTO RICO (FEB. 27) PR NEWSWIRE - First Federal Savings Bank of Puerto Rico (NASDAQ: FFPR) today announced that it had declared a cash dividend of $0.13 per share, payable on March 30, 1990, to all shareholders of record as of March 15.

Mariano J. Mier, chairman and executive officer of Puerto Rico's largest Savings Bank, stated, "Over the years First Federal has repeatedly shown its ability to adapt to change. We strengthened the bank diversifying into consumer and by successfully commercial lending after Congress permitted these changes in 1982. We can also grow and prosper in the new regulatory environment of the 1990s. Our strong earnings demonstrate this. In 1989 First Federal earned $11,743,000 and increased its net interest income by 6 percent in spite of a difficult interest rate environment. We expect to improve on these results as we enter a new decade of service to Puerto Rico."

First Federal Savings Bank intends to continue its present policy of paying a quarterly dividend to its shareholders. The declaration and amount of dividends is dependent on operating performance and other factors.

First Federal Savings Bank, which has assets of $1.9 billion, was organized in 1948 and presently operates 29 branches in Puerto Rico and the U.S. Virgin Islands. The bank's wholly owned subsidiary, First Florida Savings Bank, FSB, operates three branches in the Miami area.

PALMETTO, FL (FEB. 27) PR NEWSWIRE - Bowater, Inc. (NYSE: BOW), newsprint supplier for the St. Petersburg Times, has decided to relocate its Tampa Bay operations to Port Manatee from the Port of Tampa. The move was initiated to improve logistics related to the cargo, which will be handled by Eller & Co. Inc., stevedore and agent for Bowater.

The first shipload of newsprint -- 6.7 million pounds -- arrives at Port Manatee Wednesday, Feb. 28, and will be stored there dockside at Public Warehouse No. 1. The warehouse features dockside rail service.

Eller will unload 4,215 packages of newsprint, arriving on the 388-foot Ivan Gorthon inbound from Nova Scotia, Canada.

CONTACT: Steve Tyndal of Port Manatee, 813-745-6641 (mobile), or 813-722-6621 (after 8 a.m. Wednesday Feb. 28)

MINNEAPOLIS (FEB. 27) PR NEWSWIRE - Jostens Inc. (NYSE: JOS) announced today that it has acquired two companies, Lenox Awards, a division of Lenox Inc., a subsidiary of Brown-Forman Corp. and Gordon B. Miller & Co. of Cincinnati, Ohio. Both companies will become part of Jostens' Recognition division which is headquartered in Memphis, Tenn.

Lenox Awards, an Illinois-based company, is a manufacturer and marketer of fine jewelry and branded merchandise for the service award market, with annual sales in excess of $11 million. As part of the purchase, Jostens will receive an exclusive right to distribute Lenox china and crystal products and Hartmann luggage to the service award market in the United States and Canada. Lenox is a premiere crystal and china manufacturer and Hartmann offers an exclusive line of top-quality luggage items to retail stores nationwide.

Gordon Miller, the oldest recognition company in North America, markets proprietary and service award programs to major corporations primarily in the Midwest. Its products include rings, jewelry, and awards and annual sales approximate $7 million.

Bruce L. Pratt, president and general manager of Recognition division, said, "The addition of Lenox Awards and Gordon Miller represents exciting opportunities for us. These acquisitions broaden our market share and will position our products across a diverse national account base. In addition, these fine companies will allow us to offer widely recognized brand names to our present and future customers."

Jostens' Recognition division is a market leader in customized sales and service awards for major companies and their employees. Jostens Inc. is a leading provider of products and services for the youth, education, sports award and recognition markets. The Fortune 500 company is listed on the New York Stock Exchange under the symbol "JOS" and last year reported sales of $696 million.

VIRGINIA BEACH, VA. (FEB. 27) PR NEWSWIRE - Clarence W. Keel, President and Chief Executive Officer of Seaboard Savings and Loan Association (NASDAQ: SEAB), announced today that Seaboard is preparing to file applications with the applicable regulatory authorities to obtain permission to convert from a Virginia chartered stock savings and loan association to a federally chartered stock savings bank and thereafter to reorganize into the holding company form of ownership.

The announced plan calls for the conversion of Seaboard from a Virginia chartered stock savings and loan association to a federally chartered stock savings bank to be known as "Seaboard Savings Bank, F.S.B." The board of directors is also proposing to approve the formation of a savings and loan holding company. If approved, Seaboard Savings Bank will become a wholly-owned subsidiary of the newly formed holding company known as

"Seaboard Bancorp, Inc." Under the plan, each outstanding share of common stock of Seaboard Savings and Loan will be exchanged for one share of common stock of Seaboard Bancorp, Inc. The proposals will be presented to the stockholders at the annual meeting of the Association, to be held on Thursday, April 26, 1990.

Keel indicated that the conversion will permit the Association to simplify its regulatory reporting and to reduce expenses incurred in connection with dual federal and state reporting and examinations. The reorganization will provide greater operating flexibility and will permit expansion of the Association into a broader range of financial services and other business activities than are currently permitted to the Association as a Virginia chartered savings and loan.

Seaboard is a Virginia chartered stock savings and loan association and provides mortgage and retail banking services principally in the Hampton Roads area of Virginia. Headquartered in Virginia Beach, Virginia, the Association has four offices, two in Virginia Beach, one in Norfolk and one in Portsmouth. Currently the Association has approximately 900 stockholders and 891,184 shares of stock outstanding.

NEW YORK, (FEB. 27) PR NEWSWIRE - Andover Togs, Inc. (NASDAQ: ATOG) today announced its results of operations for the fourth quarter and year ended Nov. 30, 1989.

Sales for the fourth quarter were $21,149,000 as compared to $16,991,000 in the same quarter of the previous year, representing a 24.5 percent increase for the quarter over the prior year's quarter.

Sales for the year ended Nov. 30, 1989, were increased to $91,766,000 as compared to $71,376,000 in the prior year, representing an increase of 28.6 percent for the year.

Pre-tax earnings for the 1989 fiscal year were $1,896,000 as compared to $484,000 for fiscal 1988, representing an increase of 292 percent. Net earnings for 1989 were $1,153,000 (36 cents per share) as compared to $213,000 (7 cents per share) the year earlier, representing an increase in net earnings of 441 percent over the prior year. The company incurred a pre-tax loss of $1,004,000 during the fourth quarter of fiscal 1989 as compared to a pre-tax loss of $1,274,000 in the comparable period in the prior year.

William Cohen, chairman and president, stated that the 1989 fourth quarter was negatively impacted by excess costs at the company's domestic facilities due to late fabric deliveries, unusual turnover of production personnel, and inefficiencies associated with commencement of production of the company's new line of ladieswear.

Cohen said that earnings for the full year were also negatively impacted by other start-up costs associated with the new ladies division, a loss in the operations of the company's Anchor Apparel subsidiary, and losses in the outerwear division, which is being phased out in fiscal 1990.

On Feb. 26, 1990, the company increased its combined short-term borrowings and letter of credit facilities from $24 million to $32 million. The facility is secured by the company's accounts receivable and certain property, plant and equipment.

Andover Togs is one of the country's five largest suppliers of non-branded clothing, producing sportswear primarily for infants, toddlers and children. The company became publicly held in June 1986.

BLOOMFIELD HILLS, MI. (FEB. 27) PR NEWSWIRE -- PHM Corporation (NYSE: PHM), Bloomfield Hills, announced today its consolidated revenues, income before income taxes, income taxes (benefit), and net income for the year and quarter ended Dec. 31, 1989.

For the year ended Dec. 31, 1989, PHM's net income was $53,776,000 ($2.02 per share), compared with $31,795,000 ($1.21 per share) for 1988.

Homebuilding operating income was $21,766,000 in 1989, vs. $34,388,000 in 1988. These results included provisions for reserves of $18,700,000 in 1989 (of which $12,000,000 was provided in the fourth quarter) and

$13,500,000 in 1988 (of which $9,000,000 was provided in the fourth quarter), principally related to net realizable valuation on assets in certain Western states.

Sales from for-sale homebuilding operations for the year ended Dec. 31, 1989, decreased 13 percent to $723,829,000 from $834,227,000 for the comparable period in 1988. This resulted from an 18-percent decrease in unit volume, partially offset by a 6-percent increase in the average unit sales price to $128,000.

At Dec. 31, 1989, housing unit backlog was $215,000,000 (1,453 units) compared with $214,000,000 (1,694 units) at Dec. 31, 1988. During the quarter ended Dec. 31, 1989, net new orders of $148,000,000 (1,083 units) were received, compared to $167,000,000 (1,316 units) during the quarter ended Dec. 31, 1988. The decreases were due primarily to lower order activity in Eastern markets.

#90058p0381 02/27/1990 ~PR Newswire

MT. KISCO, N.Y. (FEB. 27) PR NEWSWIRE - TWA (NYSE: TWA) has announced that beginning March 1 it will enhance Frequent Flight Bonus Program benefits significantly, offering qualifying FFB(R) members more opportunities to upgrade to business class and First Class seats.

"TWA's FFB members have always enjoyed some of the most attractive upgrade benefits available anywhere," said Robert Cozzi, senior vice president of marketing. "Now, holders of the gold 'Privileged Member Card' will find themselves -- and a traveling companion -- seated in the front of the plane more often."

Most significantly, TWA will now allow gold "Privileged Members" to upgrade to First Class on international flights. Also, for the first time, travelers' companions can take advantage of the new benefits of the "Privileged Member" status. Members may obtain a domestic Ambassador Class(R) (TWA's business class) upgrade for any one companion traveling at the same fare on the same itinerary. That's a real "plus" because TWA has nearly three times as many domestic flights with business class as all other airlines combined.

And for domestic travel, Ambassador Class upgrades are available at the time your reservation is made, if you travel on a full economy fare. Upgrades for members traveling on any discounted published economy fare may be obtained within two hours of departure upon airport check-in. International First Class and Ambassador Class upgrades, and domestic First Class upgrades will be confirmed 24 hours before departure.

More than 90 percent of TWA's unreserved seats will be available for these upgrades, up to seating capacity. Certain restrictions may apply to these offers and upgrades are subject to availability. Passengers should consult with TWA for further details.

TWA's white bonus card also will be replaced by the silver "Preferred Member" card. New gold "Privileged Member" Cards and silver "Preferred Member" Cards will be sent to present card holders to replace their existing cards.

FFB members who fly 30,000 actual miles on TWA in a 12-month period, or four transatlantic flights in a calendar year, are eligible for the "Privileged Member" Card. FFB members with 5,000 actual miles of travel on TWA in a 12-month period are eligible for the "Preferred Member" Card.

To introduce the new cards, TWA is offering 2,000 bonus miles to "Privileged Members", and 1,000 bonus miles to "Preferred Members," for their first flight taken on TWA between March 1 and May 15.

"This new program has been established to create what we feel is the best Frequent Flyer Program in the industry," said Cozzi. "We know it's an aggressive approach, but it's one we feel our business passengers deserve."

BELLEVUE, WA (FEB. 27) PR NEWSWIRE - VWR Corp. (NASDAQ: VWRX), which will spin off a large segment of it operations on March 1, incurred a net loss of $5,345,000, or $1.01 per share, for the 10-month fiscal year ended Dec.

31, 1989. Earnings from continuing operations, which represent the company's laboratory supplies distribution business, were a positive $3,872,000, or 73 cents per share. Laboratory supply sales of $311,832,000 reflect an 11 percent gain over the comparable period for the prior year but a 7 percent decline versus the 12-month fiscal year ended Feb. 28, 1989. VWR recently adopted a Dec. 31 fiscal year to facilitate comparisons with industry data and shareholder communications.

The net loss resulted from a $9,217,000 after-tax loss associated with operations to be spun-off into a new public company, Momentum Distribution Inc., via a tax-free distribution of all Momentum shares to VWR Corp. shareholders of record on March 1. This loss included net restructuring costs of $3,574,000; the remainder of the loss was due to disproportionately high operating costs and unusually low margins in the company's graphic supplies distribution business (Momentum Graphics Inc.). Management attributes a substantial portion of the loss to the termination last year of certain Kodak, Du Pont, and 3M graphic arts distribution agreements.

SANTA CLARA, CA (FEB. 27) PR NEWSWIRE - Avantek Inc. (NASDAQ: AVAK) announced today that it had completed its previously announced restructuring. According to Avantek's CEO, Dr. E. Oran Brigham, "A 5 percent employee reduction has been realized by centralization of manufacturing operations and consolidation of customer service, strategic marketing, and program management functions. We expect this restructuring of operations will continue to improve quality, customer support, performance to schedule, and operating results throughout 1990."

Financial results for fiscal year 1989 and for the fourth quarter of 1989 remain unchanged from those previously reported. For the full fiscal

year 1989, sales were $158.8 million, up 29 percent from 1988. The company reported a net loss of $21.4 million ($1.21 per share) compared to a loss of $25.3 million ($1.42 per share) from continuing operations in 1988. Year-end backlog was $89.2 million as compared to $123.5 million at the end of last year. The backlog change in 1989 was due to reductions, cancellations, and shipments associated with multifunction assembly contracts. Cash at year-end was $13 million, up $7 million from 1988. The company has no debt and the book value was $5.30 per share.

Sales for the fourth quarter of 1989 were $47.9 million an increase of 48 percent from the comparable period in 1988. Including a $16.5 million pre-tax charge to earnings to provide for contract issues, restructuring of operations, and the elimination of excess capacity, the company reported a loss from continuing operations of $16.5 million (93 cents per share) compared to a loss of $10 million (57 cents per share) in the fourth quarter of 1988.

Avantek manufactures and markets several hundred microwave electronics products -- including semiconductors, components and assemblies -- for use in various defense and commercial applications.

ST. LOUIS (FEB. 27) PR NEWSWIRE - The American Marketing Association (AMA) has selected ConAgra Frozen Food's Healthy Choice(R) Frozen Dinners as one of the best new products of 1989.

Healthy Choice and 10 other winners will be recognized with an Edison Award Thursday, March 1, at a ceremony during the AMA's new products conference in New York City.

"Selections for best products are made based in part on marketing innovativeness, success in the marketplace, technological advances, value and impact," said Calvin L. Hodock, AMA chairman of the board. "Healthy Choice certainly scored well in all those areas."

Each year the American Marketing Association asks its members to nominate selections for best new consumer products. A blue-ribbon panel of senior marketing and advertising executives makes the final choices.

"Healthy Choice dinners were so well-received by the public that we recently added four varieties to the line, for a total of 14," said Stephen Hughes, vice president, new ventures for ConAgra Frozen Foods. "We also are introducing a companion line of 10 frozen entrees."

Healthy Choice dinners are low-fat, low-cholesterol and low-sodium and can be prepared in either a microwave oven or conventional oven. No dinner derives more than 21 percent of its calories from total fat or more than 9 percent of its calories from saturated fat. In addition, all the dinners contain 310 calories or less.

In addition to Healthy Choice, other products introduced in 1989 selected to receive the award include Acuvue Disposable Contact Lens, Contadina Fresh Pasta and Cheese, Keebler Magic Middles cookies, the Mazda Miata, Anheuser-Busch Michelob Dry beer, the NeXT Computer, DowBrands Spiffits cleaners, Sony Discman Portable CD Player, Campbell's Souper Combos, and Toyota's Lexus LS-400.

#90058p0396 02/27/1990 ~PR Newswire

LOS ANGELES (FEB. 27) PR NEWSWIRE - Neutrogena Corp. (NASDAQ: NGNA) today reported net income of $8,750,000 or $.33 per share, on net sales of $54,974,000 for its first quarter ended Jan. 31, 1990.

In the prior year's first quarter, the company had net income of $8,748,000 or $.33 per share, which included $345,000, or $.01 per share, resulting from the cumulative effect on prior years of a change in accounting for income taxes. Net sales for the fiscal 1989 first quarter were $49,696,000.

Lloyd E. Cotsen, president and chief executive officer, said: "Sales of many of our brands were very satisfying. However, a decline in Neutrogena Shampoo and Conditioner coupled with anticipated first quarter declines in two foreign countries (viewed by the company to be non-recurring) contained our overall sales growth to only 11 percent. Furthermore, the complete change of quarterly trade promotion programs in fiscal 1990, along with the year-to-year timing of certain marketing and selling programs, caused operating expenses as a percent of sales to rise significantly in our first quarter. While first quarter earnings were flat, we do not believe these results are indicative of the full year."

Neutrogena Corp., headquartered in Los Angeles, manufactures and sells high-quality, premium-priced specialty skin and hair care products.

NEW YORK, (FEB. 27) PR NEWSWIRE - International Banknote Co. (AMEX: IBK) announced today that its board of directors had elected eight new directors to the board. The election of these directors followed the acquisition on Feb. 26 by a subsidiary of United States Banknote Co. L.P. of approximately 66-2/3 percent of the fully diluted shares of common stock of International Banknote pursuant to the subsidiary's tender offer, which was made in accordance with the merger agreement with United States Banknote.

The eight new directors were nominated by United States Banknote and represent a majority of International Banknote's board. In addition, the board of directors of International Banknote's subsidiaries, American Bank Note Co. and American Bank Note Holographics Inc. were reconstituted to include directors proposed by United States Banknote.

The new directors of International Banknote are Morris Weissman, Stanley Kreitman, Sheldon Cantor, John T. Gorman, Harvey A. Appele, Joseph Maturo, Ira Hechler and Jon Hechler. The directors of American Bank Note Co. are Morris Weissman, Stanley Kreitman, Sheldon Cantor, John T. Gorman, Edward H. Weitzen, Donald C. Brown, and S.F. D'Amato. The directors of American Bank Note Holographics are Morris Weissman, Stanley Kreitman, Sheldon Cantor, John T. Gorman, Robert L. Christopherson, Edward H. Weitzen, S.F. D'Amato, David J.K. Rigg, and C.J. Dixon.

Also, on Feb. 26, 1990, U.S. Banknote and American Bank Note Co., a subsidiary of International Banknote, completed the previously announced sale of substantially all of the assets of the securities printing business conducted by American Bank Note at leased premises in Ramapo, N.Y. The sale was made to Banknote Corp. of America Inc., a newly-formed corporation controlled by Francois-Charles Oberthur Fiduciare, a French corporation which is engaged in the securities printing and related business in France.

American Bank Note has subleased the Ramapo facilities from the purchaser for 45 days in which certain items of equipment will be transferred and certain other transition matters will be completed. The sale agreement requires U.S. Banknote to subcontract to the purchaser for three years, certain stock and bond securities printing business. The sale of the Ramapo business to the affiliate of Oberthur was undertaken by U.S. Banknote in connection with the resolution of certain issues which had been raised by the Antitrust Division of the Department of Justice relating to the acquisition of International Banknote by U.S. Banknote.

#90058p0405 02/27/1990 ~PR Newswire

LOS ANGELES (FEB. 27) PR NEWSWIRE - The U.S. Government and Northrop Corp. (NYSE: NOC) reached a complex compromise today under which the Government agreed to withdraw various charges the company had been contesting for over a year, and Northrop in turn agreed to pay a $17 million fine for charges arising out of actions by some employees it subsequently fired in 1987 from its now-closed Western Services Department.

Court papers filed today disclosed that as part of the compromise the Government and Northrop have resolved a number of other pending investigations the Government has been conducting. The Government has agreed not to prosecute, file criminal charges or seek indictment s against the company on these matters.

In regard to the issues involving the former Western Services Department and its parent unit, Northrop's Precision Products Division in Norwood, Mass., the Government dropped 139 counts of making false statements and two counts of conspiracy, and Northrop agreed to plead guilty to 34 false statements that had been made by the former employees at WSD.

The Government withdrew all charges against the Precision Products Division and against Joseph Yamron, 62, vice president and general manager of the division, and Leopold Engler, 60, vice president and manager of instrument operations.

From the time last April when the Government filed its charges against the division, Yamron and Engler, Northrop has stated the charges were unwarranted and strongly disputed any allegations of criminal behavior by the Precision Products Division or by these individuals.

Yamron and Engler, who have been on administrative leave in order to spend as much time as required to respond to the Government's allegations against them and the division, will now return to their former responsibilties.

In July 1987, the company first discovered and disclosed to the Government and the public that some employees at the 30-person WSD unit in Pomona, Calif., had admitted failing to perform certain tests on electronic equipment. Northrop dismissed the plant manager and three of his employees and by year-end had closed the plant. The work was moved to the Precision Products Division.

The factory was involved in the production of rate sensor assemblies for the AV-8B Harrier jet and flight data transmitters for the air-launched cruise missile. According to the using military services, both systems have performed satisfactorily in flight operations.

#90058u0907 02/27/1990 ~United Press International
SAN FRANCISCO (FEB. 27) UPI - After watching four commercials touting ''the way people at Northrop think,'' three federal appellate judges were asked whether the ads could be shown on Los Angeles television stations during the defense contractor's fraud trial.

A government attorney argued before the 9th U.S. Circuit Court of Appeals Monday that the image-building commercials would influence jurors in favor of Northrop during the case, scheduled to begin in Los Angeles Tuesday.

But Northrop Corp. attorneys said the spots were protected by free speech and would help counter bad publicity from the case.

The 30-second spots, first broadcast Jan. 22, one week before the fraud trial's original starting date, feature test pilot Chuck Yeager introducing Northrop employees who discuss their commitment to product quality.

The ads were scheduled to be broadcast strictly in Los Angeles on such popular shows as ''The Cosby Show'' and ''Good Morning America.''

U.S. District Judge Pamela Rymer banned the commercials Feb. 16, finding they would have a ''calculated but subliminal influence on prospective or impaneled jurors.''

But two appeals court judges suspended the ban the next day after Northrop lawyers filed requests for an emergency stay. Government lawyers asked the appeals court Monday to lift the suspension.

Even though the commercials made no mention of the pending fraud trial, they would leave potential jurors with a ''warm and fuzzy feeling'' about Northrop that could influence their verdict in the case, Assistant U.S. Attorney Steven Medison said.

But Northrop attorneys said the ads were clearly protected as free speech under the First Amendment. The commercials are not intended to sell a product and should not be classified as ''commercial speech,'' which can be more easily restricted, Northrop attorney Michael Doyen said.

''I think it is clear that if an individual were to put out ads saying what a great guy he was, we would think that is a very important part of the public dialogue,'' he said.

Northrop and five current and former employees are scheduled to go on

trial Tuesday on charges they falsified tests on components for nuclear-armed Cruise missiles and supplied equipment that they knew failed to meet goverment specifications.

The indictment, handed down last April, also alleges that the company defrauded the government by improperly testing components for the AV-8B Harrier jet, used by the Marine Corps. The case has been severed in two, and opening statements in the Harrier phase were scheduled to begin Tuesday.

#90058u1281 02/27/1990 ~United Press International
WASHINGTON (FEB. 27) UPI - The Supreme Court ruled Tuesday that nearly half a million dollars in severance payments Boeing Co. made to employees who were going to work for the government did not violate federal conflict of interest law.

The court, in a ruling by Justice John Paul Stevens, reversed a decision by the 4th U.S. Circuit Court of Appeals against Boeing and five former employees of the company.

The court held that because the payments were made before government service, they did not violate the law.

Stevens noted that while the payments might look wrong, allowing ''corporations to encourage qualified employees to make their special skills available to the government serves the public interest identified by both the president and the attorney general when (the law) was enacted.''

At issue was whether the $485,000 in severance given in 1981 and 1982 to Melvyn Paisley, T.K. Jones, Herbert Reynolds, Harold Kitson and Lawrence Crandon - who were about to accept high-level positions in the Department of Defense - violated federal conflict of interest law and must be forfeited to the United States.

The law forbids supplementing the salary paid to federal employees.

According to the government, the amounts paid to the five were not rewards for past service or hardship payments to provide a financial cushion for employees between jobs.

Instead, the government said the payments were ''made only because the individual petitioners were to assume positions with the Department of Defense, and the amount of the payments was tied directly to their future government employment.''

The government said that in the preceding 20 years, Boeing had made only 21 similar payments and in each case the Boeing employee left to accept a high-level government job.

A federal court, after trial, found for Boeing and the former employees. However, the appeals court reversed and said the government could recover the money.

#90058u1290 02/27/1990 ~United Press International

MARYSVILLE, OH (FEB. 27) UPI - Honda of American Manufacturing Co. says U.S.-made Accord station wagons - which will be produced beginning later this year - will be exported to Europe beginning in 1992.

Honda spokesman Roger Lambert said Tuesday Honda already has begun gearing up its Ohio complex to produce the station wagon. Honda now produces its Civic and Accord models and the facility.

It has been widely speculated the Marysville plant - which now ships cars to Canada, Taiwan, South Korea, Japan, and later this year, to Israel - would begin exporting cars to Europe.

However, it was not known until an announcement by Honda Motor Co.'s chief executive which car Honda would export to Europe and when shipments would begin, Lambert said.

Tadashi Kume, who was in Detroit Monday to accept a man-of-the-year award from Automotive Industries magazine, said, "This will be the first of our exports to Europe." Kume did not say how many wagons would be exported or whether the company would try for sales in the rapidly changing Eastern European market.

Automotive Magazine, in announcing the award to Kume, noted the Honda Accord was the best-selling car in the United States last year with 362,707 sold. The Ford Taurus was second at 348,061.

In December, Honda opened its second U.S. auto production plant at nearby

East Liberty, Ohio, making Honda the only Japanese auto company with two assembly plants in the United States.

By 1992, Honda will increase production at the East Liberty plant to 150,000 cars a year, while production of about 360,000 cars a year will continue at the Marysville plant, Lambert said.

Room will be made for station wagon production at Marysville by shifting some Civic and Accord work to East Liberty, he said. Honda motorcycles and all-terrain vehicles manufactured in Ohio are exported to 15 countries, including European nations.

#90058u1335 02/27/1990 ~United Press International

DALLAS (FEB. 27) UPI - Bank One Texas in the next several months plans to lay off 290 employees of Bright Banc Savings Association which it acquired earlier this month to eliminate ''duplicative work'' in the two financial institutions.

Under the staffing phaseout, announced Monday, Bank One Texas, formed from the 20 failed banks of MCorp under a federal bailout, immediately eliminated 90 jobs and said the other 200 cutbacks would take place in the next two weeks to seven months.

The cuts were disclosed only to two Dallas newspapers Monday because the action would affect only the Dallas region, a spokesman said.

Bank One Texas spokesman George McCane was quoted as saying that after an evaluation of staffing levels, Bank One ''began to realize duplicative work was being performed.'' The work related to accounting, administrative and personnel already being done at Bank One's downtown headquarters.

McCane said the bank would try to absorb the affected employees eventually within its own system. Bank One, which employs about 6,000 people in Texas is a unit of Banc One Corp. of Columbus, Ohio.

He said the employees were being offered severance of two weeks to six months.

Bright Banc, which had employed 950 people, was acquired by Bank One in one of the largest transactions under President Bush's thrift bailout law. The federal government took over the thrift in February 1989 after mounting losses had drained its capital and had operated it under its conservatorship program.

Bright Banc was formed by former Dallas Cowboys owner H.R. ''Bum'' Bright in the early 1980s. As with most Texas thrifts, the institution fell

victim to the real estate market crash in the state.

#90058u1349 02/27/1990 ~United Press International
WASHINGTON (FEB. 27) UPI - The Federal Reserve Board announced Tuesday it granted the Ameritrust Corp., bank holding company of Cleveland permission to acquire MVestment Corp., of Dallas, and conduct a variety of related businesses.

Ameritrust will be able to "engage in the exercise of trust powers, investment advisory activities, real estate equity financing activities and real estate appraisals" through MVestment, the Fed said.

Ameritrust is the 53rd largest bank holding company in the nation, and the third largest in Ohio, with total consolidated assets of $10.9 billion. It also operates banks in Indiana.

"The activities Ameritrust proposes to conduct through MVestment are closely related to banking and permissible for bank holding companies," the Fed said.

MVestment owns four non-bank subsidiaries: MTrust Corp., of Dallas, a provider of trust services; MSecurities, of Dallas, a stock advisory firm; MRealty Corp., of Dallas, a real estate advisory firm; MPetroleum, a petroleum investment advisory firm.

#90058u1447 02/27/1990 ~United Press International
BOSTON (FEB. 28) UPI - A recent basketball game between the University of Maine and Boston University shaped up to be a good one. At tip-off time, the players were ready to go, the officials and scorekeepers were set.

It was only the fans who were missing.

An outbreak of measles on the Maine campus forced health officials in Boston to restrict admission to the game, fearing that packing thousands of people together in the presence of such a contagious disease could turn an outbreak into an epidemic.

The incident was the latest of several similar occurrences at schools and colleges during the past couple of seasons. Eight years after the deadline set by the federal government for eradicating measles, the disease is not only around, it is resurgent.

According to Ken Allman, a public health consultant at the federal Centers for Disease Control in Atlanta, there were 16,236 documented cases of

measles in the United States in 1989.

Allman said that represents 6.5 cases per 100,000 people - a five-fold increase over 1988. If that was not bad enough, he said the incidence of measles in the first month of 1990 ran 40 percent ahead of 1989, with outbreaks occurring in 12 states.

Those numbers still are nothing like the half-million Americans annually infected with measles before a vaccine came onto the market in 1963. But Allman said the stubborn presence of the disease - especially among pre-schoolers and young adults - has led to a recent change in government guidelines for immunization.

Prior to last year, a single vaccination against measles at the age of about 15 months was believed sufficient. Now, federal and state agencies, as well as the American Academy of Pediatrics, recommend two doses - one at 15 months and a second administered sometime between kindergarten and sixth grade.

Allman said it is not clear why single doses of measles vaccine have not been universally effective, but he said researchers suspect that in some people, the protection conferred by a single vaccination wanes over a period of time.

Among people who are now college-aged, there are other problems as well. Those who were vaccinated between 1963 and 1975 generally received their doses at nine or 12 months - which doctors now believe was too early to confer maximum protection.

In addition, Allman said it appears some vaccine was not handled properly in the 1960s, leading it to break down and lose effectiveness.

Nationwide, he said the biggest problem with measles is among pre-schoolers, because no laws require proof of immunization until a child enters the first year of school.

As a result, immunization rates can vary from 100 percent in some communities to as little as 28 percent in some inner-city areas, he said.

''If a child is enrolled in some kind of pre-school program, then chances are that he or she will need to be immunized,'' he said. ''But if you've got a kid who stays at home, under the care of mother or grandma, there is no such requirement.''

One strategy that has proved successful in reducing the incidence of measles is universal immunization programs in which taxpayers pick up the bill for the cost of vaccines, said Dr. Alfred DeMaria, assistant commissioner for communicable diseases in the Massachusetts Department of

Public Health.

DeMaria said Massachusetts is one of eight states that pays for immunization programs covering measles and several other diseases, including mumps, rubella, polio and diphtheria.

He credits the program for giving the state a pre-schooler immunization rate of ''over 90 percent in all communities,'' and one of the lowest incidences of measles in the country, with 109 cases in 1989.

Because measles in Massachusetts occurs primarily among people aged 10 to 20, DeMaria said state law requires all students entering college present proof of immunization.

In addition, guidelines issued in January recommend these students should now have evidence of receiving two doses of vaccine.

Although it is generally assumed people born before 1957 are immune to the disease, federal and state officials say vaccinations are nevertheless a good idea for health care workers and travelers to countries where measles is widespread.

#90058u1463 02/27/1990 ~United Press International

LOS ANGELES (FEB. 27) UPI - Texas investor Harold Simmons will ask shareholders of Lockheed Corp. to recommend that the aerospace giant drop its poison pill anti-takeover measures, filings showed Tuesday.

Simmons, who has an 18.94 percent stake in Lockheed, said in a filing with the Securities and Exchange Commission that he will seek support at Lockheed's March 29 annual meeting for a resolution calling on the company to redeem its preferred share purchase rights.

Those rights are designed to discourage a hostile suitor form buying more than 20 percent of stock by making it prohibitively expensive to acquire more stock.

Simmons disclosed last week that he and NL Industries Inc., a Houston chemicals company he controls, have nominated a slate of 15 directors to replace the company's board.

Simmons also disclosed in the filing that he has hired Salomon Brothers Inc. to help in his proxy fight.

#90058u1524 02/27/1990 ~United Press International

NEWARK, N.J. (FEB. 27) UPI - A federal judge held Eddie Antar in criminal contempt Tuesday and ordered a securities fraud case against the elusive founder of the Crazy Eddie chain of discount electronics stores to proceed immediately.

''Subpoenas are to be issued against all the banks that we know about, all of the Antars that we know about and all of the Antar relatives that we know about,'' said U.S. District Judge Nicholas Politan.

Politan said members of the family will be ordered to give depositions.

Although Antar failed to appear in court, he was represented by three lawyers, who told the judge they did not know his whereabouts or why he was not present. Lawyer Jack Arsenault also said he did not know why Antar has failed to turn over $52 million in alleged illegal trading profits he transferred to banks in Israel.

A complaint filed last year by the Securities and Exchange Commission charged Antar and a group of relatives, including his brother and cousins, with juggling Crazy Eddie Inc.'s books to inflate profits and the price of the company's stock. The SEC is seeking disgorgement of up to $64 million Antar made by selling his Crazy Eddie stock after he stepped down as chairman in late 1986.

Antar has already been held twice in civil contempt, once by Politan for failures to appear and last week by U.S. Magistrate Ronald Hedges for failure to repatriate the $52 million. He surrendered to federal marshals on Feb. 13 and was allowed to go free on his own recognizance after a brief, secretive court appearance.

Besides the SEC case, Antar faces a suit filed by Crazy Eddie shareholders in federal court in Brooklyn.

After finding Antar in criminal contempt, Politan lifted a stay he had imposed on the SEC case. He had delayed the suit because Antar has been notified that he is the target of a criminal investigation by federal authorities in New Jersey, and his lawyers have been warned that their fees might be subject to forfeiture.

''If Mr. Antar feels he can run away from this court's orders and avoid this court's orders and be contemptuous of this court's orders, this court is going to take action,'' the judge said.

Politan scheduled trial to begin May 1. But he told lawyers for a cousin, Sam E. Antar, and brother, Mitchell Antar, that the magistrate handling pre-trial work would likely grant them a separate trial later on.

Antar built the Crazy Eddie chain from one store in the Coney Island

section of New York to a chain throughout the metropolitan area, famous for its commercials featuring a deranged-looking actor trumpeting, ''His prices are insane.'' But the company, based in Edison, N.J., filed for bankruptcy last year and was liquidated after a turnaround attempt failed.

DETROIT (FEB. 27) UPI - Despite successful partnerships with the Japanese, the outgoing head of Ford Motor Co. said Tuesday both he and the American industry in general remain uneasy about doing business with Asians.

Donald E. Petersen, in his final interview before retiring as chairman of the No. 2 automaker Thursday, also said the United States is undergoing a "subtle but continuing erosion" of its manufacturing base that will mean far fewer jobs.

Regarding Ford, Petersen said he hoped he instilled a sense of teamwork during his five-year reign. Ford became the nation's richest automaker in the late 1980s. He said Ford is set to become the world's highest quality vehicle producer within this decade.

Petersen, 63, who announced last November he would retire about 18 months ahead of schedule, will be succeeded by Vice Chairman Harold "Red" Poling, 64, who postponed his retirement until age 67.

"I'm uneasy at this stage about the whole process of Asian ownership," said Petersen, adding he was not nearly as concerned about U.S. business ventures with the Europeans, who have in many cases been in the United States for many decades and become part of the fabric of U.S. society. "I would feel a whole lot more comfortable if there was an American-owned and American-based strong core of worldwide competitiveness," he said.

Petersen seemed to subscribe to futurist Peter Drucker's theory that the Japanese approach to trade is to take an adversarial role intended to eliminate the competition rather than to compete fairly.

"We have to understand their approach to trade ... which is highly

nationalistic," he said, citing Drucker's notion that getting the Japanese to understand fair trade "is utterly fruitless" and that U.S. companies must "figure out how to plug in."

"The manufacturing sector of the United States is going through the same process that the agricultural sector went through in prior generations," Petersen said. "We have to accept that it, too, will generate a far smaller percentage of employment of the people of the United States than it did ten years ago."

Petersen warned there is a growing dependence on foreign-based industries. "In recent talks, I have been discussing the crucial importance of maintaining the manufacturing of core components, because your basic technology will inevitably follow wherever it is that those components are made," he said.

Yet, Petersen defended Ford's links with several Japanese firms, links that critics charge has eroded the automaker's own manufacturing and engineering base in North America.

During the early 1970s, Ford formed an association with Japanese carmaker Mazda by acquiring a 25 percent stake in it. That association grew during the last decade to include the engineering and joint manufacturing of all of Ford's small cars sold in the United States.

Ford also has associations with Nissan to help it develop a new minivan for the 1990s, and with Yamaha, which supplies performance engines for its Taurus SHO sedan.

"It's a matter of specifics versus the general," he said, noting that economics were the major drive behind the Mazda alliance. "By working with Mazda, we were able to continue to be a strong presence in that part of the market. That's certainly a better end-result than not being there at all.

"We saw it as a very logical way," Petersen said, adding that while Europe was traditionally Ford's overseas base, Ford knew it had to have a domestically built small car to meet government fuel economy laws.

Changing the corporate culture at Ford by instilling a sense of teamwork and making quality a top concern were primary aims of Petersen's during his tenure, missions that were widely publicized by the automaker in the latter half the 1980s. But trying to "break the ancient Ford habit of following General Motors" was also a top concern, he said.

"It was remarkable at how late in the game it was before we had any evaluation of what was happening from major automotive companies elsewhere " Petersen said, adding that he regards Toyota and Peugeot as the best non-U.S. automakers today.

"At first, it was like pulling teeth to get a competitive comparison against the best of the Japanese in a given area and the best of the Europeans in a given area," he said. "Now it's routine."

#90058u1921 02/27/1990 ~United Press International

CHICAGO (FEB. 27) UPI - A consortium of designers and engineers, led by Amoco Chemical Co., Tuesday outlined plans for a revolutionary 65-foot prototype sailing yacht they hope will revive the nation's declining sailboat industry.

Amoco Chemical representatives told reporters at the National Design Engineering Conference that the vessel, to be christened the Amoco Procyon, seeks to combine the speed and convenience of power boats with the thrill of sailing.

The Amoco Procyon's design centers on two revolutionary concepts - a wing keel that looks a little like a dolphin and tilts to the optimum sailing angle, and a lightweight bipod mast shaped from carbon fiber. The boat, named for Procyon, the brightest star near the sailing constellations, is the brainchild of yacht designer Olaf Harken.

Harken said he set out more three years ago to create a fast, comfortable, easy-to-rig sailboat that would be affordable to maintain. "I figured a lot more people would be interested in sailboats if they were just as convenient and fast as motorboats," Harken said.

"When I originally approached Amoco Chemical, I just hoped they would listen long enough for me to explain my idea," he said. "Not only did they listen, but they really got excited."

The sailing industry "has been in a technological slump, without a lot of change in design over the past few years," Harken said. "I expect Amoco Procyon to excel as a cruising-racing boat but, more importantly, to serve as a stimulation to the industry for the future," he said. "It is the future."

An Amoco Chemical spokeswoman said the company expects the Amoco Procyon to be completed by next January. Amoco Chemical is supplying materials and marketing support for the project. Amoco Chemical manufactures a variety of marine products, including the carbon fiber that will be used in the ship's mast.

"We believe Amoco Procyon embodies those characteristics of high quality and innovation so important to any industry," said Amoco Chemical Vice President Bruce Otto.

"High technology is not enough. It is the combination of quality materials craftsmanship and imaginative design and use of products that creates new opportunities in an industry," Otto said. "Amoco Procyon has the potential to turn the sailing-marine industry around."

Harken heads the design team and is providing block and fitting design and production. Britt Chance of Chance & Co. heads the hull-design project. "The wing keel is a major breakthrough for increasing boat speed," said Chance. "And we've added a radical ingredient: this wing keel cants to optimum sailing angle."

David Greeley of Atlantic Applied Research Corp., the project's computer modeler, said the wing keel wmake the boat easier to handle.

The new, bipod mast by Hall Spars and a self-furling main sail designed and made by Charles Miller of North Sails Midwest also add to handling ease.

"Big boat mains have looked pretty similar over the years, but new materials and finishes have enhanced the sail-designer's ability to create " said Miller.

The Amoco Procyon's fully battened, self-furling mainsail uses a unique, patented roller batten. The bipod mast allows the mainsail to furl and unfurl easily, and the lightweight carbon mast can be lowered and raised in ten minutes. The Amoco Procyon also will offer such creature comforts as wall-to-wall carpeting and a full galley and will provide sleeping room for eight.

NEW YORK (FEB. 27) UPI - Eastern Airlines Tuesday asked a bankruptcy court to release an additional $60 million from an escrow account for the company to conduct business through March, a creditors' attorney said.

"The number (Eastern) asked for is a negotiated number (of dollars) needed to conduct business through March. We've agreed to that release," said Adam Harris of Kramer, Levin, Messen Kamen & Frankel, New York attorneys for the Eastern's unsecured creditors.

The U.S. Bankruptcy Court of the Southern District of New York will hold a hearing on the request Thursday, Adams said. He said $260 million has already been withdrawn from the account, which currently totals $557 million.

Eastern spokeswoman Karen Ceremsak at company headquarters in Miami

confirmed that the airline had asked the court for an additional $60 million from the escrow account. No immediate comment could be obtained from Eastern.

Eastern and its unsecured creditors reached an agreement last week under which the airline would pay about half of the $980 million owed the creditors. The unsecured creditors include The Boeing Co., General Electric Co. and Airbus Industrie. Eastern filed for Chapter 11 bankruptcy protection in March 1989 after strikes by its pilots, machinists and flight attendants.

Earlier this month, Eastern reported 1989 losses of $852.3 million and said it expected to lose another $155 million in the first six months of 1990.

#90058u2050 02/27/1990 ~United Press International

CALGARY, Alberta (FEB. 27) UPI - Canada's largest public utility TransAlta Utilites Corp. Tuesday reported year-end earnings of $113.6 million, or 84 cents a share, up 18 percent from $96.5 million, or 71 cents a share, in 1988.

Revenues for 1989 increased to $804.7 million from $764.6 million in the year earlier.

TransAlta said its earnings were affected by several factors including lower common equity and a reduced rate of return.

The utility said its revenues rose due to expanded industrial activity in Alberta, especially in the forest products sector.

Electric energy sales amounted to 21.9 million kilowatt-hours, a 3.6 percent increase from 1988, TransAlta said.

TransAlta supplies more than two-thirds of the province of Alberta's electric energy requirements. Its subsidiary, TransAlta Resources, supervises non-regulated activities and investments including installing and maintaining energy management and building control systems.

#90058u2078 02/27/1990 ~United Press International

NEW YORK (FEB. 27) UPI - Computer retailer Businessland Inc. presented Tuesday a new strategy with an emphasis on business services in a bid to boost its financial performance.

"The Businessland mandate for the new decade is to address customer needs

through advanced technology solutions, services and standard microcomputer systems," said David Norman, chairman and chief executive officer of the largest U.S. computer and computer products retailer.

Norman described the troubled company's plan in two separate meetings with industry analysts and reporters in New York. He said the company will develop its customer services in the area of consulting, reconfiguration of systems and training. Norman described the company's outlook for 1990 as "cautiously optimistic."

The largest U.S. retailer of microcomputers, workstations and computer products, with annual sales of about $1.18 billion, reported a $1.2 million loss in its last quarter ended Dec. 31. The 1990 second-quarter loss reflected a one-time $7.5 million charge for restructuring costs, including severance pay for staff reduction and closure of operations with a low profit margin.

Businessland projected that its hardware sales will drop from 77 percent in 1989 to 73 percent in 1990, while software sales will go down from 4.5 percent to 3 percent while consultancy, service and training related activities will grow to a combined 24 percent, up from 18.5 percent in 1989.

Eugene Glazer, an industry analyst with Dean Witter Reynolds, said "the worst seemed to be over" for Businessland. "Basically, it is a positive plan in an industry which came under extraordinary pressure last year because of a lot of price cutting," Glazer said.

"In the first weeks of this year, we saw some initial signs the plan might be successful with Businessland taking strong measures to cut cost," Glazer added. "They are a very service-intensive company. This will help them turn profitability around."

Norman acknowledged that Businessland took a severe blow when Compaq Computer Corp. of Houston, a leading manufacturer of personal computers, ended its partnership with the major retailer in February 1989. Compaq computers amounted to $150 million a year in sales for Businessland.

But Norman stressed the company's gross margin, which dropped to a low 20.7 percent in June, climbed back to 22.6 percent in December and was now two points over that level, reflecting cost-cutting measures.

Walter Winnitzki, an industry analyst with the New York firm of Brown Brothers Harriman, said Businessland was reverting to its original line of business, focused on customer services and training.

"Businessland really underestimated the repercussion that the loss of business Compaq would have," Winnitzki said. "Service offers a very good

margin," he added. "Businessland is moving in the right direction but further evidence is needed to prove the company's ability to return to profitability."

The company, based in San Jose, Calif., has dealer partnership with more than 100 computer hardware and software manufacturers and has an exclusive service agreement with Eastman Kodak Co. of Rochester, N.Y., for products, service and support.

Businessland, which services all major microcomputer products in the top 50 markets in the United States, also has operations in Canada and Britain. Norman said the company is seeking new markets in all the major cities of Western Europe and the Pacific Rim.

Analysts attending the meeting felt that earnings in the coming third quarter could climb back to 13 cents or 15 cents a share, but still well below their 26-cent level in the year-ago period. Businessland sold 200,000 personal computers last year and serviced 280,000 customers.

#90058u2129 02/27/1990 ~United Press International

NEW YORK (FEB. 27) UPI - A federal judge Tuesday issued an order temporarily restraining the Reuters news agency from breaching or terminating its five-year-old news photo exchange agreement with United Press International.

U.S. District Court Judge Peter Leisure also ordered Reuters to show cause by March 12 "why an order should not be made preliminarily enjoining Reuters ... from terminating the picture services agreement."

Reuters earlier this month said it was terminating a contract through which UPI clients in the United States receive Reuters' photos from abroad and Reuters' clients outside the United States receive UPI domestic news photos. The judge's order prevents Reuters from stopping the flow of news photos to UPI clients as Reuters did for more than four hours on Feb. 16.

After Reuters unilaterally declared its intent to end the photo relationship with UPI, the British-based news agency filed suit in U.S. District Court in Manhattan seeking to recover what it claimed was the additional cost of supplementing UPI's domestic photo service. Washington-based UPI, in a counterclaim to the Reuters' suit, sought an injunction that would prevent Reuters from breaching its agreement with UPI. Reuters' representatives were not immediately available for comment.

UPI spokesman Milt Capps said the wire service was "very encouraged" by the court's issuance of a temporary restraining order. "It suggests to us that UPI, working through the courts, can avert further damage," he said

from the company's headquarters in Washington. UPI has said it will seek damages of $1.6 million as a result of Reuters abrogation of the news photo agreement.

Andrew Nibley, editor for Reuters America, previously said the British news agency decided to terminate the photo agreement with "deep regret and only after trying hard for a long period to make it work."

"For some time Reuters has been forced to incur considerable additional costs to supplement the UPI service," Nibley's statement said. "We had no choice but to take this decision."

In its counterclaim, UPI described this action as a diversionary tactic and denied the Reuters' allegation that UPI news photo volume and quality have declined since the ten-year exchange agreement went into effect in January 1985.

BOSTON (FEB. 27) UPI - The troubled Bank of New England has chosen a veteran of the banking industry who briefly was No. 2 man at a Los Angeles thrift as its new chairman, a press report said Tuesday. Federal regulators confirmed they had been asked to review a nominee for the bank's chairman position.

The prospective chairman is Lawrence K. Fish, former president and chief operating officer of Columbia Savings & Loan Association, The Boston Globe said Tuesday in a story quoting unnamed sources. Bank of New England,

which declined to confirm Fish's appointment, said it will make an announcement Wednesday.

A spokesman for the Office of the Comptroller of the Currency, which must approve the appointment of chief executive officers, said Bank of New England had submitted a nominee's name but declined to say what action the OCC had taken.

The bank and the OCC said the bank likely will sign a cease and desist order Wednesday that would outline what measures the bank must take to satisfy regulators that it is on the road to avoiding insolvency.

When he resigned two years ago, Fish headed Bank of Boston Corp.'s New England Group and thus was the top executive in the company's New England operations. That experience may be helpful as Bank of New England struggles with losses in the region's faltering real estate market and a branch banking network the company concedes has developed duplication during its rapid growth.

The California thrift, once an enormously successful institution, with $12.7 billion in assets as of Sept. 30, lost $211 million in the first three quarters of 1989 because of the recent sharp drop in the junk bond market. About one third of its assets, or about $4.3 billion, was invested in junk bonds, Columbia said.

Fish, who had a 17-year career with the Bank of Boston Corp., left the Boston bank in 1988 to become president and chief operating officer of Columbia, where he spent just 17 months. He resigned from Columbia in August, before the thrift reported losses and after a reorganization the company said was designed to make it less dependent on junk bonds for profit.

Fish, 45, would replace Walter J. Connolly Jr., who was dismissed as chairman and chief executive officer last month after it was disclosed the bank expected to report a staggering loss of more than $1 billion for last year.

H. Ridgley Bullock, a Bank of New England board member who became interim chairman on Connolly's firing and who was a candidate for the permanent job, said the company would "make an announcement tomorrow and I won't have any comment until then."

#90058u2509 02/27/1990 ~United Press International

MIAMI (FEB. 28) UPI - Pan American World Airways said Tuesday it has applied for permission to fly from Miami to Toronto, Canada, and to several cities in Latin America currently served by Eastern Air Lines.

Besides Toronto, Pan Am said it is seeking U.S. government clearance to serve Guayaquil and Quito in Ecuador, Lima, Peru, and Bogota, Colombia, from Miami.

Eastern has agreed to sell its Latin American routes to American Airlines, together with other assets, for $471 million.

''With the pending sale of Eastern's U.S.-South American route authority to American Airlines, it is in the public interest to have Pan Am also designated to serve major markets,'' said Richard Mathias, a Pan Am senior vice president.

''Pan Am's entry into the west coast of South America would ensure a more competitive structure in U.S. carrier South America service,'' he added.

Pan Am said it hopes to operate one daily flight between Miami and Guayaquil, Lima and Bogota. The Guayaquil flight would continue on to Quito.

The airline, based in New York, said it would operate three daily flights between Miami and Toronto.

#90058u2517 02/27/1990 ~United Press International

ANCHORAGE, AK (FEB. 27) UPI - A federal grand jury indicted the Exxon Corp. and the Exxon Shipping Co. Tuesday on five criminal charges arising from last year's oil spill that soiled the pristine environment of Alaska's Prince William Sound.

The indictment came after weeks of intense negotiations between the world's largest oil company and the Justice Department in a futile effort to reach agreement on a plea bargain under which Exxon would avoid a criminal indictment.

The state of Alaska was vehemently opposed to such a deal. State Attorney General Douglas Baily has said such a deal would have been slanted in Exxon's favor.

The charges are violation of the Clean Water Act, the Refuse Act, the Migratory Bird Treaty Act, the Ports and Waterways Safety Act and the Dangerous Cargo Act.

The indictment said the Exxon Valdez left the designated shipping lanes on March 24, 1989, with the master absent from the bridge and the ship under the control of ''an officer who lacked the required Coast Guard certification for pilotage in Prince William Sound and a helmsman who was

known by Exxon Shipping Co. to be incompetent at performing his assigned duties.''

Under the control of these crewmen, the 987-foot oil tanker grounded on Bligh Reef, tearing a gaping hole in its hull and spilling nearly 11 million gallons of Alaska crude into the environmentally sensitive waters.

Exxon wilfully and knowingly violated the Dangerous Cargo Act by employing crewmen aboard the Exxon Valdez ''knowing such persons to be physically and mentally incapable of performing the duties assigned them,'' the indictment said.

Exxon also ''did wilfully and knowingly fail to ensure that the wheelhouse of the Exxon Valdez, while under way, was constantly manned by persons who directed and controlled the movement of the vessel, each of whom was competent to perform that duty ...,'' the indictment said.

The indictment said that after the tanker left the shipping lanes the skipper, Capt. Joseph Hazelwood, ''left the ship's bridge.'' The indictment, which did not mention Hazelwood by name.

In Washington, Attorney General Dick Thornburgh said Exxon approached the Justice Department last week to see what it would take to work out an agreement, but the ''terms we insisted upon were not acceptable to the defendants.''

In a statement released by the company's New York headquarters, Exxon Chairman Lawrence Rawl called the spill ''a tragic accident.'' Noting that no individual was charged, Rawl said, ''Nobody willfully grounded the ship or caused the spill.''

The indictment said the oil traveled 700 miles from Bligh Reef and contaminated Prince William Sound, the Gulf of Alaska, Kenai Fjords National Park, Katmai National Park, Aniakchak National Preserve, the Alaska Peninsula National Refuge, the Alaska Maritime National Wildlife Refuge, Becharof National Wildlife Refuge, Kodiak National Wildlife Refuge and many islands and waters.

The spill killed more than 36,000 migratory birds and more than 100 endangered and legally protected bald eagles.

The Justice Department said the indictment charged violations of five federal laws:

-The Ports and Waterways Safety Act and the Dangerous Cargo Act, each of which carries a fine of up to $600,000 for failing to have competent personnel operating cargo vessels.

-The Clean Water Act and the Refuse Act, each of which carries $200,000 fines for dumping pollutants into U.S. waters.

-The Migratory Bird Treaty Act, which levies a $200,000 fine for killing protected birds without a permits.

Under a separate law, the penalties can be multiplied and the ultimate fine could include costs spent for clean up and to reimburse business losses.

#90058u2692 02/27/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The Federal Trade Commission Tuesday approved B.F. Goodrich Co.'s request to sell a Calvert City, Ky., chemical plant to Westlake Monomers Co.

FTC approval of the vinyl chloride monomer and ethylene dichloride plant's divestiture was required by a 1989 settlement order stemming from Goodrich's acquisition of Diamond Shamrock Platics Corp.

The FTC ruled in 1988 that the acquisition lessened competition in the production of VCM, the chemical from which polyvinyl chloride plastics are produced.

Westlake is a wholly owned subsidiary of Gulf Polymer & Petrochemical Inc. and an affiliate of China General Plastics Corp., of Taiwan, according to the FTC.

-30- 877

#90058u2930 02/27/1990 ~United Press International

WASHINGTON (FEB. 27) UPI - The Senate voted Tuesday to provide higher post-service benefits to civilians who volunteer for national service than to veterans, rejecting arguments it would be unfair and could hurt military recruitment.

The Senate rejected 55-40 an amendment by Sen. John McCain, R-Ariz., which would have provided civilians in the proposed national volunteer service program the same benefits as military veterans and limited to use for educational purposes.

''This send a wrong message to those are serving or have served,'' McCain said and Sen. William Armstrong, R-Colo., added ''it will have an effort on recruitment and let's not kid about it.''

McCain charged the Senate would make a ''grave mistake'' to give better benefits to civilians who participate full time or part time in community

service.

But Sen. Edward Kennedy, D-Mass., said that a military veteran would get more in combined service and post-service benefits than the civilian, saying the two packages ''are not even comparable.''

The McCain amendment set off the first major fight over the legislation to promote voluntary national service, which has already been scaled down to meet administration objections.

Before the bill reached the floor, the measure was whittled down from about $300 million a year to $125 million, which would service about 750,000 volunteers instead of 2 million.

The proposed National and Community Service Act would authorize up to $35 million for a youth service corps for people aged 16 to 26 and $35 million for states to set up a national service program for people over 17. Both would be open to full-time and part-time participants.

The bill also provides $25 million for students to participate in community service and for programs under which older people could volunteer in schools, in addition to $25 million for President Bush's ''Points of Light'' volunteer program.

In addition to a poverty-level stipend, those leaving the youth service corps would get post-service training and those in the national service program would get vouchers for higher education, first-time home purchase or to pay off student loans.

''If we don't want anyone but rich people to volunteer, let's just kill this bill,'' said Sen. Sam Nunn, D-Ga. And Sen. Christopher Dodd, D-Conn., argued, ''Volunteerism should not be just something that the affluent can afford.''

But McCain argued that it was not fair to provide less for a veteran ''who makes a much higher sacrifice'' than the civilians would make and who, in the recent case of Panama, gave their lives for their country.

Under the bill, two-year volunteers would get a $5,000 voucher to pay for college or buy a home while the service veteran would get $3,200 under the GI Bill strictly for education.

But Kennedy and Nunn argued that the total package provided for the military, including higher pay in the service, and post service benefits combined would be much larger. Kennedy said the difference would be $373 a week to $231 a week for the civilian.

#90058u2936 02/27/1990 ~United Press International
BURBANK, Calif. (FEB. 28) UPI - Former Orion Pictures executive Mike Medavoy was named Tuesday to the newly created post of chairman of Columbia Pictures' Tri-Star Pictures unit.

Medavoy resigned his long-time post as executive vice president of production at Orion last week amid speculation about a possible sale of the studio by majority shareholder John Kluge.

Medavoy will report directly to the co-chairmen of Columbia Pictures Etnertainment, Peter Guber and Jon Peters.

Guber and Peters were hired by Columbia to run the studio last year following Sony Corp.'s $3.4-billion buyout of the company and an expensive settlement with Warner Bros. allowing the pair to break their contract.

The appointment of Medavoy partially fills the gaps left last month by the departures of Tri-Star's President, Jeff Sagansky, and Columbia Pictures President Dawn Steele.

Terms of Medavoy's deal were not disclosed. He was rumored to also have considered an offer from Warner Bros., but was considered more likely to take a job with Guber, his long-time friend.

Medavoy was a partner and co-founder of Orion in 1978, along with Arthur Krim, Eric Pleskow, Bill Bernstein and Robert Benjamin. The executives helped create Orion Pictures Corp. as a publicly held company four years later.

Medavoy, 49, was involved with such successes as ''Platoon,'' ''Amadeus,'' ''Mississippi Burning,'' ''Throw Mama From the Train,'' ''Bull Durham'' and ''Robocop.''

Orion, the smallest of the major studios, has long been considered a takeover candidate. It performed poorly last year, with less than 5 percent of the $5 billion domestic box office.

#90059b0012 02/28/1990 ~Business Wire
TOLEDO, OHIO (FEB. 28) BUSINESS WIRE - This report discusses the status of all known or potential defaulted or non-performing assets as of Feb. 28 1990.

Previous reports are available upon request. This report will be updated periodically:

CAMP VERDE, ARIZ.

At our 120-bed nursing facility, the census has increased slowly but steadily. In January, the average daily census exceeded 85 patients. The facility has made a contribution to interest, over and above operating expenses, for the year 1989. Active efforts to sell or lease the facility will commence when census hits 85 percent, hopefully within six months.

FORT WAYNE, IND.

Higher patient rates are helping at the 81-bed North facility and the 61-bed facility in nearby Ligonier. Average daily occupancy at North for January was 70 (86 percent) and Ligonier's was 30 patients (49 percent). The third facility in the group, a 61-unit retirement and assisted living center, Manor Estates, had an average of 47 units rented during January out of 61. A proposal to sell Manor Estates is now under consideration.

SAFETY HARBOR, FLA.

The REIT has filed a lawsuit in Florida to collect past due interest and principal on a $5,252,000 first mortgage note secured by a nursing home. The owners of the facility are also obligated under a guaranty agreement covering 30 percent of amounts due on the mortgage. The owners have filed suit against their corporate manager from whom they purchased the facility in 1986, for breach of contract and related matters. Bruce G. Thompson, chairman and CEO of the REIT, is a director and a less than 1 percent shareholder of the corporate manager. Attempts are continuing to settle the dispute among all parties by negotiation.

RESERVES:

As of this date, the allowance for losses is deemed adequate to absorb costs of operating and selling/leasing the above-described properties. Consequently, their disposition is not expected to have a significant impact on earnings.

#90059b0034 02/28/1990 ~Business Wire

SOUTH SAN FRANCISCO, CA (FEB. 28) BUSINESS WIRE - Genentech Inc. Wednesday announced that human clinical trials of relaxin have begun. The company plans to investigate the effects of the hormone, now produced by recombinant DNA technology, in facilitating childbirth.

The Phase I studies are being conducted at three centers: The University of North Carolina at Chapel Hill, University of California, San Francisco and University of Utah, Salt Lake City. In order to conduct these safety trials, non-pregnant women volunteers will be studied.

Relaxin is a naturally occurring hormone that is produced in highest levels by the female reproductive organs during pregnancy. It appears to have a role in childbirth by relaxing, or softening, the cervix and birth canal.

Through a series of clinical trials, Genentech will be evaluating relaxin's potential to facilitate safe and natural childbirth in women who near the end of pregnancy, suffer complications of toxemia or diabetes, or who are more than three weeks post-due.

Barry Sherman, M.D., vice president of medical affairs at Genentech, cautioned that relaxin is in early investigational studies and must undergo extensive human clinical trials over a period of several years.

"If relaxin is proven to be safe and efficacious in child bearing women, it may provide a cost-efficient and non-invasive alternative to cesarean section delivery in certain women."

Relaxin is Genentech's fourth product to begin human clinical trials in the last seven months; the first new product into the clinic in 1990. In the third quarter of 1989, Genentech began Phase 1 trials of Argatroban, a blood clot-inhibiting agent; CD4-IgG, a second generation potential AIDS therapeutic; and IGF-1, a protein which is believed to have a role in treating a variety of nutritional and growth disorders.

Genentech Inc. is a leading biotechnology company focusing on the

development, manufacture and marketing of pharmaceuticals produced by recombinant DNA technology.

DENVER (FEB. 28) BUSINESS WIRE - Nevada Goldfields Corp. and its Empire Project partners have executed the joint venture agreement with Noranda Exploration Inc. for further exploration and development of the Empire property.

Noranda may earn a 55 percent interest in the Empire property by expending US $5 million before Dec. 31, 1993, and by Dec. 31, 1994, making a commitment to bring the property into commercial production.

Noranda will provide all financing necessary to place the Empire property into production. Noranda has the right to recover pre-production capital costs, exclusive of exploration costs, from 75 percent of the operating profits. Nevada Goldfields and its partners, Marquette Minerals Inc. and Clear Creek Resources Inc., will share the remaining 25 percent.

Upon recovery of costs by Noranda, Nevada Goldfields will own a 22.5 percent interest in the property and Marquette Minerals and Clear Creek Resources will own a combined 22.5 percent interest.

The Empire Project is a fully permitted, open-pit, heap-leach gold mine, which is located 40 miles west of Denver. The joint venture will provide additional exploration of other gold mineralization targets on the 7,000-acre property. Noranda anticipates it will initiate a drilling program on the property during March.

Nevada Goldfields Corp. is a Canadian public company with two gold mines in Nevada. Its shares trade on the Toronto Stock Exchange under the symbol NGF, on NASDAQ under the symbol NGFCF, and on the Stuttgart Exchange, West Germany, under the symbol NGF SG.

#90059b0042 02/28/1990 ~Business Wire

TEMPE, AZ (FEB. 28) BUSINESS WIRE - Amtech Systems Inc. (NASDAQ:ASYS) announced Wednesday it has entered into a letter of intent to acquire Martec Temporary Services of Los Angeles for approximately $400,000 cash

and 175,000 shares of Amtech common stock.

''Martec, which has a major technical temporary personnel presence in the Los Angeles area, is an excellent opportunity for Amtech as we continue to build on our successful diversification into the technical personnel business,'' explained J.S. Whang, president of Amtech.

''Marty Simons, the founder and president of Martec, has built a strong marketing and recruiting organization. With Amtech's administrative support and financial strength, Martec should achieve even greater profitability and growth.''

In fiscal 1989 the privately held Martec had revenues of $16 million. Organized in 1981, Martec operates in three areas: temporary technical personnel, temporary administrative support personnel and in-house technical design and engineering.

Under the terms of the preliminary agreement, Simons will remain as president of Martec, which will operate as a wholly owned subsidiary of Amtech. Simons will be entitled to additional cash incentive payments based on the future performance of Martec.

The transaction, which is subject to further due diligence and negotiation of a definitive agreement, is expected to close by the end of March.

Amtech Systems Inc. manufactures the ATMOSCAN, an automated environmentally controlled process system which improves the yields of semiconductor manufacturers.

In addition, through its wholly owned subsidiaries, RTS Inc. and Echelon Service Co., Amtech provides technical temporary employment services to major aerospace, defense, computer and high technology companies in the Southwest and the Baltimore/Washington D.C. areas.

#90059b0045 02/28/1990 ~Business Wire

TEMPE, AZ. (FEB. 28) BUSINESS WIRE - Amtech Systems Inc. (NASDAQ:ASYS) Wednesday announced it has entered into a letter of intent to acquire Tystar Corp. of Torrance, Calif., for $250,000 cash and approximately 208,000 shares of Amtech common stock.

''We are excited about Tystar, Amtech's first acquisition in the semiconductor field. By joining forces we can significantly broaden our product line,'' said J.S. Whang, president of Amtech. ''By combining Tystar's sophisticated technology with Amtech's marketing and financial strength, the business should grow at a faster pace.''

Tystar makes and services semiconductor manufacturing equipment, including a patented photo chemical vapor deposition system and an automated diffusion furnace. The company also has a fiber optic chemical vapor deposition system.

Chemical vapor deposition is one of the fastest growing areas of the semiconductor equipment market. This market alone is expected to be $500 million for 1990. In 1989 the privately held Tystar had total revenues of $1.3 million. Organized in 1988, the company has 20 full-time employees.

Under the terms of the tentative agreement, the existing shareowners of Tystar will be entitled to additional Amtech common stock based on the future performance of Tystar, which will operate as a wholly owned subsidiary of Amtech. Dr. Klaus Schuegraf, a highly regarded executive in the field of semiconductor equipment technology, will continue to be president of Tystar.

The transaction, which is subject to further due diligence and negotiation of a definitive agreement, is expected to close in the very near future.

Amtech Systems Inc. manufactures the ATMOSCAN, an automated environmentally controlled process system which improves the yields of semiconductor manufacturers. In addition, through its wholly owned subsidiaries, RTS Inc. and Echelon Service Co., Amtech provides technical temporary employment services to major aerospace, defense, computer and high-technology companies in the Southwest and the Baltimore/Washington D.C. areas.

#90059b0052 02/28/1990 ~Business Wire

SAN FRANCISCO (FEB. 28) BUSINESS WIRE - The Harper Group Inc. (NASDAQ:HARG) reported record operating results for the year ended Dec. 31 1989.

The San Francisco headquartered firm is a leader in the global movement of goods, information, and value-added services including electronic shipment

tracking, invoicing and logistics management.

Record revenue for 1989 totalled $398,313,000, an increase of 41 percent from the $283,238,000 reported for 1988. Operating income increased 51 percent to $20,555,000 from $13,579,000. The company's 1989 net income increased 5 percent to $14,828,000 as compared with $14,119,000 in the previous year. Net income per share was up 3 percent to $1.56 as compared to $1.51 in 1988.

Net income for 1988 included a gain on the sale of real property located in Tokyo, partially offset by writedowns of computer equipment and software costs resulting in a net after tax gain of $2,761,000, or 29 cents per share, for the year ended Dec. 31, 1988.

Excluding this gain, net income and net income per share for 1989 increased 31 percent and 28 percent respectively from the $11,358,000 and $1.22 in 1988.

For the fourth quarter of 1989 net income was $3,882,000, an increase of 30 percent from the $2,994,000 a year earlier. Net income per share rose 25 percent to 40 cents vs. 32 cents for the like period in 1988. Revenue climbed to a record $105,947,000, a 35 percent increase from the $78,705,000 reported for the like period in 1988.

The Harper Group Inc. subsidiaries include Circle Freight International, Harper Robinson & Co., and Baxter Gruenhut Management Ltd., air and ocean freight transportation management and custom brokerage operations.

The Harper Group Inc. is headquartered at 260 Townsend St., San Francisco, Calif., 94107; telephone 415/978-0600.

#90059b0053 02/28/1990 ~Business Wire

BEVERLY HILLS, CA. (FEB. 28) BUSINESS WIRE - Litton's Houston-based Western Atlas International high-tech oil services subsidiary has established a major operations center in Nigeria to handle an increasing volume of business in West Africa.

''The 38,000-square-foot center in Port Harcourt represents a multimillion dollar investment and a long-term commitment to provide a broad range of land and offshore field and laboratory services directly to our private and national customers in the region,'' said M. Howard Dingman Jr., president of Western Atlas and a Litton senior vice president.

West Africa, including Nigeria, is proving to be one of the world's major growth areas for oil and gas exploration and development.

Four Western Atlas divisions share the Port Harcourt facility, which has been leased for five years plus options, and is initially staffed by approximately 100 employees. They support more than 1,000 people now employed by Western Atlas in the field in Nigeria alone. Most Western Atlas employees there are Nigerian nationals.

''The combination of Western Geophysical, Atlas Wireline, Core Laboratories and Downhole Seismic Services' field operations at Port Harcourt is representative of our continuing effort to integrate multidivisional capabilities where it is appropriate,'' Dingman said. ''Our primary seismic exploration, well logging, core and fluid analysis and reservoir description services are all available from there,'' Dingman said.

''Our international business has grown significantly over the past three years, prompting an increasing investment in overseas facilities and technological capabilities,'' said Dingman.

Western Atlas has major laboratory and data processing installations in Canada, the United Kingdom and Singapore, as well as the United States. By mid-1990 the company will complete construction of an 86,000-square-foot seismic data processing center in Singapore to replace a leased facility there that is half its size.

Western Atlas, a majority owned Litton subsidiary, is the world's leading single source of integrated reservoir description services.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems to U.S. and world markets.

DUBLIN, CA. (FEB. 28) BUSINESS WIRE - Hexcel Corp. Wednesday announced it has signed a licensing agreement with Lockheed Corp. for conductive polymer technology.

The agreement provides Hexcel with an exclusive license to manufacture and sell Lockheed's conductive polymers and the right to sublicense the technology to others. The technology is protected by patents.

Conductive polymers are electrically conductive plastic resins with a wide range of potential applications, including batteries, printed circuit boards, photocopying and electromagnetic interference shielding.

The aerospace industry represents a strong potential market for these polymers for possible use as ''smart'' skins on aircraft, lightning strike protection or other special electromagnetic applications.

The technology Hexcel has licensed from Lockheed is for intrinsically conductive polymers. Conductive by virtue of their molecular structure, these polymers have advantages of strength, flexibility and light weight over conductive polymers made by mixing carbon or metal particles into a resin matrix.

''This licensing agreement provides Hexcel with the opportunity to develop the important research done on intrinsically conductive polymers into materials and products needed in the marketplace,'' said Jim Otis, senior vice president of engineered and structural products.

''The successful application of this technology for a variety of markets is a further step in the company's continued expansion into high technology advanced products.''

Hexcel Corp. is an international developer and manufacturer of honeycomb, advanced composites, reinforcement fabrics, specialty chemicals and resins used in commercial aerospace, space and defense and other general and industrial markets.

#90059b0068 02/28/1990 ~Business Wire

SAN JOSE, CA. (FEB. 28) BUSINESS WIRE - ARIX Corp. (NASDAQ:ARIX) announced that its board of directors adopted a stockholder rights plan Wednesday in which common stock purchase rights will be distributed to stockholders as a dividend at the rate of one right for each share of common stock held as of the close of business on Mar. 9, 1990.

Each right has a 10-year term and will entitle stockholders to buy one share of common stock of the company at an initial exercise price of $14.

However, if any person becomes the beneficial owner of 15 percent or more of the company's outstanding common stock without the board's approval, then each right not owned by such person generally will entitle its holder

to purchase, at the right's then-current exercise price, shares of the common stock of the company having twice the market value of such exercise price.

If the company, without the board's approval, is acquired in a merger or other business combination transaction with another person, or sells 50 percent or or more of its assets of earning power to another person, each right not owned by such other person generally will entitle its holder to purchase, at the right's then-current exercise price, shares of common stock of such other person having twice the market value of such exercise price.

The right plan is designed to protect against unsolicited and coercive attempts to acquire control of the company, and to encourage anyone who attempts to acquire the company to negotiate with the board acting on behalf of all stockholders.

The company will be entitled to redeem the rights at 1 cent per right at any time before the close of business on the 10th day following public announcement that someone has acquired 15 percent of the company's outstanding common stock, unless such 10-day period is extended by the board.

ARIX Corp. designs, manufactures and markets high-performance UNIX-based symmetric multiprocessor computer systems that can accommodate more than 500 users in certain configurations. ARIX distributes its systems almost exclusively through domestic and international reseller channels, including original equipment manufacturers, value-added resellers and system integrators.

#90059b0078 02/28/1990 ~Business Wire

RIO RANCHO, NM (FEB. 28) BUSINESS WIRE - Intel Corp. Wednesday announced it will equip Fab 9.2, the second module of its state-of-the-art submicron microprocessor factory in Rio Rancho.

This factory will manufacture Intel's i486 microprocessor and other leading-edge microcomputer components. The new plant will be operational by early 1991 and production shipments are scheduled to begin during the third quarter of 1991.

Fab 9.2 is the second module of a seven-acre plant constructed in 1987. The new module will add 25,000 square feet of ''Class 1'' clean room to Intel's chip manufacturing capabilities. Fab 9.2 will cost approximately $160 million to complete and will employ roughly 450 people when fully staffed.

Fab 9.2 joins an existing factory on the New Mexico site -- Fab 9.1, which began production in 1987 and produces Intel's 386, i486, i860 microprocessors plus a host of advanced peripherals.

Rio Rancho is also home to Intel's Fab 7 factory, which is the world's largest producer of EPROMs (erasale programmable read-only memory). Intel said that it is also making an additional capital investment of $90 million for Fab 7 and Fab 9.1, bringing total new capital commitments of $250 million to New Mexico.

Andrew S. Grove, president and chief executive officer, said: ''With the Fab 9 outer shell already complete, we can bring this new module to a state of readiness faster than starting a fab from the ground up. This will help us satisfy our customers' rapidly growing demand for our microcomputer products.''

He attributed Intel's success in New Mexico to a competitive workforce and New Mexico's receptive business environment.

The addition of Fab 9.2 will bring total employment at the Rio Rancho site to approximately 1,700 people by the end of the year.

Intel manufactures microcomputer components, modules and systems.

GEYSERVILLE, CA (FEB. 28) BUSINESS WIRE - Geyser Peak 1988 Reserve Chardonnay and 1986 Reserve Cabernet Sauvignon will be the exclusive wines for the California Chamber of Commerce's 100th anniversary dinner on Thursday.

The event, which is sold out, will be held at the Century Plaza Hotel in Los Angeles. Each guest will also be given a bottle of 1988 Geyser Peak Sauvignon Blanc as a commemorative gift. All wine bottles will carry a special 100th anniversary seal.

President George Bush will be the special guest at the gala dinner. Other honored guests at the black tie affair include Gov. George Deukmejian, U.S. Sen. Pete Wilson, California Attorney General John Van de Kamp, State Treasurer Thomas W. Hayes, Assembly Speaker Willie L. Brown Jr., and Senate Republican Leader Ken Maddy. In addition, the dinner agenda will feature entertainment by singer Dionne Warwick.

Geyser Peak Winery is located in Sonoma County's famed Alexander Valley about 85 miles north of San Francisco. The winery dates back to 1880 and currently produces approximately 500,000 cases annually. The winery is owned by the Trione family of Santa Rosa, Calif., and Penfolds Wines of Australia.

#90059b0088 02/28/1990 ~Business Wire

DENVER (FEB. 28) BUSINESS WIRE - Forest Oil Corp. reported a fourth quarter 1989 net loss of $4.8 million, after preferred stock dividend requirements, compared to a net loss of $4.5 million for the comparable period of 1988.

Net loss for 1989 was $15 million, after preferred stock dividend requirements compared to a net loss of $10.8 million in 1988.

The net loss attributable to common stock for the fourth quarter 1989 was 45 cents per share (fully diluted) compared to a net loss per share of 51 cents (fully diluted) for the fourth quarter of 1988.

For 1989 the net loss was $1.54 per share (fully diluted) compared to a net loss of $1.24 per share (fully diluted) a year ago.

Total revenue for the fourth quarter 1989 was $21.2 million, a decrease of 42 percent from the like period in 1988. During the fourth quarter of 1988, revenue was favorably impacted by the receipt of $8.1 million of revenue primarily from the settlement of a take or pay dispute.

Total revenue for 1989 increased 15 percent from 1988 to $131.6 million. Oil and gas sales were approximately 15 percent greater in 1989 primarily as a result of a settlement of a gas purchase contract dispute despite decreased production.

Net cash provided by operating activities for 1989 totaled $82.4 million, a 51 percent increase from the like period in 1988.

Total expenses for the fourth quarter of 1989 before federal income tax expenses decreased 37 percent from total expenses reported for the fourth

quarter of 1988 due primarily to a non-recurring, non-cash charge in 1988 related to a write-down of Canadian oil and gas properties and a decrease of non-cash charges for depreciation and depletion.

Total expenses for 1989 before federal income taxes increased 17 percent from total expenses reported for 1988 primarily because of increased non-cash charges for depreciation and depletion, increased interest expense due to an increased effective interest rate and additional average indebtedness, an increase in oil and gas production expense and a $12 million non-cash write-down of U.S. oil and gas properties related to the favorable settlement of a gas purchase contract dispute.

Forest Oil Corp. is engaged in the exploration for and acquisition, development and production of oil and natural gas. The company's principal reserves and producing properties are located offshore Louisiana and in Texas, Wyoming, Oklahoma and Canada. The company is traded on the NASDAQ/NMS system, under the FOIL symbol.

BURLINGAME, CA (FEB. 28) BUSINESS WIRE - SamTrans will run additional bus service and CalTrain will add extra cars in the event of a Greyhound strike on Friday.

Greyhound operates seven routes under contract to SamTrans between Palo Alto and San Francisco carrying 17,000 daily riders. Caltrans officials said commuter daily rail capacity could accommodate peak-hour demand if a strike occurs, and feeder buses to rail stations will run as usual.

The seven routes affected are 3X (Daly City BART to San Francisco Airport); 5M (San Mateo to San Francisco); 7B (Redwood City to San Francisco); 7F (Palo Alto to San Francisco); 16F and 17F (Palo Alto to San Francisco); and 41F (Redwood City to San Francisco).

SamTrans will add extra service on Routes 5L (between San Mateo and Daly City BART), 18F (San Carlos to San Francisco), 19F (San Mateo to San Francisco) and 22D (South San Francisco to San Francisco).

For additional route and CalTrain information, patrons should call the SamTrans Telephone Information Center at 415/761-7000 (San Francisco); 415/871-2200 (North County); 415/348-8858 (Central County); or 415/367-1500 (South County). Information for the hearing impaired is available by calling TTY (415/343-3222).

The phone center is open weekdays from 6 a.m. until 10 p.m. and on weekends from 8 a.m. until 5 p.m.

WOODINVILLE, WA. (FEB. 28) BUSINESS WIRE - Cyanotech Corp. Wednesday announced the completion of the first stage of a two-phase overall financial restructuring, the principal effects of which are a significant reduction of the company's long-term indebtedness and an expansion of its equity base by means of new capital investment.

In an agreement reached with holders of debentures and long term notes, $1.73 million of Cyanotech debt obligations are to be converted to preferred stock. The result of the transaction will be that the only long-term debt obligation of the company will be to agencies of the government of Hawaii.

The second phase of restructuring, which is expected to be completed by the end of the first quarter of 1990, involves the injection of new equity funding. The bulk of this capital will be used for working capital purposes in support of the company's aggressive growth plan.

Cyanotech will seek to be relisted on NASDAQ subsequent to the completion of the restructuring.

In related developments, Cyanotech has discontinued the previously announced financing effort undertaken on its behalf by Loeb Partners of New York.

Cyanotech Corp., formed in 1983, identifies and grows microalgae as sources for high-value products. The company currently manufactures nutritional products and a series of fluorescent pigments for use in immunological diagnostics. The company is headquartered in Woodinville, with production facilities located in Kona, Hawaii.

#90059b0106 02/28/1990 ~Business Wire

IRVINE, CA. (FEB. 28) BUSINESS WIRE - StarTel Corp. (NASDAQ:STAS) Wednesday announced results from operations for the fourth quarter ended Dec. 31, 1989 with revenues of $2,003,000, down 22 percent from $2,577,000

in the like period of 1988.

Net income for the fourth quarter was $106,000 compared with a loss of $377,000 in the like period of 1988. Related earnings per share for the fourth quarter were 2 cents per share compared with a loss of 8 cents per share in the like period of 1988.

Results for the year ended Dec. 31, 1989 include revenues of $7,599,000, down 33 percent from $11,367,000 in the like period for 1988. Net loss for the year ended Dec. 31, 1989 was $742,000 compared with a loss of $426,000 in the like period of 1988. Related loss per share for the year ended Dec. 31, 1989 was 15 cents per share compared with a loss of 9 cents per share in the like period of 1988.

Don Berry, chairman of the board of StarTel, indicated the revenue decline was the result of continuing softness in the telecommunications equipment market. In response, the company instituted certain organizational and personnel changes during the fiscal year ended 1989 which enabled it to regain profitability in the third and fourth quarters.

The board of directors was pleased with StarTel's return to profitability and recognizes the need to increase the company's size and value. The company has been actively exploring several courses of action including both mergers and acquisitions.

Berry stated the company plans to repurchase its shares of common stock in the open market from time to time because the board of directors believe the current market price does not adequately reflect the value of the company.

StarTel, located in Irvine, manufactures and markets telecommunications systems with integrated voice, data, database and networking capabilities. StarTel has installed to date approximately 950 systems worldwide in corporations, executive suites, hospitals, telemarketing centers and telephone answering bureaus.

#90059b0114 02/28/1990 ~Business Wire

INDIANAPOLIS (FEB. 28) BUSINESS WIRE - Basic American Medical Inc. Wednesday announced record operating results for the fourth quarter and year ended Dec. 31, 1989.

For the fourth quarter, operating revenues increased 17.3 percent to $84.8 million from $72.3 million in 1988. The company had net income of $1.8

million in the fourth quarter of 1989 compared with net income of $.3 million in the like quarter in 1988. Net income per share for the quarter was 23 cents in 1989 compared with net income per share of 15 cents in 1988.

For the year, operating revenues increased 12.4 percent to $319.4 million from $284.1 million in 1988. Net income was $6.0 million in 1989 compared to a net income of $1.2 million in 1988. Net income per share was 77 cents in 1989 compared with net income per share of 15 cents in 1988.

Fourth quarter operating revenues increased primarily as a result of increased revenues at the company's large hospitals.

Fourth quarter earnings increased in 1989 as compared to the like quarter of 1988 primarily due to increased earnings at the company's large hospitals. This increase resulted primarily from higher admissions at the large hospitals. This increase was partially offset by a net provision of $1.5 million for uncollectible notes receivable from related entities. These notes are guaranteed by the principal shareholders of the company.

In addition to the results of the fourth quarter, the increase in earnings for the year primarily resulted from increased earnings at the company's large hospitals, lower provisions for estimated losses on disposal of certain operations including future operating losses and the utilization of the income tax benefit of the company's remaining net operating loss carry forward of $1.4 million.

LOS ANGELES (FEB. 28) BUSINESS WIRE - Jack R. Borsting, dean of the University of Southern California School of Business Administration, has been elected to the board of directors of Coast Savings Financial Inc. (NYSE/PSE: CSA) and its principal subsidiary, Coast Savings and Loan Association.

Borsting, who was U.S. assistant secretary of defense (comptroller) from 1980 to 1983, served as dean of the University of Miami School of Business Administration for five years before he assumed his USC post in July 1988.

Borsting directs academic activities of 165 full-time faculty members at the area's leading business school, which enrolls 2,600 undergraduate business majors and 1,300 graduate students. He holds the Robert R. Dockson professorship, an endowed chair in honor of the school's former dean, who later became chairman of CalFed Inc., another major California thrift.

Borsting is past president of the Operations Research Society of America and the Military Operations Research Society, as well as a Fellow of the American Association for the Advancement of Science.

Borsting also served as a director on the boards of The Aerospace Corporation and McDonnel Douglas Finance Corp., a wholly-owned subsidiary of the aircraft manufacturer.

Coast Savings, with assets of $11.2 billion and 125 offices statewide, is the nation's tenth largest savings institution.

SAN JOSE, CA (FEB. 28) BUSINESS WIRE - Madge Networks Inc. has requested the Federal District Court in San Francisco to declare U.S. Patent Re. 31,852 invalid.

Olof Soderblom's company claims that this patent covers IEEE token ring technology and recently filed suit against Madge.

According to Madge Networks Inc., Soderblom's patent does not apply to Madge's token ring technology. That, the company asserts, is clear from the U.S. Patent Office's refusal to grant Soderblom a patent covering closed-transmission loop token-passing technology -- the basis of token ring local area networks.

Robert Madge, president of Madge Networks Inc., said the company was requesting a declaration from the court because ''it is high time that this issue is settled on its merits in a court of law to avoid the commercial and public inconveniences which are caused by unproven allegations.

''While legitimate patent claims should be honored, the computer industry is being plagued by ill-founded claims to basic technologies. Too often, companies pursuing such claims are rewarded with undeserved royalties at a direct cost to customers and the industry. It is the customers who ultimately pay any royalties. And the industry is paying a terrible price because its progress is being slowed.

Robert Madge is well-known in the local area network industry as a proponenet of network standards and, through his Founder-Chairmanship of the Open Token Foundation, he has supported the adoption of multi-vendor token ring networking and open access to token ring technology.

Madge Networks Inc. is a leading supplier of IBM-compatible token ring network hardware and software in the United States, Europe and Japan. The company's products include a full line of token ring adapters for ISA, EISA and Micro Channel buses, a Repeater, 8-Station Ringhub, Local Ringhub and token ring management software.

As a developer of the first independent NETBIOS protocol stack, Madge has played a key role in the development of token ring software for leading computer companies. Madge Networks Inc. has headquarters in San Jose.

#90059b0134 02/28/1990 ~Business Wire

PHOENIX (FEB. 28) BUSINESS WIRE - Nine thousand employees of Greyhound Lines Inc., the nation's largest inter-city bus system, are facing an uncertain future because discussions with the company to bring management back to the bargaining table for good-faith contract negotiations have been ''moving at a slow pace,'' stated Edward M. Strait, president of the Amalgamated Council of Greyhound Local Unions.

The Council is the exclusive bargaining agent for 9,000 Greyhound employees.

Representatives of the union have been in discussions with Greyhound management since Feb. 25, to explore options for returing to the bargaining table to resume negotiations on a new contract. The current contract expires at 12:01 a.m. Friday, March 2.

Commenting on the discussions, Strait stated, ''There has been progress in some areas, but very little progress in others.'' He added, ''It will be very difficult to achieve our objective -- a fair and equitable contract for Greyhound employees -- by the March 2 deadline.''

In 1983, Greyhound drivers were paid 40 cents a mile for their work. Today they receive 30 cents per mile plus an incentive payment that averages 2.5 cents per mile. Employees that have joined Greyhound since 1983 have had no pension plan because the company has refused to contribute to one.

Strait stated, ''Ridership is up and profits are up, but Greyhound continues to refuse to negotiate a fair and equitable contract for its employees. Their idea of a fair contract is millions for management and pennies for the people who drive and maintain the buses and who ensure the efficient operation of the Greyhound system.''

The company's first and only contract proposal was rejected by the union's membership on Feb. 9 by a 91.9 percent margin. The members also authorized a strike. The company subsequently rejected the union's offer to bargain with the assistance of a federal mediator.

Strait concluded, ''We have 36 hours to bring about a fair settlement. The union's committed to good-faith negotiations that will produce a contract by 12:01 a.m. on Friday, March 2.''

#90059b0143 02/28/1990 ~Business Wire

SOLANA BEACH, CA (FEB. 28) BUSINESS WIRE - This month, Kaypro Corp. (NASDAQ:KPRO) introduced the latest addition to its KC-2 line of 16-bit microcomputers -- the KC-2/SX.

This desktop computer is based on the 80386/SX microprocessor, combining 32-bit performance with 16-bit economy.

Roy Salisbury, president and chief executive officer of Kaypro, said: ''The general design of the 80386/SX has been accepted by individual users and corporate America alike. Both groups require maximum computing power for their dollar and have come to rely on Kaypro's reputation for rugged reliability. The KC-2/SX will become a mainstay of Kaypro's product line.''

The KC-2/SX utilizes the 80386/SX microprocessor and can be ordered with either 16MHz or 20MHz clock rates. The unit features 1MB of RAM (Random Access Memory), which can be expanded to 8MB on the system's motherboard.

The basic configuration includes a 1.2MB, 5.25-inch disk drive, floppy drive controller and IDE hard disk controller with 1:1 interleave. Two RS-232C serial ports and one Centronics-compatible parallel port round out the system's input/output capabilities. Other KC-2/SX features include a 101-key, AT-style keyboard, a 200-watt power supply and a four-bay chassis.

The 16MHz machine retails for $1,245, the 20MHz version $1,305.

A unique aspect of the KC-2/SX is its use of surface-mount technology. The components that make up the floppy drive controller, hard disk controller, serial/parallel I/O and RAM are resident on the system's motherboard.

This design leaves all eight expansion slots available for user options.

KC-2/SX options available from Kaypro include RAM expansion (up to 8MB), video monitors (monochrome, CGA, EGA, VGA) and hard disk drives (up to 70MB).

Kaypro Corp. has more than 38 years of experience in the high-tech/electronics industry and is an internationally recognized brand name. Currently, Kaypro enjoys a user base of more than a half-million computer systems worldwide and markets a full line of microcomputers for businesses and individuals.

MOUNTAIN VIEW, CA. (FEB. 28) BUSINESS WIRE - Consilium Inc. (NASDAQ:CSIM) a leading supplier of integrated factory floor management software, reported final results for its fiscal 1990 first quarter ended Jan. 31, 1990.

The company achieved revenues of $6.8 million, 41 percent over the $4.8 million of the previous fiscal year. This marks the company's ninth consecutive quarter of increased revenues. Net income was $1.2 million (17 cents per share), up 129 percent from $520,000 (10 cents per share) for the like quarter last year, exceeding Wall Street's published earnings estimates of 13-14 cents per share.

Contributing to first-quarter revenues was the closing of significant sales in the United States and abroad. Consilium sold its Workstream software to The Boeing Co.; Goldstar Electron Company Ltd., a South Korean semiconductor company; RTC Compelec, a French subsidiary of Philips N.V. which manufactures print circuit boards; and Wacker Chemie GmbH, a German wafer manufacturer.

In addition, Consilium's Italian distributor, Sidec S.p.A., closed a major sale with Novaceta, an Italian textiles manufacturer. Textiles is a newly targeted industry for the company within the specialty chemicals market, according to Thomas Tomasetti, Consilium's president and chief executive officer.

Other major milestones for Consilium during the first quarter included:

-- The formalization of a distribution agreement with Digital Equipment Corp. that enables Digital to sell and support WorkStream as part of its Systems Integration services. Digital's system integration business for 1990 is estimated at $1 billion.

-- Initial shipment of a major new release of its Workstream software.

''Once again, Consilium has posted strong financial results,'' said Tomasetti. ''We are expanding our business development activities with large European and Asian companies while we move into new industries, such as textiles.''

Consilium Inc. is a leading supplier of integrated factory floor management software and services. The company's WorkStream line of integrated software modules directs the execution of the manufacturing plan on the factory floor, enabling lot-based manufacturers to reduce costs, improve quality and achieve just-in-time delivery.

Operating on the Digital Equipment Corp. line of VAX computers, WorkStream software is used by manufacturers in the electronics systems, semiconductor, aerospace and defense, commercial aircraft and specialty chemicals industries. The company has headquarters in Mountain View.

HOUSTON (FEB. 28) BUSINESS WIRE - Santa Fe Energy Partners L.P. announced a significant natural gas find in an Atoka interval not previously tested in the prospect area in Eddy County, N.M.

The Pure Gold C-17 Federal No. 2 has been production tested from perforations between 13,348 - 13,374 feet at rates exceeding ten million cubic feet of gas per day through a 13/64 inch choke with 6400 pounds of flowing tubing pressure.

At least two additional Atoka intervals are also gas-bearing, including a shallower zone which flowed at rates exceeding four million cubic feet per day on a drill stem test.

Santa Fe Energy Partners L.P. is the operator of the Pure Gold and has a 50 percent working interest. Other interest holders in the well include Mitchell Energy & Development Corp. of The Woodlands, Texas with 37.5 percent and Siete Oil and Gas Corp. of Roswell, N.M. with 12.5 percent. Santa Fe, Mitchell and Siete jointly hold acreage in the prospect totaling 3,500 gross acres.

The Pure Gold C-17 Federal No. 2 is a part of Santa Fe Energy Partners' active drilling program in Southeastern New Mexico. The partnership has participated in more than 45 wells in the area since the beginning of 1989 with a success rate exceeding 80 percent.

Santa Fe Energy Partners L.P. is an affiliate of Santa Fe Energy Resources Inc., the Houston-based oil and gas operating company of Santa Fe Pacific Corp. The partnership units are traded on the New York Stock Exchange using the symbol SFP.

SAN FRANCISCO (FEB. 28) BUSINESS WIRE - Two men who robbed Wells Fargo Bank's Plymouth office on Feb. 22, were caught in Las Vegas Tuesday.

They are being held on a federal warrant for bank robbery in the Clark County Detention Center in Las Vegas.

''We are obviously very pleased by this development,'' said Tom Warren, senior vice president and manager of the bank's Capital district. ''Wells Fargo takes threats to its customers and employees very seriously, and since last week, we've worked closely with the FBI and law enforcement officials to locate these men. Our team effort has paid off in their capture and we couldn't be happier.''

According to Warren, the bank's security procedures during the robbery worked without a hitch. ''Our people in the branch did exactly what they

were supposed to do, and our security camera captured the robbery in progress on an entire roll of film. We have more than 900 images of the robbers that will not only confirm identification, but should help to convict them,'' he said.

Most of the money that had been taken from the bank was recovered, although the bank will not disclose the amount for security reasons.

EVERETT, WA. (FEB. 28) BUSINESS WIRE - At the Feb. 28, 1990, annual meeting of John Fluke Mfg. Co. Inc. (ASE:FKM), stockholders present and voting by proxy elected the following directors for three-year terms ending in 1993: James B. Scroggs, James E. Warjone and George M. Winn.

The holders of Series A preferred stock have elected Steven C. Tumminello to serve a one-year term expiring at the 1991 annual meeting.

The company's stockholders also voted to adopt the 1989 Stock Option Plan for outside directors recommended by the board. This plan is intended to advance the interests of the company by providing outside directors with the opportunity to acquire a proprietary interest in the company and an additional incentive to promote its success.

The board of directors, in a regular meeting held just prior to the stockholders' meeting, declared the company's sixth quarterly dividend, set at 8 cents per share, to stockholders of record on March 30, 1990, to be paid on April 20, 1990.

In addition, the board elected the following officers of the company: John M. Fluke Jr., chairman of the board; George M. Winn, president, chief executive officer; Richard W. Van Saun, senior vice president, group manager, Service Equipment Group; Ronald R. Wambolt, senior vice president director of worldwide sales; Jerome A. Froland, vice president, group manager, Business Development Group; Valentine C. Gersbach, vice president group manager, Calibration and Communications Group; William R. Hoffman, vice president, group manager, Philips T&M Group; Dougas G. McKnight, vice president, general counsel, corporate secretary; John R. Smith, vice president, treasurer; George O. Trickell, vice president, personnel and facilities.

John Fluke Mfg. Co. Inc. is a leading supplier of electronic instrumentation and services that improve the productivity of technical users engaged in research, service, design, manufacturing and calibration.

Fluke focuses on customers who are manufacturers and users of electronic and electrical equipment in defense and aerospace, government agencies, computers and peripherals, electronic instrumentation, communications, utilities, automotive and consumer electronics. Founded in 1948 and headquartered in Everett, Fluke employs more than 2,300 people and had sales of $247.7 million in its most recent fiscal year, ended Sept. 29, 1989.

SALT LAKE CITY (FEB. 28) BUSINESS WIRE - Questar Corp. (NYSE:STR) affiliate Celsius Energy Co. Wednesday announced successful results from two exploratory wells in Colorado and Wyoming.

Celsius completed the McLish Federal Unit No. 8-1 wildcat well with an initial potential of 1.8 million cubic feet of gas per day and a flowing tubing pressure of 900 psi. It is located approximately 20 miles northeast of Grand Junction, Colo., in the southwest-northeast quadrant of Section 8, Township 8 South, Range 98 West in Garfield County. The well was drilled to a depth of 8,415 feet and perforated from 8,104-8,250 feet in the Dakota Formation.

The McLish well is 2-1/2 miles from the nearest producing well, the Hancock Gulch No. 4-14, also operated by Celsius. The Hancock Gulch well was completed in 1983 for an initial daily potential of 2.9 million cubic feet. Celsius has a 100 percent working interest in the Hancock and McLish wells and has more than 17,000 net acres in the area.

Celsius also announced that a wildcat well, the Mulligan Draw Unit No. 1, flowed at an average rate of 2.2 million cubic feet of gas per day during a 48-hour test. Operated by Celsius, the well is located approximately 57 miles southwest of Rawlins, Wyo., in the northwest quadrant of Section 24, Township 15 North, Range 95 West in Garfield County. It was drilled to a depth of 13,118 feet and perforated from 12,853-12,877 feet in the Almond Formation. The interval was stimulated with 500 gallons of fluid.

Celsius and Union Pacific Resources Co., a wholly owned subsidiary of Union Pacific Corp., each have a 50 percent working interest in the well and in approximately 20,134 gross acres within the unit.

DALLAS (FEB. 28) BUSINESS WIRE - Nautilus Sports/Medical Industries Inc. (NSMI), a leading pioneer and innovator in the exercise and fitness equipment industry, filed Feb. 27, 1990, for protection under Chapter 11 with the United States Bankruptcy Court for the Western District of Virgnia.

The filing was accompanied by new financing with the existing lenders, which will continue funding NSMI during the reorganization period. A Debtor's First Plan of Reorganization was also proposed by NSMI at the time of filing.

John Urmston, Nautilus' chief operating officer, said: ''Enormous strides have been made in reorganizing NSMI through elimination of unnecessary assets and adjustments in workforce. NSMI has recently introduced 'The Next Generation,' the finest new line of exercise equipment in the history of our company.

''As a result of the Chapter 11 filing, Nautilus should now be on the road to an orderly reorganization in order to continue in our position as a leader in our industry. It is unlikely that our customers will notice any changes in our operation and services to meet their needs,'' said Urmston.

ALBUQUERQUE, NM (FEB. 28) BUSINESS WIRE - United New Mexico Financial Corp. and First Interstate Bancorp Wednesday announced an agreement whereby United New Mexico will acquire three First Interstate affiliate banks in New Mexico.

Making the announcement were Larry D. Willard, president of United New Mexico Financial Corp., and James A. Clark, chairman, president and chief executive officer of First Interstate Bank of Albuquerque.

Under terms of the agreement United New Mexico will purchase First Interstate Bank of Albuquerque, First Interstate Bank of Lea County and First Interstate Bank of Roswell for a total cash consideration of approximately $52 million.

First Interstate's affiliate bank in Santa Fe and a franchised bank in Farmington with the same name are not affected by the sale.

The transaction will be subject to completion of a definitive agreement and the approval of several state and federal regulatory agencies and

could be pending for several months. When completed, the purchase will boost United New Mexico's assets to nearly $1.8 billion from its present $1 billion at year-end 1989.

First Interstate provides the largest geographical coverage of any retail and business banking system in the United States. Including licensees, First Interstate Banks operate nearly 1,200 full-service offices in 21 states. These offices serve 5 million households in more than 650 communities, including seven of the 10 fastest growing metropolitan markets in the U.S. Other offices serve U.S. and international customers in 19 countries.

United New Mexico Financial Corp. is a 13-bank holding company operating 56 branches of United New Mexico Banks in 30 communities and is also the parent company of United New Mexico Trust Co., with offices in Albuquerque Hobbs, and Roswell.

United New Mexico Banks are located in Albuquerque, Santa Fe, Hobbs, Las Cruces, Portales, Socorro, Dexter, Hagerman, Deming, Carlsbad, Roswell, Eunice, Cuba, Gallup, Thoreau, Zuni, Magdalena, Estancia, Moriarity, Lovington, Artesia, Alamogordo, Holloman AFB, Tularosa, Rio Rancho, Vaughn Bernalillo, Carrizozo, Ruidoso and Corrales. The Financial Corporation is headquartered in Albuquerque.

#90059b0205 02/28/1990 ~Business Wire

DALLAS (FEB. 28) BUSINESS WIRE - El Chico Corp. Wednesday announced financial results for the quarter ended Feb. 5, 1990.

Net income for the quarter increased 9.4 percent to $151,000, or 3 cents

per share, up from $138,000 for the like 12-week period a year ago. Pretax income decreased from $300,000 to $222,000 due to a non-cash increase in the restaurant closing expenses of $201,000. Net income increased due to a change in effective tax rates from 54 percent to 32 percent.

Sales and operating margins improved, and general and administrative expenses and interest expense declined.

Systemwide sales, including sales from franchised restaurants, were $26,377,000, up 4.2 percent from $25,303,000 recorded in the prior year. Net sales from company operations were $19,336,000, an increase of 5.6 percent from the $18,309,000 recorded a year ago. Comparable stores sales increased 1.8 percent for company-owned stores and 10 percent for franchised stores.

Franchise-related income, included in net sales, increased 5.7 percent to $351,000.

The 49-year-old, Dallas-based company owns and franchises full-service, ''Tex-Mex''-style Mexican restaurants in 12 states throughout the Southern and Southwestern regions of the United States. As of Feb. 5, 1990, the company had 61 company-owned restaurants and supported a network of 29 franchised restaurants.

KANSAS CITY, MO (FEB. 28) BUSINESS WIRE - UtiliCorp United (NYSE:UCU) announced Wednesday that George B. Kitchens has been named president of its West Virginia Power division.

He succeeds James E. Harden, who is retiring.

Kitchens, 36, previously was vice president, administration for West Virginia Power. Prior to that, he was general manager of Cabot Corp.'s gas utility division in West Virginia. He had been employed at Cabot's Charleston, W.Va., office since 1982 in various management and accounting positions. UtiliCorp completed the acquisition of Cabot Corp.'s gas utility division in January 1990.

Harden has served as president of the West Virginia Power division since it was acquired by UtiliCorp from Dominion Resources in March 1987. For three years prior to that he was district manager of West Virginia operations for Dominion Resources' Virginia Electric Power Co. division. He had 40 years service with that company, holding various positions in

management, engineering and right of way.

Kitchens held accounting positions with various companies in the oil and gas industry prior to his employment with Cabot Corp. He holds a bachelor of science degree in accounting from Mississippi State University.

Based in Fairlea, W.Va., West Virginia Power serves about 23,300 electric customers in 38 communities and 23,000 gas customers in 118 communities. The division's service territory is located primarily in southeastern and central West Virginia.

UtiliCorp, based in Kansas City, provides electric and gas service in eight states through its divisions, Missouri Public Service, Peoples Natural Gas, Michigan Gas Utilities, Northern Minnesota Utilities, Kansas Public Service and West Virginia Power.

West Kootenay Power in British Columbia is a Canadian subsidiary. UtilCo Group and PSI are non-regulated subsidiaries specializing in energy and utility related enterprises.

VANCOUVER, WA (FEB. 28) BUSINESS WIRE - Alascom Inc., a wholly owned subsidiary of Pacific Telecom Inc. (NASDAQ: PTCM), announced Wednesday that it has entered into a settlement agreement with the Municipality of Anchorage d/b/a Anchorage Telephone Utility (ATU) under which ATU will pay Alascom $25,647,845.

The settlement resolves all disputes over intrastate and interstate toll revenue settlements for years prior to 1986 and also resolves all issues regarding intrastate toll revenue settlements between Alascom and ATU for the years 1986, 1987 and 1988. The cash received from this settlement satisfies the receivable recorded by the company in prior years.

Charles Robinson, chairman, president and chief executive officer of Pacific Telecom, stated: ''We are pleased to have resolved these long standing matters. Resolution of these disputes will allow both companies to work more productively together in providing quality telecommunications service to the public.''

Pacific Telecom is a PacifiCorp company.

DALLAS (FEB. 28) BUSINESS WIRE - Interphase Corp. (NASDAQ/NMS:INPH) Wednesday announced revenues of $5,259,496 for the first quarter of fiscal 1990.

Revenues were up 21 percent compared with $4,333,940 for the first quarter of fiscal 1989.

The company reported a loss of $920,236, or 28 cents per share, compared with net income of $28,699, or 1 cent per share, for the like period a year ago. The loss was primarily due to expenses of approximately $827,000 relating to its majority-owned start-up company, OMNI Solutions, and lower than expected revenues for the first fiscal quarter.

Michael E. Cope, president, said: ''We anticipated a small loss due to OMNI expenses, but ending about $1 million below planned revenues for the quarter came as a surprise. That was mostly caused by some customers pushing orders into the second quarter, particularly a couple of large

ones. On the bright side, the second quarter looks strong, with the largest backlog ever at this point in the quarter.''

Interphase Corp. is a leading manufacturer of high-performance disk, tape and networking controllers and subsystems for the open systems VMEbus, multibus and EISA markets, and the Sun Microsystems aftermarket. The company is located at 13800 Senlac, Dallas, 75234.

SAN FRANCISCO (MARCH 1) UPI - Beginning at 11 a.m., officials of the San Francisco Bay Area Rapid Transit District (BART) and the San Mateo County Transit District (SamTrans) will sign the comprehensive agreement that will signal the start of the project to extend BART from the present Daly City BART station to the San Francisco International Airport.

The signing ceremony will take place at what will eventually be the site of the new Colma BART Station, which will be located on the old San Bruno Spur of the Southern Pacific Railroad right-of-way at ''A'' Street in Colma.

On hand to participate in this historic occasion will be Nello Bianco, president of the BART board of directors, and Bill Schumaker, president of the SamTrans board of directors.

It is anticipated that there will be many other officials who have contributed over the years to reaching this memorable occasion.

To reach the site of the ceremony take Highway 280 to the Eastmoor exit. Veer right and then turn left on to San Pedro. Go east on San Pedro to Mission. Make a right on Mission to ''A'' Street. Make another right on ''A'' Street headling west. Continue one block and look for the sign marking the site.

Notify BART's public information office at 415/464-7120 if you plan to attend this historic signing ceremony.

#90059b0279 02/28/1990 ~Business Wire

SEATTLE (MARCH 1) BUSINESS WIRE - Nordstrom announced Wednesday that a class action lawsuit was started against the company in King County Superior Court in Seattle.

The lawsuit was brought by United Food and Commercial Workers Union Locals 1001 and 367 and five individually named plaintiffs.

The lawsuit is said to be on behalf of current and former employees of the company for alleged wage claims in the various states where Nordstrom does business. The unions represent only 1500 Washington employees of the 30,000 nationwide.

''We are disappointed to see that a lawsuit has been started,'' said John Nordstrom. ''We deeply care about our employees. We do not feel it is in their best interest because once it is filed, local court rules place restrictions on our ability to communicate directly with our employees about their claims. This could slow down and perhaps bring to a halt the resolution process. We will continue to do what we can to compensate our employees for any back pay claims, including seeking court approval to do

so,'' he explained.

The likelihood of the union action had been previously announced by the company in view of the union's repeated threats to sue. ''We believe the lawsuit resulted from the union's concern that the record keeping and claims procedures we implemented would eliminate the need for union action '' said Nordstrom.

''Our policy is to pay employees for all work performed. If mistakes have been made, we are in the process of correcting them,'' said Nordstrom.

Nordstrom also confirmed Wednesday the filing of a class action lawsuit against the company in U.S. District Court at Seattle on behalf of certain shareholders. The complaint alleges that the company failed to disclose that employment practices could generate employee claims for unpaid work and overtime. The suit names as defendants company co-chairmen Bruce, James and John Nordstrom; company president, John McMillan and senior vice-president John Goesling.

''We are not surprised at the filing of this lawsuit and indicated earlier that we thought it was imminent. Some of the lawyers who initiated the lawsuit are those who recently filed shareholder lawsuits against both Microsoft and Egghead,'' said John Nordstrom.

''As a company, we have always kept our shareholders informed. We believe we did that in this case,'' Nordstrom said.

FRESNO, CA (MARCH 1) BUSINESS WIRE - Investment in its new hub at Washington-Dulles, rapidly escalating fuel prices, poor weather, and the Bay Area earthquake all contributed to the first quarterly loss posted by WestAir Holding Inc. (ASE:WAH) in over three years, the company announced Wednesday.

For its fourth quarter ended Dec. 31, 1989, WestAir reported an operating loss of $603,000 and a quarterly net loss of $847,000, or 12 cents a share. The company reported an operating profit of $1,621,000 for the fourth quarter 1988 and net earnings of $769,000, or 11 cents a share.

WestAir's fourth quarter operating revenues increased 34 percent to $51.1 million, while operating expenses increased 42 percent to $51.8 million.

WestAir said it experienced a 33 percent increase in per gallon fuel

prices during the quarter compared to the like period in 1988. The company said that there was a temporary fall-off in passenger traffic at its San Francisco hub following the Oct. 17 Bay Area earthquake, and that it experienced a significant number of weather-related flight cancellations during the quarter.

WestAir also charged costs associated with the establishment of its Washington-Dulles hub against the 1989 fourth quarter results.

For calendar 1989, WestAir reported that its operating profit was $5.7 million, 36 percent off from $9.0 million for 1988. The company posted a net profit for 1989 of $2.4 million, or 34 cents a share, compared to 1988 profits of $4.8 million, or 81 cents a share.

In a separate development, WestAir also announced that it has filed suit against a New York bank seeking a ruling that WestAir previously paid in full $1.3 million which the bank claims is still owed. WestAir said it paid the bank's collection agent, which apparently failed to remit all the funds to the bank.

WestAir Holding Inc. which operates through two wholly owned subsidiaries and one operating division -- WestAir/United Express, NPA/United Express, and Atlantic Coast Airlines/United Express -- is the largest regional airline company in the United States.

The company operates over 780 daily flights and serves 50 cities in the West and along the East Coast utilizing both jet and turbo-prop aircraft. The company's major hubs are Los Angeles, San Francisco, Fresno, Sacramento, Portland, Seattle and Washington D.C.

WestAir Holding Inc. is headquartered in Fresno.

#90059b0621 02/28/1990 ~Business Wire
RIVERSIDE, CA (FEB. 28) BUSINESS WIRE - Fleetwood Enterprises Inc. (NYSE/PSE:FLE) Wednesday announced sales and earnings for the third fiscal quarter and the first nine months ended Jan. 28, 1990.

Revenues for the period reached $347,396,000, a record for a winter quarter, compared with the $346,811,000 reported for the similar period last year. ''We are pleased with the company's sales performance during the quarter considering the sluggish economic environment we have been operating in,'' said Fleetwood President Glenn Kummer.

Net income for the quarter, however, was down 28 percent to $9,113,000, or 40 cents per share, compared with last year's record third-quarter earnings of $12,624,000, or 54 cents per share. The company indicated that the earnings decline resulted primarily from lower manufacturing profit margins because of competitive market conditions and a shift in

product mix to lower-priced models. Also, net income for the quarter includes a non-recurring loss of 3 cents per share related to the sale of two idle plants.

Sales for the first three quarters of fiscal 1990, which contained 39 weeks, were $1.12 billion, a 6 percent decline from the record $1.19 billion achieved in the corresponding 40-week period of fiscal 1989. Net income during the period was $37,910,000, or $1.66 per share, off 28 percent from the record $52,771,000, or $2.29 per share, attained in the prior year.

Fleetwood is the nation's leading producer of motor homes, travel trailers folding trailers and manufactured housing. The company operates 20 recreational vehicle and 26 housing plants in 17 states and Canada.

LYNNWOOD, WA (FEB. 28) BUSINESS WIRE - Ralph V. Schapler, chairman and chief executive officer of Pioneer Federal Savings Bank, Lynnwood, Wednesday reported that on Feb. 21, 1990, the board of directors adopted a Plan of Conversion to convert from a federally chartered stock savings bank to a Washington chartered stock savings bank.

The board of directors adopted the Plan of Conversion because of its belief that operation as a Washington chartered savings bank would offer the Savings Bank greater opportunities for expansion and growth. Over the past several years, the Washington legislature has passed various statutes

that have provided Washington savings banks with expanded lending and investment powers, which exceed those of federal savings institutions. The Savings Bank believes that, following the conversion, it could prudently take advantage of the various other powers which are now available to Washington savings banks and could operate more effectively as a result.

Under the Plan of Conversion, Pioneer Federal would be renamed Pioneer Savings Bank. Pioneer must obtain the approval of the Washington State Supervisor of Banking and has also filed an application with the Office of Thrift Supervision. The Plan of Conversion must be approved by the stockholders of Pioneer Federal.

Pioneer Federal converted to stock ownership on July 13, 1989, and trades on the NASDAQ National Market System under the symbol ''PFBK.'' At Dec. 31 1989, Pioneer Federal had $649,881,000 in assets and $82,159,000 in net worth.

IRVINE, CA (FEB. 28) BUSINESS WIRE - BoMed Medical Manufacturing Ltd. (NASDAQ:BOMD) reported that it has closed the fiscal year ending Nov. 30, 1989 with a profit of $74,770 on revenues of $2,892,025.

This compares favorably with a profit of $3,770 on revenues of $2,770,110 in the like period a year before, representing a 4.4 percent increase in sales and a 1,880 percent increase in profitability.

BoMed is also pleased to report that its philosophy of real-time hemodynamic management, instead of current cardiac monitoring is being embraced in most of the countries of the world. This is an important change. With the real-time hemodynamic management by BoMed's CDDP System starting preoperatively, the patient can now be therapeutically guided to continuously optimize his outcome.

This philosophy accents prevention rather than current reaction to a catastrophic event. BoMed expects that its utilization will result in a decrease of mortalities and complications. The same approach applied to the outpatients now provides a very effective treatment of hemodynamic disorders, such as hypertension which afflicts one in every four Americans.

In addition, Sramek has been lecturing extensively on BoMed's patient management philosophy in many countries and the acceptance is growing rapidly.

At the American College of Cardiology meeting in March, 1990 BoMed will introduce an additional module to the CDDP System which will allow quantification of hemodynamic status of the patients with pacemakers. Currently, the pacemakers are programmed to manufacture-suggested values expected to provide adequate blood flow, however, without any hemodynamic verification.

Tests with the module have already shown that some patients' pacemakers were not set optimally. This new utilization of the CDDP System is expected to change the way the pacemakers are programmed and their settings verified.

BoMed Medical Manufacturing, with headquarters in Irvine, is a leader in the field of noninvasive, cardiodynamic monitoring. It develops, manufactures and markets technically-advanced instruments for a broad range of patient monitoring and therapeutic management applications.

The company was established in 1980 by B. Bo Sramek, an expert in electrical bioimpedance technology, to develop medical systems based on his research.

BEAVERTON, OR (FEB. 28) BUSINESS WIRE - Timberline Software Corp. (NASDAQ: TMBS), a leading developer of software for the construction and property management industries, Wednesday announced that its board of directors has authorized management to repurchase up to another 100,000 shares of its common stock or approximately 4 percent of 2,382,860 shares outstanding.

Previously, the board had authorized the purchase of 200,000 shares, of which 188,500 have been acquired. Stock purchases will be made from time-to-time in the open market based upon market conditions.

''We continue to believe our stock is an outstanding value and, in fact, is the best investment we can make at this time,'' said John Gorman, chairman and president. ''At Dec. 31, l989, we had $2.2 million or $.93 per share in cash and temporary cash investments with long term debt of under $9,000.''

Earlier this month Timberline reported record annual earnings for 1989 of $769,000 or $.31 per share compared to $446,000 or $.18 per share for the year 1988. Revenues for 1989 were $10,741,000 compared to $8,980,000 the

previous year.

Founded in 1971, Timberline Software Corp. is a leading international supplier of industry specific software for the construction, architect/engineer and property management industries. The company has installed more than 10,000 systems in the United States. Timberline shares are traded on the NASDAQ National Market System under the symbol TMBS.

SACRAMENTO, CA (FEB. 28) BUSINESS WIRE - System Integrators Inc. (SII), a leader in the design and integration of publishing systems for the newspaper industry, Wednesday announced a $5.7 million dollar contract with The Daily Oklahoman (Oklahoma City) to install a complete SII LAN (local area network) based system, using industry-standard PCs, for editorial, advertising, pagination and imaging as well as an interface to their library system.

Two other PageStream products, Graphics Database (Graphics:db) and Page Database (Page:db), which will reside on the Tandem system, were also purchased.

The entire configuration provides The Daily Oklahoman system with the ability to upgrade its system with additional SII productivity solutions as needs permit. The Daily Oklahoman system will be based upon the Tandem computer platform, an industry standard for fault-tolerance in a deadline-critical publishing environment, as well as SII's database management and integration expertise.

Background Information

The new SII installation for The Daily Oklahoman replaces a system installed seven years ago by Hastech using Digital Equipment Corp. minicomputers and workstations. Hastech has since been purchased by Crosfield. The Daily Oklahoman's New Facility and SII's Role

The significance of the contract and installation also rests with the nature of a new communications center where everything will be integrated by SII.

The Oklahoma Publishing Co. (OPUBCO), holding company for The Daily Oklahoman, also owns several radio and television stations. OPUBCO is building a new communications center, to be located eight miles outside

Oklahoma City, which will house The Daily Oklahoman and OPUBCO Corporate Headquarters in addition to the news and communications facilities of their broadcast affiliates.

The new multi-media communications center, due to be completed in January of 1991, will utilize fiber optics technology and will be designed to manage and shield the various communications signals from each other. Each floor of the projected 12 story command center will have steel channels to protect against EMI (electro-magnetic interference).

SII's role in the new OPUBCO command center will be in phases. Phase 1 is installation of the SII Advertising System/55 in the current facility. Phase 2 is installation of the stand-alone Color AdSpeed display ad system into the current facility. Both these installations will be completed by June, 1990.

Phase 3 of SII's plan is to install the SII LAN-based Editorial System/55 and PageStream pagination system, plus re-install Phase 1 and Phase 2 applications, into the new communciations center outside Oklahoma City. During Phase 3, all these applications will be integrated, beginning in January 1991 with completion expected by March, 1991.

A key part of the integration process will be maintaining ''live'' production of all applications at The Daily Oklahoman through a series of carefully planned 6-10 hour windows within the newspaper's tight deadline schedule.

Headquartered in Sacramento, System Integrators Inc. designs, manufactures markets and services publishing systems for editorial, advertising, pagination and imaging applications for the news publishing industry worldwide.

#90059b0637 02/28/1990 ~Business Wire

PALO ALTO, CA (FEB. 28) BUSINESS WIRE - Varian Associates Inc. (NYSE/BSE/MSE/PSE/PhSE:VAR) Wednesday announced that its board of directors has elected J. Tracy O'Rourke chairman of the board and chief executive officer.

O'Rourke, 54, will join the billion-dollar multinational electronics company immediately. Varian's operating managers will report directly to

its new chairman and chief executive officer, who indicated that the post of president will not be filled for the time being.

Thomas D. Sege, who had served as Varian's chief executive since 1981, has been named vice chairman of the board and will assist with the smooth transition of responsibilities to his successor.

O'Rourke was previously one of three executive vice presidents and chief operating officers at Rockwell International Corp. In that assignment he was responsible for Allen-Bradley Co., Rockwell Graphic Systems and Rockwell Communications Systems -- businesses with combined annual sales of more than $3 billion.

He also headed the corporation's international and operations staff functions and served on its management committee.

Late last summer, Varian's board initiated a search for a replacement for Sege, who had indicated a desire to step out of the chief executive officer's role prior to reaching age 65.

O'Rourke's background includes a broad range of industry and product experience. He came to Rockwell through its 1985 acquisition of Allen-Bradley, which he had joined in 1978. He became Allen-Bradley's president and chief operating officer in 1981.

In his 11 years with the company, O'Rourke is credited with a significant role in turning what was a $450 million privately held electro-mechanical concern into a $1.4 billion international electronics business.

In guiding Allen-Bradley's repositioning from a controls manufacturer into a leading supplier of advanced automation systems, O'Rourke was considered a visionary. He was quick to grasp coming industry trends, reworked strategy to accommodate them and then led implementation of changes needed to secure a competitive advantage.

Varian has set the achievement of similar competitive advantage in its diverse markets as a major priority.

During O'Rourke's tenure, Allen-Bradley greatly expanded its international business, with shipments abroad growing more than fourfold. The repositioning also included a drive for world-class manufacturing capability -- another long-range Varian objective -- which lowered costs and improved profitability. Pre-tax profit margins tripled during this period.

Prior to joining Allen-Bradley, O'Rourke held senior management posts with Chemetron Corp., The Carborundum Company and Liquid Nitrogen Processing Corp. where he was president and chief executive officer.

Varian Associates Inc., a diversified high-technology company with some 12,000 employees and 1989 sales of $1.3 billion, produces systems and components for communications, defense, scientific, medical and industrial markets worldwide.

EMERYVILLE, CA (FEB. 28) BUSINESS WIRE - Chiron Corp. (NASDAQ:CHIR) Wednesday reported that for the year ended Dec. 31, 1989, the company had revenues of $35,474,000 and a net loss of $21,629,000, or $1.51 per share, compared to revenues of $32,814,000 and a net loss of $14,405,000, or $1.23 per share, for the restated year ended Dec. 31, 1988.

The loss in 1989 includes $4.1 million in charges associated with the revaluation of certain assets to reflect Chiron's strategic plans for building market positions in certain key business segments such as diagnostics and vaccines, and for increasing profitability as key products reach market.

Effective Dec. 31, 1989, Chiron converted to a calendar year from its prior fiscal year end of April 30, and is not reporting quarterly results for calendar 1989 at this time. From this date forward, financial results will be reported on a quarterly basis including prior year comparisons.

Revenues from product sales to end users increased substantially, from $1,220,000 in 1988 to $4,934,000 in 1989 as Chiron began shipments of antigens for use in commercial diagnostic products and product sales at the company's subsidiary, Chiron Ophthalmics, continued to increase.

PALO ALTO, CA (FEB. 28) BUSINESS WIRE - Hewlett-Packard Co. has signed an agreement to license the HP NewWave software environment to NCR Corp., both companies announced Wednesday.

Terms of the contract were not disclosed.

HP NewWave is an applications environment that makes it easier for

computer users to move and update information among different applications and to schedule routine tasks to be done automatically by the computer.

HP NewWave has a graphical user interface designed for ease-of-use and is based on object-management technology, which simplifies the process of combining different types of data across various software programs and computer systems.

NCR's OCCA is a client-server approach to computing that combines industry standards and open-systems elements with cooperative processing. NCR will release a suite of software products called Cooperation for delivery in the second half of the year. The release will be the first in a series of product introductions supporting NCR's OCCA.

In addition to NCR, Data General Corp. and Canon Inc. also have signed agreements to license HP NewWave. More than 40 companies, including HP and NCR, have formed the Object Management Group to establish a common, industrywide applications environment that will make computer systems and software from different manufacturers work and communicate together.

NCR, with world headquarters in Dayton, Ohio, develops, manufactures, markets and supports business-information systems for worldwide markets. Revenue for 1989 reached approximately $6 billion. NCR markets its products and services through 1,200 offices in more than 130 countries.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

#90059b0653 02/28/1990 ~Business Wire

MEMPHIS, TN (FEB. 28) BUSINESS WIRE - Union Planters National Bank (NYSE:UPC) Tuesday unveiled the plans and architectural model for its new administrative center to be built at Goodlett Farms, near I-40 and Whitten Road.

Benjamin W. Rawlins, chairman and chief executive officer of Union Planters, said the building was designed to meet the operational, functional, physical and security needs of Union Planters National Bank now and in the future. The facility, designed by Barry Marshall of the Hnedak Bobo Group, is actually two buildings connected by a common lobby.

Construction is scheduled to begin in May with a projected move-in date of

Summer 1991. Martin, Cole, Dando & Robertson Inc. will serve as general contractor on the project, which is estimated to cost $23 million. ''The team of contractor, architect and soon to be selected sub-contractors will be strongly Memphis based,'' Rawlins added.

The facility, which is designed to exceed the anticipated seismic criteria of the revised Memphis/Shelby County building code, will occupy a 21-acre site on Goodlett Farms Parkway.

Certain physical components of the work environment stay in the same place such as reception areas, conference rooms, coffee and copy centers, Bobo added, but the common denominator of people's needs dictated the space standards so that employees can be very comfortably accommodated at any location in the building.

The two buildings have one central entrance, which is a security plus, but the two-building scheme was chosen for functional reasons as well. The special purpose segments of the bank -- the vault, check processing, information processing, and computer center, which requires additional air conditioning, back-up generators and specific electrical and mechanical needs -- are not part of a normal office building and are all located on the lower floors of the west wing, leaving the other areas a typical office environment.

On all floors, the open work areas are configured around the outside near the windows with offices at the interior featuring glass doors and walls. The front of the building faces south and Goodlett Farms Parkway. The back faces a four-acre lake. The lake is also visible to vistors as soon as they enter the building and from the dining room on the lower level.

SEATTLE (FEB. 28) BUSINESS WIRE) - Expeditors International of Washington Inc. (NASDAQ: EXPD), an international freight forwarder and customhouse broker, Wednesday announced a 29 percent increase in net earnings to $9,311,000 on total revenues of $193,602,000 for the year ended Dec. 31, 1989.

For 1988, the company recorded net earnings of $7,206,000 on $147,460,000 of total revenues. Earnings per share were $1.60 in 1989, compared to $1.25 in 1988. Net revenues (total revenues less direct costs of freight consolidation) amounted to $42,403,000 in 1989 compared to $33,658,000 in 1988.

For the three-month period ended Dec. 31, the company reported $48,864,000 of total revenues, $11,051,000 of net revenues, $2,416,000 of net earnings and 41 cents net earnings per share in 1989 compared to $39,234,000 of total revenues, $9,087,000 of net revenues, $1,950,000 of net earnings and 34 cents net earnings per share in 1988.

''We're very pleased with our 1989 results, but so much for history,'' said Peter J. Rose, president of Expeditors International. ''We are looking foward to 1990 with some trepidation, as there are signs of an economic slowdown; however, we will just have to work a little harder. We are continuing to focus our efforts on expanding into new areas to better serve our customers.''

#90059b0657 02/28/1990 ~Business Wire

SAN DIEGO (FEB. 28) BUSINESS WIRE - Institut Merieux, Pasteur Vaccins and The Immune Response Corporation on Wednesday jointly announced that Immune Response will license its AIDS Immunotherapeutic to Institut Merieux and Pasteur Vaccins for use in Europe, Africa, and South and Central America.

The AIDS Immunotherapeutic is based on an approach first suggested by Dr. Jonas Salk. If successfully developed, the AIDS Immunotherapeutic would at first be used primarily to prevent or delay the development of AIDS in HIV-infected individuals. The AIDS Immunotherapeutic is currently in multicenter clinical trials in the United States.

The companies have also entered into a supply agreement pursuant to which Institut Merieux and Pasteur Vaccins would supply Immune Response with quantities of the AIDS Immunotherapeutic for use in the United States, Canada and Puerto Rico. Immune Response expects to supply these North American markets through Immunization Products Ltd., a joint venture between Immune Response and Rorer Group Inc.

The Immune Response Corporation is a biopharmaceutical company focused on developing, manufacturing and marketing proprietary products for the treatment of HIV infection, which leads to AIDS, and for the treatment of certain major autoimmune diseases, particularly multiple sclerosis, rheumatoid arthritis and insulin-dependent diabetes.

The company's research and development efforts utilize molecular biology, immunology, peptide chemistry and virology to selectively alter the human immune response.

Institut Merieux, together with its subsidiary Pasteur Vaccins, is one of

the world's leading biological companies involved in the research, development, manufacturing and marketing of vaccines, blood proteins and related products.

Institut Merieux and Pasteur Vaccins market their products in France and in more than 150 other countries through subsidiaries of specialized agents, with sales amounting to 1.7 billion French francs ($300 million). Institut Merieux and Pasteur Vaccins' research expenditures on human biological products amount to more than 15 percent of sales.

In December 1989, Institut Merieux bought all the shares of the Canadian company Connaught Biosciences Inc., thereby becoming the world leader in the vaccine market.

EL PASO, TX (FEB. 28) BUSINESS WIRE - Texscan Corp. (NASDAQ: TXCN), a leading manufacturer of cable television, commercial insertion equipment and fiber optic systems, Wednesday reported operating income for the three months ended January 27, 1990 rose 545 percent on a 31 percent increase in revenue from continuing operations.

Net income for the quarter increased over four-fold.

Sales for the quarter ended January 27, 1990 were $13,002,000 compared with $11,055,000 in the prior year's third quarter which included $1,158,000 from Texscan's divested instruments division and German subsidiary. Income from operations rose to $890,000 from $138,000 a year earlier primarily as a result of the performance of Texscan's fiber optic division in the United Kingdom.

Net income for the third quarter rose to $421,000, or $0.04 per share, from $102,000, or $0.01 per share, a year earlier.

Sales for the nine months ended January 27, 1990 were $36,635,000 compared to $32,241,000 from continuing operations in the prior year. Prior year-to-date sales from divested operations were $3,691,000 million. Operating income for the nine months was $2,445,000, 86 percent higher than the year's $1,313,000.

Net income increased to $995,000, or $0.09 per share, from a loss of

$216,000, or $0.02 per share, in the prior year. FAS 96, which requires a reduction of income through a non-cash provision for income taxes offset by an increase in equity, had the effect of lowering net income by $428,000, or $0.04 per share, if the provision not been required.

William H. Lambert, Texscan Chairman, President and Chief Executive Officer noted that ''while sales on our base CATV and commercial insertion businesses improved 10 percent, or approximately $2 million for the third quarter of fiscal 1990, the investment made in our European OP-Tech fiber optic systems division contributed an additional 20 percent revenue gain over last year's third quarter.''

Headquartered in El Paso, Texscan Corp. (NASDAQ: TXCN) is best known as a designer and manufacturer of a broad line of distribution equipment for the cable television (CATV) industry. The Company also designs, manufacturers and markets multipoint distribution systems, character generators and commercial insertion equipment, as well as serving the European CATV, fiber optics communications and microwave markets.

#90059b0664 02/28/1990 ~Business Wire

NEW YORK (FEB. 28) BUSINESS WIRE - Polly Peck International PLC, a worldwide corporation based in London, Wednesday announced that it had purchased Standard Fruit & Vegetable Co., a major wholesale produce distributor in Dallas and the surrounding eight-state area.

The purchase price of $30.15 million will be satisfied by the issuance of new shares of Polly Peck which will be placed by Shearson Lehman Hutton and Barclays de Zoete Wedd in London.

Standard Fruit & Vegetable, founded in 1933 by Abraham Rutchik, is owned and managed by Martin and Morris Rutchik. The company is an integrated fresh produce operation with separate trucking, pre-packaging and sales divisions which supply more than 360 supermarkets and institutional customers.

Wholesaling operations account for approximately 80 percent of revenue with prepacking of certain products and transportation contributing the balance.

Standard distributes a full produce line of more than 100 items including

potatoes, bananas, lettuce onions, tomatoes. The company operates on a direct purchase basis, both domestically and internationally, and has strong historic relationships with quality growers and shippers.

Net sales for the year ended Dec. 31, 1989, were $76.6 million. Net tangible worth of Standard Fruit & Vegetable is at least $16 million, including the company's 270,000 square foot distribution center in Dallas.

Martin Rutchik (60), chief executive officer, and Morris Rutchik (54), chief operating officer, will remain in their respectie positions for at least three years.

Standard Fruit & Vegetable is Polly Peck's fourth major U.S. food distributor acquisition. In December 1989, the company purchased the Del Monte Fresh Fruit Co. Del Monte is the largest distributor of pineapples and the third largest purveyor of bananas in the world.

In January 1989, Polly Peck bought the Mendelson-Zeller Co. located in Fresno, Calif., from the Campbell Soup Co. and in June 1988, acquired Prevor Marketing International, a New York-based fruit and vegetable wholesaler.

Polly Peck International has worldwide manufacturing, sourcing and marketing operations strategically located in Europe, the Near and Middle East, the Far East and North and South America. Its major activities center on agricultural and citrus produce; electronics and travel and leisure.

SAN JOSE, CA (FEB. 28) - Digital Microwave Corp. (NASDAQ:DMIC) announced Wednesday its launch into the digital video transmission market with the formation of a separate division, DMC Digital Video.

The initial product offering focuses on digital microwave radio systems for digital transmission of broadcast quality video and audio.

James B. Murray has been appointed vice president/general manager of this division and will report to William E. Gibson, president and chief executive officer of Digital Microwave Corp.

Murray is well known in the transmission industry, having served most recently as president of Local TerraCom. Murray's focus on the video transmission market began when he founded Farinon Video in 1973.

''We believe digital video transmission is the technology of the 1990s, and DMC Digital Video is positioned to take a leadership role in bringing this technology to the marketplace,'' said William E. Gibson, president and CEO of Digital Microwave Corp.

''We are pleased to have Mr. Murray join our team; his experience and knowledge of the video industry are assets to our company,'' continued Gibson.

Headquartered in San Jose, Digital Microwave Corp. is a leading supplier of high performance short-haul transmission products to domestic and international markets.

Digital Microwave Corp. is located at 170 Rose Orchard Way, San Jose, Calif., 95134; telephone 408/943-0777.

HOUSTON (FEB. 28) BUSINESS WIRE - TEPPCO Partners L.P., a unit of Panhandle Eastern Corp. (NYSE:PEL), has priced its initial public offering of master limited partnership interests at $20 per unit.

TEPPCO Partners will offer to sell to the public 12,750,000 units of the new partnership representing an 89.25 percent limited partner interest. Texas Eastern Products Pipeline Co. will be the general partner with an approximate 2 percent interest plus an 8.75 percent limited partner interest in TEPPCO Partners. The partnership has granted the underwriters an over-allotment option to purchase up to an additional 1,250,000 units.

The publicly offered units will be listed on the New York Stock Exchange under the symbol ''TPP.''

Goldman, Sachs & Co. is lead underwriter for the offering, and co-managers for the underwriting are Kidder, Peabody & Co. Inc. and Shearson Lehman Hutton Inc. Regional managers are Bateman Eichler, Hill Richards Inc., Boettcher & Co. Inc., Cowen & Co., Rauscher Pierce Refsnes Inc. and Sutro & Co. Inc.

Proceeds from the master limited partnership will be used to completely retire Panhandle Eastern bank debt from the acquisition of Texas Eastern

Corp. and for general corporate purposes.

TEPPCO Partners owns and operates the petroleum products pipeline business of Texas Eastern Products Pipeline Co., which includes a 4,100-mile pipeline system extending from Southeast Texas through the Midwest to the Northeastern United States, said TEPPCO President Michael D. Burke. TEPPCO Partners is one of the largest common carrier pipelines of petroleum products in the United States.

Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

NEW YORK (FEB. 27) BUSINESS WIRE - Einar Kloster, president, chief executive officer and chairman of the executive management committee of North American Philips Corp., has been elected president and chief executive officer of Philips Lighting Holding B.V. of The Netherlands, effective Oct. 1, 1990.

He will begin preparing for his new position as of June 1, 1990. Kloster succeeds Ype G. Bouwkamp, who becomes a member of the board of management of N.V. Philips of The Netherlands.

Stephen C. Tumminello, executive vice president and vice chairman of the executive management committee of North American Philips Corp., has been elected to succeed Kloster as president, chief executive officer and chairman of the executive management committee of North American Philips Corp., effective June 1, 1990.

Kloster became president of North American Philips Corp. on Jan. 1, 1989 and chief executive officer on June 1, 1989. Tumminello became executive vice president of North American Philips Corp. on Feb. 26, 1986. The announcements were made by Gerrit Jeelof, chairman of the board of North American Philips Corp.

North American Philips Corp., a wholly-owned subsidiary of N.V. Philips of the Netherlands, is one of the 100 largest industrial companies in the United States with operations in consumer products, lighting products, electrical and electronic components, medical diagnostic imaging systems and other professional equipment marketed under many well known brands, including Philips, Magnavox, Norelco, Philco, Sylvania audio-video, and

Genie.

Before assuming his current position in 1989, Kloster, 52, has served as North American Philips executive vice president responsible for manufacturing and marketing of consumer electronics and electrical products and television picture tubes.

Prior to joining North American Philips, Kloster served in a succession of international executive management posts with Philips in Brazil, Norway, Kenya, Japan, and the Netherlands.

During the period 1986-1988, Kloster served as chairman and chief executive officer of Miami-based Kloster Cruise Limited, the world's leading cruise operator.

SUGAR LAND, TX (FEB. 28) BUSINESS WIRE - Henley International Inc. (NASDAQ: HINT) announced that it completed its initial public offering of common stock on Feb. 2.

The company also announced that unaudited revenues for the first quarter of fiscal 1990 (ended Jan. 31) increased 103 percent to $5.9 million, from $2.9 million for the same quarter of fiscal 1989. First quarter after-tax earnings increased 137 percent to $175,000, or 11 cents per share, in 1990 from $74,000, or five cents per share, in 1989.

Per share earnings are based upon 1,655,000 shares outstanding for both fiscal quarters and do not give effect to the issuance of one million shares from the company's initial public offering.

Kenneth W. Davidson, the company's chairman, president and chief executive officer, attributed the increases in revenues, earnings, and earnings per share to acquisitions concluded in the second and third quarters of fiscal 1989 and also to improved operating margins.

The company develops, manufactures and distributes a diversified range of physical therapy, home pain management, and disposable hospital products. Headquartered in Sugar Land, Texas, with an additional facility in Southern California, the company has experienced significant growth in revenues and earnings in recent years.

#90059b0688 02/28/1990 ~Business Wire
PEABODY, MA (FEB. 28) BUSINESS WIRE - Warren Bancorp Inc. (NASDAQ:WRNB) Wednesday reported its operating results for the fourth quarter and the year ended Dec. 31, 1989.

For the year ended Dec. 31, 1989, the corporation reported a net loss of $9.4 million, or $2.71 per share, compared with 1988 net income of $2.2 million, or 64 cents per share.

The corporation reported a net loss of $6.7 million, or $1.92 per share, for the quarter ended Dec. 31, 1989, compared with net income of $325,000, or 9 cents per share, for the comparable period in 1988.

Stephen F. O'Sullivan, chairman, president and chief executive officer of Warren Bancorp Inc. indicated that the loss for the 1989 periods was primarily the result of further deterioration in the corporation's loan portfolio due to the continued slowing of the New England economy and related difficulties in the real estate market.

As a result of these factors, the corporation's provision for possible loan losses increased significantly during the 1989 fourth quarter and for the 1989 year, and net income for both 1989 periods was reduced by write-downs of real estate joint ventures and real estate acquired through foreclosure as well as the uncollected interest on loans in a non-accrual status.

Warren Bancorp Inc. had net charge-offs totalling $5.3 million during the 1989 fourth quarter; for the year ended Dec. 31, 1989, net charge-offs totaled $7.7 million.

The corporation added $5.7 million to its provision for possible loan losses in the fourth quarter of 1989, and $10.4 million in the 1989 year, compared with $1.1 million, and $1.6 million, respectively, for the same periods in 1988; the allowance for possible loan losses totaled $6.1

million at Dec. 31, 1989, compared with $3.4 million at Dec. 31, 1988.

The corporation recognized losses on its joint venture projects and real estate owned through foreclosure of $2.3 million and $2.9 million, respectively, in the quarter and year ended Dec. 31, 1989, compared with a loss of $93,000 in 1988.

Loans decreased 9.8 percent, to $443.4 million at Dec. 31, 1989, from $491.9 million at Dec. 31, 1988. Included in loans for the 1989 period are $12.8 million in condominium development loans; $11.7 million in land loans; and $3.3 million in construction loans.

Loans in a non-accrual status at Dec. 31, 1989, totaled $26.5 million, or 5.97 percent of loans, compared with $9.1 million, or 1.86 percent of loans, at Dec. 31, 1988. Included in this total were $8.2 million in condominium development loans, $4.5 million in land loans and $348,000 in construction loans.

Real estate acquired through foreclosure and substantially repossessed at Dec. 31, 1989, totaled $11.6 million at Dec. 31, 1989, compared with $751,000 at Dec. 31, 1988. Also in a non-performing status at Dec. 31, 1989 are $2.9 million of real estate joint ventures.

Warren Bancorp Inc. is the holding company for Warren Five Cents Savings Bank. A Massachusetts-chartered, FDIC-insured savings bank, Warren Five services the North Shore, Merrimack Valley and Cape Ann communities through eight branches and two loan offices in Peabody, Beverly, Andover and Gloucester.

The annual meeting of Warren Bancorp Inc. will be held on Wednesday, May 2 1990, at 7 p.m., at the Peabody Marriott Hotel, Centennial Park, Peabody, Mass. All shareholders of record as of March 5, 1990, are eligible to vote at this annual meeting.

EINDHOVEN, THE NETHERLANDS (FEB. 28) BUSINESS WIRE - Mr. C.J. van der Klugt, president of N.V. Philips' Gloeilampenfabrieken and chairman of the

board of management/group management committee, having reached the age of retirement, will give up that position as per July 1, 1991.

It is planned that a proposal to appoint Mr. J.D. Timmer as president of the company and chairman of the board of management/group management committee will be put to the annual general meeting of shareholders, which will be held in the spring of 1991. Mr. Timmer is now a member of the group management committee and chairman of the consumer electronics division.

It will be announced at the annual general meeting of shareholders, to be held on April 10, 1990, that Mr. G. Jeelof, having reached the agreed age of retirement, will retire as executive vice-president and vice-chairman of the board of management as per July 1, 1990, and that Mr. F.F. Otten will give up his position as executive vice president and member of the board of management/group management committee as per October 1, 1990, to become Philips' reprobative in its relations with the European community in Brussels.

It will be proposed that Mr. Timmer should be appointed vice- chairman of the board of management/group manment committee and executive vice-president, with effect from July 1 this year.

It will also be proposed to the annual general meeting of shareholders, to be held on April 10, that Mr. H.H.A. Appelo, member of the group management committee and group director accounting, should be appointed a member of the board of management with effect from July 1, 1990, and that Mr. Y.G. Bouwkamp, president and chief executive officer of Philips Lighting Holding b.v., should be appointed a member of the board of management as per October 1, 1990.

DAYTON, OH (FEB. 28) BUSINESS WIRE - Philips Industries announced Wednesday that its special shareholder meeting, previously adjourned to Feb. 28, 1990, has been adjourned indefinitely.

This special meeting had been called to consider the proposed merger of Philips with MLPI Holdings Inc. (a corporation formed at the direction of Merrill Lynch Capital Partners Inc.). Philips and Holdings also jointly announced that at this time the agreement and plan of reorganization that they had previously executed as of Sept. 24, 1989, and amended as of Nov. 28, 1989, has not been terminated.

Holdings also stated that, as previously announced on Jan. 11, 1990, Holdings' proposed financing sources had indicated that they would be unable to participate in the financing of the transaction as currently structured. However, Holdings stated that it continues to remain interested in completing an acquisition of Philips and is evaluating whether an alternative structure can be arranged which would be acceptable to all parties. Philips and Holdings stated that Holdings has not made any further proposals to Philips and they are unable to predict at this time whether any acquisition will be consummated or whether any alternative transaction will be proposed.

Philips Industries is a leading manufacturer of components for the building and transportation industries and provides quality material handling systems to manufacturers. The company is listed on the New York Stock Exchange under the ticker symbol PHL.

NEW YORK (FEB. 28) BUSINESS WIRE - Airship International Ltd. (NASDAQ: BLMP) purchased an additional Skyship from Airship Industries, U.K. (''AIRSY'').

The new Skyship at 194 feet is the most technically advanced airship in the world and the same size airship that the company currently operates for the Metropolitan Life Insurance Co. As a result of the purchase, Airship International Ltd. was appointed the exclusive commercial operator in the United States for Airship Industries U.K.

The purchase of the new airship has been financed in full by a major banking institution for $3.25 million.

The company is presently negotiating with a major Fortune 500 company which shall utilize this airship as an aerial ambassador on a cross-country promotional tour. The future contract will be on similar terms as the company's existing $10.8 million contract with the Metropolitan Life Insurance Co. (MetLife).

The new airship will be equipped with the company's NightSign System, the world's largest full color aerial display, creating messages, logos and animated graphics that can be seen from over a mile away.

Airship International Ltd. currently owns and operates a state-of-the-art 194 foot Airship Industries Skyship 600 on behalf of MetLife. The company's Skyship 600, which is fully Federal Aviation Administration

Certified with its NightSign System is presently on a cross country promotional tour appearing as an eye-in-the-sky television network camera platform for major sporting and special events including the 1990 Super Bowl.

The Skyship is leased to MetLife for a term of 36 months with a potential value to the company of over $10.8 million dollars.

LOS ANGELES (FEB. 28) - Leisure Technology (NYSE:LVX) announced Wednesday that it has formed and closed a partnership with Hazama USA Corp., a subsidiary of Tokyo-based Hazama Corp. (Tokyo Stock Exchange:1837), one of Japan's largest construction companies, and a consortium of Japanese companies, which includes Starts International California Inc.; Matsukyu USA Inc. and N. Hasegawa Inc.

The partnership will develop an active adult community in Escondido, Calif., with projected revenues upon completion of $200 million. Development and construction financing is expected to be provided by The Industrial Bank of Japan Ltd. George Smith/Grubb & Ellis Financial Services served as real estate investment banker for the partnership.

The new community, Leisure Oaks Escondido, will be developed on a 134-acre parcel of land that has been sold to the partnership by Leisure Technology for $20 million.

Leisure Technology of Escondido Inc. is general partner and is responsible for the development, construction and marketing of the new active adult community. Land development of the first phase is projected to start in June 1990.

Construction of the community facilities and model construction of the first phase of approximately 175 singele-family, detached homes for active adults is projected to begin by early fall 1990. Marketing is projected to commence in the fall of 1990.

Isao Honda, general manager of North America operations for Hazama, said, ''We are especially pleased to enter this partnership with Leisure Technology and look forward to their expert management in the development and marketing of the Leisure Oaks Escondido community.''

Major recreational amenities planned for Leisure Oaks will feature The Leisure Oaks Country Club, a 17,000 square foot recreation center with

meeting and craft rooms, as well as an auditiorium with a fully equipped stage for the performing arts.

Other amenities will include a 9-hole golf course, neighborhood clubhouse, a junior Olympic swimming pool, tennis courts, boccie, paddle-tennis, sport courts, patios and barbecue areas.

Leisure Technology, established in 1957, is the largest nationwide developer of active adult communities and is currently developing active adult, single-family or full-service retirement communities in New Jersey, New York, Florida, Illinois and California.

TAMPA, FL (FEB. 28) BUSINESS WIRE - One of the leading commercial bank holding companies in the mid-west has become a subscriber for Invest Financial Corp.

Invest Executive Vice President D. Mark Olson announced that First Interstate of Iowa, the $1.2 billion asset, 13-bank holding company with headquarters in Des Moines, will open Invest centers in four First Interstate banks early this year.

''This is a significant endorsement of growth for Invest,'' Olson said. ''First Interstate of Iowa is one of the emerging retail banking institutions in the mid-west, and it is a franchisee of the First Interstate Bancorp,'' he added. ''We are proud to be associated with First Interstate of Iowa.''

First Interstate of Iowa Chairman and Chief Executive Officer Oliver H. Hagen said Invest centers would be established in: Des Moines, Iowa, at the First Interstate Bank of Des Moines; in Urbandale, Iowa, at the First Interstate Bank of Urbandale; in Mason City, Iowa, at the First Interstate Bank of Mason City; and in Fort Dodge, Iowa, at the First Interstate of Fort Dodge.

''We are pleased to introduce the high quality Invest program to our banks '' Hagen said. ''Invest Financial Corp. was the original provider of

investing products to customers of banks and has a long record of quality service to customers,'' Hagen said.

Through Invest Financial Corp., customers can purchase mutual funds, unit investment trusts, and other investments as well as insurance annuities within the bank. Invest operates over 560 centers within banking institutions in 40 states.

Invest, headquartered in Tampa, Fla., is a member NASD/SIPC and a subsidiary of Kemper Financial Companies Inc., of Chicago.

Construction of the community facilities and model construction of the first phase of approximately 175 singele-family, detached homes for active adults is projected to begin by early fall 1990. Marketing is projected to commence in the fall of 1990.

"The development of Leisure Oaks Escondido will assure Leisure Technology's continued leadership in the rapidly growing North County San Diego market as our highly successful 1,650-unit Leisure Village Ocean Hills active adult community in nearby Oceanside is completed within the

next two years," said Michael L. Tenzer, chairman and chief executive officer of Leisure Technology.

"We look forward to developing Leisure Oaks Escondido as a premier active adult community," Tenzer added. "The partnership of Leisure Technology and the consortium of Japanese partners is a continuation of the company's plans for the development of active adult communities in strong housing markets," Tenzer concluded.

Isao Honda, general manager of North America operations for Hazama, said, "We are especially pleased to enter this partnership with Leisure Technology and look forward to their expert management in the development and marketing of the Leisure Oaks Escondido community."

NEW YORK (FEB. 28) BUSINESS WIRE - The Commodity Futures Trading Commission (CFTC) Wednesday granted contract approval to the New York Mercantile Exchange (NYMEX) for natural gas futures.

NYMEX will become the first exchange in the world to trade natural gas.

Trading will begin on April 3. June will be the first of twelve consecutive delivery months.

NYMEX first applied to the CFTC to trade natural gas futures in 1984, when gas transportation was much more limited than it is today. In October 1989 the Federal Energy Regulatory Commission (FERC) decided its direct involvement in natural gas futures was no longer necessary due to the increased access to both inter- and intrastate markets that resulted from FERC's transportation programs.

In November 1989, NYMEX resubmitted its contract to the CFTC with the Sabine Pipe Line Company's Henry Hub near Erath, La., as the new delivery site.

#90059b0735 02/28/1990 ~Business Wire

HOUSTON (FEB. 28) BUSINESS WIRE - Galveston-Houston Co. (NYSE:GHX) Wednesday reported increased earnings for both the fourth quarter and the year ended Dec. 31, 1989.

For the fourth quarter of 1989, the company's net income applicable to common stock was $739,000, or 5 cents per share. This reflects a 125.3 percent increase above the $328,000, or 3 cents reported for the similar 1988 period. Revenues for the 1989 fourth quarter, at $15,586,000, were 15.2 percent higher than the $13,532,000 for the fourth quarter of 1988.

For 1989, the company reported net income applicable to common stock of $2,902,000, or 24 cents per share, a 100.8 percent increase compared to $1,445,000, or 13 cents for 1988. Revenues for 1989 were $62,288,000, 15.4 percent higher than the $53,961,000 stated for 1988.

In a subsequent event, the company announced that it had completed a 4.6 million share public common stock offering in which it received $21.4 million in net proceeds. Of this amount, $18.2 million was used to retire substantially all of the company's long-term bank indebtednesss.

Nathan M. Avery, chairman of the board, stated, ''1989 was an excellent year for Galveston-Houston Co. Our strong revenues, coupled with a healthy backlog and solid financial picture resulting from our successful offering make us very optimistic about 1990 and beyond.''

Galveston-Houston Co. manufacturers valve actuators and custom steel castings for the energy and other industrial markets, and replacement wear parts and excavation buckets for the construction, mining and other earthmoving industries.

FRAMINGHAM, MA (FEB. 28) BUSINESS WIRE - The TJX Cos. Inc. (NYSE:TJX), the major off-price apparel retail operator of T.J. Maxx, Hit or Miss and Chadwick's of Boston, Wednesday announced that earnings increased for the fiscal year and were up sharply for the fourth quarter ended Jan. 27, 1990

For the full year, net sales rose 11.9 percent, to $2,148,735,000, and income from continuing operations increased to $86.8 million, or $1.32 per

share, from $55.1 million, or 98 cents per share, in the prior year. This year's income from continuing operations includes after-tax income of $5.2 million or 8 cents per share, from the Ames Department Stores Note which was repaid by Ames on May 24, 1989.

The prior year's earnings included a post-tax restructuring charge of $7.2 million or 13 cents per share, partially offset by after-tax income on the Ames Department Store Note, of $3.7 million or 6 cents per share.

On a comparable basis, adjusting for these one-time and other non-comparable items related to the company's restructuring, which was completed in June of this year, income from continuing operations for the year was $1.20 per share, up 12.1 percent over an adjusted $1.07 per share last year.

These full year results were buoyed by strong fourth quarter earnings. For the 13 weeks ended Jan. 27, 1990, net sales rose 9.1 percent to $618,640,000, and income from continuing operations climbed to $25.2 million, or 36 cents per share, up from $10.4 million or 18 cents per share last year.

Last year's fourth quarter earnings included the previously discussed post-tax restructuring charge of 13 cents per share, partially offset by the 6 cents per share interest income from the Ames Note. Adjusting for these and other non-comparable items related to the restructuring, this year's fourth quarter earnings per share of 36 cents increased 33 percent over comparable earnings per share of 27 cents last year.

During fiscal 1990 T.J Maxx opened 44 new stores, ending with 352 units, and Hit or Miss added 40 stores, net of closings, to end the year with 546 shops. In the current fiscal year, plans call for approximately 45 additional T J. Maxx stores and 45-50 net additions to Hit or Miss. Chadwick's of Boston plans to mail approximataly 60 million catalogs this year, up from 49 million in the prior year.

ASHEVILLE, NC (FEB. 28) BUSINESS WIRE - Ingles Markets Inc. (NASDAQ:IMKTA) Wednesday announced that its board of directors has declared a cash dividend of $.055 (five and one-half cents) per share on all its Class A common stock and 5 cents per share on all its Class B common stock.

Dividends on both the Class A and Class B common stock are payable March

30, 1990, to all shareholders of record on March 16, 1990.

Ingles Markets Inc. is a leading supermarket chain with operations in five southeastern states. Headquartered in Asheville, the company operates 163 supermarkets. In conjunction with its supermarket operations, the company also operates 61 neighborhood shopping centers, each of which contains an Ingles supermarket.

The company's common stock is traded on the National Market System under the NASDAQ symbol IMKTA.

HOUSTON (FEB. 28) BUSINESS WIRE - Team Inc. (ASE: TMI) Wednesday announced that in connection with the recent call of the company's 13 percent convertible subordinated debentures (the "debentures"), substantially all were converted as of Feb. 26, the expiration date of the conversion option.

The original principal amount of the debentures was $5 million, and at the close of the company's second quarter on Nov. 30, 1989, $4,802,000 remained outstanding. Of this amount, $4,677,000 were converted into 623,600 shares of common stock and $125,000 were redeemed. Effective Feb. 27, the company's debentures ceased trading on the American Stock Exchange.

Team's Chairman and President H. Wesley Hall stated that, "With the conversion of substantially all of the debentures and the successful completion of our recent common stock offering, the stockholders' equity section of the balance sheet increased to more than $30 million. This compares to stockholders' equity of $15,700,000 at May 31, 1989.

"The company's debt-to-equity ratio has also substantially improved which will be more fully discussed in our third quarter report." As a result of the conversion, future interest costs will be reduced by approximately $624,000 per annum.

No earnings dilution will result since earnings per share calculations since fiscal 1988 have been reported on a fully diluted basis as if the debentures had been converted.

Team Inc. provides repair, specialty, and transportation services primarily to industrial customers and privatized services to governmental entities. The company has 50 operating locations in 23 states and serves the international market through liscensee arrangements in ten countries.

TORONTO (FEB. 28) BUSINESS WIRE - Officeland Inc. (NASDAQ:OFLDF) Wednesday announced that it has developed a business plan to form a subsidiary company which will enter into the business of operating and franchising fast food restaurants. The restaurants, initially to be located in southern Florida, will offer a varied menu and will specialize in ''submarine'' style sandwiches.

Officeland also announced that it is in the process of completing a private placement of its securities, the proceeds of which will be used for the consulting, planning and start-up expenses as well as the development of a pilot location for the fast food restaurants.

Officeland has an agreement in principle with a group which has extensive experience in fast food restaurant operations to manage this subsidiary.

Marvyn Budd, president, commented, ''We believe the operation and franchising of fast food theme restaurants offers an exciting growth opportunity for the company. We expect that our restaurant concept will fare especially well in South Florida, which is one of the premier markets in the U.S. for fast food operations.'' Officeland Inc. provides collection and office equipment brokering services to financial institutions throughout North America.

TAMPA, FL (FEB. 28) BUSINESS WIRE - Eastern Environmental Services Inc. (NASDAQ:EESI) Wednesday announced the signing of a preliminary agreement to acquire an operating Midwest landfill.

This agreement comes just seven days after EESI signed a similar agreement to acquire an existing Northeast landfill and represents EESI's third pending transaction to acquire strategically located waste disposal sites throughout the Southeast, Midwest and Northeast United States.

This landfill will allow EESI's waste hauling subsidiary to accelerate expansion into the profitable Midwest market, particularly into Chicago and Central Indiana, stated EESI Chairman William C. Skuba. The site is expected to handle municipal solid waste and asbestos from Illinois, Indiana and Missouri.

EESI's waste hauling subsidiary currently performs the majority of its work in the Northeast United States.

Acquisition of the Midwest landfill could occur within 90 days and is subject to environmental testing, regulatory acceptance and review and other items. Company principals emphasized that the agreement is preliminary in nature and there is no guarantee that EESI will acquire the Midwest landfill.

#90059b0763 02/28/1990 ~Business Wire
CAMP HILL, Pa. (FEB. 28) BUSINESS WIRE - Consumers Financial Corp. (OTC: CFIN) Wednesday announced unaudited net income for 1989 of $2.9 million (74 cents per share), compared to $2.6 million (67 cents per share), as restated, for 1988.

The higher earnings were achieved through increased profits in the Credit Insurance Division and reduced losses in the Individual Life Insurance Division. Fourth quarter net income decreased from the restated 1988 level of $1.5 million (44 cents per share) to $913,000 (25 cents per share) in 1989.

The company has restated its financial statements for years prior to 1989 to reflect adoption of Financial Accounting Standards No. 97, which

changed the accounting for universal life-type contracts. The change decreased shareholders' equity at Dec. 31, 1988 by $1 million (31 cents per share) and decreased net income by $130,000 (4 cents per share) and $295,000 (9 cents per share) for 1989 and 1988, respectively.

In accordance with FAS 97 discussed above, net realized investment gains are now reported as a component of operating income. Excluding such gains operating income for the year ended Dec. 31, 1989 increased $440,000 from $2.08 million in 1988 to $2.52 million. Fourth quarter operating income, excluding net realized investment gains, decreased from $1.2 million in 1988 to $785,000 in 1989. -0- T

JACKSONVILLE, FL. (FEB. 28) BUSINESS WIRE - American Federal Savings Bank of Duval County Wednesday reported net income for the year ended Dec. 31, 1989 of $341,000, or 37 cents per share, as compared to 1988 net income of $517,000, or 55 cents per share.

Net income for the fourth quarter of 1989 was $39,000, or four cents per share, as compared to $59,000, or six cents per share, for the like period in 1988.

The results for the fourth quarter reflected a loan loss charge of $347,300 that was made to increase the specific loan loss provision that American Federal has established with respect to a loan secured by a shopping center in Fort Walton Beach, Fla.

American Federal's Chairman of the Board and Chief Executive Officer Norman Harrison reported, ''We are pleased with our results in what has been a tough year for the thrift industry.

''We think it prudent to increase the loan loss reserve with respect to the Fort Walton Beach property, but we note that commercial mortgage loans represented only 6 percent of our portfolio at year end. We look forward to the challenges and opportunities of the 1990's.''

American Federal's total assets as of Dec. 31, 1989 were $272 million and stockholders' equity as of Dec. 31, 1989 was $11.3 million, which represents a $12.07 book value per share. Total loan originations for 1989 were $94 million, just slightly below the $96 million originated in 1988.

American Federal Savings Bank of Duval County is a federal stock savings bank and is traded on the NASDAQ National Market System under the symbol ''AMJX.''

NATICK, MA (FEB. 28) BUSINESS WIRE - Waban Inc. (NYSE:WBN), a major operator of warehouse clubs, Wednesday announced operating results for its fourth quarter and fiscal year ended Jan. 27, 1990.

Sales rose 17.1 percent to $557 million during the quarter and aggregated $2.1 billion for the entire fiscal year, up 24.4 percent over last year.

Net income totaled $7.2 million, or 25 cents per share, for the quarter vs. $4.3 million in the prior year. Earnings for the entire fiscal year were $28.8 million, or $1.01 per share, up from $17.2 million a year earlier.

At this time last year the company was operating as a division of Zayre Corp. In June 1989, Waban was spun off as an independent public company. It should be noted that the prior year's results included intercompany interest expense that is not applicable to the year just ended.

On a pro forma basis, adjusted to exclude the intercompany interest expense and to include certain expenses associated with Waban as if it were a stand-alone public company, the prior year's earnings were $5.6 million, or 20 cents per share, for the fourth quarter of fiscal 1989 and $22.4 million, or 79 cents per share, for the year.

''We are pleased to report record sales and earnings for our first year as a publicly-held company,'' commented John F. Levy, Waban president and chief executive officer.

''Looking ahead to next year,'' Levy continued, ''we are seeking to build strong businesses for the long term in an increasingly competitive environment for both divisions. As we said in our press release dated Feb. 16, 1990, this strengthening process calls for a substantial investment that will significantly diminish Waban's earnings for the current fiscal year.''

Waban Inc. is a major participant in the rapidly growing warehouse club industry through its HomeClub and BJ's Wholesale Club businesses.

HomeClub is one of the nation's leading merchandisers of home improvement products at everyday low prices, operating 58 warehouses in 10 western states. BJ's Wholesale Club, which currently operates 23 clubs in the eastern United States, is a low-cost, low-margin, high-volume, membership-oriented distributor of food and general merchandise.

CLEVELAND (FEB. 28) BUSINESS WIRE - Society Corp. Wednesday announced that it has agreed to purchase from Marine Midland Banks Inc., for an aggregate price of $49,250,000, all outstanding shares of Society's Adjustable Rate Preferred Stock and a Warrant held by Marine.

The stated value of the Adjustable Rate Preferred Stock is $25 million. The Warrant provided for the purchase of 2,519,374 Society Common Shares at an exercise price of $20 per share at any time until Sept. 3, 2000. The Preferred Stock and the Warrant both were issued to Marine as part of the merger in 1985 of Centran Corp. into Society.

Society also announced that it may purchase in the open market and through negotiated transactions up to 500,000 of its common shares. Society had 33,752,254 shares outstanding on Jan. 31, 1990. The timing and amount of the common share purchases will depend on market conditions. The shares purchased will be available for issue on the exercise of stock options and for other corporate purposes. Any purchases will be made prior to Dec. 31, 1990.

Society Corp., with assets of $16.2 billion is one of the largest bank holding companies in the Midwest. Through its affiliates, the holding company has 370 offices in Ohio, Michigan, Indiana and Florida. Society engages in commercial banking, consumer banking, mortgage banking and leasing, and provides trust and investment banking services.

CLEVELAND (FEB. 28) BUSINESS WIRE - The following is a summary of a presentation Wednesday at the Cleveland Society of Security Analysts by Gwain Gillespie, executive vice president of finance and administration.

Tremendous growth opportunities in the long term disability market translate into strong premium growth potential for UNUM Corp. of Portland, Maine, according to Gwain Gillespie, executive vice president of finance and administration.

Gillespie and Sandra Plette, second vice president of investor relations, addressed the Cleveland Society of Security Analysts on Feb. 28.

The financial success of UNUM's core product line, long term disability, will play a major role in achieving the company's goal of 15 percent return on equity (ROE) by the early 1990s, Gillespie said. Other critical factors include risk management, pricing actions, productivity gains, corporate development activities such as share repurchase, dividend policy acquisitions and international expansion, and innovative products.

''The U.S. civilian labor force includes about 117 million people. Only about 21 million of those people have some sort of disability income protection. Even by conservative estimates of total market potential, there is tremendous room for further penetration,'' Gillespie said.

He estimates that between 55 and 60 percent of new long term disability insurance is being sold to organizations which have never had long term disability insurance before.

UNUM is also focusing on opportunities in the short term disability market which replaces income before long term disability coverage begins, Gillespie said.

''Having a better grasp of short term disability claims stretches the period during which UNUM risk management specialists can influence a

potential long term disability claim,'' Gillespie said. ''The earlier we can bring that expertise in, the better we can manage claims. The end result is the employer's costs stay down.''

UNUM's acquisition of Thomas L. Jacobs of Chicago in 1989 has already provided substantial benefits, including increasing UNUM's disability database by 30 percent to include over four million covered people. Thomas L. Jacobs, a third party administrator, has added both claims expertise and new sales to UNUM's short term and long term disability business.

In mid-1989 UNUM added a new long term disability product called the ''Mini-Plan.'' After only six months on the market, more than 500 Mini-Plan cases were sold. Mini-Plan is targeted at small companies with two to 10 employees -- one of the fastest growing employer groups for the 1990s.

A particularly significant opportunity lies within the long term care market, which UNUM entered two years ago. Unlike other plans which pay for specific services rendered, UNUM's long term care plan pays a fixed dollar amount. ''This provides individuals with desired and needed flexibility in dealing with their loss of the ability to perform certain activities of daily living,'' Gillespie said.

In reviewing historical financial performance, UNUM's head of investor relations, Sandra Plette, noted that UNUM has an established pattern of premium growth in the ongoing lines of business. Compound annual growth rates of premiums in the major insurance lines range from 9 percent to 13 percent per year over the last five years.

Regarding UNUM's invested assets, Plette said UNUM maintains a high quality portfolio, with about 60 percent in bonds, 27 percent in mortgages and 6 percent in stocks. ''Only 2.7 percent are below-investment-grade bonds,'' Plette remarked, ''most of which were investment grade at the time of purchase, but were subsequently down-graded.'' Mortgages were reported to be well-diversified across the nation with ''only 10 percent in New England and 9 percent in the oil-patch states.

''UNUM manages its assets in accordance with its liabilities,'' Plette explained. ''The bond portfolio currently has an average life of about six years and new cash flow is being invested mostly in the public and private bond market, in high quality issues.''

UNUM Corp. (NYSE:UNM) is a specialty insurance holding company with $8.6 billion in assets. Headquartered in Portland, Maine, UNUM is the nation's leading provider of group long term disability insurance and a major provider of employee benefits and individual disability insurance. The company also markets retirement income and long term care products.

     #90059b0791 02/28/1990 ~Business Wire
WESTBOROUGH, MA. (FEB. 28) BUSINESS WIRE - New England Power Co. (NEP) Wednesday proposed a voluntary agreement with the Connecticut River Atlantic Salmon Commission (CRASC) to promote the downstream migration of Atlantic salmon.

This agreement is the outgrowth of recent discussions between NEP and CRASC. According to the proposed agreement, NEP will continue to work with CRASC to develop and implement plans for three of the company's hydroelectric stations on the Connecticut River to ensure safe downstream passage of the fish around each station's powerhouse.

The three hydroelectric stations covered by the agreement are Wilder, Vernon, and Bellows Falls.

John F. Kaslow, president of NEP, said ''New England Power has been the leader in the restoration of Atlantic salmon to the Connecticut River. Beginning in 1979, we have constructed fish ladders at three power stations to promote safe upstream migration, and since the mid 1980s, we have been conducting research experiments to determine the best method to protect salmon in their downstream migration. This agreement sets goals for NEP to provide downstream fish passage consistent with dates adopted by CRASC.''

According to the agreement, NEP proposes to commence construction of fish

diversion systems at Vernon and Bellows Falls Stations in 1993. At Wilder Station, NEP proposes to develop a gate spillage plan to ensure that Atlantic salmon smolts are by-passed around the station's powerhouse. NEP intends to provide downstream passage at all three stations in time for the 1994 downstream migration period.

Prior to construction, NEP will continue its research and development studies to ensure that the optimal downstream fish migration systems are installed.

''Restoring the Atlantic salmon population to the Connecticut River has been a dream of conservationists and the mission of CRASC for many years. This agreement sets the stage for this dream to become a reality. We are proud to play our part in helping to restore the salmon,'' Kaslow said.

NEP owns and operates 21 electric generating stations throughout New England, including 14 hydro-electric stations in New Hampshire, Vermont, and Massachusetts.

#90059b0794 02/28/1990 ~Business Wire
COLUMBUS, OH (FEB. 28) BUSINESS WIRE - MERET Inc. (NASDAQ:MRET) reported net income of $135,187, or 1 cent per share, for its second quarter ended Jan. 31, 1990, compared to net income of $130,787, or 2 cents per share, for the like quarter last year.

Total revenues for the Jan. 31, 1990 quarter were $3,223,361 compared to $2,451,069 for the second quarter last year. For the first six months of fiscal 1990, net income was $90,399, or 1 cent per share, on revenues of $5,719,558, compared to net income of $159,862, or 2 cents per share, on

revenues of $4,918,092 for the 6-month period ended Jan. 31, 1989.

The 31.5 percent increase in second quarter revenues compared to the same period a year earlier, is principally due to the revenue contribution from the company's design production and implementation business. This service was not provided by the company during the first six months of fiscal 1989. Net income for the quarter, however, was only slightly up compared to last year due to the increase in selling, general and administrative expenses associated with new sales and marketing offices in New York, Seattle and London, as well as start-up expenses incurred in connection with the company's business of franchising convenience stores on college campuses.

Commenting on the second quarter results, Meret Chairman Bruce W. Krysiak said, ''We are pleased that the company was able to rebound from a first quarter loss to report a profitable second quarter that was up slightly over the second quarter of last fiscal year. Although the second quarter results were somewhat negatively impacted by the expenses associated with additional office locations and new business opportunities, we feel the investment in these growth efforts are essential in the long-term interests of the company.''

Meret operates Retail Planning Associates, one of the world's largest retail consulting and design firms.

FORT LAUDERDALE, FL (FEB. 28) BUSINESS WIRE - Guardian Savings and Loan received authorization from the State Comptroller's Office Wednesday for conversion to a commercial bank allowing the Fort Lauderdale based thrift to be the first independent savings and loan in the State of Florida to receive approval to convert to a state chartered commercial bank.

Geoffrey C. Warner, chief executive officer stated that the anticipated conversion is expected to be finalized by late spring allotting time for technical requirements to be satisfied and coordinated with a planned corporate headquarters move to Boca Raton.

Warner further stated that Guardian's conversion to a state chartered commercial bank will allow Guardian to operate as a bank with expanded services including capabilities to service business accounts.

Alan S. Becker, chairman of the board stated that Guardian's positioning as the first independent savings and loan to receive commercial bank conversion approval, is a reaffirmation of Guardian's conservative operational philosophy and strength of management which has paved the way for continued growth in today's rapidly changing financial market place.

CHARLOTTE, NC (FEB. 28) BUSINESS WIRE - The board of directors of North Carolina Federal Savings and Loan Association (''North Carolina Federal'') a wholly owned subsidiary of NCF Financial Corp. (ASE: NFC), Wednesday reported they have been notified by the Office of Thrift Supervision (''OTS'') that North Carolina Federal's Capital Restoration Plan (the ''Plan'') originally filed with the OTS on Jan. 6, 1990 has been disapproved.

The OTS indicated this disapproval resulted primarily because the plan did not demonstrate that North Carolina Federal would be able to

comply with regulatory capital standards by Dec. 31, 1994. As a result of

the OTS' disapproval of the plan, North Carolina Federal is prohibited from increasing its asset size and remains subject to a number of special operating guidelines under its Dec. 1, 1989 consent agreement with the OTS as well as regulations imposed by existing federal laws.

Management does not expect the Plan's disapproval to cause a substantial restriction in the current business operations of North Carolina Federal or its subsidiaries, and management is not aware of any further action contemplated by the OTS at this time.

Notwithstanding the Plan's disapproval, the board and management of North Carolina Federal continue to seek alternatives to restoring the company to profitability and capital compliance.

NCF Financial Corp. is a savings and loan holding company whose subsidiary North Carolina Federal Savings and Loan Association, is a federally chartered, FDIC-insured stock savings and loan association headquartered in Charlotte. North Carolina Federal conducts business through 15 branch offices in North Carolina.

Customer deposits at North Carolina Federal are insured up to $100,000 by the Federal Deposit Insurance Corp. (FDIC), and backed by the full faith and credit of the United States Government. The common stock of NCF Financial Corp. is traded on the American Stock Exchange under the symbol ''NFC.''

#90059b0831 02/28/1990 ~Business Wire

BILLERICA, MA (FEB. 28) BUSINESS WIRE - Davox Corp. (NASDAQ-NMS:DAVX) Wednesday introduced the CAS 2000, the most powerful predictive dialing system it has ever offered.

Designed for very large, high-volume outbound calling applications, the CAS 2000 supports up to 128 phone lines and 64 agent workstations, while delivering roughly 20 percent greater processing performance than the company's existing CAS 1000 unit.

The system also offers substantially improved call list management tools and enhanced remote diagnostic capabilities. Installed CAS 1000 units can be field-upgraded to the CAS 2000 performance level via an upgrade kit.

Used in applications such as credit card collections and telemarketing, the CAS 2000 boosts outbound dialing productivity dramatically by placing calls simultaneously over multiple phone lines, directly from the user's data files.

It detects and processes unanswered calls without agent intervention and instantly routes only answered calls, together with a corresponding data display, to an available workstation agent. All call attempts are maintained in an event log for use in management reports that track dialer and agent activity.

''The CAS 2000 has a more powerful multiprocessor architecture compared to the CAS 1000,'' said Daniel A. Hosage, Davox president, chairman and chief executive officer. ''For users, this advancement allows for greater system size, increased throughput and vastly increased data management tools for added operational flexibility and control of call lists.''

The CAS 2000 is available immediately. Typical prices range from $159,000 for a 16-line, 8-agent configuration up to more than $1 million for a 128-line, 64-agent system. The upgrade kit existing CAS 1000 users sells for $70,000.

Davox develops, produces and markets Computer Aided Communications systems which include predictive dialing, interactive voice response and multifunction workstation systems. These products automate and integrate telephone and data communications functions in applications such as collections, telemarketing and customer service.

BRENTWOOD, TN (FEB. 28) BUSINESS WIRE - Comdata Corp. (NASDAQ/NMS:CMDT) Wednesday announced the appointment of Louis A. Molettiere Jr. as senior vice president in its Transportation Services Division.

According to David B. Wolverton, president of the division, Molettiere's responsibilities include supervising sales for Transportation Services -- a division that provides funds transfer, cash advance, return trip loadmatching, telephone services, management reporting and information services to the trucking industry.

''We are happy to have Lou Molettiere as the leader of our sales team,'' Wolverton said. ''His extensive experience and education in electronic communications are a tremendous help to our staff. His talent is an asset that will help us build on our tradition of finding creative and

cost-effective solutions for our clients.''

Molettiere joins Comdata after a 21-year career with AT&T. During his tenure with the company, he held assignments in operations, engineering, public relations, personnel, and numerous assignments in marketing and sales management. Most recently Molettiere served as the General Marketing Manager at AT&T's Tennessee headquarters in Nashville.

Molettiere is a graduate of Fairleigh-Dickenson University in New Jersey with a Bachelor of Science degree in operations research and an M.B.A. in marketing and management and information systems. He attended the Aspen Institute in Aspen, Colo., a special program covering social issues in management.

Comdata Transportation Services is a leading supplier of funds transfer, cash advance, permits, check guarantee and telecommunication services to the transportation, retail and leisure industries.

#90059b0843 02/28/1990 ~Business Wire
CINCINNATI (FEB. 28) BUSINESS WIRE - Charles S. Mechem Jr. announced Wednesday that he will step down as chairman and chief executive officer of Great American Broadcasting effective at the company's annual stockholders meeting in May.

At that time he will become chairman of the executive committee of Great American Broadcasting. At the same time Mechem will join the law firm of Taft, Stettinius and Hollister in an Of Counsel capacity. Mechem was a partner in that firm when he was named chairman and chief executive of Taft Broadcasting Co., Great American's predecessor, in December 1967.

George E. Castrucci, who presently serves as president and chief operating officer of Great American Broadcasting will succeed Mechem as chief executive officer of Great American Broadcasting. Castrucci has been with the company for 26 years. He served as chief operating officer of Taft Broadcasting from July 1986 until its merger into Great American Broadcasting. Before that he was executive vice president and chief financial officer of Taft Broadcasting.

Mechem stated: ''In September of this year, I will be 60 years old and will have served as CEO of Taft and Great American for 23 years. I have been contemplating this move for some time and I believe now is the proper time for these changes to occur. I am delighted to continue my association with Great American Broadcasting as chairman of the executive

committee. I have spent most of my adult life with this company. I have great respect and affection for my colleagues at Great American and our principal stockholders, American Financial Corp. and the Lindner family.

''I'm glad to be able to continue to have a role in Great American Broadcasting's future. I'm also very happy to be able to rejoin my old friends at Taft, Stettinius & Hollister where I spent nine wonderful years. I feel especially fortunate to be able to be associated -- at the same time -- with the only two organizations for which I have worked.''

Great American Broadcasting is a wholly-owned subsidiary of Great American Communications Co. Great American Broadcasting owns 11 FM and six AM radio stations and five network-affiliated television stations in the top 50 markets. Its additional interests in animated film and video production and distribution include ownership in Hanna-Barbera Productions Inc. Great American Communications trades on the NASDAQ under the symbol GACC.

PRINCETON, NJ (FEB. 28) BUSINESS WIRE - Church & Dwight Co. Inc., (CRCH) Wednesday announced the appointment of William C. Egan III, 44, to the newly created post of president, Arm & Hammer Division.

Egan will be responsible for managing the company's expanding Arm & hammer consumer product lines which include baking soda, laundry detergents,

carpet deodorizers, and dental care products.

He reports to Spencer J. Volk, president and chief operating officer. Egan had been president of Johnson & Johnson Baby Products Co., a division of Johnson & Johnson, where he held various general management and consumer marketing posts during the last 16 years.

Egan is a graduate of Trinity College and received an MBA from the J.L Kellogg Graduate School of Management at Northwestern University. A Princeton resident, he and his wife Pauline have five children.

Church & Dwight Co. Inc., the world's largest producer of sodium bicarbonate, maintains its corporate headquarters and research and development center in Princeton.

MONTREAL (FEB. 28) BUSINESS WIRE - North American Vaccine Inc. Wednesday announced the closing of its transactions with American Vaccine Corp. (''AMVAX'') and IAF BioChem International Inc. (''BioChem'').

The shareholders of AMVAX voted to exchange their AMVAX shares for NAVA shares with the result that the AMVAX shareholders receive in the aggregate 50 percent of the outstanding shares of NAVA.

BioChem transferred certain vaccine technologies and related assets along with approximately $10 million (U.S.) comprised of 50 percent cash and 50 percent common shares of BioChem in exchange for NAVA shares, options, and warrants representing 50 percent on a fully diluted basis of the total shares of NAVA.

NAVA has 9,343,542 common shares and 2 million convertible preferred shares outstanding.

NAVA combines the complementary technologies and skills of AMVAX and BioChem. AMVAX provides its bordetella pertussis (whooping cough) vaccine technology, significant development and manufacturing expertise as well as a state-of-the-art manufacturing facility.

BioChem provides conjugate vaccine technologies applicable to a number of new generation vaccines including those for the prevention of meningococcal, pneumococcal and haemophilus influenzae and rights to certain other vaccine-related technology and assets.

NAVA is a Canadian company headquartered in Montreal with research and manufacturing operations and corporate offices in Prince Georges County, Maryland. NAVA will be listed on the American Stock Exchange with trading to commence Mar. 1, under the symbol NVX.WI.

BioChem is an innovative Canadian pharmaceutical company specializing in the research, development and manufacture of high quality products for the prevention, treatment and detection of diseases involving the immune system.

Based in Laval and Montreal, Canada, IAF BioChem is a public company whose shares are traded on the Montreal and Toronto stock exchanges (Symbol:BCH).

PRINCETON, NJ (FEB. 28) BUSINESS WIRE - Church & Dwight Co. Inc. (NASDAQ:CRCH), manufacturers of ARM & HAMMER products, reported that for the year ended Dec. 31, 1989 earnings amounted to $8.6 million, or 42 cents per share, after a charge of 44 cents per share resulting from the previously announced disposition of certain businesses.

Without the latter charge, earnings for the year would have been 86 cents per share. This compares to $16.5 million, or 75 cents per share, in the previous year. Sales were $387.6 million, an increase of 12 percent above the prior year.

For the fourth quarter of 1989, the company reported a net loss of $2.7 million or 13 cents per share. Restructuring charges amounted to 34 cents per share in the quarter.

Without these charges earnings would have been 21 cents per share. This compares to net income of $2.9 million, or 14 cents per share, in the fourth quarter of 1988. Sales for the quarter increased by 11.2 percent over 1988 to $101 million.

The results of the year and fourth quarter were in line with preliminary estimates announced earlier.

AUSTIN, TX (FEB. 28) BUSINESS WIRE - Healthcare International Inc. (ASE:HII)(PSE:HII) Wednesday announced that it has reached an agreement in principle with Concept Health Group Inc. to sell its 203-bed acute-care hospital and related medical office complex in Tustin, Calif.

Sale of Healthcare Medical Center of Tustin is scheduled to occur in mid-summer. However, responsibility for operating the facility is scheduled to be transferred to Concept within the next month.

The sale is subject to definitive documentation and to a number of third-party consents, including the consent of HealthVest, which holds a mortgage on the facility.

Jean Smith, Healthcare's president, said, ''While the proposed sale price is less than the amount of the mortgage on the facility and the sale would therefore generate no cash to the company, disposition of this facility is an important part of Healthcare's restructuring plan. The proposed sale would relieve the company of substantial debt, and it would be another step toward reducing or eliminating Healthcare's presence in the acute-care market.''

Healthcare International provides a wide range of health care products and services to both local and national markets through 24 facilities in 7 states. The company's Class A common stock is listed for trading on the American and Pacific Stock Exchanges under the symbol HII.

SHEET METAL WORKERS NATIONAL PENSION FUND OWNS 9,351,489 SHARES (65.90%) OF CHRONAR CORP (TICKER: CRNR) OF HARBERT SOLAR INC..

ANNOUNCEMENT:

On Jan. 26, 1990, NPF received warrants to purchase 186,000 shares at $2.64 each before Oct. 30, 1999 in consideration for its limited guarantee of certain obligations of Chronar under a credit agreement with Midlantic National Bank.

On Jan. 31, Chronar and certain of its subsidiaries entered into a 1990 credit agreement with Midlantic through which NPF, Harbert Solar, and Harbert International Inc. agreed to extend limited guaranties of certain obligations of Chronar arising under the 1990 credit agreement.

In connection with the agreement, NPF, the Harbert companies (Harbert), and Chronar entered into a second amendment to a financing supplement on the same date.

Under the terms of this agreement, NPF and Harbert agreed to extend supplemental guaranties described in the original financing supplement for four months.

In exchange for the extension, Chronar agreed to issue 666,000 warrants to NPF and 222,000 to Harbert on Jan. 31 instead of in periodic installments.

The warrants are exercisable before Feb. 1, 2000 at $2.64 per share.

Concurrently with the additional guaranties, certain creditors and Chronar amended a debenture agreement with Chronar Ltd. to reflect the amended credit agreement.

SEC - AMENDMENT NUMBER: 23

ANNOUNCEMENT:

Sutton and DeSoto are discussing terms of a confidentiality agreement concerning information about DeSoto that it may provide to third parties in connection with DeSoto's previously-announced exploration of means to maximize shareholder value.

On Feb. 23, Sutton notified DeSoto of Sutton's intent to propose an amendment to DeSoto's bylaws which would increase the size of the board to 13 members and to designate nominees for election as directors at the 1990 annual meeting.

-30- 494
#90059c0054 02/28/1990 ~Comtex

STAMFORD, CT (FEB. 28) COMTEX - Molex Inc. of Lisle, Ill., has acquired 19.4 percent of Beta Phase Inc., the Menlo Park, Calif., manufacturer of electronic components that has granted Molex rights to certain electronic connector technology.

The Feb. 1 agreement grants Molex a worldwide co-exclusive license to certain electronic connector technology Beta Phase now owns or may develop prior to Jan. 31, 1996, as well as an exclusive, two-year license to distribute, market and sell electronic connectors using Beta Phase technology in countries other than the United States, according to a filing with the Securities and Exchange Commission.

If certain financial targets are met by June 30, 1990, Molex agreed to pay a $1 million royalty advance.

If the advance is made, Beta Phase will be required to issue Molex a warrant to buy 3 million common shares at an exercise price of 30 cents a share.

In addition, Molex bought 716,666 series C preferred Beta Phase shares for $1.1 million.

The preferred shares are convertible into common shares at 30 cents each and, if converted, would give Molex 19.4 percent of Beta Phase's outstanding common shares.

As part of the deal, Molex's director of new ventures, Thomas S. Lee, will become a Beta Phase director.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 27, 1990

MINNEAPOLIS EMPLOYEES RETIREMENT FUND OF MINNEAPOLIS, MN OWNS 193,300 SHARES (8.60%) OF GRI CORP (TICKER: GRR) OF CHICAGO, IL.

ANNOUNCEMENT:

Minneapolis, Mr. Friedman and Mr. Zimmerman agreed to vote their shares to elect Zimmerman to the board of GRI at the annual meeting held on May 11, 1989.

On March 28, 1989, GRI filed a lawsuit seeking to block the nomination of Zimmerman that was then settled on Feb. 15, 1990.

In the settlement, Zimmerman agreed to sell his shares and refrain from purchasing any shares until Feb. 8, 1997, at which point he may also be nominated to the board.

Minneapolis no longer has any agreements with Friedman or any other person with respect to its shares.

#90059c0099 02/28/1990 ~Comtex
WASHINGTON (FEB. 28) COMTEX - Is the practice of providing soft drink equipment to fountains and restaurants free of charge or at reduced rates anti-competitive or merely a form of creative competition?

A bill sponsored by Sen. Daniel Inouye (D-HI) would prohibit soft drink manufacturers from engaging in the sale of dispensing equipment or soft drink syrup to induce retailers to purchase syrup from it, to the exclusion of other sellers, through certain promotional practices.

The bill is aimed primarily at Coca-Cola Co. and PepsiCo Inc. which together control approximately 85 percent of the fountain syrup market.

The Federal Trade Commission said it opposes the legislation and believes that the discounting policies the bill aims to prohibit are, in most cases likely to be proconsumer and not anticompetitive.

"The offer of dispensing equipment or other consideration is a form of a discount from the price at which soft drink syrup is sold to retailers, and therefore is a form of price competition," said Mary Lou Steptoe, the FTC's Deputy Director, Bureau of Competition. "The fact that the discount sometimes takes the form of providing dispensing equipment at no separate charge is a creative alternative to direct price competition."

The FTC is also concerned about the procedural precedent that this bill might set.

"Most antitrust laws are expressed in terms of general principles ... to incorporate into the antitrust statutes an industry-specific directive could introduce great rigidity into our national competition policy, and would be contrary to the approach that has customarily guided that policy in the past," Steptoe said.

However, many independent distributors and bottlers believe that if this legislation is not enacted, they will be driven out of business and the consumer will ultimately suffer through higher prices.

"I take exception to the FTC speaker," said Douglas Damon, president of Damon Distribution Co. "I was run out of business by these unfair trade practices. I was formerly in the business of manufacturing generic syrups and leasing, selling and renting fountain equipment. If Coke and Pepsi provide equipment to fountain vendors, they demand that the customer use their respective syrup products. This locks me out."

"We cannot compete with free equipment, we cannot compete with small margins on syrup and still cover our overhead," added Brook Jason,

president of Jason Soda Systems Inc. "Why should we have to compete with these grossly unfair trade practices when everything they stand for is unjust?"

The National Soft Drink Association (NSDA), the national trade organization representing the soft drink industry opposes the legislation.

"We are not here today because consumers are paying inflated prices for soft drink beverages at retail food outlets," said John Webster, a Pepsi-Cola bottling executive testifying on behalf of the NSDA. "We are here for one reason only. A few people want to use the government and public policy to guarantee them a market. The fact is this market is available to them -- if they choose to compete."

"If Congress does not grant relief, not only will our businesses suffer but consumers will too," Damon countered. "Coke and Pepsi will be the only ones left and syrup costs will rise."

"The business of the restauranteur is to be aware of the desires of consumers," said Mark Gorman, representing the National Restaurant Association, which is opposed to the bill.

"But under practice, doesn't this usually mean providing Coke or Pepsi?" Inouye responded.

"Yes sir," Gorman said.

Sen. Larry Pressler (R-SD) complained that when attending business functions, he can never get a Diet 7-Up, only Diet Coke or Diet Pepsi.

Richard Wach, the vice president of the fountain division of the Dr. Pepper/7-Up Companies, told Pressler that enactment of the legislation will make it easier to obtain a wider variety of soft drink brands.

"We believe that foodservice operators should make their decisions on the merits of the brands, as reflected in customer appeal, not on the basis of attractive equipment deals," Wach said.

"The two principal brands manufactured by Dr. Pepper/7-Up are among the ten most popular consumer soft drinks in the United States," Wach added. "Yet it is often difficult to sell our product to foodservice operators -- despite this consumer demand -- because of the operators' commitments made in obtaining equipment from the major soft drink companies in the industry."

#90059c0111 02/28/1990 ~Comtex

WASHINGTON (FEB. 28) COMTEX - The 10-Q report filed at the NASD shows Renaissance GRX Inc. lost $1.08 million, or $0.17 per share, on revenues of $4.60 million for the quarter ended Dec. 31, 1989.

This compares with losses of $1.03 million, or $0.16 per share, on revenues of $10.95 million for the same period in 1988.

-30- 480

#90059c0112 02/28/1990 ~Comtex

WASHINGTON (FEB. 28) COMTEX - The 8-K report filed at the SEC shows on Feb. 5, 1990, First Golden Bancorp. announced that it seeks to completely refinance two lines of credit from First Interstate Bank of Oklahoma. Those credit loans, a term loan with an outstanding balance of $2.01 million and $375,000 drawn on a $500,000 line of credit, will mature on July 13, 1990.

A breech of agreement on these loan occurred Dec. 31, 1989 in connection with losses sustained by First Golden Bancorp.

According to the 8-K filed on Feb. 5, 1990, First Golden Bancorp. is currently negotiating with other finacial institutions for a complete refinancing of these debts.

#90059c0177 02/28/1990 ~Comtex

STAMFORD, CT (MARCH 1) COMTEX - Corvus Systems Inc., a San Jose, CA, company in bankruptcy proceedings, will oppose a proposed reorganization plan filed by Berg and Berg Industrial Developers, a general partnership that is a secured creditor, according to a filing with the Securities and Exchange Commission.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 28, 1990

-30- 551

#90059c0178 02/28/1990 ~Comtex

STAMFORD, CT (MARCH 1) COMTEX - Shareholders of Rykoff-Sexton Inc. filed suit against the Los Angeles company Feb. 12 asking for class-action status and alleging that the company made false and misleading statements in financial disclosure forms released to the public.

The suit was filed in the U.S. District Court for the Central District of California and names two officers and the company, according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 28, 1990

-30- 677

#90059c0179 02/28/1990 ~Comtex

STAMFORD, CT (MARCH 1) COMTEX - Middleby Corp. of Morton Grove, IL, sold its Southern Equipment Co. division of St. Louis to a company called Southern Acquisition Co. of St. Louis for $7.9 million and the assumption of certain liabilities.

The unit manufactures custom fabrications and ventilations for the food-service industry.

It was acquired by Middleby July 14 from Hussman Corp., according to a Securities and Exchange Commission filing.

The cash proceeds from the sale of the units were paid by Middleby to Citibank N.A., the lender of the funds for the Hussman acquisition, to reduce the acquisition loan.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 28, 1990

#90059c0180 02/28/1990 ~Comtex

STAMFORD, CT (MARCH 1) COMTEX - Cerritos, CA-based Cardis Corp. sold its Tuneup Masters Inc. unit to Xpert/TUM Acquisition Inc. Feb. 13 for $55.95 million as part of its reorganization plan, which was confirmed by the U.S. Bankruptcy Court on Nov. 27.

Cardis acquired Tuneup Masters in July 1986, according to a filing with the Securities and Exchange Commission.

The proceeds from the sale will be distributed directly to Dresdner Bank A.G., New York Branch, Anthony Granatelli and Jerry Dres, under the reorganization plan.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 28, 1990

-30- 763

#90059c0181 02/28/1990 ~Comtex

STAMFORD, CT (MARCH 1) COMTEX - Sinking Spring, PA-based Hofmann Industries Inc. completed a self-tender offer Jan. 10, acquiring 1.3 million of its own common shares for $8.25 each.

As a result of the self-tender offer, the Hofmann family and the company's officers increased their stake in the company to 86.1 percent from 31.2 percent, and the American Stock Exchange plans to delist the stock, according to a filing with the Securities and Exchange Commission.

Lancaster, PA-based Hamilton Bank and Meridian Bank of Reading, PA, provided credit to finance the tender offer and to refinance the company's existing debt.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 28, 1990

-30- 883

#90059c0182 02/28/1990 ~Comtex

STAMFORD, CT (MARCH 1) COMTEX - Hollywood, FL-based Associated Mortgage Investors and its wholly owned subsidiary, AMI Sub Holdings Inc., filed for protection under Chapter 11 of the U.S. bankruptcy laws Feb. 11, according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 28, 1990

-30- 509
#90059c0184 02/28/1990 ~Comtex
STAMFORD, CT (MARCH 1) COMTEX - Los Angeles-based Verit Industries has completed the acquisition of all the stock of Emerald Homes SGP Inc., 50 percent of the stock of Emerald Homes Inc. and 50 percent of the stock of Emerald ALP Inc.

Emerald SGP and Emerald Inc. are the general partners of Emerald Homes L.P., which designs, builds and markets single family homes in the San Francisco, San Diego, Houston and Phoenix areas, according to a Securities and Exchange Commission filing.

Emerald SGP owns 24 percent of the outstanding units of Emerald Homes L.P.

To acquire the stock, Verit issued 20,000 of its series A preferred shares and warrants to buy another 250,000 common shares at $4 each to Philip L. Polich.

In addition, Verit acquired 56 percent of the common shares outstanding of Iroquois Brands Ltd., a maker of mechanical handling equipment and power tools, on Feb. 12 in exchange for 155,292 of its series A preferred shares.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 28, 1990

TEHERAN (FEB. 28) - Iranian authorities have rounded up 530 suspected drug smugglers and 4,863 addicts since Saturday, Teheran Radio reported Wednesday.

Urban militiamen were in charge of the week-long operation, codenamed Zafar-1 (victory), and they seized 2,360 kilos (5,190 pounds) of narcotics the report said.

The militia, known as the Komiteh, was deployed at more than 1,000 strategic points in Teheran as well as desert and border regions of the country in a drive to curb trafficking.

Some 1,034 people found guilty of smuggling have been executed in Iran since stringent anti-drugs laws came into force January 1989. Addicts are sent to labour camps for cures.

THE HAGUE (FEB. 28) - Jan Timmer, chairman of Philips Consumer Electronics International, is expected to succeed Cor van der Klugt as head of the Dutch electronics giant NV Philips in July next year, the company announced here Wednesday.

Mr. Timmer's nomination will be submitted to a meeting of share holders, a company communique said. Mr. van der Klugt is to retire.

Swiss Thierry Meyer, who heads the company's French branch, will take over from Mr. Timmer and be appointed a member of the Philips International group management committee and chairman of the consumer electronics division on April 1. He is to take over Philips Consumer Electronics International on July 1.

Financial director Pierre Steenbrink is to replace Mr. Meyer at the top of the company's French branch.

The changes were announced on the eve of the Eindhoven-based group's results for 1989.

According to the financial paper Het Financieele Dagblad, last year's net profits will be "considerably higher"" than in 1988 and could be expected to total between 1.4 and 1.6 billion guilder (736-841 million dollars), up from 1.05 billion guilder (552 million dollars) in 1988.

On January 8 Philips announced a consolidated turnover of 57 billion guilder (29.9 billion dollars) last year against 56 billion guilder (29.4 billion dollars) in 1988.

LONDON (FEB. 28) - Cocoa prices rose sharply on the London futures market Wednesday, reaching their highest level in three and a half months, following cover buying due to a tightening of supply, analysts said.

At midday, prices were up 26 pounds ($43.3) a ton over Tuesday's closing levels, to 677 pounds for May delivery, their highest level since mid-November.

Availability had been tighter recently due to a slowdown in sales by producer countries and good demand, said Lawrence Eagles, an analyst with brokers GNI.

Disease affecting Brazilian cocoa plantation and social unrest in several West African producer countries, including Ivory Coast, the world's largest producer, had helped spark cover buying. But Eagles said it would be premature to talk about a reverse in the downward trend of the cocoa market.

There was no significant change in fundamental market trends, he said, with offers and stocks remaining high, and no durable price increase could be expected until production were reduced.

The latest estimates published by London brokers Gill and Duffus predict

that world cocoa stocks will reach a record 1.3 million tons at the end of the current season, which ends in September, with production outstripping consumption by some 205,000 tons.

Even at Wednesday's high levels, cocoa prices are still only 54 pounds a ton above the December level, when heavy selling by producer countries pushed them down to 623 pounds a ton, their lowest in more than 14 years.

KATHMANDU (FEB. 28) - Police arrested more than 200 students and fired tear gas to disperse hundreds of protestors Wednesday in Lalitpur, just south of Kathmandu, a student source said.

Hundreds of riot police were deployed in the tourist town 16 kilometres (10 miles) from here to try to prevent the students holding a public meeting to protest Nepal's partyless political system.

About 500 students marched from nearby Shiphal and headed towards the centre of Lalitpur, but were stopped by riot police wielding batons and tear gas.

The marchers set fire to an effigy of the Panchayat, the kingdom's political system of councils under which political parties are banned.

Witnesses said riot police seriously beat two students carrying banners of the banned parties.

No official figure for the number arrested has been released.

Wednesday's protest was called by the Democratic People's Movement Students Coordination Committee in advance of a planned general strike Friday when banned party supporters and students intend a show of strength in a bid to compel the government to negotiate.

Meanwhile, government chief spokesman Radhe Shyam Bista announced the release of 169 people arrested in the past 78 hours in connection with protests in and around Kathmandu.

Mr. Bista did not reveal the total number of people detained after the anti-Panchayat demonstrations.

LONDON (FEB. 28) - International electronics major Sharp Corporation of Japan is to establish an optoelectronics and information technology

research laboratory at Oxford University's new Oxford Science Park in Southern England.

The facility, named Sharp Laboratories of Europe Ltd., will employ 30 staff in the early stages, rising to 100 in the future.

It is being financed 75 percent by Sharp Electronics (UK) Ltd. and 12.5 per cent each by Sharp Electronics (Europe) GMBH of West Germany and Sharp Electronics Espana S.A. of Spain.

The Oxford Science Park was recently launched by Oxford University's Magdalen College.

Sharp said it wishes to establish partnerships with British and European research organisations, including universities.

ALGIERS (FEB. 28) - Sixty-seven people have been taken ill with typhoid in the town of Mascara, western Algeria, within two days after drinking water was contaminated by sewage, press reports said here Wednesday.

The daily El Moudjahid said the epidemic started a week ago when a Mascara resident sought to unblock a clogged sewer near his home but instead ruptured the sewerage system.

The town's main fresh water source was littered with garbage and the main drinking water supply was running with waste water, the paper said.

According to another press report, four people suffocated from toxic fumes

in the neighboring town of Relizane when they tried to pick up a child's ball that had fallen into a sewage ditch.

MOSCOW (FEB. 28) - An Intourist guide's job involves a lot more than shepherding around tourists and routinely includes watching foreigners and drawing up reports on them, an employee of the official Soviet tourism agency revealed Wednesday.

"Guides must agree to accept special conditions" when they sign up to work for the organization, Illia Nikonov told the liberal weekly Moscow News.

"Management says our task is to explain to foreigners that we have everything (in the Soviet Union) except problems", said Mr. Nikonov, who translates from Swedish and has worked for Intourist for 13 years.

"Of course, we can mention a few negative details, but the main thing is to explain the advantages of socialism by expressing our personal convictions."

However guides are also expected to make out reports on tourists they meet on organized tours and submit them to "special workers".

Although he did not explain the reference, observers noted the KGB secret police had representatives in all Soviet enterprises.

"I have to tell everything: where a tourist was born, where he works, if he speaks Russian and what he thinks of the Soviet Union."

Tourists should also expect that details such as "what questions he asked, if he knows Russians and if he met them, if he went along on all the tours and if not, where he was" will be reported to so-called special workers.

And finally, "if he was a spy", Mr. Nikonov told the weekly.

However dissidence apparently flourishes even in Intourist, and "some people make a formal report but some try not to do it," said Mr. Nikonov, who classified himself in the second category.

Intourist punished renegades by barring them from trips abroad, which for many Soviets were the main reason they had learned a foreign language.

Until January, guides were barred from giving their address or telephone number to foreigners. "The rules changed, but management warned us: 'You can do it, but we can fire you in 24 hours."

#90059d1640 02/28/1990 ~French/German News Agency
CAIRO (FEB. 28) - Yugoslav President Janez Drnovsek said here Wednesday that his country was seeking to establish consular links with Israel but that a Middle East settlement should come before full diplomatic relations.

"Yugoslavia hopes that a solution to the Middle East conflict will be found in the near future, thus creating the right climate for the normalization of Yugoslav-Israeli relations," Mr. Drnovsek said.

The Yugoslav president, addressing a press conference at the end of a three-day visit to Cairo, said his country was however ready to discuss the setting up of consular ties with Israel.

The Yugoslav news agency Tanjug, in a dispatch from Cairo, said Tuesday that Mr. Drnovsek had informed Egyptian President Hosni Mubarak of Belgrade's decision to restore diplomatic relations with Israel.

Yugoslavia, like all the East bloc countries except Romania, broke off diplomatic relations with Israel after the 1967 Middle East war. But Hungary, Czechoslovakia and Poland have all recently restored ties with Israel.

#90059d1860 02/28/1990 ~French/German News Agency
JERUSALEM (FEB. 28) - Prime Minister Yitzhak Shamir is to meet Friday with his top three ministers to discuss a proposed Israeli-Palestinian dialogue in Cairo, the premier's office announced Wednesday.

Mr. Shamir, Foreign Minister Moshe Arens, Finance Minister Shimon Peres and Defence Minister Yitzhak Rabin are to discuss the possible inclusion in a Palestinian delegation of east Jerusalem residents and Arabs expelled from the Israeli-occupied West Bank and Gaza Strip.

Hardliners in the premier's right-wing Likud bloc are opposed to their participation in the peace process because it could boost Palestinian claims on Israeli-annexed east Jerusalem and the aspiration of exiles to return to the occupied territories.

Mr. Peres, leader of the Labour Party, has warned that his party would pull out of the ruling coalition unless the government endorsed current regional peace efforts.

He said the government should back U.S. proposals for the Israeli-Palestinian dialogue in the Egyptian capital ahead of Mr. Shamir's plan for elections among Palestinians in the occupied territories.

Hardliner Ariel Sharon, who recently resigned as trade and industry ministry because of his opposition to the territories' election plan, has called for another meeting of the Likud central committee to debate the peace process.

Amid mounting pressure on the prime minister, Mr. Sharon announced his decision to quit the government at a stormy meeting of the central committee on February 12.

#90059d2160 02/28/1990 ~French/German News Agency

GENEVA (FEB. 28) - U.N. Western member states envisage putting Chinese human rights violations on the agenda of the next meeting of the U.N. Commission on Human Rights, diplomatic sources said here Wednesday.

A draft resolution submitted to the panel here by about 15 western nations including the 12-member EEC was seen likely to win support from a majority of commission members.

If adopted, the resolution would be the first by the commission to condemn a permanent member of the U.N. Security Council.

The draft says the commission is "concerned at allegations of violations of human rights in China."

Referring to China's condemnation by a U.N. sub-committee on human rights last August -- three months after the army quashed the pro-democracy movement -- the draft says the commission "welcomes the decision of the Chinese government in January 1990 to lift martial law in Beijing and to release 573 persons who had been detained as steps in the right direction."

It also "urges the government to continue to take measures along the same lines to ensure full observance of human rights."

It goes on to call upon Secretary-General Javier Perez de Cuellar "to transmit to the 47th Session of the Commission on Human Rights additional information, including that provided by the government of China."

Mr. Perez de Cuellar told the commission on February 14 that the Beijing government had violated fundamental rights and liberties of Chinese citizens.

In another development, 20 non-governmental organizations called on the commission to name a special rapporteur to probe the human rights situation in Tibet.

#90059d2370 02/28/1990 ~French/German News Agency
TEHERAN (FEB. 28) - Interior Minister Abdullah Nouri on Wednesday dismissed foreign news reports of mounting protests in Iran as being "nothing but silly jokes," the Iranian news agency IRNA reported.

On a recent clash here between football fans and militiamen following the last-minute postponement of two matches because of bad weather, the minister regretted that the fans had not been informed in time.

"Some elements not numbering more than a few hundred tried to exploit the issue by chanting slogans against the football federation officials in protest at the postponement," Mr. Nouri said.

IRNA said 30 people were detained after hooligans stoned passing cars and buildings near a stadium on February 16.

"Since the February 16 incidents, we have had no such problems in Teheran or elsewhere in Iran," the interior minister said at a press conference. "All stories cooked up by the foreign mass media are nothing but silly jokes.

"When we closed down the BBC bureau in Teheran, we should not expect this mercenary radio station to beam facts," he added.

On February 20, Iran closed the British Broadcasting Corporation's office here in retaliation for Britain's expulsion of nine Iranian students earlier this month.

-30- 1446
#90059d2550 02/28/1990 ~French/German News Agency
WASHINGTON (FEB. 28) - The "chances are very slim" that Western hostages being held in Lebanon will be released soon, a U.S. official said Wednesday.

John Kelly, assistant secretary of state for Near Eastern and Asian Affairs, told a House of Representatives subcommittee that the United States was "continuing to press the cause of the hostages" but "chances are very slim" that they would be released soon.

He said he had "a tremendous interest" in an Iranian newspaper's recent call for release of the 17 hostages, including eight Americans.

But, he added, "We will continue to make clear to Iran and those in Lebanon with whom they have influence, that it is not words that count but actions."

The United States has repeatedly asked Iran to use its influence to free the hostages, most of whom are believed to be held by pro-Iranian groups. Mr. Kelly said Syria "could be more helpful" in settling the hostage question.

"The unconditional release of our hostages continues to be a high priority for this administration. We intend to strictly adhere to our no-concession policy," Mr. Kelly said.

#90059d2600 02/28/1990 ~French/German News Agency

LONDON (FEB. 28) - A self-proclaimed assassin for the regime of the late President Marcos of the Philippines was jailed for life here Wednesday for the "human torch" murders of two guards at a London amusement arcade.

The judge recommended Victor Castigador serve at least 25 years.

The trial heard that Mr. Castigador, 35, who pleaded guilty, led a gang that tied up two Sri Lankan guards and two other arcade staff, doused them in white spirit and set them alight.

Two victims survived their injuries.

Mr. Castigador, who came to Britain in 1985 and claimed to have murdered 20 people for the Marcos government in the Philippines, had planned a robbery as a revenge because of a grudge he bore over lack of advancement at a leisure arcade where he had worked as a security guard.

He decided in advance that staff members would have to die because they would recognize him.

Two of the four youths with him on the raid were convicted of murder and attempted murder. One was ordered to be detained for life in a young offenders' institution, the other was sentenced to detention during Her Majesty's pleasure.

Two young women were cleared of murder and attempted murder.

#90059d2610 02/28/1990 ~French/German News Agency

SEOUL (FEB. 28) - Soh Sung, 46, spent 19 years in a South Korean prison, his face badly burned and disfigured, after being arrested for spying for the communist North -- a charge he has always denied.

On the eve of the March 1 holiday commemorating a 1919 uprising against

Japanese colonial rule, Mr. Soh was freed from Taejon prison, some 200 kilometers (125 miles) south of Seoul.

"I wanted to see my relatives and friends waiting outside the prison, but I was whisked through the back gate and driven in a convoy to Seoul," Mr. Soh said. "They did not want me photographed by journalists."

Mr. Soh, a Japanese-born ethnic Korean, was foremost among 22 "leftist prisoners" released on parole or probation on Wednesday.

Mr. Soh was arrested with his brother, Chun-Shik, in March 1971 on charges of spying for North Korea when he was a student at Seoul National University.

His case drew the attention of international human rights organizations including London-based Amnesty International after he tried to commit suicide by throwing himself on an oil stove in an interrogation room at a military intelligence unit.

The incident left his face badly burned and disfigured.

At a press conference at the Foreign Correspondents' Club, Mr. Soh denied a government statement that his suicide attempt had been motivated by a sense that he had betrayed his own brother by cooperating with investigators in anticipation of a lighter sentence.

He said he was kept awake for nights, beaten and threatened by a military dog as he was forced to "confess" his links with then president Park Chung-Hee's arch political rival, Kim Dae-Jung.

"I was under such a painful situation that I wanted to die," roared Mr. Soh, gulping a cup of water and trying to calm himself down.

He was sentenced to life imprisonment and then had his sentence commuted to 20 years in 1988. His brother was given a seven-year sentence which he completed in 1978 but was kept in jail until May, 1988 because he refused to "repent."

Mr. Soh strongly denied the espionage charges that he passed on intelligence to Pyongyang and formed underground rings among students to prepare for an uprising at a critical moment as "nonsense".

He admitted that he once visited Pyongyang but denied he had joined North Korea's ruling Workers' Party. "I went there to see the North with my own eyes. I think of both the North and the South as parts of my fatherland," he said.

He also denied that he was a communist but said he was a nationalist

supporting an early national reunification with the North.

An analyst here said Pyongyang had used ethnic Koreans studying in Seoul to spread anti-government sentiment and calls for reunification with the North among South Korean students.

Mr. Soh said there were 58 "unrepented leftist prisoners" remaining in Taejon prison.

"I know a prisoner who is a devout Christian and convicted of espionage charges. He has been kept there for decades just because he refuses to repent over what he had not done," he said.

Dissidents said there were 165 remaining leftist prisoners who have been imprisoned for a long time and some 800 other "political prisoners."

The government denies there are political prisoners in the country and maintains that it only jails those who break laws dealing with public or national security.

The main thing Mr. Soh found unchanged after his 19 years in prison was the division of the Korean peninsula and tension between the North and South.

"We have to learn from Germany. Reunification requires a spirit of reconciliation and compromise," he said.

NEW YORK, UNITED NATIONS (FEB. 28) - Five countries Wednesday told the United Nations they would contribute humanitarian aid to Cambodian refugees camped in Thailand.

Australia, France, Canada, Malaysia and China said they would provide some 3.5 million dollars to various aid programs benefitting the refugees.

The U.N. Border Relief Organization had forecast a budget of 50.7 million dollars for the Cambodian refugee relief program -- which many officials considered a minimum.

LONDON (FEB. 28) - British journalist Julian Ozanne, detained a week ago in Sudan, is being investigated in connection with activity by the political opposition there, the Foreign Office said Wednesday on the basis of its inquiries.

It had sought explanations from the Sudanese ambassador in London.

Mr. Ozanne works for the Financial Times and the Sunday Correspondent.

According to the Foreign Office, the British embassy in Khartoum has been authorized to visit him in detention.

Sudan returned to military rule last year when a junta ousted civilian prime minister Sadek El-Mahdi.

#90059d3600 02/28/1990 ~French/German News Agency

TOKYO (MARCH 1) - The Matsushita group, Japan's home electronics giant, plans to invest 230 billion yen (1.5 billion dollars) through March 1992 in a plant to manufacture 16 megabit dynamic random access memories (DRAMs), a Tokyo financial newspaper said Thursday.

The Nihon Keizai Shimbun said the parent firm, Matsushita Electric Industrial Co. Ltd., would likely bear all the costs and allow its chip-making subsidiaries to use the new plant on lease.

Matsushita's investment scale is comparable to that of the other leading Japanese semiconductor makers, Hitachi and Toshiba Corp., which plan to spend 100 billion yen (671 million dollars) to mass produce the next generation memory chips.

A Matsushita spokesman, however, refused to comment on the reported investment plan.

-30- 973

#90059d3690 02/28/1990 ~French/German News Agency

TOKYO (MARCH 1) - The capital investment of Japanese corporations will increase by an average 7.3 percent during fiscal 1990 compared to a year earlier, the Industrial Bank of Japan reported Thursday.

The report said the growth will be below the estimate of 19.4 percent for the current, 1989 fiscal year ending on March 31.

The bank's survey found that plant and equipment investment plans for the manufacturing industry in fiscal 1990 are likely to rise 9.3 percent from the previous year, compared with an anticipated gain of 23.4 percent in fiscal 1989.

It also said the effects of the Bank of Japan's three key rate hikes last year and the recent stock market tumbles might force small- and medium-size companies to remain cautious about increasing plant investment.

#90059d7420 02/28/1990 ~French/German News Agency
TOKYO (FEB. 28) - Japan's mammoth trading firm Mitsui and Co. said Wednesday it had decided to promote vice president Naohiko Kumagai to president in a reshuffle after withdrawing from a petrochemical project in Iran.

Mr. Kumagai, 63, is to replace Koichiro Ejiri, who will succeed Toshikuni Yahiro as chairman, the company said. Mr. Yahiro, 75, will serve as a senior adviser to the company, it said.

Mr. Ejiri, 68, told a press conference that the reshuffle was "designed to form a new management lineup on better business performance" after scrapping a petrochemical project between a Mitsui-led Japanese consortium and Iran.

The appointments will be formalized at a board of directors' meeting in late June to follow a shareholders' meeting, he said.

The formal termination of the multi-billion dollar project came in mid-February, with the Japanese partners paying an estimated 130 billion yen (878 billion dollars) in compensation for their withdrawal.

Mitsui is Japan's second largest trading firm after Mitsubishi Corp. and had consolidated sales totaling 14,800 billion yen (100 billion dollars) in the 12 months to March 1989.

The company expects its sales to reach 18,200 billion yen (123 billion dollars) in the current fiscal year ending next month, a Mitsui spokesman said.

#90059d8350 02/28/1990 ~French/German News Agency
KUALA LUMPUR (FEB. 28) - Petronas, Malaysia's national oil company, Wednesday signed letters of intent with BP Plastics Ltd. and Idemitsu Petrochemicals Co. Ltd. to set up two petrochemical plants.

Petronas president Azizan Zainul Abidin said at the signing ceremony that the letters would enable the three partners to begin feasibility studies on the ethylene and polyethylene projects, set up the joint-venture companies and construct the plants.

The ethylene project, estimated to cost 500 million dollars, will be 60 per cent owned by Petronas with Idemitsu, a Japanese company, holding 25 percent and BP Plastics, a unit of British Petroleum PLC, taking the

remaining 15 per cent.

BP Plastics will take up 45 percent of the polyethylene project, expected to cost 300 million U.S. dollars, while Petronas has 40 percent share and Idemitsu 15 percent.

About 70 percent of the funds for the projects would be sourced externally, BP Plastics officials said.

Mr. Azizan said the plants would produce 500,000 tonnes of ethylene and 300,000 tonnes of polyethylene a year mainly for the domestic market when they come on stream in 1995. Any excess would be marketed, he said.

#90059d8760 02/28/1990 ~French/German News Agency

TOKYO (FEB. 28) - Japan's Nippon Telegraph and Telephone Corp. (NTT) said Thursday it expected its ordinary profit to climb 4.9 percent to 430 billion yen (2.87 billion dollars) in the 12 months to March next year.

But the forecast, included in the telecommunication giant's annual business plan for Japan's Post and Telecommunications Ministry, also predicted a 24.1 per cent slide in sales to 5,892 billion yen (39.3 billion dollars).

Capital investment is forecast to rise 1.2 per cent to 1,720 billion yen (11.5 billion dollars) including 1,380 billion yen (9.2 billion yen) to expand and improve services.

Research and development is to account for 107 billion yen (713 million dollars), while the remaining investment was unspecified.

The former government monopoly, which has been one-third privatised in a series of share issues since 1986, is the world's biggest telecommunications concern after American Telephone and Telegraph Inc. of the United States.

AMSTERDAM (FEB. 28) - AMRO, the Netherlands' second largest private bank, said Wednesday its net profit rose 45 percent in 1989 to 849 million guilder (425 million dollars).

Excluding exceptional items, net profit was up 22.7 percent at 721 million guilder, and annual dividend is to rise from 5.2 guilder in 1988 to 5.6 guilder.

Trading in AMRO stock was suspended for an hour and a quarter in Amsterdam

pending the announcement of the annual results. The shares had been quoted at 75.5 guilder Wednesday morning, up from 74.90 at Tuesday's close.

Kathmandu (FEB. 28) - The Asian Development Bank is to provide Nepal with a loan of 51 million dollars for implementing a power project.

An agreement to this effect was signed here Wednesday by the bank's president, Kimimasha Tarumizu, and the Nepalese finance secretary, Sashi Narayan Shah, in the presence of the Nepalese finance minister, Bharat Bahadur Pradhan.

The Adb chief had arrived here earlier in the day.

The present loan will go towards implementation of Nepal's seventh power project to renovate and strengthen the power supply distribution network in the country, particularly the capital.

The Adb has so far provided loans to Nepal totalling some 869 million dollars and last year alone it provided loans totalling 122 million dollars.

#90059d9590 02/28/1990 ~French/German News Agency

LONDON (FEB. 28) - Britain's current balance of payments deficit m than doubled in January over the December level to 1.9 billion pounds (3.1 billion dollars), its highest level since August, it was announced here Wednesday.

The seasonally-adjusted figure was higher than analysts' forecasts of a January deficit of around 1.3 billion pounds (2.1 billion dollars), but officials said the sharp rise was prompted by exceptional factors and the pound and stock market recovered after initial concern.

At one p.m. (1300 GMT), the pound had recovered to its 10 a.m. (1000 GMT) level of 1.6865 against the dollar and had risen to 2.8516 Deutsche marks against 2.8477 at Tuesday's close.

The trade deficit also rose sharply, to 1.98 billion pounds (3.3 billion dollars) from 917 million (1.5 billion dollars) in December, the Central Statistics Office said.

The rise was due to a high level of diamond imports and a fall in aircraft exports, the Office said, but if oil and "erratic" elements were excluded,

exports were four per cent above the average for the past three months and imports one per cent below it.

The invisibles surplus was unchanged from the December level at 100 million pounds (166.6 million dollars).

A downward revision of the December current balance of payments deficit to 817 million pounds (1.3 billion dollars) from 1.12 billion (1.8 billion dollars) had exacerbated the January figure, analysts said.

But "the underlying trend looks very favourable," said Kevin Darlington of UBS-Phillips and Drew, predicting a deficit for this year of 10.2 billion pounds (17 billion dollars), against a Treasury forecast of 15 billion pounds (25 billion dollars).

LONDON (FEB. 28) - British oil company London and Scottish Marine Oil (LASMO) said Wednesday it more than doubled its net profit last year to 60 milion pounds (100 million dollars), up from 28 million (46.6 million dollars) in 1988.

Pre-tax profit was up fivefold to 80.3 million pounds (133.8 million dollars) from 15.8 million (26.3 million dollars), and turnover improved 75 per cent to 263.4 million pounds (439 million dollars).

The company fixed dividend for the year at 11.25 pence, up from 8.5 in 1988.

The results were in line with market expectations and LASMO shares were up seven pence at 626 in mid-session trading.

LASMO, which has interests in the North Sea, said the good result was due to increased oil prices and a firmer dollar.

FRANKFURT, West Germany (FEB. 28) - West Germany's biggest union, the 2.7-million member engineering workers' union IG Metall, said Wednesday it was opening eight offices in East Germany.

"A united Germany needs united, strong and independent unions," said a joint statement from IG Metall president Franz Steinkuehler and the president of IG Metall in East Germany, Hartwig Bugiel.

The new offices will be in East Berlin, Leipzig, Dresden, Karl-Marx-Stadt, Halle, Erfurt, Rostock and Magdeburg. The East German IG Metall has some 1.8 million members.

The West German businessman's federation and industries federation said Wednesday in Cologne that they would be opening an information centre on East Germany in West Berlin on Thursday.

The centre would provide information to West German businesses wanting to set up in East Germany, and would establish contacts with official organisations from both states in the industrial sector.

It would also offer help to East German enterprises wanting to form a business federation.

CAIRO (FEB. 28) - Egypt, which is not a member of the Organisation of

Petroleum Exporting Countries, lowered its oil price Wednesday for the third consecutive time, apparently in response to weak international demand.

No reason was given for the reduction of 60 U.S. cents per barrel, which takes effect Thursday.

The price fell 90 cents in mid-February and a full dollar on February 1. The earlier falls were officially attributed to worldwide oversupply. Egypt fixes its oil price every two weeks.

During January the Egyptians pushed the price up by two dollars. From Thursday, prices will range from 17 dollars a barrel for the grade Suez Gulf to 14.70 dollars for Gharib grade.

UNIONTOWN, OH (FEB. 28) PR NEWSWIRE - The Genie Co., makers of automatic garage door openers, will launch a consumer awareness campaign on automatic garage door system safety this spring.

Beginning in March, consumers will be able to receive Genie's free brochure, "Don't Close the Door on Safety: Taking Care of Your Automatic Garage Door System," by mailing a self-addressed, stamped envelope to Genie.

The brochure, which opens up to a poster suitable for mounting in a garage or work space, reminds consumers of routine, safety-related maintenance that should be performed on garage doors and electric door openers.

"Genie is committed to consumer safety and all our door openers conform to strict safety standards," said President John Gray. "But responsibility for safety does not stop there. That's why we put together this guide --

to tell automatic garage door owners what they need to know and what steps they should take to ensure the continued safe operation of their garage door system."

If not properly balanced, an automatic garage door can exert up to 250 pounds of pressure when it comes down -- enough to cause serious injury and even death. Over the years, a number of automatic garage door-related injuries and deaths have occurred due to carelessness and poor maintenance. Genie's guide offers valuable safety information that can prevent this, including a list of dos and don'ts.

To receive a brochure, consumers should send a self-addressed, stamped envelope to: SAFETY, c/o The Genie Company, 3515 Massillon Road, Uniontown Ohio 44685.

Based in Uniontown, Ohio, The Genie Co. is a manufacturer of garage door openers, wet/dry shop vacuum systems and trash compactors.

SAN BRUNO CA (FEB. 28) PR NEWSWIRE - The board of directors of North Lily Mining Co. (NASDAQ: NLMC), is pleased to announce that the company's management team has recently been augmented by the addition of four senior staff members. Each member was selected for the unique experience and management capabilities they contribute to the company, and their ability to act as a cohesive team to meet North Lily's objectives of growth and expansion. The additions to our management team are briefly introduced

below:

Gary Leighton, Vice-President - International Operations. Leighton is in charge of the company's branch office in Santiago, Chile. A mining engineer, Leighton has over 25 years' international experience in the construction, start-up, and management of coal, copper, aluminum and gold facilities. Prior to joining North Lily Mining Co., Leighton was employed by BHP-Utah International Inc. as manager of engineering and construction for the Escondida mine in Chile.

Alan Fitzpatrick, Vice-President - Project Management. Fitzpatrick is responsible for the supervision and coordination of the company's projects with specific emphasis on those based in South America. A mechanical engineer, Fitzpatrick has over 18 years of experience in industrial construction, engineering and plant operations of facilities based worldwide. Fitzpatrick was recently employed by BHP-Utah International Inc. as mine manager for the Posse Mine in Brazil.

Rauno Perttu, Vice-President - Acquisitions. Perttu spearheads the company's evaluation of properties for acquisition both nationally in internationally. Perttu has a Master's degree in Geology, and 20 years of international experience in mining, exploration and engineering geology. Previously a director of business development with Kennecott Corp., Perttu identified and evaluated development opportunities in the United States, Australia and South America.

George Holcomb, Vice-President - Operations. Holcomb oversees the company's North American projects. A mining engineer, Holcomb has over 30 years' experience in all phases of mine development and management.

In addition, Joseph Milbourne, previously vice president of operations for North Lily, resigned from the company on Feb. 15, 1990.

The board is confident that the recent expansion of the company's management team amply equips North Lily with the potential to meet its objective of rapid growth and development.

HAYWARD, CA (FEB. 28) PR NEWSWIRE - Nellcor Inc. (NASDAQ: NELL) today announced that the U.S. Food and Drug Administration has granted marketing clearance for the NELLCOR(R) N-2500 anesthesia safety monitor.

The N-2500 combines a Nellcor N-1000 multi-function monitor with a Nellcor-designed anesthetic agent analyzer to monitor concentrations of the anesthetic agents present in a patient's breathing circuit.

The N-2500 reduces the risk of anesthetic overdose or misdosage through wrong agents, thereby reducing the risk of serious injury. It offers a considerable advantage over conventional infrared technology because it automatically identifies the anesthetic agent without user intervention. Commercial shipments of the N-2500 have begun in Europe, and volume shipments in North America are scheduled to begin in the next quarter.

Nellcor President and Chief Executive Officer Ray Larkin Jr. commented, "Nellcor's decision to combine 'smart' agent analysis with the oxygen saturation and carbon dioxide measurement of the N-1000 multi-function monitor demonstrates again our commitment to developing innovative products that anticipate needs in patient safety monitoring and management. The N-2500 will expand the benefits of automatic safety monitoring of patients under anesthesia, responding to clinicians' growing desire to monitor anesthetics for patient safety."

The N-2500 features automatic display of patient data after one- touch start-up; automatic identification, quantification and display of concentrations of up to three anesthetic agents simultaneously; and uninterrupted monitoring during gas transitions. The new anesthesia safety monitor also allows users to take advantage of the distinctive features of the N-1000 multi-function monitor, including automatic calibration, a unique moisture handling system, fast response time, low gas sampling rate and C-LOCK(TM) ECG synchronization. Current N-1000 customers will be able to upgrade their instruments with a modular version of the N-2500 anesthesia safety monitor.

Nellcor Inc. designs, manufactures and markets high-performance electronic monitoring instruments for patient safety and management in operating rooms, recovery rooms, intensive care units and other areas of the

hospital. Nellcor is the leading producer of pulse oximeters used in hospitals for the continuous measurement of patient oxygen status.

QUINCY, MA (FEB. 28) PR NEWSWIRE - Clean Harbors, Inc. (NASDAQ: CLHB) announced today that revenues for December and January were less that the company's expectations and that the fourth quarter ending Feb. 28, 1990 is expected to result in a loss. Total revenues for December and January were approximately $21 million.

Alan S. McKim, chairman and CEO, said, "The seasonal impact of the winter quarter has resulted in a slowdown in our field services and remediation projects. Increased competition for the dwindling number of projects that are performed during the winter has resulted in significant pressure on pricing and margins." McKim also pointed out that severe cold temperatures in December hindered operations at Clean Harbors' wastewater treatment facilities in Cleveland, Chicago and Baltimore. "Our largest treatment facility (Braintree, Mass.) was also affected by the slowdown in field services projects, as a significant percentage of its revenues are derived from field services projects," McKim said.

SAN FRANCISCO (FEB. 28) PR NEWSWIRE - Personal Library Software Inc. of Rockville, Md., and Apple Computer Corporation (NASDAQ-NMS: AAPL) of Cupertino, Calif., yesterday announced the signing of a licensing agreement.

Among the announced details, the pact provides a site license for Apple's internal use of Personal Librarian, PLS' full text information management system.

PLS develops and markets computer software for managing data, text and image bases and is widely recognized as a leader in information search technology, introducing an array of tools that help users find more relevant information quicker. PLS is best known for providing "smart" search and "concept" searching, in addition to a full array of other search and navigation methods. Because of the speed, power and its ease of use, PLS has been cited as ideal for CD-ROM applications.

PLS' line of Personal Librarian products spans a variety of computers from

popular desktop models to super-minis. PLS products are being used successfully for such varied applications as online databases, CD-ROM discs, corporate information bases stored on optical and magnetic media, and databases created by scanning and optical character readers (OCR). PLS products are used today by computer manufacturers, oil companies, libraries, pharmaceutical companies, print media publishers, law firms, government agencies and in many other applications in the private and public sector. To bolster electronic publishing development, PLS provides a complete range of CD authoring tools to make searching easy including Table of Contents and fill-in- the-blanks Form Searching capabilties as well as an Application Programmer's Toolkit for complete customization.

A Macintosh computer version of the popular WPL (Windows Personal Librarian) is expected to be released by PLS at the end of the third quarter of this year. PLS searchers can thus expect to easily recognize and readily be able to take to a common graphical user interface across a wide range of computers. For the international market, a version of PLS exists in French, Spanish and Italian. A German version is expected later this year.

Personal Library Software's PLS and WPL are being used in an increasing number of CD-ROM titles including Oceana Publications, The Ellen G. White Foundation, ABC News, the Journal of American Bone Surgery, CEDROM technologies of France, EDITEL of Italy, La Ley and Cor Grupo of Spain.

One of PLS' most powerful search features is Topic Search. With Topic Search a wide range of contextually relevant information can be located using heuristic algorithms and sorted by PLS' unique probable relevance ranking system. In many cases the most relevant documents will not even contain the query terms entered by the searcher.

JACKSON, MI (FEB. 28) PR NEWSWIRE - Owners of television sets, VCRs, stereos, personal computers, answering machines or microwave ovens can benefit from a new program developed by Consumers Power Company. In conjunction with THE POWER CLINIC(R), the utility is offering customers a selection of surge protectors which can shield valuable, sensitive electronic equipment from damaging fluctuations in power.

Consumers Power customers will receive information on THE POWER CLINIC(R) in their utility bills after March 1, 1990. A brochure with details on the types of surge suppressors available along with prices and ordering information will be enclosed. Prices will range from approximately $64 to $99.

"More than 99 percent of our customers have sophisticated electronic equipment sensitive to power spikes and surges," said Paul A. Elbert, vice president of marketing, rates and wholesale power for Consumers Power. "We are making an excellent product available to our customers in an effort to help them protect their valuable investments," he said.

Today's sensitive microprocessor and microchip-based electronic equipment can be damaged by two types of power-quality problems. Surges are increases in voltage commonly caused by equipment in your home such as air-conditioners, furnace motors, heat pumps or electric water heaters turning off, impacting other appliances. Damage from surges is gradual but often has a devastating long-term impact.

A spike is a very high, brief overvoltage condition most commonly caused by lightning. Spikes can also be caused by the operation of oil furnace ignitors, copy machines, laser printers or fluorescent lights. Each spike can cause irreparable damage to electronic equipment.

"In Michigan, we experience between 30 and 40 direct lightning strikes per square mile every year," said Elbert. "One hit could destroy hundreds or even thousands of dollars worth of equipment that is not properly protected. The device we have selected to offer is top quality and guaranteed for life by the manufacturer," he said.

To safeguard sensitive equipment, the surge protectors are easily installed by plugging the devices into any wall socket. The electronic appliances are then plugged into the outlets on the surge protector.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility, serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

LOS GATOS, CA (FEB. 28) PR NEWSWIRE - Caere Corp. announced today an OEM relationship with Wang Laboratories Inc. (AMEX: WAN) in which Wang will market Caere's OmniPage/386.

Caere's OmniPage/386 is a Microsoft Windows-based page recognition software pckage that complements Wang's OPEN/Image-Windows document image processing system. OmniPage/386 converts most scanned fonts and typefaces from hard-copy documents into word processing formats, saving significant data-entry costs, and in many cases, justifying the purchase of an imaging

system. Unlike competing products, OmniPage/386 does not require additional hardware.

"Integrating OmniPage/386 into OPEN/Image-Windows applications will allow our customers to speed up and simplify the indexing of Image documents, dramatically improving office productivity," said David E. McWhorter, Wang's director of Worldwide Imaging. "Working with Caere emphasizes Wang's commitment to Microsoft Windows as the chosen interface for all our applications."

"We are pleased to form this relationship with Wang and plan to work with them as we continue to develop page recognition software products for the imaging marketplace," said Larry Miller, Caere's vice president of marketing and sales for office products.

OmniPage/386, priced at $895, is immediately available from Wang through its direct sales organization, dealers, distributors and Wang Express, Wang's catalog and telemarketing organization.

Wang's OPEN/Image-Windows integrates document imaging into applications operating within the Microsoft Windows environment on industry-standard PCs and PC local area networks (LANs).

CONTACT: Miriam Hyman of Regis McKenna, 415-354-4409, for Caere; or Lawrence Miller of Caere, 408-395-7000; or Albie Jarvis of Wang, 508-967-1523

LOS ANGELES (FEB. 28) PR NEWSWIRE - Republic Pictures Corp. (NASDAQ: RPICA) today reported a significant increase in net income to a record $1,003,000, or $0.23 per share, for the year ended Dec. 31, 1989, from $285,000, or $0.07 per share, posted a year earlier. Revenues for the year were $46,536,000 compared with $51,984,000 in 1988.

For the fourth quarter ended Dec. 31, 1989, net income was $138,000, or $0.03 per share, on revenues of $8,880,000, compared with the loss of $472,000 on revenues of $12,157,000 in the previous year. The loss in the fourth quarter of 1988 resulted from a write-off for a cancelled first-run syndication series.

Russell Goldsmith, chairman and chief executive officer, said, "We have accomplished our goals for 1989 and, as a result, Republic is well-positioned to capitalize on a broad range of opportunities in the entertainment industry in the 1990s."

Goldsmith added: "We have been expanding our television production

company through the venture we established in 1989 with United Artists Entertainment Company. We have increased our acquisitions for video and television to enhance our overall position as a supplier and distributor of quality contemporary entertainment worldwide. Also, we have been successfully capitalizing upon expanding markets and new technologies."

"Republic's growth continues to be facilitated by a very talented team of people, by increasing library cash flow to its highest level ever and by our strong financial position."

Goldsmith said that Republic is currently engaged in discussions relating to the future licensing of "Beauty and the Beast." He expressed optimism that the award-winning "Beauty and the Beast" television series, produced in association with Witt/Thomas Productions, will provide a meaningful, longterm financial return for the company. "This is a unique, much-loved series which will have enduring worldwide appeal for many, many years to come."

"Looking forward into 1990," Goldsmith concluded, "Republic has a number of exciting new titles for distribution in home video and international television, new packages going into domestic syndication and new, original productions for network television."

Republic Pictures Corp. is a publicly-held television and home video production and distribution company based in Los Angeles.

GREENWICH, CT (FEB. 28) PR NEWSWIRE - The XTRA Independent Stockholders Committee announced today that it is committed to support a financed, cash sale of the company that is in the best interests of shareholders.

"Our goal remains the maximization of shareholder value," a committee spokesman said. "If management can commence a transaction that achieves this goal before the annual meeting, we pledge ourselves to its consummation. If they are unable to do so, we would expect our slate of directors, if elected at the annual meeting, to pursue this goal."

The Independent Committee's pledge comes after a ruling by the Delaware Chancery Court yesterday requiring XTRA to hold its annual meeting on March 15. XTRA had earlier announced its intent to put the company up for sale and had attempted to postpone the annual meeting, originally scheduled for Feb. 28, until March 30. The Independent Shareholders Committee, which holds 21.6 percent of XTRA's shares, has nominated a

slate of directors to oppose the leasing company's incumbent board.

PURCHASE, NY (FEB. 28) PR NEWSWIRE - International Paper (NYSE: IP) today announced the donation to the University of Georgia's Cooperative Extension Service of 300,000 pine seedlings. The gift is part of a company nationwide program under which 10 million seedlings have been made available in support of President George Bush's environmental initiative to increase the nation's tree cover by a billion trees a year during the next decade.

Genetically improved southern pine seedlings are being given to the Cooperative Extension Service for distribution throughout the state and to area 4-H Clubs. Club members will distribute their seedlings throughout 30 counties. Seedlings are scheduled for delivery today at the Clarke County Extension Service Office in Athens, State Farmers Market in Macon, and the Kiwanis Fair Grounds in Statesboro. This donation follows similar recent gifts by the company in Alabama, Louisiana, Mississippi and South Carolina.

Grown at the company's "Supertree" nursery in Blenheim, S.C., these seedlings produce high quality southern pine stock which develop into healthier, taller and faster growing trees with greater pest and disease resistance than naturally regenerated trees.

John Georges, chairman and chief executive officer of International Paper, emphasized the need for environmentally sound management of existing timberlands while hailing the President's program as a "seminal contribution towards public recognition of the benefits of responsible forest management." He added, "We are pleased to participate in and support Georgia initiatives for woodlands expansion. The returns will serve as cherished assets for the benefit of future generations in the state."

International Paper, headquartered in Purchase, N.Y., manufactures products including business communication papers, commercial and magazine printing papers, photographic films and wood products. The company also distributes paper and wood products. In Georgia, the company has offices or facilities in Bainbridge, Decatur, East Point, Marietta, Norcross, Stockbridge and Tucker. In addition to the United States and Canada, the company has sales or manufacturing facilities in a number of countries in Europe, Latin America, Africa and Asia.

NEW YORK (FEB. 28) PR NEWSWIRE - York Securities, Inc., a deep- discount brokerage that charges commission fees of 50 to 75 percent lower than conventional discounters, will introduce Thursday, March 1, an instant touchtone telephone quote service called YORKalert.

YORKalert is a 24-hour, 7-day real-time expanded quote service that provides up-to-the-minute bid and ask market size in addition to current price, last sale, net change, opening price, high, low and volume, all in a clear recorded voice.

According to Tom Curran, York vice president and head of the trading desk, "Size of the bid and ask market is a very frequent request by active investors. Few telephone quote services are equipped to provide this information."

Curran noted that YORKalert can be accessed from any touchtone telephone, including car phones. "We found that many investors have car phones and can appreciate the round-the-clock convenience of touchtone service. Now a motorist stuck in traffic can still get real-time stock quotes."

Direct transfer to the trading desk is made possible by simply pressing, "0."

"Speed and convenience are very important to investors, especially day traders, who buy and sell the same stock before the sun goes down and, at times, in as little as 15 minutes," Curran said.

In addition to common stocks, YORKalert provides instant quotes on options and listed mutual funds. Market indexes, including volume, Dow Jones averages, and the S&P 500 average are also reported by YORKalert with the press of a button.

Another feature of YORKalert is the ability to obtain the value of a personal portfolio of up to 20 stocks and options. The caller can enter a specific quantity of shares for each symbol and the total portfolio market value is calculated to include the net change since the previous day. Symbols can be added or deleted at any time.

YORKalert is accessed by pressing individual or a combination of buttons on a touchtone telephone.

A financial news commentary called "YORK Street Talk" is available on YORKalert menu to review events that relate to investment strategies. The

YORKalert service is free to clients of York Securities.

York Securities, Inc., was founded in 1979 by David J. Corcoran, president. It has offices at 160 Broadway, New York, N.Y. 10038. Telephone: 212-349-9700 and 800-221-3154. Fax: 212-619-1593.

BOSTON (FEB. 28) PR NEWSWIRE - The Ares-Serono Group today reported net income of U.S. $62.3 million for the 12 months ended Dec. 31, 1989, a 29.6 percent increase over the 1988 result of $48.0 million. Earnings per share were $114.53 in 1989 vs. $88.36 in 1988.

Ares-Serono previously reported that 1989 sales increased 23.5 percent to $519.0 million from 1988 sales of $420.5 million. Excluding unfavorable currency fluctuations, actual sales growth for the year was 28.0 percent.

Ethical pharmaceutical sales for 1989 increased by 19.1 percent to $420.8 million, up from $353.2 million reported in 1988. Diagnostic sales were $83.8 million, an increase of 43.8 percent over 1988 sales of $58.3 million. Sales of OTC products were $14.4 million compared to $8.9 million, a 61.4 percent increase.

The Ares-Serono Group experienced significant growth in all its major geographical markets in 1989, especially in the United States, which now accounts for 28 percent of total sales, compared to 19.5 percent in 1988. Sales in Europe represented 63 percent of 1989 total sales vs. 70 percent in 1988.

In 1989, capital spending for property, plant and equipment amounted to $57.5 million compared with $66.8 million in 1988. During the last five years, capital spending totaled $183.1 million.

At The Ares-Serono Group's annual meeting on May 16, 1990, the board of directors will ask shareholders to approve a dividend distribution of SFr 25.00 per bearer share (SFr 10.00 per registered share) out of the 1989 retained earnings.

The Ares-Serono Group had 3,488 employees as of Dec. 31, 1989, compared to 3,179 at the end of 1988.

The Area-Serono Group is a leading multinational developer and marketer of pharmaceutical and diagnostic products with executive headquarters in Geneva, Switzerland, and operating headquarters in Boston. The Group

operates subsidiaries and manufacturing facilities in more than 20 countries. Shares of Ares-Serono S.A., the parent company of the Group, are listed on the major Swiss stock exchanges.

SAN BRUNO, CA (FEB. 28) PR NEWSWIRE - The directors of North Lily Mining Co. (NASDAQ: NLMC) are pleased to announce the results of the sodium sulfate content of composite samples taken from the 26 square kilometer Yolanda property in northern Chile.

Sodium sulfate, which readily leaches in water in the nitrate/iodine heap leaching process, provides a valuable by-product recoverable at very low cost. Sodium sulfate presently sells for approximately $100 per tonne.

The average sodium sulfate content of composite samples selected for process testwork was 9.3 percent. This average grade represents samples from 83 sample holes and 5 meter-long channel samples from trenches cut in the deposit. This significant sulfate content potentially increases the contained value of the 26 square kilometer area by approximately $186 million. Over 2,000 samples are currently being individually assayed for sodium sulfate content, and are expected to be available by the end of March. These sample assays will provide the basis for the sodium sulfate reserve estimate undertaken by Davy McKee Corp.

The Yolanda property was extensively sampled in 1989, with ore reserves being released in January 1990, for both the iodine and nitrate content. These reserves, calculated by Davy McKee Corp., indicate that, using a cut-off grade of 8 percent sodium nitrate, the Yolanda property contains in excess of 20 million tonnes of caliche ore grading approximately 11.8 percent sodium nitrate and 237 ppm. iodine. Using current market prices, the contained iodine and nitrate value of the 26 square kilometer area exceeds $920 million.

The Yolanda property is part of the Taltal Joint Venture, a 50:50 joint venture between Kap Resources Ltd. and Atacama Resources Ltd. on approximately 700 square kilometers of select iodine, nitrate and sulfate deposits or "pampas" in northern Chile. North Lily Mining Co. is the operator of the project, and retains a 10 percent net profits interest.

NEW YORK (FEB. 28) PR NEWSWIRE - Sutton Holding Corp. announced today that it has extended the expiration date of its cash tender offer for all of the outstanding shares of Common Stock of DeSoto, Inc. (NYSE: DSO) (including the associated preferred share purchase rights) at $50 per share, until midnight, New York City time, on Tuesday, March 13, 1990. The offer was previously set to expire at midnight, New York City time, on Feb. 27, 1990.

Sutton Holding Corp. was advised by the depositary for the tender offer that as of 7 p.m. New York City time, on Feb. 27, 1990, 2,410,349 shares of common stock had been validly tendered and not withdrawn which, together with the shares beneficially owned by Sutton Holding Corp. and its affiliates, collectively represent approximately 74 percent of all outstanding DeSoto shares.

Sutton believes that these shares also represent approximately 83.9 percent of the shares of common stock not owned by either Sutton Holding Corp. and its affiliates or by the DeSoto stock ownership plan and officers and directors of DeSoto.

KANATA, ONTARIO (FEB. 27) PR NEWSWIRE - Newbridge Networks Corp. (NASDAQ: NNCXF; Toronto: NNC) today announced financial results for the nine months ending Feb. 3, 1990.

Sales for the nine months ending Feb. 3, 1990, were recorded at $89.4 million, representing an increase of 105 percent, or approximately double the revenues for the same period in fiscal year 1989. Net income for the period at $10.8 million ($.33 per share), represents an increase of 104 percent, or approximately double the net income of $5.3 million for the same period of fiscal year 1989.

Sales for the third quarter of fiscal year 1990 were recorded at $30.4 million, representing a 58 percent increase over the sales of $19.3 million for the corresponding quarter of last year. Net income for the third quarter was $1.6 million ($.05 per share, fully diluted), compared to $2.8 million for the third quarter of the last fiscal year. While business activity for Newbridge is running at record levels and the products are taking an increasing market share, the third quarter financial results were disappointing and represent lower than planned revenues and profits. A number of European contracts expected to be completed during the quarter were not concluded. It is anticipated that this business will now contribute to results for the fourth quarter. Sales for the United States, Canada and Asia/Pacific regions were generally according to plan during the quarter. Direct sales of Corporate Networks were higher than planned for the quarter and represented more than 60 percent of the United States business. Order backlog at the end of the third quarter for shipment in the fourth quarter was higher than at any time in the company's history.

Accounts receivable were higher at the end of the third quarter than at the end of the second quarter. The company's improved collection efforts and the recent resolution of a number of technical issues have contributed to the success in reducing uncollected accounts receivable since the end of the quarter. The company will continue to focus on this important area.

HUTCHINSON, KS (FEB. 28) PR NEWSWIRE - Doskocil Companies Incorporated (NASDAQ: DOSK) announced today that the company and its subsidiaries, including Wilson Foods Corporation, are in default under their $133 million senior loan agreement and that the company is presently in negotiations with its senior lenders with respect to such default and the provision of additional working capital.

Such default results from, among other things, the failure of Doskocil to make approximately $1.7 million in repayments of principal which are required by reductions of the company's "borrowing base" of inventory and accounts receivable. As a result of this, default provisions were triggered under certain of the company's subordinated debt agreements. In addition, the company was prevented from making an interest payment of $165,000 due on its 11 percent convertible debentures on Feb. 15, 1990. Furthermore, the company currently is discussing with its suppliers the terms on which the company purchases its raw materials.

The company and its advisers are reviewing all available options for dealing with the company's financial situation including securing new sources of working capital and possible restructuring of its indebtedness. Larry Doskocil, chairman of Doskocil, stated, "The company's liquidity problems and current financial situation result from several factors including the delay in the sale of the Wilson Foods Brands division and the high level of interest expenses arising from the debt incurred to

finance the 1988 acquisition of Wilson Foods. Furthermore, operating profits have been lower than expected in recent quarters. Despite the current difficulties the company believes its operations are fundamentally sound."

Doskocil and its subsidiaries specialize in formulating, processing, marketing and distributing specialty, pre-cooked, value-added meat, meat toppings, pepperoni and other deli specialty meats. The company is a leading supplier of beef and pork toppings and pepperoni to the pizza foods service market. In addition, Doskocil and its subsidiaries supply products to grocery and independent delicatessens, numerous restaurant food processors and institutional customers.

NEW CANAAN, CT (FEB. 28) PR NEWSWIRE - Delphi Pharmaceuticals, a new unit of ATI Pharmaceuticals, Inc. (NASDAQ: ATPH), has been established to develop new applications for aerosol drug delivery systems, ATI officials announced today. Delphi will focus its research on the development of

alternative aerosol propellants for pharmaceutical delivery and the potential use of aerosols to deliver drugs directly to the bloodstream. Delphi is based in Norwood, Mass.

The new company's aerosol delivery research builds on the work of Harvey Mintzer, president of Armstrong Laboratories, Inc., and Dr. Peter Byron, a leading authority on inhalation therapy and associate professor, pharmacy and pharmaceutics at the Medical College of Virginia/Virginia Commonwealth University. Mintzer will also serve as president of Delphi and Dr. Byron is chairman of the Delphi Scientific Advisory Board. Armstrong Laboratories, a subsidiary of ATI, has over 35 years of experience in the use of aerosols for drug delivery.

In addition to direct support from ATI Pharmaceuticals, Byron's research for Delphi has received a matching grant from the Institute of Biotechnology, Virginia Center for Innovative Technology, for the development of optimized inhalation aerosols and alternative propellants.

"Many drugs currently on the market can be reformulated for aerosol delivery, adding convenience and extending markets for proprietary products" said H.R. Shepherd, ATI's chairman and CEO. "Aerosols can provide significant competitive advantages to drug manufacturers who adopt this technology. Aerosols also offer the promise of a more convenient method of delivering pharmaceuticals directly to the bloodstream than by direct injection. Of special interest to Delphi are biopharmaceuticals which, despite their fine safety and efficacy profiles, lack convenient methods of delivery."

Aerosol delivery has long been recognized as an effective, convenient, and patentable method for administering drugs to the respiratory tract. To date, aerosol technology has not been applied to drugs that require delivery through the bloodstream.

The new subsidiary's research program includes the development of new, environmentally sensitive propellant blends for metered dose inhalers (MDIs). The current market for MDIs is approximately $600 million and expanding at approximately 15 percent per year. MDIs are commonly used to deliver drugs to the respiratory tract, such as bronchodilators to treat asthma.

ATI Pharmaceuticals is a drug delivery company engaged in the development and manufacturing of aerosol pharmaceuticals. Armstrong Laboratories, ATI's manufacturing subsidiary, is based in West Roxbury, Mass.

CHATSWORTH, CA (FEB. 28) PR NEWSWIRE - The Software Toolworks, Inc. (NASDAQ: TWRX) today announced the election of Elizabeth Barker to the company's board of directors. Barker is filling the vacancy created by Arthur Levine, who resigned in November of 1989.

Barker, 34, is currently a general partner at Montgomery Securities in San Francisco. She joined the prestigious West Coast brokerage firm in 1983, and became a special limited partner in 1987. Her area of expertise is emerging growth technology companies with a specific focus on the software industry. Prior to joining Montgomery Securities, Barker was a corporate loan officer at the Bank of California.

Barker received her B.A. from the University of California, Santa Cruz and her MBA from the University of California, Berkeley.

Commenting on the election, Les Crane, chairman of the board and president of The Software Toolworks, stated, "The addition of Beth Barker to our board will be of significant benefit to our company as we continue our strategic growth and expansion plans. Barker possesses a great deal of knowledge about our industry and for the past several years has worked closely with The Software Toolworks. We believe her experience will provide additional depth to The Software Toolworks management team."

The Software Toolworks is a publicly traded software developer and

publisher located in Southern California. Among the company's best-selling, award-winning software products are The Chessmaster 2100, Mavis Beacon Teaches Typing and Twist and Shout.

BURLINGTON, NC (FEB. 28) PR NEWSWIRE - Environmental Diagnostics, Inc. (NASDAQ: EDIT) announced today that is has completed an agreement with Syva-bioMerieux to market the EDI EZ-SCREEN drugs of abuse tests.

Syva-bioMerieux, based in Lyon, France, is a joint venture company between Syva Diagnostics, a division of Syntex Corporation (NYSE: SYN), and bioMerieux, one of France's largest diagnostics and biotechnology companies. Syva-bioMerieux is a leader in providing clinical diagnostic products and services for detecting drugs of abuse in humans. Syva-bioMerieux will market the EDI EZ-SCREEN drugs of abuse tests to law enforcement agencies, hospitals, clinics, substance abuse centers and private businesses in France, French protectorates and territories and Belgium under a four-year exclusive arrangement.

James D. Skinner, EDI President and Chief Executive Officer, said "We are very pleased to report that Syva-bioMerieux will be marketing the EDI EZ-SCREEN: CANNABINOID/COCAINE test for detecting marijuana and cocaine abuse and has been one of the first to receive the recently-introduced EZ-SCREEN: OPIATES test for detecting heroin and morphine abuse. We feel that Syva-bioMerieux, already a market leader in providing instrumentation-based drugs of abuse tests as well as other diagnostic products, will provide great strength in the marketing and distribution of the EDI drugs of abuse tests." He added that product shipments have already commenced concurrent with the introduction of the EDI drugs of abuse tests in France.

Environmental Diagnostics, Inc. develops and manufactures human clinical and agricultural diagnostics specifically designed for on-site testing by non-technical personnel. The Company's EZ-SCREEN products provide the accuracy of laboratory results in minutes.

DALLAS (FEB. 28) PR NEWSWIRE - International Broadcast Systems, Ltd.

(IBS) announced today that Hit Video USA, the rock music video program which IBS distributes internationally, has been licensed in 20 countries.

"We continue to see -- especially with some recent deals in the United Kingdom, Singapore, Bulgaria, Algeria and Thailand -- that the diverse and family-oriented programming represented in Hit Video USA makes it appealing to all types of audiences and markets throughout the world," said Armando Nunez Jr., senior vice president of program distribution at IBS. "Hit Video USA has mass international appeal and we see no end in sight for broadcaster's appetite for such programming."

Recent developments which have contributed to Hit Video USA's success include the program being granted worldwide licensing rights by IFPI, the international music licensing body. This arrangement allows the music video program to be sold around the world on a one-stop clearance basis.

Hit Video USA is the largest producer of music video programming for broadcast television, offering the top songs from contemporary hit, album-oriented, urban contemporary and adult contemporary charts.

With offices in Dallas, Los Angeles, Paris, Santiago and Washington D.C., IBS distributes television programming in more than 120 countries. Additionally, the firm secures airtime and sponsorships internationally, provides product licensing and merchandising services, as well as broadcast management and consulting services to television stations domestically and abroad. The company's Class A Common Stock trades under the NASDAQ symbol "IBSLA."

ATLANTA (FEB. 28) PR NEWSWIRE - Del Taco Restaurants, Inc. (NASDAQ: DETA, BSE: DET) today reported that net income for the fourth quarter ended Dec. 27, 1989 decreased to $12,000 compared with $85,000 in the comparable quarter of 1988. Sales and revenues for the 1989 quarter increased to $12,724,000 from $12,316,000 in the 1988 period. The increase in sales and revenues was primarily due to the positive impact of the "99 Cents Bigger, Better Bite" advertising campaign initiated in October 1989.

For the full year 1989, Del Taco reported a net loss of $387,000, or five cents per share, versus net income of $7,491,000, or 88 cents per share, in 1988. The 1988 figure includes a $6,520,000 (76 cents per share) gain on the sale of the company's Applebee's restaurant business in the 1988 second quarter. Sales and revenues for the year decreased to $51,344,000 from $58,785,000 in 1988, largely due to the Applebee's divestment and the

sale or closing of other restaurants.

William L. Hyde, Jr., president and chief executive officer of Del Taco, commented, "Our relocation to Atlanta marks the completion of phase one of our restructuring program. Phase two will focus management's efforts on positioning Del Taco as the best overall value in the Mexican quick service segment." He continued, "Although our 1989 financial results were not good, we are very encouraged by the progress of our "99 Cents Bigger, Better, Bite" marketing strategy which was introduced in late October 1989. We believe this strategy will contribute to better performance in the months ahead." System-wide, Del Taco operates and franchises 147 Del Taco and Taco Villa Mexican fast food restaurants.

#90059p0076 02/28/1990 ~PR Newswire

PITTSBURGH (FEB. 28) PR NEWSWIRE - Thrift Drug Co. announced today a joint program with Med-Chek Laboratories, a well-known medical laboratory, to offer complete laboratory testing capabilities at five Pittsburgh area Thrift Drug stores.

The move puts Thrift Drug among a handful of drug store chains in the country to offer permanent in-store laboratory testing, and the only drug store operation in Pittsburgh to offer such a service.

The new Med-Chek centers at Thrift Drug will offer Pittsburghers the convenience of having laboratory test samples collected and prescriptions conveniently filled at one central location. In addition, the new Med-Chek centers will offer physicians and patients a convenient alternative to their blood testing needs. All test samples collected at Med-Chek centers will be processed and transported to Med-Chek Laboratories for analysis. All routine test results will be reported to physicians within 24 hours.

Thrift Drug's Med-Chek centers will be capable of conducting any type of test or screening prescribed by physicians including: systolic and diastolic blood pressure, HDL and LDL cholesterol, pre-marital, blood-glucose, therapeutic drug monitoring, pregnancy, urinalysis and complete blood counts. All tests processed at Thrift Drug's Med-Chek centers will be in accordance with the standards of the College of American Pathologists.

While the opening of the Med-Chek centers represent an innovative move for Thrift Drug, they also represent a new business opportunity for Med-Chek Laboratories, one of the fastest growing medical laboratories in the region, according to a spokesman.

To introduce both physicians and their patients to Med-Chek centers at Thrift Drug, Med-Chek has developed a special Cardiac Risk-Chek for those people concerned about high cholesterol.

Available exclusively at Thrift Drug, the new Cardiac Risk-Chek profiles a variety of risk factors that impact the potential for heart disease including blood pressure, heart rate, lifestyle, cholesterol, triglycerides and other lipoprotein levels. A 12-hour fasting period and a physician's approval are required for participants of the Cardiac Risk-Chek.

Most tests at Med-Chek Center will be covered by insurance and Med-Chek's trained, professional staff will assist consumers with preparing claims forms. Although all clinical laboratory tests must be prescribed by a physician, no appointment is necessary at Med-Chek centers.

The new Med-Chek centers are conveniently located in a private area near the pharmacy counter at each of the following Thrift Drug store locations: Thrift Drug/Crafton Ingram Shopping Center; Thrift Drug/Mount Royal Shopping Center; Thrift Drug/Miracle Mile Shopping Center; Thrift Drug/South Park Shops; and Thrift Drug/McKnight-Seibert Shopping Center.

#90059p0082 02/28/1990 ~PR Newswire

MIAMI (FEB. 28) PR NEWSWIRE - Spec's Music, Inc. (NASDAQ: SPEK) today announced results for its second fiscal quarter ended Jan. 31, 1990.

Revenues during the second fiscal quarter increased by 23 percent to $15,053,000 compared to $12,236,000 in 1989. Revenues for stores which were opened for more than one year increased by four percent during the quarter. Net earnings for the second quarter increased by two percent to $1,084,000 compared to $1,058,000 a year ago. Earnings per share were $.20 in both periods.

At Jan. 31, 1990, the company operated 53 stores representing approximately 200,000 square feet of selling space. During the past 12 months the company has opened 12 new stores totaling 75,000 square feet, including eight stores which were opened during the first six months of fiscal 1990. Operating expenses of new stores, as a percentage of revenue, are significantly higher during their initial year of operation. The costs associated with new stores contributed to higher operating expenses during the current quarter.

Revenues for the first six months of fiscal 1990 rose by 22 percent to $24,883,000. Same-store revenues during the first six months increased

by 5 percent. Net earnings, before a change in accounting principle, decreased by 11 percent to $1,187,000 ($.22 per share) compared to $1,333,000 ($.25 per share).

Spec's Music, Inc. is publicly held company founded in 1948 by Martin W. Spector. Spec's is the largest specialty retailer of pre-recorded music and video products in Florida. The company currently operates 53 stores within Florida which sell cassettes, compact discs, video movies and a variety of related audio and video accessories. Thirty-eight of the company's stores rent movies.

TROY, MI (FEB. 28) PR NEWSWIRE - Energy Conversion Devices, Inc. ("ECD") (OTC: ENER) and Canon Inc. of Japan ("Canon") announced today that they had reached a basic agreement to form a joint venture for the manufacture of solar cells in the United States. Under the terms of the pre-joint venture agreement, the company, which is intended to be a model for United States/Japanese business relations, will manufacture and sell proprietary thin-film solar cell products under license from ECD.

Canon and ECD will negotiate to form the joint venture no later than July 1, 1990. During the pre-joint venture period, ECD and Canon will review ECD's current photovoltaic operations and engage in a joint program aimed at manufacturing process optimization and scale up of both module energy conversion efficiency and solar cell output.

In connection with the pre-joint venture agreement, ECD entered into a term loan agreement to borrow up to $8 million from Canon to fund ECD's pre-joint venture activities. When the joint venture is formed, such loan will be appropriated for a portion of Canon's capital contribution to the new company.

Canon, a 6-percent stockholder in ECD, is a leading international manufacturer of photographic products, automated business machines, and optical products.

ECD, based in Troy, is the pioneer in amorphous materials technology. The company and its subsidiaries license technology and manufacture and sell products in the areas of alternate energy, information processing, and synthetic materials. ECD's solar and battery products are environmentally safe and address such environmental problems as protecting the ozone layer reducing hazardous waste, the greenhouse effect and atmospheric pollution.

LONDON (FEB. 28) PR NEWSWIRE - AT&T ISTEL announced that it has formed a new company called AT&T ISTEL Global Messaging Services Limited to provide value-added messaging services in the United Kingdom.

To do this, Global Messaging Services has created the first AT&T electronic messaging node outside of the U.S. AT&T has previously announced its intention to create a series of these computerized nodes in key markets around the world.

AT&T acquired ISTEL in October 1989. ISTEL's innovative value-added capabilities in key vertical markets and AT&T's technology, networking expertise, and global experience have now been combined to position the new company as a leader in the world messaging market.

Initially, AT&T ISTEL Global Messaging Services has three offerings: AT&T

Mail, a sophisticated but easy to use electronic mail service; EDICT, one of the world's leading electronic data interchange services; and iNET, and information management gateway service. Other products and services - such as AT&T Enhanced Fax, a network- based, store-and-forward service - will be available later in the year.

Under the banner of Global Messaging, these services combine to add value to the worldwide business community by offering an integrated, international approach, backed by AT&T's pioneering initiatives with the X.400 communications standard.

This standard defines the rules for interconnecting E-mail systems. The messaging services will also become the foundation for other products and services in vertical markets, one of AT&T ISTEL's strongest areas of expertise.

Global Messaging Services already employs over 100 people, drawn from both AT&T and ISTEL. It now occupies offices in Reddich, in Worcestershire, and at a new multi-million dollar site in London's Docklands area. Daman Singh formerly director of International Development within ISTEL, is the new managing director of the company.

At a press briefing in London today, John Leighfield, executive chairman of AT&T ISTEL, said, "At the time of AT&T's acquisition of ISTEL, I said that the two companies were a perfect match. Despite the differences in many aspects of the company - size, products, services, locations - we are now proving the validity of that statement.

"In Global Messaging Services we have brought together the products, the services and the respective market positions of ISTEL and AT&T in an exciting and complementary manner."

HOUSTON (FEB. 28) PR NEWSWIRE - Baker Hughes Incorporated (NYSE: BHI) today announced that in connection with its previously announced public offering of 9 million shares of its common stock, the underwriters had exercised their option to purchase 1,350,000 additional shares to cover over-allotments. The shares were sold at the original offering price of $26.375. The offering, with the exercise of the over- allotment option, totaled 10,350,000 shares. The company intends to use the proceeds in connection with the pending acquisition of Eastman Christensen Company by Baker Hughes.

The offering was sold to a group of underwriters co-managed by The First Boston Corporation and Shearson Lehman Hutton Inc. for the U.S. and Canadian portion of the offering and by Credit Suisse First Boston Limited and Shearson Lehman Hutton International, Inc. for the non-U.S. portion.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission and has become effective.

Baker Hughes is a leading provider of products and services for the oil, gas and process industries.

------ This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration of qualification under the securities laws of any such state.

WILMINGTON, DE (FEB. 28) PR NEWSWIRE - Jan Leschly, 49, former president and chief operating officer, Squibb Corporation, has been named to the board of directors of Beneficial Corporation (NYSE: BNL), as announced today by Chairman Finn M. W. Caspersen.

Leschly's appointment, which is effective immediately, brings the board total to 18, and is Beneficial's third board nomination in as many weeks.

Former Governor of New Jersey Thomas H. Kean was appointed to the board on February 21, and former Commissioner of the New Jersey Department of Community Affairs Leonard S. Coleman, Jr. was named the previous week.

Beneficial Chairman Finn M. W. Caspersen commented, "As with Kean and Coleman, we are very fortunate to add Jan Leschly to our board. Under his leadership, Squibb became one of the foremost pharmaceutical companies in the world. I am certain that his leadership qualities will be an asset to Beneficial Corporation and to its shareholders."

Leschly joined Squibb in 1979 as vice president of Commercial Development. He was promoted to president of E. R. Squibb & Sons, Inc., in 1981. He became group vice president of the Pharmaceutical Products Group in 1984, and in the same year was elected to the board of directors, Squibb Corporation.

Leschly was promoted to president and chief operating officer in 1988. He resigned shortly after Squibb's merger with Bristol-Myers in October of

1989.

Prior to joining Squibb, Leschly spent seven years with Novo Corporation of Denmark, the last five years as executive vice president of the corporation and president of the Pharmaceutical Division.

Leschly is perhaps best known for his life preceding his business career when he was a professional tennis player, ranking 10th in the world in the late '60s.

Leschly was born and educated in Denmark. He received graduate degrees from the Copenhagen School of Pharmacy and the Copenhagen School of Economics and Business Administration. He is a member of the Wharton Business School Undergraduate Executive Board, and the Emory Business School Advisory Council.

Leschly lives with his wife, Lotte, and their four children in Princeton, N.J.

Beneficial Corporation provides consumer financial services through a network of over 1,000 offices located across the United States, and in Canada, the United Kingdom and West Germany.

HOUSTON (FEB. 28) PR NEWSWIRE - Seagull Energy Corporation (NYSE: SGO) announced today that holders of 969,465 shares (99 percent) of its $2.25 convertible exchangeable preferred stock have elected to convert their preferred shares to Seagull common shares.

The conversions were exercised in anticipation of Seagull's redemption of the preferred, announced on Feb. 7. The redemption will occur on March 9, 1990, at a per-share redemption price of $26.50, plus accrued dividends through the redemption date of 41.3 cents per share.

A total of 980,950 preferred shares were outstanding when the call for redemption was issued on Feb. 7. In light of the conversions, only 11,485 preferred shares will actually be redeemed.

The conversion adds slightly more than 1.5 million common shares to Seagull's outstanding share base. Consequently, 8,539,586 common shares are now outstanding.

"We are very pleased with this reaction to the call for redemption," said Seagull Chairman Barry J. Galt. "By converting, we believe these holders

are casting a vote of confidence in the outlook for both the company and the natural gas industry.

"Of direct benefit to the company, we have enhanced our financial strength by eliminating a $2.25 million annual dividend requirement," he added.

WILMINGTON, DE (FEB. 28) PR NEWSWIRE - Du Pont (NYSE: DD) and Ciba-Geigy Ltd. today said they have agreed to the joint development and marketing of their lines of fluoro-finishes for textiles worldwide.

Products involved include a broad range of stain resist, water repellent and stain release formulations, plus many other formulations engineered for most fabric substrates. End-use markets include apparel and upholstery fabrics.

The agreement is expected to help double Du Pont's annual sales of the products to $200 million by 1995, the company reported.

"The new enterprise will expand and improve the collective strengths of all the groups," according to John Thackrah, business manager, Performance Products Division of Du Pont. "The result will be a versatile line of products that meet the consumer need for quality and performance. Both companies will continue to supply technical service and research.

"Our collective manufacturing strengths and capabilities will allow us to make products as close to the market as possible, thus utilizing our resources most effectively for us and for our customers."

"Du Pont has an outstanding reputation for growing new brands and carrying them forward into diverse market segments," said Ron Mrstik, vice president, textile chemicals, Ciba-Geigy Corporation, Dyestuffs and Chemicals Division. "We expect that they will bring this same expertise to the development, marketing and distribution of our jointly developed fluoro-textile finishes."

"Over recent years, Du Pont has successfully grown its 'Teflon' soil and stain repellent and 'Zepel' rain/stain repeller brands, carrying them forward into many new market segments," said Thackrah.

In the new association, Du Pont will be responsible for all worldwide communications and end-use marketing programs associated with these products. Ciba-Geigy, through its subsidiary, Pfersee, in Augsburg, Germany, will be primarily responsible for sales and technical support

outside of the United States.

Details of program and market responsibilities will be announced later.

CHICAGO (FEB. 28) PR NEWSWIRE - Sears Mortgage Corporation, Riverwoods, Ill., and the Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) today announced an agreement that will provide financing for $2 billion in home mortgages originated nationwide over the next 12 months.

Under the agreement, Sears will originate a variety of fixed- and adjustable-rate mortgages that will be exchanged for mortgage-backed securities issued by Fannie Mae or sold to Fannie Mae for cash.

Sears Mortgage Corporation, the mortgage banking subsidiary of Sears, Roebuck and Co. (NYSE: S), originates home mortgages nationwide through its 87 offices. The mortgages to be delivered under the $2 billion agreement will consist primarily of new originations, along with some seasoned home loans.

"This partnership between Fannie Mae, the USA's Housing Partner, and Sears one of America's best known corporations, will provide thousands of Americans with affordable home financing," said John R. Hayes, senior vice president in charge of Fannie Mae's Midwestern regional office.

The agreement was announced here by Hayes, responsible for Fannie Mae's activities in the 10-state Midwestern region.

"We look forward to working with Fannie Mae on the implementation of this agreement, which renews Sears' strong corporate commitment to helping Americans achieve the dream of homeownership," said Walter C. Klein Jr., chairman and president. "This new supply of mortgage financing will enable Sears to continue to make available to home buyers a wide variety of mortgage loan products at competitive interest rates."

Sears Mortgage Corporation is a full-service mortgage banking company. It originates, acquires, and services mortgage loans and issues mortgage-backed securities. The company derives its income from fees on originations, portfolio servicing, and sales of mortgage loans and securities.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company and the nation's largest investor in home mortgages.

DETROIT (FEB. 28) PR NEWSWIRE - General Motors said today that it distributed more than $139 million to GM U.S. hourly employees in perfect attendance awards for 1989.

The total includes $68 million which was distributed last week to approximately 228,000 U.S. hourly employees for perfect attendance during the second half of 1989.

In August 1989, similar payments amounting to $71 million were made to 237,000 employees who achieved perfect attendance during the first six-month period.

GM U.S. hourly employees qualify for semi-annual perfect attendance awards by working all available scheduled hours in the regular work week without any absences beyond those provided in the labor agreement. Eligible employees receive a cash payment in the amount of $300 for each of the two qualifying periods in recognition of their achievement. Approximately 200,000 hourly employees qualified for awards in both halves of 1989.

These payments are part of the total cash compensation received by GM hourly employees which currently averages $43,000 per employee on an annualized basis. When benefits are included, the average total compensation cost per hourly employee amounts to approximately $61,000 annually.

ACTON, MA (FEB. 28) PR NEWSWIRE - CML Group, Inc. (NYSE: CML), a leading specialty marketing company, today reported a 25 percent increase in revenues and a 39 percent increase in income from continuing operations for the second quarter of fiscal 1990, ended Jan. 27, 1990.

Total sales for the second quarter were $106 million, compared with $85 million for the year-ago quarter. Income from continuing operations was $10.5 million, or $1.41 per share, compared to net income of $7.6 million, or $1.04 per share, in fiscal 1989.

The sale of discontinued operations will result in a one-time accounting

loss of approximately $14.7 million. The company expects to receive approximately $20 million in a combination of cash and notes from the sales of Carroll Reed and SyberVision.

CML Group's high-quality products are sold under the trade names Britches of Georgetowne, The Nature Company and NordicTrack.

COEUR D'ALENE, IDAHO (FEB. 28) PR NEWSWIRE - Shareholders today approved

the Plan and Agreement of Regorganization and Merger dated Dec. 21, 1989 with Security Pacific Bancorporation Northwest. Approval of the agreement by more than 2/3 the required majority of outstanding shares was received at the Annual Meeting held today in Coeur d'Alene. Terms of the definitive agreement announced in December generally provide for Security Pacific to acquire all of the shares and options of the Idaho-based savings bank for $31.5 million. Common stockholders would receive approximately $18.03 per share as a result of the agreement. The transaction now must receive approval by the appropriate regulatory authorities. Closing is exptected to occur promptly thereafter upon satisfactory completion of other conditions of the merger agreement.

All other issues put before the shareholders received approval, including a charter amendment to increase the number of authorized common stock to 4,000,000, $1 par value.

Mountain West (NASDAQ: MWSB) has assets of $320 million and 10 full service offices throughout the state of Idaho, as well as mortgage lending offices in Boise, Idaho, and Spokane, Wash. It has 1.7 million shares outstanding, and its stock is traded on the National Over the Counter Market. It acquired Ketchum-based (Sun Valley) Mountain State Savings Bank in October 1988. Mountain West changed its name from First Federal Savings and Loan Association of Coeur d'Alene late last year.

Security Pacific Bancorporation Northwest is a wholly owned subsidiary of Security Pacific Corp., an $87 billion, Los Angeles-based bank holding company traded on the New York Stock Exchange. The Seattle-based company has assets of $10.1 billion and operates three commercial banks and a savings bank in Washington, Oregon and Alaska.

BIRMINGHAM, AL (FEB. 28) PR NEWSWIRE - HealthSouth Rehabilitation Corp. (NYSE: HRC) announces the addition of a new outpatient medical rehabilitation facility in Richmond, Va.

According to Richard M. Scrushy, chairman of the board, president and CEO, the facility will be called HealthSouth Rehabilitation Center of Richmond.

"The acquisition of this location marks HealthSouth's entry into our 20th state," said Scrushy. "Having expanded our roster of outpatient facilities to 29 in 1989, we are pleased to welcome the Richmond center as our newest outpatient location in 1990."

The center will specialize in sports medicine, industrial medicine (work capacity assessment and work hardening), general orthopaedic care, back injury rehabilitation and physical therapy.

With the addition of this facility, HealthSouth will have 44 inpatient and outpatient locations in 20 states. With its nationwide network of facilities, representing 1,400 beds and an employee base of more than 3,000, HealthSouth has provided services to more than 100,000 people since the company's founding in 1984.

LIBERTY CORNER, NJ (FEB. 28) PR NEWSWIRE - Blessings Corporation (AMEX: BCO) announced today that its Edison Plastics Division will construct a new technical and commercial development center on land adjacent to its existing plant in Newport News, Va. The site for the new facility is a 5.8-acre parcel located in the Oakland Industrial Park in the city of Newport News.

The new facility will consist of approximately 40,000 square feet of offices, laboratories and developmental manufacturing space. Construction is expected to begin in late spring of this year and first occupancy is expected in the early summer of 1991.

Edison Plastics has plants in South Plainfield, N.J.; Washington, Ga.; McAlester, Okla., and Newport News, Va. The Newport News operation was acquired in August 1989 from the Phillips Joanna Film division of Industrial Coatings Group, Inc.

Edison Plastics is a major supplier of polyethylene and polypropylene barrier films to the health care industry where the film is used to produce a variety of consumer items including feminine hygiene products,

disposable baby diapers and adult incontinent products. Various other types of films are supplied to the automotive, agriculture and packaging industries.

#90059p0562 02/28/1990 ~PR Newswire

MONTREAL (FEB. 28) PR NEWSWIRE - The board of directors of Techbyte Inc. today announced that an agreement has been reached with Masterplan, Inc., of Haslett, Mich., granting to Techbyte worldwide, exclusive rights to market the Grademaker software developed by the Michigan company.

The Masterplan Grademaker concept is based on easy-to-use productivity software for use by teachers in elementary, secondary, and post-secondary education. William D. Gattis, president of Techbyte Inc., described the new software as "innovative and extremely attractive to every educator who has reviewed it. The program is very user- friendly, and saves a teacher a substantial amount of time. Grademaker is the first of a series of new teacher productivity software tools we plan to offer for the education market."

Of particular significance are the company's plans to offer Grademaker for four different personal computer platforms -- the Apple Macintosh, the Apple IIGS, the IBM PC and PC compatibles, and the Commodore Amiga. "These four versions are compatible with virtually all personal computer systems being sold into schools today," stated Gattis, "and will help to address a persistent problem for computer users in schools -- that of limited compatibility of software with much of the computer equipment that they are buying."

The Macintosh version will be the first to be available, with first deliveries scheduled for late spring of this year. In addition, several network-compatible versions are planned for future release.

Scott Bowers, vice president of educational sales and marketing for Techbyte International (USA) Inc., a wholly owned subsidiary of Techbyte Inc., described the Masterplan software as "particularly timely for the educational market. Preliminary reviews of the product by several large educational software distributors in the U.S. have been universally enthusiastic."

Bowers is currently exploring several distribution arrangements for the software in the U.S. market, and stated that "initially, a two- tiered distribution program is being considered. We plan to sell the product directly to the major school districts in the North American markets, and

we plan to sell to the medium and smaller districts through distribution arrangements with established education distributors."

In addition, the company is exploring several distribution arrangements for European educational markets.

#90059p0563 02/28/1990 ~PR Newswire

WALTHAM, MA (FEB. 28) PR NEWSWIRE - Thermo Instrument Systems Inc. (AMEX: THI) today announced that it has called for redemption, on March 30, 1990, all of its outstanding 6-3/4 percent Convertible Subordinated Debentures due 2003. The redemption price is 106.75 percent of the principal amount of the Debentures plus accrued interest to the redemption date, or a total of $1,114.29 for each $1,000 principal amount of Debentures. There are approximately $5.2 million principal amount of the Debentures currently outstanding.

As an alternative to redeeming for cash, holders of Debentures have the option, until the close of business on March 30, 1990, of converting their Debentures into Thermo Instrument Systems common stock at a conversion price of $10.50 per share. This is equivalent to approximately 95.24 shares of common stock for each $1,000 principal amount of Debentures converted. Based on the closing price of $14.88 of Thermo Instrument Systems common stock on the American Stock Exchange of Feb. 26, 1990, 95.24 shares has a current market value of approximately $1,417, which exceeds the redemption price.

Thermo Instrument Systems has entered into a standby agreement with Shearson Lehman Hutton, Inc. pursuant to which Shearson Lehman Hutton Inc. has agreed to purchase from the company the number of shares of common stock that would have been issued upon conversion of Debentures that either have been surrendered for redemption or have not been surrendered for conversion by the close of business on March 30, 1990. The Debentures are guaranteed on a subordinated basis by Thermo Electron Corporation.

The details concerning terms and conditions of redemption or conversion are fully described in a notice to be published in the Wall Street Journal Financial Times and Luxemburger Wort on Feb. 28, 1990. Redemption or conversion transactions will be handled by Chemical Bank.

Thermo Instrument Systems develops, manufactures, and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental

science and engineering services, laboratory-based testing, and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

EL SEGUNDO, CA (FEB. 28) PR NEWSWIRE - Wyle Laboratories (NYSE: WYL) registered increased sales and substantially higher earnings in the fourth quarter ended Jan. 31, 1990, Charles M. Clough, president and chief executive officer, announced today.

Net income for the quarter increased 77 percent to $2,719,000, or 28 cents per share, compared to income of $1,533,000, or 15 cents per share, reported a year ago. Sales for the fourth quarter were $106.1 million, up 9 percent from last year's $97.3 million.

For the year, sales were a record $415.6 million compared to $410.9 million in the previous year. Net income for the year amounted to $7,478,000, equal to 75 cents per share, down slightly from $7,800,000, or 77 cents per share, a year ago.

The improved operating results in the fourth quarter were mainly attributable to higher sales and profits at the Electronics Marketing Group. In addition, the company adjusted its provision for income taxes during the quarter, based on a review of certain income tax matters and related accruals, which reduced the effective tax rate for the year to 37.5 percent.

COEUR D'ALENE, ID (FEB. 28) PR NEWSWIRE - Shareholders today approved the Plan and Agreement of Regorganization and Merger dated Dec. 21, 1989 with Security Pacific Bancorporation Northwest. Approval of the agreement by more than 2/3 the required majority of outstanding shares was received at the Annual Meeting held today in Coeur d'Alene. Terms of the definitive agreement announced in December generally provide for Security Pacific to acquire all of the shares and options of the Idaho-based savings bank for $31.5 million. Common stockholders would receive approximately $18.03 per share as a result of the agreement. The transaction now must receive approval by the appropriate regulatory authorities. Closing is exptected to occur promptly thereafter upon satisfactory completion of other conditions of the merger agreement.

All other issues put before the shareholders received approval, including a charter amendment to increase the number of authorized common stock to 4,000,000, $1 par value.

Mountain West (NASDAQ: MWSB) has assets of $320 million and 10 full service offices throughout the state of Idaho, as well as mortgage lending offices in Boise, Idaho, and Spokane, Wash. It has 1.7 million shares outstanding, and its stock is traded on the National Over the Counter Market. It acquired Ketchum-based (Sun Valley) Mountain State Savings Bank in October 1988. Mountain West changed its name from First Federal Savings and Loan Association of Coeur d'Alene late last year.

Security Pacific Bancorporation Northwest is a wholly owned subsidiary of Security Pacific Corp., an $87 billion, Los Angeles-based bank holding company traded on the New York Stock Exchange. The Seattle-based company has assets of $10.1 billion and operates three commercial banks and a savings bank in Washington, Oregon and Alaska.

BETHESDA, MD (FEB. 28) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) has scheduled for launch on March 14 a Commercial Titan rocket carrying a 10,179-pound Intelsat VI communications satellite into orbit.

The launch is scheduled for 6:49 a.m. EST from Complex 40 at Cape Canaveral Air Force Station, Fla.

The satellite is the first of two Intelsat VIs to be launched by Commercial Titans this year. The second launch is expected in June. The satellites are built by Hughes Space & Communications Group. The International Telecommunications Satellite Organization (Intelsat) is an international not-for-profit commercial cooperative of 118 member nations that owns and operates a global communications satellite system used by more than 170 countries for a variety of telecommunications services.

Martin Marietta Commercial Titan, Inc., a wholly owned subsidiary of Martin Marietta Corporation, successfully launched its first Commercial Titan on Dec. 31, 1989, placing two communications satellites into orbit for the Japan Communications Satellite Company and the United Kingdom Ministry of Defense. A Martin Marietta Commercial Titan also is scheduled to launch the Mars Observer spacecraft for the National Aeronautics and Space Administration in 1992.

NEW YORK (FEB. 28) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) announced today that its French affiliate will upgrade distillate fuels processing at the company's refinery in Notre-Dame de Gravenchon, France, at a cost of about $38 million.

The new dewaxing and desulfurization unit will remove impurities from the feedstock used to produce diesel fuel and heating oil, resulting in even higher quality products. Expected to start up during the second half of 1991, it uses the Mobil Distillate and Dewaxing (MDDW) process which is based on a unique zeolite catalyst developed by Mobil scientists. Mobil licenses MDDW to refiners worldwide.

"This upgrade will strengthen our position in the European distillates market," said Eugene A. Renna, president of Mobil's marketing and refining division.

Last November Mobil dedicated two other Gravenchon upgrades - a plant to produce polyalpha olefins for making high-quality synthetic lubricants, and an isomerization unit to produce high-octane, clean- burning gasoline - totaling $60 million.

BALTIMORE (FEB. 28) PR NEWSWIRE - Employees of the Baltimore Gas and Electric Co. (NYSE: BGE) saved the utility's customers $326,660 in 1989 through the Work Smarter Proposal Plan, company officials announced today.

The employee suggestion program proved beneficial to employees as well. A total of 422 BG&E employees earned awards amounting to $116,089.

BG&E has had some form of employee suggestion program for more than 30 years. Since 1972, the Work Smarter Proposal Plan has saved BG&E customers $3,460,000.

Last year's single-largest award went to Joseph Grisbach, then a project designer and now a supervisor in the company's Central Distribution department. Grisbach's suggestion to replace underground cable vaults with cheaper, easy-to-maintain above ground structures resulted in an estimated three-year savings of $116,640 to BG&E customers. Grisbach, a resident of the Gardenville section of Baltimore City, was awarded 10 percent of the savings, or $11,665.

ATTLEBORO, Mass., Feb. 28 /PRNewswire/ -- Marshall Tulin, president of Swank, Inc. (NASDAQ: SNKI) today reported sales and earnings for the fourth quarter and year ended Dec. 31, 1989.

Commenting on the results for the year, Tulin said, "The improvement resulted from increased sales and improved margins offset in part by increased advertising and promotion activity and write-off of uncollectable accounts. During the fourth quarter the increase in

advertising and promotion activity, combined with the write-off of uncollectable accounts, amounted to a pre-tax charge of approximately 5 percent of sales."

Swank manufactures and markets men's and women's jewelry, belts, personal leather goods, fragrances and gift items. The company distributes its products to retail outlets throughout the United States and in 50 foreign countries.

TORONTO (FEB. 28) PR NEWSWIRE - Cineplex Odeon Corporation (NYSE: CPX) today announced that it has completed the sale of the corporation's interest in motion picture theaters in the Atlantic Provinces to Empire Theatres Limited and Canadian Multi-Screen Cinemas Limited of Stellarton, Nova Scotia for an aggregate purchase price of $3.4 million Cdn., subject to post-closing adjustments which are not expected to be material.

Assets sold include the four-screen Crystal Palace Cinemas, an operating cinema complex in Dieppe, New Brunswick, and the right to construct and

operate a cinema complex in the Dartmouth Supercentre in Dartmouth, Nova Scotia.

"Cineplex Odeon, as part of its strategy of concentrating on the exhibition business in our existing primary markets, has decided to curtail expansion into Atlantic Canada, and hence has agreed not to operate theaters in that region for five years," said Allen Karp, president and chief operating officer of Cineplex Odeon Corporation.

Cineplex Odeon is one the largest theater circuits in North America and includes approximately 1,935 screens in 500 locations in Canada, the United States and the United Kingdom.

AKRON, OH (FEB. 28) PR NEWSWIRE - Arthur Kelly, retired executive vice president and a former director of BFGoodrich (NYSE: GR), died Feb. 27. He was 87.

"Arthur Kelly had a long and distinguished career with the company, and he made a number of important contributions to our growth and success," BFG Chairman John Ong said. "He was a valued member of our management team and provided important guidance to us as a member of our board of directors. Those of us who knew him as an associate and friend are saddened by his death."

A graduate of Purdue University, Kelly joined the company in 1925 as a chemist. He served in various technical capacities in the United States and Japan, later becoming plant manager of the company's Oaks, Pa., and Clarksville, Tenn., manufacturing plants.

He became vice president-manufacturing for the company in February, 1953; president of the BFGoodrich Tire Company in June, 1953; executive vice president of the company in 1956; and was elected a director in 1961.

Kelly retired in 1967, but continued serving as a director until 1973. He was a trustee and member of the executive committee of Akron City Hospital and was a trustee of the University of Akron.

HUNTINGDON VALLEY, PA (FEB. 28) PR NEWSWIRE - Toll Brothers, Inc. (NYSE: TOL), a builder of luxury homes in the Boston-to-Washington corridor, today reported net income of $3,290,000, or 11 cents per share, for the first quarter of fiscal 1990, which ended Jan. 31. net income for the first quarter of the prior year was $3,044,000, or 10 cents per share. Revenues for the most recent quarter totaled $47,181,000, compared to revenues of $39,595,000 for the prior year's opening quarter.

The company also reported increases in the total number and aggregate sales value of new contracts signed. In the first quarter of fiscal 1990, new contracts were signed for 137 homes with a sales value of $37,641,000, compared to contracts for 124 homes with a sales value of $31,394,000 in the first quarter of last year.

Further, the contract backlog at Jan. 31, 1990, was higher than at Jan. 31 1989. At the end of this year's first quarter, the backlog had a sales value of $96,880,000 and consisted of 339 homes, while the year- earlier backlog had a sales value of $89,827,000 and consisted of 315 homes.

The company attributed the results to the increased number of communities in which it is offering homes for sale, rather than an improvement in housing demand. It noted that the results were, nevertheless, gratifying, given the well-publicized woes of the Northeast housing market.

Robert I. Toll, chairman and chief executive officer, commented that the increased number of communities, while continuing to restrain operating margins, position the company to benefit from the next upturn in the housing cycle.

Toll Brothers, Inc. designs, builds, markets and finances luxury single-family homes, townhomes and condominiums in the Boston-to-

Washington corridor.

ATLANTA (FEB. 28) PR NEWSWIRE - In separate meetings held today, shareholders of The Citizens and Southern Corp. (NYSE: CTZ) and Sovran Financial Corp. (NYSE: SOV) voted to approve the proposed combination of their two companies under a new holding company, Avantor Financial Corp.

The transaction, which is expected to be completed in the second quarter of 1990, will make Avantor the nation's 14th largest bank holding company. It will have total assets of approximately $48.7 billion and 1,000 banking offices in eight states ranging from Florida to Maryland, including Washington, D.C.

Approximately 90 percent of C&S shares voted, or 45,510,255 shares, were voted in favor of the merger. Shareholders voting for or against the merger represented 80 percent of the total C&S shares outstanding. The C&S shareholders meeting was held at The Westin Peachtree Plaza in Atlanta.

Approximately 95 percent of the Sovran shares voted, or 44,421,145 shares, were voted in favor of the merger. Shareholders voting for or against the merger represented 78 percent of the total Sovran shares outstanding. The Sovran shareholders meeting was held at the Sovran Conference Center in Norfolk, Va.

Avantor management will be centered in a four-person office of the chairman, operating from dual headquarters in Atlanta and Norfolk, Va. Brown will be chairman and chief executive officer and will continue as chairman of C&S. Gornto will be chairman of Avantor's executive committee and will continue as chairman and chief executive officer of Sovran.

Dennis C. Bottorff will become president and chief operating officer of Avantor, and he will continue as president and chief operating officer of Sovran. Bottorff will succeed Brown as Avantor's chief executive officer in the future. Hugh M. Chapman, president and chief operating officer of C&S, will become vice chairman of Avantor and chief executive officer of C&S. When Bottorff succeeds Brown as Avantor's chief executive officer, Chapman will become chairman of the Avantor board.

The boards of directors of both companies have already approved the merger. The transaction must still be approved by the appropriate federal and state regulatory authorities.

BARTLESVILLE, OK (FEB. 28) PR NEWSWIRE - Phillips 66 Company has embarked on a two-year, $1 million program to evaluate and quantify the advantages of propane as an alternate motor fuel, company officials announced here today.

Phillips 66, a major petroleum products retailer and longtime wholesale supplier of propane for agricultural and domestic uses, is converting 31 of its own fleet vehicles to operate on propane. The company also is conducting comparative analyses to measure the economic, environmental and performance benefits of propane over standard motor fuels.

"The move to cleaner burning fuels is one of the top priorities on the nation's clean air agenda and we believe propane is one of the leading alternate fuel candidates," said Bill Thompson, president of Phillips 66, a subsidiary of Phillips Petroleum Company (NYSE: P).

Tests by the Environmental Protection Agency show that propane emissions are 93 percent below federal clean air standards for carbon monoxide, show

57 percent improvement over standard fuels for nitrogen oxides and are 29 percent below standards for hydrocarbons. Propane engines generally operate two to three times longer than normal gasoline engines because of the fuels's clean-burning composition.

Thompson added that a Phillips 66 subsidiary, Phillips 66 Propane Company, expects to market propane as a fleet motor fuel later this spring under the registered trade name UltraClean(TM) Fleet LPG. The company is considering several cities in which to initiate its first retail propane venture, including those along the Front Range of the Rocky Mountains.

MCLEAN, VA. (FEB. 28) PR NEWSWIRE - Primark Corporation (NYSE,PSE: PMK) reports income from continuing operations for 1989 of $4.5 million, or 23 cents per share.

These earnings represent a significant increase over 1988, reflecting increased interest income and reduced federal income tax expense. Improved operating results from Primark's healthcare information and mortgage banking businesses additionally contributed to Primark's overall earnings improvement.

The 1989 earnings exclude the $3 million, or 15 cents per share, operating net loss of The Aviation Group, Inc. (TAG), whose operations were discontinued by Primark in the third quarter. The discontinuance of TAG was effected through sales of substantially all of its tangible assets to buyers for $12.2 million in cash and a $3.5 million promissory note. Additionally, TAG terminated and was released from certain of its major contracts. As a result of these transactions, TAG's aviation operations ceased on Dec. 31, 1989.

"Primark generated $85 million in cash during 1989, of which $62 million was generated by the sale of assets of the company's discontinued

operations," said Joseph E. Kasputys, Primark's chairman and chief executive officer. "By significantly strengthening our liquidity and divesting operations that did not fit into our overall growth strategy, Primark has entered 1990 in an excellent financial position to pursue its acquisition program."

Primark Corporation is a holding company headquartered in McLean which, through its diversified businesses, is primarily engaged in healthcare information, financial and ground transport services.

#90059p0631 02/28/1990 ~PR Newswire

JOHNSTOWN, Pa. (FEB. 28) PR NEWSWIRE - Johnstown Savings Bank, F.S.B. (NASDAQ: JSBK), an FDIC-insured institution, announced today that it was reporting a net loss of $12,119,000 or $6.25 per share for the year ended Dec. 31, 1989, compared to a net loss of $3,381,000 or $1.74 per share for the year ended Dec. 31, 1988. The 1989 loss includes approximately $12.0 million of year-end charges, consisting of a $7.5 million loss on securities designated for sale; $2.5 million of additional provisions for losses on loans and real estate owned; a $1.2 million charge relating to the bank's mortgage banking subsidiary; and $800,000 of other adjustments.

The $7.5 million loss on securities designated for sale was primarily due to a decision by management to charge to operating results $6.8 million, which is the difference between the current market value of the bank's marketable securities portfolio and its historical cost. As previously reported, approximately $5.0 million of the charge was recorded in the prior year as a market valuation allowance against stockholders' equity.

As a result, this charge will reduce the bank's stockholders' equity by only $1.8 million. The decision to charge the $6.8 million writedown to operations and not just record it on the bank's balance sheet was primarily due to the enactment of the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) of 1989, taken together with generally accepted accounting principles, and a decision to restructure the bank's balance sheet to comply with the new requirements set forth in FIRREA. This charge is expected to facilitate liquidation of substantially all of the bank's marketable securities portfolio.

Also contributing to the loss in 1989 were additional provisions for losses on loans and real estate owned during the fourth quarter of 1989 of $2.5 million. These additional provisions were made as a result of management's continuing review of the bank's loan and real estate owned portfolios and in conjunction with a regularly scheduled examination of the bank by the Office of Thrift Supervision and the Federal Deposit

Insurance Corp. The provisions taken in the fourth quarter are a reflection of the continuing weakness in the out-of-state markets in which the bank historically made commercial real estate loans.

At Dec. 31, 1989, the bank had $81.7 million or 39.6 percent of its total loan portfolio invested in commercial real estate, of which $67.8 million or 83.0 percent was located out of state. At. Dec. 31, 1989, the bank's non-performing assets (non-accrual loans, accruing loans 90 days or more overdue, restructured loans and real estate owned) amounted to $18.2 million or 6.09 percent of total assets, as compared to $16.6 million or 5.60 percent of total assets at Dec. 31, 1988.

At Dec. 31, 1989, the bank's total allowance for loan losses was $4.5 million, which represented 2.20 percent of all loans and 24.7 percent of non-performing loans, while the bank's provisions for losses on real estate owned was $900,000, or 14.0 percent of all real estate owned.

The loss in 1989 also was attributable to a revaluation of the carrying value of the purchased mortgage servicing rights owned by the bank's subsidiary, Standard Mortgage Corporation of Georgia Inc. The bank conducted a study to value Standard's portfolio of purchased mortgage servicing rights and determined that a writedown of approximately $1.1 million was necessary to reflect additional amortization of the portfolio, which had a carrying value of $9.3 million at Dec. 31, 1989, net of the writedown.

This writedown is the result of revising the assumptions used to amortize the portfolio. On Feb. 9, 1990, the FDIC published a proposed regulation which relates to the regulatory accounting for purchased mortgage servicing rights and the inclusion of such rights in the calculation of the bank's regulatory capital. Management of the bank currently is evaluating the proposed regulation, which could have a significant effect on the amount of purchased mortgage servicing rights which may be included in the bank's regulatory capital.

The bank's total assets increased by 0.68 percent to $299 million at Dec. 31, 1989, as compared to $297 million at Dec. 31, 1988. Due to the net loss of $12.1 million, stockholders' equity decreased to $19.3 million, or $9.97 per share, at Dec. 31, 1989, compared to $26.4 million, or $13.61 per share, at Dec. 31, 1988. Even with this decrease in stockholders' equity at Dec. 31, 1989, the bank's capital position was in compliance with all applicable regulatory requirements, with tangible, core and risk-based capital ratios of 5.4 percent, 5.4 percent and 8.7 percent, respectively.

Johnstown Savings Bank is a federally chartered, FDIC-insured savings bank which conducts its business from five offices in the Greater Johnstown area and through its mortgage banking subsidiary, Standard Mortgage

Corporation of Georgia, located in Atlanta.

#90059p0633 02/28/1990 ~PR Newswire

COSTA MESA, CA (FEB. 28) PR NEWSWIRE - Automated Scanning Inc. announced today that it is beginning a national program to license its proprietary document conversion technology to achieve rapid expansion in major market centers.

The program will consist of licensees positioned in all major computer-aided-design markets, who will have access to Automated Scanning's document conversion processes and join in a national marketing program. Automated Scanning offers a wide range of digital formats for customers in electronic publishing, facilities management, mechanical and electrical design, mapping and tailored databases. Automated Scanning's customers include a cross section of small to Fortune 1000 companies and federal and state government agencies.

The licensing strategy was chosen because large reductions in systems costs now allow licensees to own low cost centers in principal markets that can be inexpensively expanded to accommodate sales growth.

According to Vernon Francen, president, "The widespread use of computer-aided-design in virtually every industry is creating a need to convert large volumes of paper-based documentation into a variety of digital formats for storage, edit and design. Coupled with this need is the availability of very cost effective technologies that can be shared by Automated Scanning with its licensees. This will result in a close and innovative relationship in providing digitizing services to a large and diverse customer base. The low cost of starting a document conversion center, based on Automated Scanning's technical and operations support, makes licensing an ideal vehicle for rapid expansion to become the leader in this new field."

Automated Scanning is currently targeting about 30 major centers, which will have sales of $500,000 to over $1 million each within a three year period from start-up. Over a five year period, Automated Scanning expects to have approximately 100 document conversion centers in operation, internationally. Use of Automated Scanning's document conversion services are preferred by most companies and government agencies as a cost effective alternative to the purchase of expensive equipment and training of highly specialized personnel.

Automated Scanning is a publicly traded company.

For more information, call 303-696-6242.

SEATTLE (FEB. 28) PR NEWSWIRE - In a major effort to meet expanding demand for aircraft parts, Boeing Commercial Airplane Group today opened its third overseas spares distribution center, the company said.

The 50,000 square foot facility near Heathrow Airport outside London is the first to be owned and operated by Boeing.

A distribution center in Brussels is run by Sabena Airlines on a contract with Boeing and a center in Singapore is managed by Singapore Airlines for Boeing.

Gordon Bethune, vice president of Airline Logistics Support for the Boeing Customer Support Division, said the new London spares center reflects the dynamic growth of the spares business at Boeing.

In the past three years, Bethune noted recently, the volume of spares activity has increased by 45 percent to 16,000 items shipped a week. He added that, to meet predicted needs, Boeing expects the current spares inventory, with a sales value of about $2.6 billion, to double by the year 2000.

"We certainly will have one of the world's largest parts inventories - if not the largest," Bethune said. "The decision to locate in England demonstrates how seriously Boeing intends to meet its commitments to our customers," he said.

He added "The London center, stocking up to 30,000 part numbers, enhances Boeing's ability to serve not only the British Isles but customers in Africa and the Middle East as well."

ATLANTA (FEB. 28) PR NEWSWIRE - Nicholas D. Trigony will become president of the broadcasting division of Cox Enterprises upon the retirement of Stanely G. Mouse on Feb. 28, after 45 years with the company.

The announcement was made by James C. Kennedy, chairman and chief

executive officer of Cox Enterprises Inc. Last spring, the company announced plans for this transition of leadership.

Trigony joined Cox Enterprises in 1986 as executive vice president-radio for the broadcasting division. In 1989 he was promoted to executive vice president for the division, with responsibility for Cox television, as well as radio stations. Before joining Cox, Trigony was vice president and general manager of KIKK AM/FM in Houston. Prior to joining that station in 1981, he was with the American Broadcasting Co. for nine years. During that time he was vice president and general manager of WPLJ-FM in New York and held the same position at KXYZ-AM in Houston. Trigony previously held sales management positions at WLS-AM in Chicago and WABC-AM in New York. Earlier, he was with John Blair & Co. in Chicago and New York as an account executive.

Trigony is on the Television Membership Committee of the National Association of Broadcasters. He has served on the board of directors of the Radio Advertising Bureau and was a member of the Radio Operators Caucus. In 1988 he served on the steering committee of the radio meetings of the National Association of Broadcasters. Trigony is past chairman of both the New York City Radio Broadcasters and the Houston Area Radio Broadcasters.

He has a degree in marketing from Syracuse University. Headquartered in Atlanta, Cox Enterprises is a leading group broadcaster which owns and operates seven television stations and seven FM and five AM radio stations. Cox stations include WHIO TV and AM, WHKO(FM), Dayton, Ohio; WSB TV-AM-FM, Atlanta; WSOC TV-AM-FM, Charlotte, N.C.; WPXI(TV), Pittsburgh; KTVU(TV), San Francisco-Oakland; WKBD(TV), Detroit; WFTV(TV), Orlando, Fla.; WIOD, WGTR(FM), Miami; KFI, KOST(FM), Los Angeles; WCKG(FM) Chicago; and WWRM(FM), Tampa-St. Petersburg, Fla. The division also includes TeleRep, national TV sales representation firm.

Cox Enterprises also is a leader in newspaper publishing, cable television and automobile auctions.

FORT WORTH, TX (FEB. 28) PR NEWSWIRE - Westbridge Capital Corp. (AMEX: WBC), a health insurance holding company, today reported a substantial reduction in its net losses for the three and 12 months ended Dec. 31, 1989.

For the fourth quarter, the company sustained a net loss of $538,000, equal to 13 cents per share, compared with a net loss of $2.7 million, or

65 cents per share, for the corresponding 1988 period. For all of 1989, the net loss was $172,000, equal to 4 cents per share, versus a net loss of $4,738,000, or $1.14 per share, in 1988.

The respective 1989 periods include capital losses of $782,000 recognized in the fourth quarter, whereas both the year and final quarter of 1988 included $1,989,000 of asset write-offs and expenses and increases in claim reserves.

Martin E. Kantor, chairman and president, pointed out that the capital losses in the 1989 fourth quarter resulted from unanticipated property calls at par value of certain public utility bonds which had been acquired at a premium and the subsequent writedown on all other such bonds in the portfolio with similar call provisions.

"We are gratified," Kantor stated, "that our insurance operations showed consistent improvement throughout the year. We are confident that premium revenue and profitability in 1990 will show the benefits of the restructuring of our business over the last several years," he concluded.

DALLAS (FEB. 28) PR NEWSWIRE - Maxus Energy Corp. (NYSE: MXS) reported that production has resumed at its Intan-A production platform in Southeast Sumatra, offshore Indonesia. Production was halted on Jan. 21 due to a fire on the Lan Shui, a floating production storage and offloading vessel under contract to the company.

"Over the next few days, we expect to bring production from the Intan-A platform back to the original level of approximately 35,000 gross barrels per day," said Andy Gupta, vice president, international operations. "Production from the Intan field is expected to average 44,000 gross barrels per day in 1990."

The Lan Shui, under contract from P.T. Samudra Petrindo Asia, whose parent is Bluewater Terminal Systems N.V., has been repaired and is performing as a temporary processing facility. A second vessel is now being used for temporary storage of the Intan production.

Permanent processing facilities are expected to be installed during the fourth quarter of 1990 in the Intan/Widuri producing area.

Maxus Energy is the operator with 56 percent of the contractors' interest in the Southeast Sumatra production-sharing contract area.

BOISE, ID (FEB. 28) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) today announced that the newly formed electrical contracting division of its Construction Group has been awarded a contract in excess of $13 million from the Virginia Department of Transportation for installation of automated systems for a tunnel beneath the Hampton Roads, a waterway off Newport News, Va.

The contract award extends MK's involvement in the Hampton Roads tunnel, a submerged, mile-long interstate highway section that connects Newport News with Suffolk. MK and an associate have essentially completed construction of the $125-million tunnel.

Now, the company's electrical division will install computerized electrical and traffic control systems, which include area lighting, switching, overhead signs and signalization facilities.

Work is scheduled to begin immediately, with completion preceeding the tunnel's opening in December 1991.

SEATTLE (FEB. 28) PR NEWSWIRE - Southwest Airlines (U.S.A.) today received the first 737-500 from Boeing Commercial Airplane Group, Boeing announced.

The airplane, which received flight certification from the Federal Aviation Administration on Feb. 12, was delivered to the carrier at its home base in Dallas. Southwest has ordered 38 of the -500s.

Powered by CFM56-3B1 engines, the 737-500 will play a major role in Southwest's service to 30 cities in 14 states. The airline is the eighth largest in the United States in terms of customers carried.

Southwest Airlines currently operates a fleet of 94 Boeing 737 aircraft, including 46 of the -200s and 48 of the -300s.

The airline was a launch customer for both the Boeing 737-300 and the 737D500.

Launched in May 1987, the 737-500 rolled out of the Renton plant on June 3 1989. First flight occurred on June 30, 1989.

The 737-500, with 108 seats in a mixed-class layout, is the shortest-fuselage version of the advanced technology 737s and provides operators a quiet, more fuel efficient replacement for the 737-200. It complements the 737-300, seating 128 passengers and the 737-400, which seats 146 passengers.

The three new 737 models enable airlines to select the right airplanes to match traffic demands since all three offer a common type rating. Other commonality advantages include reduced training, maintenance and spare parts costs.

Nineteen customers have ordered 193 737-500s. Braathens SAFE (Norway) will receive delivery of the second -500 in early March.

WORCESTER, MA (FEB. 28) PR NEWSWIRE - The Hanover Insurance Company (NASDAQ: HINS) today reported net income of $82,838,000 for 1989, or $4.02 per share, compared to net income of $119,945,000, or $5.82 per share, in 1988. Earnings include a "fresh start" income tax benefit of $5,144,000, (or 25 cents per share) and realized capital gains, net of Federal income taxes, of $26,288,000 (or $1.28 per share) in 1989, and "fresh start" income tax benefit of $8,748,000, (or 42 cents per share) and realized capital gains, net of Federal income taxes, of $8,866,000, (or 43 cents per share) in 1988.

The company's combined ratio, including policyholders' dividends, was 105.9 percent for 1989 compared to 100.4 percent in 1988. The ratio of losses and loss expenses to net premiums earned was 75.3 percent compared to 70.4 percent in 1988. The ratio of underwriting expenses to net premiums written was 30.0 percent compared to 29.2 percent in 1988. Dividends to policyholders were .6 percent of net premiums earned compared to .8 percent in 1988.

In 1989 net weather-related catastrophes approximated $26,858,000, adding 1.9 points to the combined ratio, compared to $4,601,000 in 1988, adding .3 points to the combined ratio.

Net premiums written for 1989 increased 2.3 percent to $1,477,125,000 from $1,444,554,000 in 1988 compared to a 6.0 percent increase for the same period last year. Net premiums earned for the period decreased .2 percent to $1,420,657,000 from $1,423,942,000 in 1988 compared to an increase of

10.0 percent for the same period in 1988. Adjusting for the impact of California Compensation & Fire Company (Cal Comp), which was sold on Dec. 15, 1988, premiums written increased 4.1 percent while premiums earned increased 1.6 percent.

For 1989, the investment portfolio showed a pre-tax net capital gain of $49,229,000 consisting of a realized capital gain of $39,831,000, and an unrealized capital gain of $9,398,000. In the same period of 1988, the investment portfolio showed a net pre-tax capital gain of $35,083,000 consisting of a realized capital gain of $12,403,000, and an unrealized capital gain of of $22,680,000.

Net investment income is up 11.6 percent from $137,869,000 to $153,930,000. Adjusting for the impact of Cal Comp, net investment income is up 16.5 percent.

For the fourth quarter, net income was $9,528,000, (or 46 cents per share) compared to net income of $21,165,000, (or $1.03 per share) in 1988.

Hanover is an insurance and financial service organization marketing property and casualty lines of insurance. Hanover's common stock is traded "Over the Counter", and its symbol is "HINS".

CHICAGO (FEB. 28) PR NEWSWIRE - First Colonial Bankshares Corp. (NASDAQ: FCOLA) of Chicago announced today that a definitive agreement has been reached to acquire the $147-million-asset York Bankshares Inc., the parent of York State Bank & Trust Co., Elmhurst, Ill. Under the terms of the merger, First Colonial will pay a contribution of cash and stock for 100 percent of York.

York State Bank will be the fourth First Colonial location in DuPage County. First Colonial began its move into the DuPage area with the acquisition in January 1989 of the DuPage County Bank of Glendale Heights, which was renamed First Colonial Bank of DuPage County. That bank opened a temporary facility in October 1989 at Route 59 and Gowdey Road in Naperville, and its two-story headquarters is expected to be completed in the spring of this year. In December 1989, pending regulatory approval, First Colonial acquired American National Bank of DuPage, Downers Grove, Ill., which is also located in DuPage County.

Johnson said that First Colonial expects to consummate the York merger during the second quarter 1990.

First Colonial Bankshares currently owns 11 banks with 16 locations throughout Chicago and its surrounding suburbs and is parent company of other non-bank subsidiaries including Mid-States Financial Corp., a commercial leasing firm, and First Colonial Trust Co. First Colonial has recently announced the acquisition of American National Bank of DuPage, Downers Grove; Burbank State Bank, Burbank, and Fox Lake State Bank, Fox Lake, pending regulatory approval.

HAIFA, ISRAEL (FEB. 28) PR NEWSWIRE - Elbit Computers Ltd. (NASDAQ: ELBTF), an Israel-based manufacturer of computer-based systems and products for military and commercial applications and a subsidiary of Elron Electronic Industries Ltd. (NASDAQ: ELRNF), today announced that pursuant to a prospectus dated Feb. 26, it has undertaken an underwritten public offering in Israel. The prospectus covers an offer of the following securities:

To the public in Israel:

-- Registered debentures (Series A) in the aggregate amount of NIS 25,375,000 maturing during the period 1993-2001. These debentures will bear interest at an annual rate which will be determined via a public auction, and which interest rate will be between 1 percent and 0.5 percent below LIBOR (the London Inter Bank Offering Rate).

-- Registered debentures (Series B) in the aggregate amount of NIS 20 million maturing during the period 1993-1995, bearing interest at the rate of 5 percent per annum. Series B debentures are generally convertible on any business day starting on Sept. 1, 1990, until July 31, 1995, into ordinary shares of the company at the rate of NIS 24.80 (approximately $12.72) principal amount of Series B debentures for each ordinary share (subject to adjustment).

Principal and interest of both series of debentures will be linked to the representative rate of the U.S. dollar as published by the Bank $1).

-- 1 million warrants (Series 1) each to purchase one ordinary share of the company generally exercisable on any business day starting on Sept. 1, 1990, and until Feb. 28, 1995, upon payment of NIS 20.46 (approximately $10.50) for each ordinary share (subject to adjustment).

The exercise price of the Series 1 warrants is linked to the Israeli Consumer Price Index which will be published for the month of February 1990.

-- 305,000 warrants (Series 2) each to purchase NIS 100 par value of Series A debentures exercisable by payment of NIS 98 on any business day starting from the date on which they will be listed for trading on the Tel Aviv Stock Exchange until April 26, 1990.

The above securities are being offered in 100,000 units, the composition and price of each unit being as follows:

Debentures (Series A) par value NIS 250 at a price of	NIS 250
Debentures (Series B) par value NIS 200 at a price of	NIS 200
Ten warrants (Series 1)	--
Three warrants (Series 2)	--
Total price per unit	NIS 450

The aggregate offering amount to the public is equal to NIS 45 million, which is approximately $23 million.

#90059p0669 02/28/1990 ~PR Newswire

CHICAGO (FEB. 28) PR NEWSWIRE - Santa Fe Pacific Corporation ("SFP") (NYSE: SFX) and Texas Utilities Company ("TU") (NYSE: TXU) today announced they have settled a lawsuit brought by TU against SFP subsidiaries involving a long-term coal lease agreement for over 300 million tons of coal located in northwestern New Mexico. The anti- trust lawsuit sought damages in excess of $250 million prior to trebling and to have the coal lease agreement declared void and unenforceable.

The parties executed several agreements to effect settlement. The most significant agreement includes an amended coal lease. The settlement will result in Hospah Coal Company, an SFP subsidiary, receiving $212 million in 1990. This amount is comprised of a $57 million payment due under the previously-existing lease, plus an advance royalty payment of $155 million under the amended coal lease. Hospah Coal Company has already received $225 million of advance royalties during the years from 1977 through 1989.

The settlement significantly reduces TU's future advance royalty payments under the lease, and eliminates or relaxes many of the restrictions in the original lease terms. Under the amended lease, Hospah Coal Company will receive annual royalty payments of approximately $16 million beginning in 1991 and through 2017. In addition, terms of the amended lease also provide that a 12.5 percent royalty would be paid on coal mined in excess of 228 million tons. As stated above, terms of the original agreement provided for payments of $57 million in 1990. In years thereafter through 2012 those payments would have been adjusted for inflation.

The parties also agreed to terms for the future transportation of the coal when it is ultimately developed and mined.

#90059p0670 02/28/1990 ~PR Newswire

PASADENA, CA (FEB. 28) PR NEWSWIRE - Conversion Industries Inc. (AMEX: CVD) today reported results for the year and quarter ended Nov. 30, 1989.

For the year, revenues were $2,200,056 versus $13,720,884 in fiscal 1988. Net income was $883,265, or 37 cents per share as compared to $4,829,422, or $2.10 per share. Per share figures have been restated to reflect a 1-for-3 common stock reverse split on May 31, 1989.

For the quarter ended Nov. 30, 1989, revenues were $576,272 as compared to $10,073,618 one year ago resulting in a net loss of $61,970, or 3 cents per share as compared to net income of $2,389,164, or $1.02 per share. The loss for the quarter was attributed to reserves for the settlement of

a lawsuit.

The results for fiscal 1988 included gains from the sale of equity positions in two power production facilities of $11,470,890, recognized as operating income.

"The results for fiscal 1989 were generated from recurring sources of revenues. Our on-going strategy is to increase revenues and earnings from recurring sources, including power production facilities and oil and natural gas production development," stated John McGrain, chairman of the board. "During 1988, asset sales represented more than 97 percent of our total revenues," he added.

During the past fiscal year, Conversion's revenues from power production tripled and oil and gas production accounted for more than 36 percent of total revenues.

"We are confident that with the additional production currently being generated by Colin's operations as well as additional power production facility development, Conversion's growth will be impressive during fiscal 1990," McGrain stated. He noted that during the past four months, Colin's net daily oil production had tripled and is expected to exceed 1,000 barrels per day by March 1.

The announced acquisition of Coast Machinery Movers should be a material contributor to fiscal 1990 revenues and earnings. For 1990 earnings should represent a substantial gain over 1989.

Conversion Industries is a fully integrated independent power production company. In addition, Conversion holds a 52 percent interest in Calgary, Alberta-based Colin Energy Corp. (TSE: CN.) an oil and natural gas producer.

#90059p0673 02/28/1990 ~PR Newswire

ROCKY MOUNT, NC (FEB. 28) PR NEWSWIRE - Texfi Industries, Inc. (NYSE: TXF), today reported record net sales for the first quarter which ended Feb. 2, 1990.

Sales for the quarter were $55,500,000, which were up 15 percent from $48,306,000 reported in the corresponding period a year ago primarily due to acquisitions following the first quarter of fiscal 1989.

Operating earnings of $3,375,000, which increased 7 percent from last

year's first quarter, were adversely impacted by curtailed operating schedules due to sluggish market demand. Net income after taxes and interest of $1,605,000 was down from $2,581,000 in the prior year primarily due to the additional interest expense incurred in financing the growth in assets of the company from $89,764,000 on Jan. 27, 1989, to $124,358,000 on Feb. 2, 1990.

Overhead in the form ofselling, general and administrative expenses declined from 6.5 percentof sales in the first quarter of 1989 to 5.9 percent in 1990. Dividends paid to preferred stockholders reduced net income by $798,000 and $794,000 for the first quarter of 1990 and the first quarter of 1989, respectively. Common stockholders' equity increased from $3.87 per share on Jan. 27, 1989, to $4.91 per share on Feb. 2, 1990, an increase of 27 percent.

CONTACT: Michael A. Miller, executive vice president of Texfi Industries 919-443-5001; or Pier Stiny of D. F. King & Co., 212-269-5550, for Texfi

COLUMBIA, SC (FEB. 28) PR NEWSWIRE - SCANA Corporation (NYSE: SCG) today reported consolidated earnings for 1989 of $122.6 million, or $3.04 per common share, compared to $120.7 million, or $3.00 per share in 1988. Total operating revenues in 1989 were $1.12 billion, compared to $1.08 billion in 1988.

Total kilowatt-hour sales of electricity by SCANA, whose principal subsidiary is South Carolina Electric and Gas Company (SCE&G), were up 3.0 percent in 1989 compared to 1988. Consolidated sales of natural gas by SCE&G and South Carolina Pipeline Corporation, SCANA's gas transmission subsidiary, were also higher in 1989, up 5.5 percent over sales in 1988. A 3.0 percent increase in SCE&G's retail electric rates effective July 3, 1989 also contributed to the earnings improvement.

Consolidated earnings in the fourth quarter of 1989 were $22.3 million, or $.55 per common share, compared to $21.7 million, or $.54 per share for the same period last year. Operating revenues for the fourth quarter of 1989 were $284.6 million, up 5.4 percent compared to same period last year. The Company reported no change in the number of common shares outstanding at December 31, 1989.

SCANA Corporation, headquartered in Columbia, SC, is a diversified holding company engaged, through subsidiaries, in regulated utility businesses and other non-regulated businesses.

MINNEAPOLIS (FEB. 28) PR NEWSWIRE - The Valspar Corporation (AMEX: VAL), a major coatings company, reported net income for the first quarter ended Jan. 26, 1990, of $3,092,000 or 28 cents per share versus $2,584,000 or 23 cents per share last year. Sales for the quarter increased 10 percent to $112,168,000 compared with $101,958,000 a year ago. Excluding the McCloskey acquisition, comparable sales increased approximately 2.5 percent.

C. Angus Wurtele, Valspar's chairman, stated that "the Packaging Coatings and Special Products Groups had strong first-quarter results. The Consumer and Industrial Coatings Groups had a disappointing first quarter, but we expect their performance to improve for the balance of the year."

Michael P. Sullivan, president and chief executive officer of International Dairy Queen, Inc., was elected to the board of directors of The Valspar Corporation at the annual meeting of stockholders on Feb. 28. Prior to joining International Dairy Queen, Inc., in 1987, Sullivan was with the Minneapolis law firm of Gray, Plant, Mooty, Mooty & Bennett for 25 years, and was the managing partner of that firm from 1977 to 1987.
Dividend Information

The board of directors of The Valspar Corporation at its meeting on Feb. 28, 1990, declared a regular quarterly dividend of 13 cents per share payable April 13, 1990, to all common stockholders of record on March 30, 1990.

BOISE, ID (FEB. 28) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) today announced that the newly formed electrical contracting division of its Construction Group has been awarded a contract in excess of $13 million from the Virginia Department of Transportation for installation of automated systems for a tunnel beneath the Hampton Roads, a waterway off Newport News, Va.

The contract award extends MK's involvement in the Hampton Roads tunnel, a submerged, mile-long interstate highway section that connects Newport News with Suffolk. MK and an associate have essentially completed construction of the $125-million tunnel.

Now, the company's electrical division will install computerized

electrical and traffic control systems, which include area lighting, switching, overhead signs and signalization facilities.

Work is scheduled to begin immediately, with completion preceeding the tunnel's opening in December 1991.

SEATTLE (FEB. 28) PR NEWSWIRE - Boeing Aerospcae & Electronics has selected Raytheon Company's Missile Systems Division, Bedford, Mass., as its teammate on the U.S. Navy's Advanced Interdiction Weapon System (AIWS). Boeing currently is working on a contract to demonstrate and validate the new air-to-ground system.

Raytheon was selected because of its significant experience in aircraft integration, advanced guidance and sensors, low-cost production and logistics support.

The Navy plans to select one contractor team for full-scale engineering development (FSED) in mid-1991, following completion of the demonstration/validation phase. The FSED contract is expected to include options for low-rate initial production and demonstration and validation of pre-planned product improvements to the baseline weapon. The winning team will co-qualify and co-produce through FSED and the first two years of production. The two companies will then compete for subsequent production lots.

The Boeing/Raytheon team currently is competing against teams from McDonnell Douglas/Hughes and Texas Instruments/LTV.

The Navy's plans for the baseline AIWS call for a low-cost standoff weapon. The unpowered AIWS is not intended to be the "ultimate weapon," the Navy says, but would be an affordable system capable of being upgraded when new technology is available at a low cost. In its initial configuration, it could be launched against a broad spectrum of soft area targets. But with its growth potential to accommodate terminal guidance and alternate warheads, it could be upgraded to destroy hard point and mobile targets.

Major subcontractors on the Boeing/Raytheon team indclude Honeywell Military Avionics, Minneapolis; Smiths Industries, Grand Rapids, Mich.; NWL Control Systems, Kalamazoo, Mich,; Parker Hannifin, Irvine, Calif.; Talley Defense Systems, Mesa, Ariz.; and Phillips 66 Co., Bartlesville, Okla.

WESTBOROUGH, MA (FEB. 28) PR NEWSWIRE - New England Power Company (NEP) today proposed a voluntary agreement with the Connecticut River Atlantic Salmon Commission (CRASC) to promote the downstream migration of Atlantic salmon. This agreement is the outgrowth of recent discussions between NEP and CRASC. According to the proposed agreement, NEP will continue to work with CRASC to develop and implement plans for three of the company's hydroelectric stations on the Connecticut River to ensure safe downstream passage of the fish around each station's powerhouse. The three hydroelectric stations covered by the agreement are Wilder, Vernon, and Bellows Falls.

John F. Kaslow, president of NEP, said "New England Power has been the leader in the restoration of Atlantic salmon to the Connecticut River. Beginning in 1979, we have constructed fish ladders at three power stations to promote safe upstream migration, and since the mid 1980s, we have been conducting research experiments to determine the best method to protect salmon in their downstream migration. This agreement sets goals for NEP to provide downstream fish passage consistent with dates adopted by CRASC."

According to the agreement, NEP proposes to commence construction of fish diversion systems at Vernon and Bellows Falls Stations in 1993. At Wilder Station, NEP proposes to develop a gate spillage plan to ensure that Atlantic salmon smolts are by-passed around the station's powerhouse. NEP intends to provide downstream passage at all three stations in time for the 1994 downstream migration period.

Prior to construction, NEP will continue its research and development studies to ensure that the optimal downstream fish migration systems are installed.

"Restoring the Atlantic salmon population to the Connecticut River has been a dream of conservationists and the mission of CRASC for many years. This agreement sets the stage for this dream to become a reality. We are

proud to play our part in helping to restore the salmon," Kaslow said.

NEP owns and operates 21 electric generating stations throughout New England, including 14 hydro-electric stations in New Hampshire, Vermont and Massachusetts.

DEARBORN, MI (FEB. 28) PR NEWSWIRE - The following statement may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division.

Ford Motor Company is voluntarily recalling approximately 16,000 1986 California Escort, Lynx and EXP vehicles equipped with 1.9-liter engines and automatic transmissions.

In-use vehicle emission testing conducted by the California Air Resources Board (CARB) indicated that hydrocarbon (HC) and oxides of nitrogen (NOx) exhaust emission levels were unacceptable.

To correct this condition, Ford dealers are being asked to remove a vacuum delay valve, revise the engine ignition timing, and replace certain crankcase venting components.

Owners will be notified by mail and asked to return the vehicles to their dealers to have the work performed at no cost.

All of the affected vehicles were produced for sale in California only.

TROY, MI (FEB. 28) PR NEWSWIRE - Energy Conversion Devices, Inc. ("ECD") (OTC: ENER) and Canon Inc. of Japan ("Canon") announced today that they had reached a basic agreement to form a joint venture for the manufacture of solar cells in the United States. Under the terms of the pre-joint venture agreement, the company, which is intended to be a model for United States/Japanese business relations, will manufacture and sell proprietary thin-film solar cell products under license from ECD.

Canon and ECD will negotiate to form the joint venture no later than July 1, 1990. During the pre-joint venture period, ECD and Canon will review

ECD's current photovoltaic operations and engage in a joint program aimed at manufacturing process optimization and scale up of both module energy conversion efficiency and solar cell output.

In connection with the pre-joint venture agreement, ECD entered into a term loan agreement to borrow up to $8 million from Canon to fund ECD's pre-joint venture activities. When the joint venture is formed, such loan will be appropriated for a portion of Canon's capital contribution to the new company.

Canon, a 6-percent stockholder in ECD, is a leading international manufacturer of photographic products, automated business machines, and optical products.

ECD, based in Troy, is the pioneer in amorphous materials technology. The company and its subsidiaries license technology and manufacture and sell products in the areas of alternate energy, information processing, and synthetic materials. ECD's solar and battery products are environmentally safe and address such environmental problems as protecting the ozone layer reducing hazardous waste, the greenhouse effect and atmospheric pollution.

NEW YORK (FEB. 28) PR NEWSWIRE - USLIFE Corporation (NYSE: USH) named Michael LeFante as vice president-audit and control and Julie L. Mak was promoted to second vice president-audit and control. They are located at the USLIFE Operations Center in Neptune, N.J.

In making the announcement today, Gordon E. Crosby, Jr., chairman of the board, president and chief executive officer of USLIFE, said: "We are pleased to recognize the talent and ability of these USLIFE executives who are an integral part of our management team at the corporate facility in Neptune. Their combined service and experience will be an asset to the parent company and all of the USLIFE Companies."

Michael LeFante, 35, joined The United States Life Insurance Company, a wholly owned USLIFE subsidiary, in 1976 as a staff assistant in the accounting department. In 1978, he was promoted to senior accountant. The following year, in 1979, he transferred to USLIFE as auditor in the parent company's audit and control department. In 1981, LeFante was named senior auditor and, later that year, he was promoted to regional audit manager.

In 1982, he was appointed assistant vice president-audit manager East and, in 1985, he was elected second vice president-regional audit manager and

then served as second vice president-audit and control. Most recently, in 1988, he was elected vice president-regional audit manager.

LeFante earned a Bachelor of Science degree in accounting from St. Peter's College in 1976. He and his wife, Cindy, and their two children reside in Marlboro, N.J.

Julie L. Mak, 32, joined USLIFE Corporation in 1985 as a staff auditor in the audit and control department. In 1986, she was promoted to senior auditor and in 1987 was named supervising senior auditor. Since 1989, she has served as assistant vice president and special projects audit manager.

Mak is a graduate of the London School of Economics at the University of London in London, England, where she earned a Bachelor of Science degree in accounting and finance and the designation of Chartered Accountant. She received her C.P.A. certificate in 1987 and resides in Edison, N.J.

#90059p0705 02/28/1990 ~PR Newswire

FORT WORTH, TEXAS (FEB. 28) PR NEWSWIRE - Pengo Industries Inc., (PSE: PGO.P) ("Pengo") of Fort Worth today announced that in regard to closing its First Amended Plan of Reorganization ("the Plan"), which was approved on Oct. 2, 1989, by the U.S. Bankruptcy Court in Fort Worth where the consolidated bankruptcy proceeding of Pengo and Pengo Finance N.V. have been pending, the deadline in which to close its Plan had been extended by the Court from Feb. 28, 1990, to April 30, 1990.

Pengo had requested the Court to grant the extension to allow time to address some environmental matters that had arisen in connection with the normal due diligence procedures attendant to closing the Plan. In this regard Pengo stated that it had employed an environmental consultant firm to conduct a review of certain real properties and operations of the company and its subsidiaries. The environmental report will not be completed for four to six weeks.

Additionally, in a related development Pengo had previously announced that it had received a notice from the Thomas Group, who are participants in the Plan and headed by Wilmer J. Thomas Jr., of Palm Beach, Fla., that as a result of their analysis of certain economic and environmental matters a material adverse change in the company had occurred. Pengo formally notified the Thomas Group that it disputes such contentions. Such dispute is presently being settled by the parties pursuant to a Mutual Release between Pengo and the Thomas Group which includes return of an escrow fund in the amount of $500,000 to the Thomas Group. Such action by the Thomas

Group indicates that the Plan will not close as presently structured.

Pengo is informed by its Senior Secured Lenders that they are in discussions with the Thomas Group regarding their respective roles in closing the Plan. The company further explained that the results of such discussions may lead to the parties proposing some modifications to the present structure of the Plan. If such modifications are proposed they will be duly condidered by the Pengo board of directors with appropriate disclosure to the Bankruptcy Court and other parties to the Bankruptcy proceeding.

Regarding financing for the Plan, Pengo had earlier announced that it had received a commitment from the Bank of New England to fund $14 million of the approximate $17.2 million needed to fund the Plan. Pursuant to its terms, such commitment expired on Feb. 28, 1990. Pengo indicated that it will resume discussions with the Bank of New England regarding a new commitment to finance the Plan as it may be restructured; however, there is no assurance that the Bank will give a new financing commitment.

Pengo is traded on the Pacific Stock Exchange under the symbol PGO.P.
For further information regarding Pengo Industries Inc., contact E. Wayne Mercer, vice president/general counsel, Pengo Industries Inc., Water Gardens Place, 100 East 15th Street, Suite 450, Fort Worth, Texas 76102, 817-877-0388.

LOS ANGELES (FEB. 28) PR NEWSWIRE - Mike Medavoy has been appointed chairman of Tri-Star Pictures, it was announced today by Alan J. Levine, president of the Filmed Entertainment Group of Columbia Pictures Entertainment Inc.

In his position, Medavoy will be responsible for the overall operations of Tri-Star Pictures, which includes development, production and marketing of the Tri-Star product. Medavoy will report directly to co-chairmen of the company, Peter Guber and Jon Peters, as well as to Levine. Additionally, he will be named to the board of directors of Columbia Pictures Entertainment Inc.

"We are thrilled with the caliber of leadership that Mike will offer the company and which he has demonstrated over the past 16 years at Orion and United Artists," said Levine.

"I look forward with great hope and anticipation to the challenges ahead of me," said Medavoy. "I will be working with long-standing friends who

have made me very welcome to the Columbia family," he added.

"Mike has been a good friend for many years. His loyalty and commitment to the groups at both Orion and United Artists, coupled with his proven talents, are exactly what we know he offers our company in the future," said Guber. "He is a highly respected creative and business executive and we welcome him with great excitement," added Peters.

Medavoy departs Orion after nearly two decades with the company, where he was a partner and co-founder, along with Arthur Krim, Eric Pleskow, Bill Bernstein and Robert Benjamin. Medavoy and his four colleagues from the United Artists Corporation formed Orion in partnership with Warner Communications Inc. in 1978.

In 1982, Medavoy along with Krim, Pleskow and Bernstein purchased Filmways Inc., a distribution entity, and structured the company to create Orion Pictures Corporation, a publicly traded company on the New York Stock Exchange.

At Orion, Medavoy was deeply involved in many critical and box-office successes including Academy Award winners "Platoon" and "Amadeus," as well as the studio's "Mississippi Burning," "Bull Durham," "Throw Momma From the Train," "Robocop," "No Way Out," "Hoosiers," and "Colors."

Medavoy has cultivated relationships with some of the most sought-after talent, making Orion home to such talent as Kevin Costner, Michelle Pfeiffer, Jessica Lange, and Dennis Quaid to that studio.

ATLANTA, (FEB. 28) PR NEWSWIRE - Nicholas D. Trigony will become president of the broadcasting division of Cox Enterprises upon the retirement of Stanley G. Mouse on Feb. 28, after 45 years with the company.

The announcement was made by James C. Kennedy, chairman and chief executive officer of Cox Enterprises Inc. Last spring, the company announced plans for this transition of leadership.

Trigony joined Cox Enterprises in 1986 as executive vice president-radio for the broadcasting division. In 1989 he was promoted to executive vice president for the division, with responsibility for Cox television, as well as radio stations. Before joining Cox, Trigony was vice president and general manager of KIKK AM/FM in Houston. Prior to joining that station in 1981, he was with the American Broadcasting Co. for nine years. During that time he was vice president and general manager of WPLJ-FM in New York

and held the same position at KXYZ-AM in Houston. Trigony previously held sales management positions at WLS-AM in Chicago and WABC-AM in New York. Earlier, he was with John Blair & Co. in Chicago and New York as an account executive.

Trigony is on the Television Membership Committee of the National Association of Broadcasters. He has served on the board of directors of the Radio Advertising Bureau and was a member of the Radio Operators Caucus. In 1988 he served on the steering committee of the radio meetings of the National Association of Broadcasters. Trigony is past chairman of both the New York City Radio Broadcasters and the Houston Area Radio Broadcasters.

He has a degree in marketing from Syracuse University. Headquartered in Atlanta, Cox Enterprises is a leading group broadcaster which owns and operates seven television stations and seven FM and five AM radio stations. Cox stations include WHIO TV and AM, WHKO(FM), Dayton, Ohio; WSB TV-AM-FM, Atlanta; WSOC TV-AM-FM, Charlotte, N.C.; WPXI(TV), Pittsburgh; KTVU(TV), San Francisco-Oakland; WKBD(TV), Detroit; WFTV(TV), Orlando, Fla.; WIOD, WGTR(FM), Miami; KFI, KOST(FM), Los Angeles; WCKG(FM) Chicago; and WWRM(FM), Tampa-St. Petersburg, Fla. The division also includes TeleRep, national TV sales representation firm.

Cox Enterprises also is a leader in newspaper publishing, cable television and automobile auctions.

HOUSTON (FEB. 28) PR NEWSWIRE - Energy Service Company Inc. (AMEX: ESV) ("ENSCO"), announced today that a limited partnership of which a subsidiary of ENSCO is the general partner and The Goldman Sachs Group, L.P., Natural Gas Partners, L.P., and Rainwater Inc. are limited partners has purchased additional debt and equity securities of Penrod Drilling Corp. ("Penrod").

The partnership purchased such debt and equity securities at a discount for an aggregate purchase price of approximately $44.4 million, approximately $17.8 million of which was paid by ENSCO. Following this most recent acquisition, the partnership owns approximately 27.1 percent of the debt and approximately 13.6 percent of the equity of Penrod.

The debt acquired by the partnership was issued by Penrod to its bank creditors pursuant to a plan of reorganization in 1988. Penrod is a privately owned contract drilling enterprise headquartered in Dallas.

ENSCO, headquarted in Houston, provides contract drilling and related energy services to the international petroleum industry. ENSCO's common and preferred stocks trade on the American Stock Exchange (ESV).

#90059p0718 02/28/1990 ~PR Newswire

NORWALK, CT (FEB. 28) PR NEWSWIRE - Trans-Lux Corporation (AMEX: TLX) today reported 1989 results that included a revenue increase over the prior year and the company's best earnings results since 1986.

Annual revenues in 1989 were $20.9 million compared to $19 million in 1988. Trans-Lux had net income of $381,000 (26 cents per share) versus a net loss of $1.5 million (95 cents) in the previous year after a write down of approximately $1.7 million after taxes.

"We are very pleased by the company's performance in 1989," said Richard Brandt, chairman of the board and chief executive officer. "Earnings have been impacted for several years by the erosion in our teleprinter business which stemmed from the rapid decline in the worldwide use of telex services. Growth in our other lines of business, particularly LED information displays, more than offset that problem and spurred the earnings improvement. In 1989, we also made two acquisitions that are performing very nicely."

The company's board of directors authorized an increased regular quarterly dividend of 3 cents per share from 2 cents per share, payable April 4, 1990, to common shareholders of record March 16, 1990. Holders of Class B stock will receive 2.7 cents per share. The board also expressed its intent not to declare a stock dividend this year.

Trans-Lux Corporation, has two operating divisions,. The communications division designs, leases, sells and services large-scale LED information displays and credit terminals, facsimile equipment and teleprinters. The entertainment division operates a chain of theaters in the southwest and several other theatrical properties.

#90059p0719 02/28/1990 ~PR Newswire

ORLANDO, FL (FEB. 28) PR NEWSWIRE - Page Avjet officially broke ground on a new Boeing 747 maintenance complex on an eight acre tract of land at Orlando International Airport with the mayor of Orlando and other city, county and Greater Orlando Aviation Authority officials in attendance.

This ground breaking marks the continued growth for Page in the area of maintenance and modification of air transport aircraft at Orlando International Airport since 1977.

Construction of this first phase will add an additional 72,000 square feet of hangar and office space to an existing 350,000 square feet located on the south side of the airport off Tradeport Drive. Future plans call for the addition of another one or two hangers capable of handling Boeing 747 aircraft.

During the ground breaking, John Wyckoff, executive director of the Greater Orlando Aviation Authority, along with Vincent DeLuca, president and chief executive officer of Page Avjet and Mayor Bill Frederick joined together in commenting on the positive growth for Page and the airport as well as the city.

In his remarks at the ceremony, DeLuca said the addition of this new maintenance complex will add to Page's comprehensive third party maintenance program while at the same time add jobs to the community.

Construction of the new maintenance facility will take seven months to complete and will initially employ 250 to 300 skilled workers. Page has already started hiring additional workers to staff the new hangar complex, many of whom were trained for entry level positions in aviation at a school operated by Page.

During the planning and development of this project, Page has ordered new tooling and a nose dock specifically for Boeing 747 aircraft. Page's Sales Division has been busy positioning operators of Boeing 747 aircraft to take advantage of the new facility.

Upon completion of the initial hangar complex, Page anticipates having a signed contract for a section "41" modification which entails the rebuilding of the nose section of the aircraft.

The expansion of Page's Modification and Maintenance Division has been fueled by Federal Aviation Administration (FAA) mandated Airworthiness Directives (ADs) and Aircraft Manufacturer Service Bulletins.

Because of Page's reputation with the airlines for quality in conjunction with its in-depth capabilities in the modification and maintenance of aircraft, Page is looking ahead into the new decade of the nineties with great expectations for continued growth and success.

NEW YORK (FEB. 28) PR NEWSWIRE - Marine Midland Bank (NYSE: MM) said today that the planned purchase by Society Corporation (NASDAQ: SOCI) of adjustable rate preferred stock and a warrant held by Marine would result in a gain by Marine of approximately $20 million in the first quarter of 1990.

Geoffrey A. Thompson, Marine Midland president and chief executive officer said the transaction "represents an opportunity to realize an attractive profit on a warrant position which, reflecting the impact of acquisitions by Society, today is for less than 10 percent of Society's common shares."

Thompson also noted that the transaction reflects the "close and continuing nature of the working relationship between Marine and Society."

The execution of a definitive agreement for the purchase was announced today by Society Corporation, which coincidentally announced a general stock repurchase plan.

VISTA, CA (FEB. 28) PR NEWSWIRE - Predator Systems Corp. today announced the sale of manufacturing, technology and product rights to the world's first 4 MM DAT-Stacker product to Dilog in Anaheim, Calif. Dilog is one of the world leaders in providing data storage subsystems to the DEC marketplace.

Predator Systems Corp. developed the 4 MM DAT-Stacker in anticipation of user demand for inexpensive, automated data-handling equipment. The DAT-Stacker product technology purchased by Dilog provides 10 gigabytes of storage on 8 DAT cassettes in a hand-held magazine. Developed by the engineers of Predator Systems to fit on the front of a 5 1/4-inch footprint drive, the DAT-Stacker is believed to be the smallest adaptation possible for 10 gigabytes on 8 cassettes.

"Potentially, Dilog will lead the computer industry in providing 4 MM DAT-Stacker systems. Dilog has the industry image, distribution channels and marketing, financial resources, and manufacturing capability to cost effectively market DAT-Stacker products in large volume to OEM's Distributors and Endusers," according to Lee H. Elizer of Data Storage Concepts, a leading data storage consulting firm based in Santa Barbara, Calif., and Boulder, Colo.

Predator Systems Corp. is a mass storage development company specializing in data handling systems.

CERRITOS, CA (FEB. 28) PR NEWSWIRE - Cardis Corp. (OTC), a leading distributor of automotive parts, supplies and accessories throughout California, today announced that it has reached a definitive acquisition agreement with Xpert-TUM Acquisition Inc., a Delaware corporation, whereby Cardis will sell all of its interest in TuneUp Masters Inc. The purchase price, including cash and assumption of debt, amounts to approximately $56.0 million.

Under terms of Cardis Second Amended Consolidated Plan of Reorganization, as amended, approved by the United States Bankruptcy Court, Cardis does not expect to realize any proceeds for itself from the sale, but instead will carry out its contractual obligations under the plan for the exclusive benefit of its creditors.

Cardis Corp. acquired TuneUp Masters Inc. in July 1986. Presently, TuneUp Masters operates 243 company-owned service centers in metropolitan areas, primarily in the Western and Southwestern United States.

Cardis recently emerged from its Chapter 11 reorganization on Nov. 27, 1989, pursuant to Order of the United States Bankruptcy Court for the Central District of California confirming Cardis Corporation's Second Amended Consolidation Plan of Reorganization, as amended.

The company currently operated nine warehouse distribution centers and 27 retail stores located throughout California and Arizona.

#90059p0744 02/28/1990 ~PR Newswire

NEWTON, MA (FEB. 28) PR NEWSWIRE - Hori & Bunker, Inc., long recognized internationally for its Japanese language real estate publications, has announced its premier edition of an English language version of the "IREN -- International Real Estate News." The new magazine will be distributed to thousands of real estate brokers in 42 countries including Canada, Australia, Europe, the Pacific Rim, and Latin America. The English IREN will have an editorial focus devoted to issues and topics of interest to real estate buyers investing abroad and will present residential and commercial properties throughout the world.

According to Suzanne Conboy, editor-in-chief of the IREN, "We launched the English edition to assist our clients in gaining wider exposure in marketing properties overseas. Of course, our Japanese language edition of the IREN has been tremendously successful, but as the market has widened overseas and real estate prices have dropped at home, our clients have expressed a growing interest in marketing their properties globally."

Foreigners are attracted to the U.S. real estate market because of its ease of entry and America's financial safety and political stability. A huge, unsatisfied demand for property in their home countries often forces buyers to look overseas when accumulating a portfolio of quality real estate. For the past 11 years, Hori & Bunker has successfully advertised U.S. properties to the lucrative Japanese market through its publications and brokerage network.

"The explosive events overseas have contributed to the demand for U.S. properties. As Hong Kong will be returned to the Chinese in 1997, investors there have been rushing to acquire overseas properties and businesses. We have also seen a surge of inquiries by Europeans who perhaps are wary of a wave of East European immigration," Conboy said.

There is an increased sense of internationalism throughout the world as economic pressures force the relaxation of national boundaries. In particular, the upcoming unification of the European market in 1992 has found international businesses and individuals, particularly the Japanese, flocking to acquire stakes in European before the window of opportunity is shut.

The United States always ranks at the top of any list of places foreigners would like to invest. Yet due to the fragmentary nature of state-by-state realtor boards, foreign investors have a difficult time finding up-to-date information on the availability of American real estate. Likewise U.S. property owners have been stymied by a lack of affordable avenues for advertising abroad. According to Hori & Bunker, "The new English IREN will serve to solve that problem."

FREMONT, CA (FEB. 28) PR NEWSWIRE - Everex Systems Inc. (NASDAQ: EVRX) today announced a signed distribution agreement with Tech Data Corp. (NASDAQ: TECD), a leading distributor of microcomputer products.

The distribution pact covers the entire line of Everex high-performance STEP computers as well as Everex peripheral and networking products.

"Tech Data's system integration capabilities and networking expertise will be a valuable addition to our existing reseller base," said Everex President Steve Hui. "We are pleased to be working with Tech Data and look forward to developing a long, prosperous relationship with them."

Growing rapidly, Tech Data Corp. supports an active customer base of over 18,000 value-added resellers and computer retailers nationwide. "When we polled our sales staff and asked them which vendors we should add to our product listing, Everex was the ten to one favorite over competing brands " said Chuck Casper of Tech Data Corp. Ranked the number one reseller by the Computer Reseller News National Distributors Survey, Tech Data Corp. maintains distribution warehouses in 11 key market areas and utilizes UPS to fulfill orders within 24 hours.

Everex Systems Inc., headquartered in Fremont, is a leading manufacturer of personal computers and peripherals. Founded in 1983, Everex Systems designs, manufactures, distributes and supports a complete family of industry-standard personal computers and peripherals through a worldwide dealer and VAR network.

#90059p0748 02/28/1990 ~PR Newswire
SALT LAKE CITY (FEB. 28) PR NEWSWIRE - GCI Industries, Inc. (NASDAQ: GCI) announced today that it had received a $2.65 per share cash merger offer from Fairways Acquisition, Inc. ("FAI") which is $0.407 per share higher than the $2.243 per share offer from PG Acquisition, Inc. ("PG") previously announced. GCI also announced that its board of directors intends to accept this higher offer subject to PG's right to match as summarized below.

FAI, which had previously offered $2.45 per share for GCI on Feb. 22, 1990 revised its offer upward to $2.65 per share after negotiation with the board of directors of GCI. The offer represents an aggregate purchase price for GCI of approximately $11.8 million. FAI has provided GCI with acceptable financing commitments to complete the cash merger, and notified

GCI that it had satisfactorily completed its due diligence for the proposed transaction.

FAI is a newly formed affiliate of Westgate Publishing Company, Inc., a provider of business information services. New York investor George Rohr is chief executive officer of both FAI and Westgate Publishing Company.

Under the terms of GCI's existing merger agreement with PG, PG has ten (10) days to match the FAI offer, and then FAI will have the right to make two rebids, each of which may be matched by PG. In the event that PG matches the highest and last offer received from FAI, the public shareholders of GCI will receive the amount of the winning bid less certain transaction costs paid by GCI to FAI, amounting to approximately $0.11 per share. Accordingly, should PG match the FAI offer of $2.65 per share, shareholders would net approximately $2.54 per share, an approximate 13 percent increase over the PG offer of $2.243. In the event that PG does not match the offer, shareholders would receive the entire $2.65 per share.

Unless PG matches the FAI offer, it is contemplated that GCI will enter into a new merger agreement with FAI on substantially the same terms as the existing merger agreement with PG except for the higher price. Upon termination of the merger agreement with PG, FAI has agreed to enter into new option agreements with certain controlling shareholders of GCI and purchase 891,663 shares of GCI's stock held by those shareholders at $2.243 per share.

The proposed transaction is subject to approval by GCI's shareholders at its next annual meeting scheduled to be held in May, 1990. While the closing of the merger is intended to be May 31, 1990, there can be no assurance that the proposed transaction will be consummated as there exist substantial contingencies which need to be satisfied by the parties. GCI will provide further information regarding the offer and bidding process as it becomes available.

GCI's Golf Card subsidiary provides its membership, for an annual fee, the opportunity to play two 18-hole rounds of golf, without payment of green fees, at each of over 1,600 golf courses in the United States and abroad and to stay at over 360 country club golf resorts throughout the United States at special rates discounted from the resorts' regular golf packages.

CONTACT: Brad E. Libin, 800-453-4260, or Michael J. Berthelot, 216-566-9000 or 800-453-4260, both of GCI Industries, Inc.

NEW YORK (FEB. 28) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL)

announced today that it has completed a business combination with Management Science Associates, Inc. (MSA), a consulting firm headquartered in Independence, Mo., with a satellite office in San Diego. The merger was effected through an exchange of shares.

Founded in 1974, MSA offers human resources consulting services, primarily to the health care industry, where it is currently retained by more than 600 health care corporations. Its areas of expertise include compensation incentive systems, attitude surveys, executive search, and employee/labor relations. The firm employs 31 people. MSA, which will remain headquartered in Independence, joins the C&B Consulting Group, which is based in St. Louis. James C. Velghe, president and chief executive of MSA will become a member of the Consulting Group's National Planning Committee.

The C&B Consulting Group is a division of Corroon & Black's Benefits & Specialty Sales Group and operates in the areas of health and welfare and retirement plan design, flexible compensation, comprehensive actuarial services, executive compensation, wage and salary administration, organization development, and communications services.

Richard M. Miller, chairman and chief executive officer of Corroon & Black Corporation, said of the merger: "MSA's breadth of human resource expertise, along with their tools and experience in these areas, will substantially enhance the growth opportunities for all C&B Consulting Group offices."

Corroon & Black Corporation, headquartered in New York City, is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry. It has subsidiaries across the United States and affiliated offices throughout the world. The corporation was founded in 1905 in New York City.

UNION, NJ (FEB. 28) PR NEWSWIRE - The Money Store, Inc. today announced the placement of $55 million in 12 percent senior subordinated notes due Dec. 31, 1996. Prudential Bache Capital Funding arranged the placement with a group of institutional lenders.

"This transaction significantly strengthens the company's balance sheet. The subordinate nature of the transaction provides growth capital for our expanding origination business and will enhance our ability to attract senior financing on more attractive terms," said Morton Dear, chief financial officer and president of The Money Store Service Corp.

"The past year was a breakthrough year for The Money Store," he continued. "In addition to this transaction, we sold $175 million worth of second mortgage-backed pass-through securities."

Dear added that the company had its biggest year ever in terms of volume and profits in 1989.

The Money Store, Inc., headquartered in Union, is the parent company of The Money Store, the nation's largest independent home equity lender. Other wholly owned subsidiaries of The Money Store, Inc. include The Money

Store Investment Corp., the largest lender of Small Business Administration guaranteed loans for the past seven years, and Educaid, one of the largest providers of guaranteed student loans. The Money Store was founded in 1967. The three divisions operate more than 70 offices in 30 states.

#90059p0765 02/28/1990 ~PR Newswire

NEW YORK (FEB. 28) PR NEWSWIRE - Canal Capital Corporation (NYSE: COW) today reported a net loss of $734,000, or $0.20 per common share, for the three months ended Jan. 31, 1990, as compared with net income of $679,000, or $0.08 per common share, for the same period in 1989. The 1989 results include income from discontinued operations of $391,000 related to Canal's stockyards operations, which were sold in October 1989.

The 1990 loss resulted from significantly softer than anticipated results from the art and securities trading and investing operations as well as slightly higher than anticipated interest expense, offset to a certain extent by stronger than anticipated results from both the real estate and agribusiness operations.

Revenues from continuing operations, which include gross sales from each of Canal's art, real estate and agribusiness operations as well as the income or loss from the company's securities trading and investing program were $2,441,000 for the first quarter of 1990, as compared with $5,663,000 for the same period in 1989. It should be noted that 1989 excludes revenue from stockyards operations which are presented as discontinued operations.

Canal's securities trading and investing, generated operating income of $14,000 for the first quarter of 1990, as compared to $435,000 for the

same period in 1989. Included are unrealized appreciation of $195,000 and unrealized depreciation of $112,000 in the market value of Canal's marketable securities for the three months ended Jan. 31, 1990 and 1989, respectively.

Raymond French, chairman of the board and CEO of Canal Capital, said that operating results for the first quarter of 1990 reflect in part the seasonal nature of the fine arts business. He noted that Canal's second fiscal quarter is generally a more active period in art markets.

ALLENTOWN, PA (FEB. 28) PR NEWSWIRE - Pennsylvania Power & Light Co. (NYSE: PPL) today increased the quarterly dividend on common stock by 4.2 percent, from 71.5 cents per share to 74.5 cents per share, payable April 1, 1990, to shareowners of record March 9.

The quarterly dividend had been 71.5 cents per share since April 1, 1989.

Charles E. Russoli, PP&L executive vice president and chief financial officer, said "the dividend increase recognizes the importance of compensating investors for the funds they provide for the company. It is a continuation of our policy to have a consistent record of dividend increases. The dividend has been increased every year since 1979. This increase raises the annual dividend rate from $2.86 to $2.98 per common share."

The company in January reported 1989 year-end earnings of $4.05 per common share -- up from $3.73 a year earlier.

The company also declared regular quarterly dividends on its preferred and preference stock payable April 1 to shareowners of record March 9 as

follows:

#90059p0776 02/28/1990 ~PR Newswire

EAST AURORA, NY (FEB. 28) PR NEWSWIRE - Fisher-Price, a division of The Quaker Oats Co. (NYSE: OAT), today announced plans to discontinue manufacturing at its East Aurora facility. The plant closing, which will affect approximately 450 employees, will occur gradually from May 15 to July 1, 1990.

The closing will result in a non-recurring pre-tax charge to Quaker's operating income of approximately $11 million, or eight cents per share on an after-tax basis, and will be taken in the third quarter of fiscal 1990, which ends March 31, 1990.

The decision to halt operations at the East Aurora facility was reached following an extensive review of Fisher-Price's manufacturing capacity. Paul E. Price, president of Fisher-Price, said, "The difficult decision to consolidate operations was made in order to reduce excess capacity in our total plant system and better use our lower cost manufacturing plants. This will help us reduce the cost of our products and improve our competitive position in the marketplace.

"The East Aurora plant was closed because it is the least cost effective and because it is not a fully integrated manufacturing facility that combines fabrication and assembly with plastic molding capabilities. The action is in no way a reflection on East Aurora employees' performance. These employees have performed very well over the years, rising to the challenge to be as cost competitive and efficient as possible within the limits of a non-integrated production facility," Price explained.

The East Aurora closure will result in a down-dized shipping, receiving and

trucking operation emaining in the plant to handle off-site warehousing and satellite packout operations. Products currently produced in the East Aurora plant will be transferred to other U.S.-based manufacturing facilities.

The closure will also result in a time-phased relocation of some of the injection molding presses from the Holland, N.Y., plant to other Fisher-Price locations. This will create space at Holland to take advantage of the economies associated with "at-press" packouts and direct-to-consumer shipments.

The company has arranged for individual counseling and outplacement workshops to assist East Aurora employees during this period and, according to Price, "is offering a competitive severance package comparable to others arranged by its parent company, The Quaker Oats Co."

Fisher-Price will still maintain a staff of over 1,000 employees in areas such as research and development, quality control, and marketing at its headquarters in East Aurora and remains strongly committed to manufacturing in western New York. It continues to operate Holland and Medina plants which together employ approximately 2,000 people.

MINNEAPOLIS (FEB. 28) PR NEWSWIRE - Super Valu Stores Inc., (NYSE: SVU) today announced a capital budget of $380.1 million for the fiscal year beginning Feb. 25, 1990.

"Our continued policy of aggressive investment in our businesses is the clearest evidence of our commitment to the future growth of Super Valu and to our current strategies," said Chairman and CEO Mike Wright. "Each of lines of business will be undertaking important projects to maintain their present vitality and continue their growth."

The company's retail support (wholesale food operations) will receive $194.1 million or 51.08 percent of the total budget, with the majority of that slated for use in the company's 18 retail support centers, including the second phase of development of the company's new distribution center in Kenosha, Wis. The retail support amount also includes $100 million for financing of retail stores to be developed by the company's independent retailers.

An additional $46.5 million, or 12.22 percent of the total capital budget will be slotted for remodeling and construction of company-owned food stores, including a new corporate Cub Foods in Indianapolis.

ShopKo, the company's 98-store discount mass merchandiser, will receive $128.2 million, or 33.73 percent of the capital budget. ShopKo plans call for six new stores, plus one replacement store during the fiscal year and the second Twin Valu supercenter will open in Euclid, Ohio, a suburb of Cleveland in April.

The additional $11.3 million, or 2.97 percent of the capital budget is allocated for home office purposes, including new computer equipment.

LANDOVER, MD (FEB. 28) PR NEWSWIRE - Dart Group Corporation (NASDAQ: DARTA) said it has resolved all matters regarding the SEC's review of the company's possible classification as an investment company by a consent judgment agreement.

Dart Group is not now an investment company and does not intend to become an investment company.

For the fiscal year ended Jan. 31, 1990, Dart Group had sales of over $900 million from over 575 stores and more than 60 million customer transactions. Dart Group currently operates 308 Trak Auto stores, 253 Crown book stores, 21 Shoppers Food Supermarkets, Cabot-Morgan Real Estate an owner of shopping centers, and Dart Group Financial which buys bankers acceptances.

Dart Group will continue to seek acquisitions primarily in the retailing, real estate and marketing areas.

The agreement has no material impact on Dart Group's financial statements, its structure or operations. Dart Group has agreed to comply with applicable regulatory provisions if it were in the future to become an investment company.

Background Information On Dart Group Corporation If Dart Group were an industrial company, it would be on the Fortune 500 list.

Dart's compounded sales growth rate over the last five years was more than 50 percent per year.

ST. LOUIS (FEB. 28) PR NEWSWIRE - The Beech-Nut Nutrition Corporation is donating a supply of baby food to Panama in support of the U.S. State Department relief effort, the St. Louis-based company announced today. The company said that its action is in response to a request from the U.S. State Department for food supplies -- particularly baby food -- to correct temporary shortages in Panama.

Beech-Nut said that it is making available 50 cases of Beech-Nut Stage One Rice Cereal and Stage Two assorted fruit juices, a quantity that had been specified by the State Department. The distribution of the baby food, along with other supplies donated by various sources, will be supervised by State Department and military personnel to insure that it reaches infants who are most in need.

Beech-Nut spokesperson, Harriet Blickenstaff said, "We were happy to respond to this request which helps meet the nutritional needs of many infants."

Beech-Nut Nutrition Corporation is a leading manufacturer of baby food, cereals and juices. Its Stages(R) premium quality baby food is formulated to match a baby's stages of development. Beech-Nut was the first company to eliminate salt and chemically modified starches from baby foods.

Ralston Purina Company (NYSE: RAL) is the world's largest producer of dry

dog and soft moist cat foods; the largest wholesale baker of fresh bakery products in the United States; the world's largest manufacturer of dry cell battery products; and a producer of breakfast cereals, cookies, crackers and snack foods.

NEW YORK (FEB. 28) PR NEWSWIRE - The Evergreen Group of Taipei, Taiwan, has announced that its new international airline will be known as EVA Airways Corporation.

Evergreen's original intention was to use its own name for the fledgling company, but the existence of Evergreen International Aviation Inc., an established U.S. airline operator, has proved to be an insurmountable problem.

Despite lengthy but amicable discussions, it has not been possible to reach any agreement by which the Taiwanese company might incorporate the name "Evergreen" into its new airline.

In briefing the team charged with establishing the new name, Evergreen's Chairman Y.F. Chang stipulated that the new name should reflect membership in the Evergreen Group.

"Throughout Asia and the rest of the world, our name is synonymous with quality of service, reliability and efficiency. These are characteristics for which the new airline will also be famous. Both the shipping line and the airline will share a common business philosophy to serve the customer in the best way possible," he said.

EVA Airways Corporation has 26 aircraft on order comprising eight Boeing 747-400s and four 767-300ER aircraft, plus 14 McDonnell Douglas MD-11s. The first of these are due to enter service in early 1992. Initial flights commencing in spring 1991 will use Boeing 767-300ER aircraft, which EVA Airways intends acquiring under a lease/purchase agreement.

ATLANTA (FEB. 28) PR NEWSWIRE - Cotton States Life and Health Insurance Co. (NASDAQ: CSLH) today reported earnings for the year ended Dec. 31,

1989.

Earnings for the year were $2,506,426, or $.91 per share, compared to 1988 earnings of $2,429,623, or $.88 per share.

Earnings for the fourth quarter were $723,684, or $.26 per share, compared to the fourth quarter of 1988 earnings of $1,104,055, or $.40 per share.

In announcing the results, President and CEO J. Ridley Howard stated the increase in earnings was due to lower amortization of policy acquisition costs.

Howard also announced that the board of directors increased the first quarter dividend from $.06 to $.07 per share, payable April 2 to stockholders of record on March 15.

Cotton States Life and Health Insurance Co. actively markets life insurance in Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina and Tennessee. Its common shares are traded over the counter under the NASDAQ symbol.

INDEPENDENCE, KS (FEB. 28) PR NEWSWIRE - ARCO Pipe Line Company (APL) today announced plans to begin the first phase of its Texas City, Texas, to Cushing, Okla., crude oil pipeline expansion program which, as transportation needs develop, can increase line capacity to 200,000 barrels per day.

APL is a wholly owned subsidiary of Los Angeles-based ARCO (NYSE: ARC). The first phase will cost an estimated $48 million and increase crude oil delivery capability to Cushing from the current nominal rate of 50,000 barrels per day to 120,000 barrels per day. This rate should be reached by the third quarter of 1990.

Expansion of the pipeline is expected to increase the quantity of waterborne foreign crude delivered to the Midcontinent area and improve the liquidity of the Cushing market in the face of declining U.S. crude oil production.

Over 17 million barrels of foreign crude have been transported on the APL system since its start-up in March 1988.

A critical component of the project calls for linking APL's Texas City

marine terminal to the expanded distribution network which currently terminates in Houston. This strategic link, which is expected to be completed in 1990, will give foreign shippers an additional port through which to move crude from the Gulf Coast to points north and enable refiners, crude oil marketers and the trading community to easily split cargoes for multiple delivery locations.

CALABASAS, CA (FEB. 28) PR NEWSWIRE - Lockheed Corporation's (NYSE: LK) board of directors today passed a resolution officially affirming its opposition to the payment of "greenmail". In addition, the board will propose to Lockheed shareholders at the March 29 annual meeting that they adopt an amendment to the corporation's bylaws that would permanently prohibit the practice without shareholder approval.

A greenmail proposal made Monday by Harold Simmons would only ban such payments on stock held less than two years.

"Lockheed has never paid greenmail and does not intend to," said Daniel M. Tellep, chairman and chief executive officer. "We question Mr. Simmons' proposal to ban greenmail only for stock held less than two years since, under his proposal, all of his Lockheed stock would become eligible for greenmail in less than two years."

Tellep said that Lockheed would be communicating with its shareholders shortly on this and other matters regarding Simmons' attempt to take control of Lockheed by a proxy fight.

RESTON, VA (FEB. 28) PR NEWSWIRE - DynCorp, formerly Dynalectron Corporation, announced today that it had signed an agreement under which Program Resources Inc., a Maryland corporation involved in technical support and research for the Department of Health and Human Services as well as other government agencies, would merge with a wholly owned subsidiary of the Reston-based technical services company. PRI's 1989 revenues were approximately $50 million.

Closing is scheduled for late March and is subject to clearance under the Hart-Scott-Rodino Antitrust Improvements Act. The merger consideration was not disclosed.

According to Dan Bannister, DynCorp president and CEO, "The PRI acquisition represents a significant diversification of DynCorp's technical service business." Bannister added that the transaction partially fulfills the company's long-term plan to expand into service areas involving higher technology disciplines.

Under the direction of its experienced local management, PRI will continue to be operated as a wholly owned subsidiary of DynCorp.

Headquartered in Reston, Va., DynCorp is an employee-owned, professional and technical services firm providing a wide range of services to government and commercial clients worldwide.

SHANGHAI, CHINA (FEB. 28) PR NEWSWIRE - Start-up work has been completed for the last of five HF (hydrofluoric acid) Alkylation plants to be built with Phillips Petroleum (NYSE: P) help in the People's Republic of China.

SINOPEC, the Chinese state-owned corporation, chose to license the Phillips Petroleum design to produce high-octane gasoline for domestic use and export at refineries in Shanghai, Tianjin, Zhejiang, Luoyang and Da Lian. Phillips Petroleum provided full design services and start-up support on three of the SINOPEC installations, and provided only design services on the other two. In addition, under terms of the license, SINOPEC itself has engineered and built eight more HF Alkylation units based on the Phillips Petroleum design.

Since 1979, Phillips Petroleum has licensed more than 40 HF Alkylation units on every continent except Antarctica, where there is no refining.

HF Alkylation reacts olefins with paraffin hydrocarbons. The product is used to blend with gasoline to raise its octane without the use of lead additives, which now are outlawed in most countries.

LOWELL, MA (FEB. 28) PR NEWSWIRE - First Eastern Mortgage Corporation today announced it has developed a new program to assist first time homebuyers. The conventional loan program offers reduced application fees and closing costs and a reduced starting interest rate to assist the first time buyer in meeting the monthly payment qualifications with as little as 5 percent down payment on the purchase of the home.

"This is one step towards aggressively opening the market to first time homebuyers," said Peter T. Damore, vice president of marketing. First Eastern Mortgage, a leading volume originator of on-to-four family residential mortgages, has utilized its relationship with selected attorneys to reduce the attorney fee and has matched these cuts by reducing some of the larger fees charged at application and closing.

First Eastern Mortgage Corporation is a wholly owned subsidiary of First Federal Savings Bank of Boston.

MANCHESTER, NH (FEB. 28) PR NEWSWIRE - Public Service of New Hampshire today reported losses per common share of 26 cents for 12 months ended Dec. 31, 1989, compared to earnings of $1.14 per share for the same period in 1988. For the fourth quarter of 1989 the company realized per share earnings of 3 cents, compared to 29 cents during the fourth quarter of 1988.

At the same time, the company indicated that for financial forecast purposes, it is now estimating that Seabrook Station will commence providing service to customers in April 1990. As a result, the company recorded a $7 million expense for both the fourth quarter and 12-month financial results to reflect one more month of pre-operational costs at the plant.

Results for the most recent 12-month period also were affected by factors including: a $51 million expense during the first quarter to recognize the financial impact of a settlement agreement with the Joint Owners of Seabrook Station; a $16 million expense during the second quarter to reflect certain pre-operational expenditures at Seabrook Station; and $13 million in ongoing bankruptcy and reorganization-related expenses.

Total energy sales for the year were up 2.8 percent from the previous year. Energy sales for the fourth quarter were up 2.5 percent compared to the fourth quarter of 1988. This growth is lower than PSNH has experienced in recent years, reflected an economic slowdown within the company's service territory. This slowdown was offset in part by the coldest December ever recorded.

Public Service of New Hampshire filed a voluntary petition for protection under Chapter 11 of the U.S. Bankruptcy Code on Jan. 28, 1988. Since then the company has operated its business as a debtor-in-possession. A reorganization plan proposed by Northeast Utilities is currently before PSNH's creditors and security holders for a confirmation vote. This plan has been endorsed by the State of New Hampshire, the Committee of Unsecured Creditors, the Committee of Equity Security holders, other creditors and PSNH.

TULSA, OK (FEB. 28) PR NEWSWIRE - MPSI Software Inc., a wholly owned subsidiary of MPSI Systems Inc. (NASDAQ: MPSG), announced today that its Loan Advisor software product will be available on IBM's recently announced RISC System/6000 workstations using the AIX 3.0 operating system. The Loan Advisor can also be operated on the IBM RT, PS2, and other compatible UNIX operating systems.

According to Jay Scherr, vice president, business development, MPSI Software Inc., offering the Loan Advisor in the AIX 3.0 operating system environment will give financial institutions the ability to transport the product to different hardware systems. With the AIX 3.0 operating system, the Loan Advisor can be used on a low cost IBM RISC System/6000 workstation or an IBM mainframe computer. "The portability of the Loan Advisor will make it adaptable to virtually all financial institution environments using UNIX," Scherr said.

The Loan Advisor utilizes expert system technology to capture the knowledge and experience of the financial institution's personnel. The

product then compiles the expertise into an easy-to-use software package for the financial institution's organization.

Designed to enhance the decision making process for the extension of consumer credit, the Loan Advisor can be tailored to fit a financial institution's lending environment. The versatility of the product allows users to set up specific parameters and customize the product to the standards set by their institutions.

MPSI also applies advanced technologies such as voice synthesis and telephony in the Loan Advisor. This technology allows the financial institution to process applications electronically over a telephone. The applicant will be prompted by a human voice of the financial institution's choice, not by a computer generated voice.

MPSI Systems Inc. is a leading provider of decision support systems and information services to business and industries around the world. Wholly owned subsidiaries of MPSI Systems Inc. include MPSI Inc., headquartered in Dallas; Execucom Systems Corp., headquartered in Austin, Texas; and MPSI Software Inc., headquartered in Tulsa.

NASHVILLE, TN. (FEB. 28) PR NEWSWIRE - Volunteer Capital Corporation (NYSE: VCC) today reported operating results for the fourth quarter and year ended December 31, 1989.

President Lonnie J. Stout II said the Company posted a net loss of $13,839,000, or $3.43 per share, for the year ended December 31, 1989, as compared to a net loss of $2,752,000, or $.68 per share, recorded in the year ended January 1, 1989. The results for 1989 include a loss provision of $11,230,000 relating to the disposition of the Campany's Mrs. Winner's restaurant operations. Reported sales for 1989 were $58,669,000, as compared to $106,293,000 in 1988.

Volunteer Capital Corporation recorded net income of $1,894,000, or $.47 per share, in the quarter ended December 31, 1989, as compared to a loss of $1,206,000, or $.30 per share, in the quarter ended January 1, 1989. Results for the fourth quarter of 1989 include a reduction of $900,000 in the loss provision originally recorded earlier in the year for the Mrs. Winner's disposition. Reported sales for the fourth quarter of 1989 were $8,391,000, as compared to $26,375,000 in the fourth quarter of 1988.

The 1989 results also include income tax benefits of $588,000 and an extraordinary gain of $589,000 from the early retirement of a portion of

the Company's convertible debentures, both recorded in the fourth quarter.

The Company's Wendy's division reported operating income of $2,103,000 for the year ended December 31, 1989 as compared to operating income of $2,307,000 reported during 1988. Average store sales for the division were $701,000 for 1989, up 5.9 percent from $662,000 in the year ended January 1, 1989.

The Wendy's division reported operating income of $454,000 during the fourth quarter of 1989, as compared to operating income of $502,000 reported for the fourth quarter of 1988. Average store sales for the division were $173,000 for the fourth quarter of 1989, up 3.0 percent from $168,000 in the fourth quarter of 1988.

Volunteer Capital Corporation operates 50 Wendy's Old Fashioned Hamburgers restaurants in four states.

The common stock of Volunteer Capital Corporation is traded on the New York Stock Exchange (NYSE: VCC).

#90059p0846 02/28/1990 ~PR Newswire

MIAMI (FEB. 28) PR NEWSWIRE - The Deltona Corporation (NYSE: DLT) today reported that its net income for 1989 rose 40 percent to $5,031,000 compared to its 1988 net income of $3,580,000. Revenues for the year increased slightly to $66,879,000 from 1988 levels of $66,539,000. Included in 1989 and 1988 results were extraordinary items of $1,929,000 and $1,392,000, respectively, representing a reduction of income taxes arising from the carryforward of prior years' operating losses. After giving effect to the cumulative dividends on preferred stock of $1,315,000 and $2,855,000 for 1989 and 1988, respectively, income applicable to common stock rose to $3,716,000 or $.67 per share in 1989 from $725,000 or $.13 per share in 1988.

For the fourth quarter of 1989, the company reported net income of $3,864,000 versus the prior years' quarterly net income of $1,158,000. The 234 percent increase in quarterly net income was achieved despite a 23 percent drop in quarterly revenues from $22,446,000 for the 1988 fourth quarter to $17,246,000 for the 1989 fourth quarter primarily because the 1989 fourth quarter results included a $1,642,000 after tax gain from the disposition of the company's utility subsidiaries. Included in the 1989 and 1988 fourth quarter results were extraordinary items of $1,490,000 and $480,000, respectively, representing reductions of income taxes arising from the carryforward of prior years' operating losses. Earnings per share were $.70 for the 1989 fourth quarter. Net income per share applicable to

common stock was $.07 for the 1988 fourth quarter after giving effect to a $778,000 cumulative dividend on preferred stock previously outstanding.

Income from continuing operations was $528,000 for 1989, compared to $783,000 income from continuing operations for 1988. Income from discontinued operations contributed $2,574,000 to 1989 results, including a $1,670,000 gain on the disposition of the utility subsidiaries. For 1988, income from discontinued operations was $1,405,000. For the fourth quarter of 1989, income from continuing operations was $732,000 compared to $456,000 for the prior year's quarter. For the fourth quarters of 1989 and 1988, income from discontinued operations was $1,642,000, including the previously mentioned gain, and $222,000, respectively.

Deltona also announced an agreement with Empire of Carolina, its 36 percent shareholder. The major terms of the agreement are: The appointment of Maurice A. Halperin, chairman of the board of Empire, as co-chairman of Deltona's board, with Edgar M. Moore, the present chairman, being elected as the other co-chairman; the creation of a new board negotiating committee comprised of Maurice Halperin, as chairman and Barry S. Halperin, president of Empire, and George Flagg, president of National Guardian Corp., to sell the company, replacing Deltona's special committee which, among other things, had previously attempted to sell the company; the election immediately of two additional Empire nominees to Deltona's board, Howard Weiss and Dr. Harold Dubner, giving Empire four of the 10 board seats; the designation of the present board members and Weiss and Dr. Dubner as the board's slate for election at the annual meeting on May 3, 1990; and Empire's commitment to vote its shares for the board slate. Co-chairmen Halperin and Moore stated that they were very pleased with this resolution. Halperin said the new negotiating committee would begin trying to sell the company immediately.

TAMPA, FL. (FEB. 28) PR NEWSWIRE - One of the leading commercial bank holding companies in the Mid-West has become a subscriber for Invest Financial Corporation.

Invest Executive Vice President D. Mark Olson announced that First Interstate of Iowa (NASDAQ: FIIA), the $1.2 billion asset, 13-bank holding company with headquarters in Des Moines, Iowa will open Invest centers in four First Interstate banks early this year.

"This is a significant endorsement of growth for Invest," Olson said. "First Interstate of Iowa is one of the emerging retail banking institutions in the Mid-West, and it is a franchisee of the First

Interstate Bancorp (NYSE: I)," he added. "We are proud to be associated with First Interstate of Iowa."

First Interstate of Iowa Chairman and CEO Oliver H. Hagen said Invest centers would be established in: Des Moines, at the First Interstate Bank of Des Moines; in Urbandale, Iowa at the First Interstate Bank of Urbandale; in Mason City, Iowa at the First Interstate Bank of Mason City; and, in Fort Dodge, Iowa at the First Interstate of Fort Dodge.

"We are pleased to introduce the high quality Invest program to our banks " Hagen said. "Invest Financial Corporation was the original provider of investing products to customers of banks and has a long record of quality service to customers," Hagen said.

Through Invest Financial Corporation, customers can purchase mutual funds, unit investment trusts, and other investments as well as insurance annuities within the bank. Invest operates over 560 centers within banking institutions in 40 states. Invest, headquartered in Tampa, Fla., is a member of NASD/SIPC and a subsidiary of Kemper Financial Companies, Inc., of Chicago.

ORLANDO, FL (FEB. 28) PR NEWSWIRE - Page Avjet President and Chief Executive Officer, Vincent DeLuca, announced today during a joint press conference with Fort Worth Mayor Bob Bolen, the signing of a contract to develop and construct a major air transport category maintenance complex located on Meacham Field in Fort Worth, Texas.

Construction of the first phase, which could begin within six to eight weeks, will entail the development of a 72,000 square foot hangar and office complex capable of housing Boeing 747 series aircraft. This facility will be the first of a three hangar maintenance complex on a 21 acre tract of land and is designed to handle the growing demand for third party maintenance by operators of aging aircraft.

Page Avjet's reputation with the airlines for quality in conjunction with its in-depth capabilities in the maintenance and modification of aircraft have fueled the expansion of its Aircraft Modification and Maintenance Division, based in Orlando, Fla.

The Fort Worth complex will offer maintenance programs entailing extensive routine inspections and state-of-the-art non-destructive testing (NDT) on lap joints and air frame structures. Additionally, Page will be offering operators of Boeing 747 aircraft a section "41" modification which is the

rebuilding of the nose section.

Other modifications available for most aircraft models will include upgrading the avionics in the cockpit to the more technically advanced systems like Electronic Flight Instrumentation Systems, (EFIS), Terrain Collision Avoidance Systems (TCAS) and windshear detection.

Page will also be offering the modification of various aircraft with long-range fuel systems, allowing them to meet long-range mission requirements.

A complete menu of modification and maintenance programs, including the painting of aircraft, will be readily available in the new Forth Worth complex.

In making the announcement, DeLuca said, "Page is bringing to the city of Fort Worth new business, jobs and money not already here. These are new dollars not existing dollars."

Page Avjet is anxious to get the new expansion plans in Fort Worth underway, as the need for additional space is in great demand. The growing need for services provided by our Modification and Maintenance Division will ensure positive long-range growth and employment for the community.

BATAVIA, NY (MARCH 1) PR NEWSWIRE - Graham Corporation (AMEX: GHM) today reported results for the fourth quarter ended Dec. 31, 1989 and for the full calendar year 1989.

Sales for the 1989 fourth quarter were $21,649,000 producing net income for the three months of $1,846,000, or $1.86 per share.

Sales for the 12 months ended Dec. 31, 1989 were $67,784,000 producing net income for the 1989 year of $4,204,000 or $4.28 per share. Net income includes a gain of $757,000 for the sale of real estate in the United Kingdom and a gain of $498,000 from the sale of real estate in the United States.

Sales for the 1988 fourth quarter were $16,071,000 producing net income for the three months of $880,000 or $.89 per share.

Sales for the 12 months ended Dec. 31, 1988 were $62,350,000 producing a net income for the 1988 year of $866,000 or $.88 per share. The 1988, 12 month result includes charges of $1,386,000 for discontinued operations and disposal of Graham Hobal, Ltd., and a gain of $347,000 reflecting adoption of Financial Accounting Standard No. 96: "Accounting for Income Taxes."

New orders for the three months ended Dec. 31, 1989 were $20,529,000 compared to $22,800,000 for the three months ended Sept. 30, 1989, and to $18,836,000 for the three months ended Dec. 31, 1988.

New orders for the year 1989 were $82,849,000 compared to $65,075,000 for the year 1988.

Consolidated backlog on Dec. 31, 1989 was $40,657,000 compared to $41,603,000 on Sept. 30, 1989 and to $27,414,000 on Dec. 31, 1988.

Graham designs and manufactures vacuum and heat transfer equipment for the process industries. The principal markets for Graham's equipment are the chemical, petrochemical, petroleum refining and electric power generating industries, including co-generation and geothermal plants. Other process industry markets served include the food and beverage industry, shipbuilding, steel mills and paper mills.

NEW MILFORD, NJ (FEB. 28) PR NEWSWIRE - Polifly Financial Corporation (NASDAQ: PFLY), the holding company for Polifly Savings and Loan Association, reported today that the Office of Thrift Supervision (OTS) has deemed the association not to be an "eligible savings association" under the recently enacted Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). The corporation stated that the consequences of the OTS determination, which the corporation is contesting is that Polifly may no longer include supervisory goodwill in its calculation of regulatory capital. The exclusion of supervisory goodwill of $8.9 million from the capital calculation will, unless certain actions which must be approved by the OTS are taken, result in the association not meeting its minimum risk-based regulatory capital requirement by approximately $2.5 million and may result in further sanctions being imposed by the OTS. Despite the exclusion of the supervisory goodwill, the association continues to meet its tangible and core capital requirements.

The association is seeking OTS approval of certain transactions that would increase the ratio of the association's regulatory capital to total assets and cause it to meet its minimum capital requirement. There can be assurance, however, that the OTS will approve such transactions.

The board of directors also adopted today a resolution that the association will promptly enter into a consent agreement with the OTS which will substantially restrict certain activities of the association.

SHELTON, CT (FEB. 28) PR NEWSWIRE - Data Switch Corporation (NASDAQ:

DASW) said today that its previously announced voluntary exchange offer for the company's 8.25 percent convertible subordinated debentures, which was scheduled to end today, has been extended for two additional days. The offer will now expire at 5 p.m. Friday, Mar. 2, 1990.

Under the terms of the exchange offer, for each $1,000 principal amount of existing debentures, a holder will receive a new $700 principal amount of 15 percent senior subordinated notes due Feb. 1, 2000, plus 56 warrants, each to purchase a share of the company's common stock at $5 per share. The warrants are exercisable after the first year of issuance and expire Dec. 31, 1995, subject to extension.

There is a total of $33,015,000 principal amount of debentures currently outstanding. The company said that as of 4 p.m. Wednesday, Feb. 28, 1990, $10.8 million face amount of the old debentures had been tendered, constituting 32.7 percent of the $33,015,000 outstanding, and that, in addition, holders of $2.5 million of the old debentures had consented to the modifications to the existing indenture.

Rudolph G. Morin, executive vice president and chief financial officer, said, "We intend to close this offer without further amendment or extension."

Data Switch is a leading manufacturer of management and control systems for the data processing and data communications markets.

#90059p0879 02/28/1990 ~PR Newswire

ELGIN, IL (MARCH 1) PR NEWSWIRE - Jacob Saliba, chairman of Katy Industries, Inc. (NYSE: KT), announced that Katy has completed the sale of 25 percent of its wholly owned Schon & Cie AG German subsidiary.

The sale of Schon stock was accomplished by means of an initial public offering of Schon shares in Germany, which commenced on Feb. 16, 1990 with Commerzbank AG acting as lead manager of the offering.

Based on the final offering price for the Schon shares and transaction expenses, Katy realized net proceeds of about 37,000,000 DM which, at current exchange rates, resulted in a gain to Katy of approximately $13,000,000 DM which, at current exchange rates, resulted in a gain to Katy of approximately $13,000,000 after taxes. As a result of very favorable market conditions, both the net proceeds and gain exceeded Katy's previous estimates, which were announced Jan. 31, 1990.

Saliba also reported that a final disposition of the previously announced contractual dispute between Fulton Iron Works Co., a subsidiary of Katy, and Societe des Sucreries et Distilleries d'Egypte has been roached on all issues and a settlement was effected today. Saliba commented that Katy had decided to resolve the dispute at this time because of the prospect of a long and expensive trial and the uncertainty as to the outcome of the proceeding.

Based on the settlement terms and after giving effect to previously established reserves, Katy's earlier reported net income declined $1,307,000, or $.20 per share ($.14 on a fully diluted basis), for the three months and the year ended Dec. 31, 1989. As a result, Saliba today reported revised net income of $1,927,000, or $.23 per share ($.20 on a fully diluted basis), for the three months ended Dec. 31, 1989, compared with net income of $4,220,000, or $.60 per share ($.44 on a fully diluted basis), for the same period last year. For the year ended Dec. 31, 1989, the revised net income was $8,749,000, or $1.08 per share ($.91 on a fully diluted basis), compared to net income of $95,160,000, or $14.95 per share ($9.85 on a fully diluted basis), for 1988. The results for the year 1988 included a gain of $80,184,000 or $12.86 per share ($8.30 on a fully diluted basis), from the sale of the Missouri- Kansas-Texas Railroad.

For the fourth quarter of 1989, the company reported revised net income from continuing operations of $2,129,000, or $.26 per share, compared to $4,663,000, or $.67 per share, for the comparable period in 1988. For the year 1989, revised net income from continuing operations was $12,897,000, or $1.73 per share, compared to $19,056,000, or $2.74 per share, for 1988.

Katy Industries, Inc., with consolidated sales approaching $200,000,000, is a major diversified corporation with interests in industrial machinery, industrial components, consumer products and energy resources. Katy common and preferred shares (Class B) are listed on the New York Stock Exchange.

CONTACT: Jacob Saliba, Katy chairman, in Boston, 617-266-4100; William H. Murphy, Katy president, in Elgin, 312-379-1121, or J. Russell Jones, treasurer, in Elgin, 312-379-1121

#90059p0880 02/28/1990 ~PR Newswire

DALLAS (MARCH 1) PR NEWSWIRE - Interphase Corp. (NASDAQ/NMS: INPH) today announced revenues of $5,259,496 for the first quarter of fiscal 1990. Revenues were up 21 percent compared to $4,333,940 for the first quarter of fiscal 1989.

The company reported a loss of $920,236 or 28 cents per share compared to net income of $28,699 or $0.01 per share for the same period a year ago. The loss was primarily due to expenses of approximately $827,000 relating

to its majority owned start up company, OMNI Solutions, and lower than expected revenues for the first fiscal quarter.

Michael E. Cope, president, commented, "We anticipated a small loss due to OMNI expenses, but ending about $1 million below planned revenues for the quarter came as a surprise. That was mostly caused by some customers pushing orders into the second quarter, particularly a couple of large ones. On the bright side, the second quarter looks strong, with the largest backlog ever at this point in the quarter."

Interphase Corp. is a leading manufacturer of high performance disk, tape and networking controllers and subsystems for the open systems VMEbus, multibus and EISA markets, and the Sun Microsystems aftermarket. The company is located at 13800 Senlac, Dallas, Texas 75234.

#90059p0882 02/28/1990 ~PR Newswire

COSTA MESA, CA (MARCH 1) PR NEWSWIRE - Reflecting a high level of research and development expenditures, Viratek Inc. (NASDAQ: VIRA), today reported a loss for 1989.

The pharmaceutical research and development company said research spending totaled $11.2 million in the fiscal year ended Nov. 30, 1989, up from $8.9 million in 1988.

As a result, the company registered a loss of $17.1 million, or $1.85 a share, compared to a loss of $6.3 million, or 73 cents a share, in 1988.

Revenues of $2.6 million compared to revenues of $2.3 million in fiscal 1988. Viratek receives royalties on the sale of Virazole (ribavirin) by SPI Pharmaceuticals Inc., for the aerosolized treatment of infants and young children hospitalized with severe lower respiratory tract infection caused by respiratory syncytial virus (RSV). While RSV treatments have been increasing, hospitals, in a number of instances, used existing investories.

The company said it planned to significantly curtail research and development spending in 1990 to bring research costs more in line with revenues.

The company said a multicenter HIV trial with ribavirin in Canada was recently terminated as the result of the Canadian government's decision to make AZT available to the study's patient population. In addition, the company recently withdrew a treatment IND application with the FDA for ribavirin against HIV.

The company said it planned to narrow the focus of its research and development programs in the future.

There was a fourth quarter net loss of $10.2 million, or $1.11 per share, compared to a gain of $420,000, or 5 cents a share, in the fourth quarter of 1988. Research and development spending totaled $2.6 million in the quarter. Revenues were $1.7 million compared to revenues of $2.1 million in last year's fourth quarter.
